Table 1: Main observation data grid. Columns include time (01-24), pressure (local/sea level), temperature, dew point, relative humidity, wind direction/speed, precipitation, visibility, cloud amount, cloud type/direction/height, weather, pressure change, and pressure surface height. Includes handwritten notes on the right side.

Table 2: Special observation data grid. Columns include time (03, 09, 15, 21), wet bulb temperature, vapor pressure, 6-hour precipitation, ground temperature, snow depth, and 6-hour weather phenomena. Includes a note '記事 -- = °'.

Table 3: Summary data grid. Columns include daily maximum/minimum temperature, relative humidity, wind speed/direction, precipitation, solar radiation, evaporation, horizontal radiation, snow depth, weather, and precipitation intensity.
