

LUBBOCK, July 10 -- More than 2,000 items of reference material from 19 foreign countries have been placed by the International Center for Arid and Semi-Arid Land Studies (ICASALS) in the Texas Tech Library for public use.

Top officials of the Center and the Library Wednesday announced plans to house the materials in the Library to make them more accessible to persons interested in aridity.

The materials were sent to ICASALS as result of an exchange program established with the foreign countries which also are conducting research and study in the problems of arid and semi-arid lands.

The material includes newsletters, research reports, article reprints, journals, magazines, statistical data and maps.

Countries represented include Argentina, Australia, Canada, Colombia, France, India, Iran, Israel, Kuwait, Mexico, The Netherlands, Pakistan, the Republic of South Africa, Senegal, Sudan, the United Arab Republic, the Soviet Union, Venezuela, and the United States.

The Tech Library, which now contains almost a million volumes, will catalog and house the recently received material.

Bibliographer Gerald H. Sandy of the Tech Library termed the materials invaluable to researchers and students of arid lands and their problems.

He said the public is welcome to use the reference materials.

LUBBOCK, July 10 -- Twenty-eight Texas Tech students will leave Laredo July 17 for San Luis Potosi where they will participate in the university's annual Field Course in Mexico under direction of Dr. Harley D. Oberhelman, chairman of the Department of Classical and Romance Languages.

Students, all from the junior, senior or graduate level, will visit Guadalajara and Mexico City at the end of the six-week session.

In addition to class work, students will have opportunities to attend operas, concerts, plays, lectures, exhibitions and bull fights.

Dr. Oberhelman will conduct part of the course which emphasizes Mexican culture and history as well as oral proficiency in Spanish. Visiting lecturers from the University of San Luis Potosi also will participate.

Students will live with Mexican families and speak only Spanish for the six-week period. The summer field course in Mexico was initiated for Tech students of Spanish in 1934 and is the oldest continuing program of its kind offered by a U.S. university.

LUBBOCK, July 10 -- Twenty teachers--some from high schools as far away as Oregon, Illinois and New York--will arrive Sunday (July 14) for a news photo workshop at Texas Tech.

Journalism Chairman W. E. Garets said it was the only photo workshop in the nation supported by the Newspaper Fund, Inc. This is Tech's fourth year to host it.

Prof. Ralph Sellmeyer of Tech is the director of the two week institute. Other members of the faculty will be Darrell Thomas, fulltime professional photographer for student publications, and Milton Adams, student assistant.

Garets pointed out that the teachers, coming from 9 states, will pay their transportation costs to and from Tech, but all other expenses while they are here will be borne by the Newspaper Fund.

Paul Swensson, Princeton, N. J., executive director of the fund, will be on campus July 25 and 26 for consultation, conferences and seminars and will speak at a noon luncheon Friday, July 26.

The visiting teachers will live in Coleman Hall. Registration will be held Monday morning in the Journalism Building.

Classes, demonstrations, and laboratory instruction are scheduled eight hours a day, five and a half days a week for the two weeks. The course gives teachers two graduate credits toward degrees.

LUBBOCK, July 10 -- Final examinations for the first term of the summer session at Texas Technological College will be given Thursday and Friday (July 11-12).

Students without room reservations for the second term must vacate residence hall rooms by 10 a.m. Saturday.

Registration for the second term will be held Monday afternoon and Tuesday (July 15 and 16) with classes scheduled to begin at 7:20 a.m. Wednesday, July 17.

The second term ends with final examinations Aug. 19-20 and summer commencement Aug. 24.

LUBBOCK, July 11 -- The Texas and West Texas Pork-Ettes met jointly at Texas Tech Thursday (July 11) to make plans to help their husbands promote the swine industry.

Mrs. Roy (Kay) Poage of Slaton, president of the West Texas organization, said the Pork-Ettes are an auxiliary to the West Texas Pork Producers Association. Both Mr. and Mrs. Roy Poage are ex-students of Texas Tech.

The purposes of the Pork-Ettes at the local, state and national levels are to support the pork industry, to protect and improve the image of pork and to promote increased consumption of pork products," Mrs. Poage said.

The Texas Pork-Ettes organized June 8 of this year and the West Texas group was formed June 25. Approximately 20 women attended the joint meeting here, with officers of both groups in attendance.

Mrs. John B. Fair of Gunter is president of the state Pork-Ettes; Mrs. T. Euel Liner of Lubbock, vice president; and Mrs. Sam Rabb of Llano, secretary-treasurer. Officers of the West Texas group, in addition to Mrs. Poage, president, are Mrs. David Hughes of Lamesa, vice president for membership; Mrs. Herman Lorenz of Lubbock, vice president in charge of projects; and Mrs. Leland Tribble of Lubbock, secretary-treasurer.

A West Texas pork queen will be chosen in September, with regional winners to compete for the title of Miss Pork of Texas in October at the State Fair in Dallas.

Persons interested in entering the contests may get in touch with Mrs. Liner of Lubbock for additional information.

The Pork-Ettes attended a luncheon at noon Thursday at Tech, then joined their husbands attending the annual Swine Short Course at a dinner Thursday night at the Johnson House Restaurant.

This release distributed 7-11-68
to Lubbock news media.

LUBBOCK, July 11 -- An animal nutrition specialist from the University of Illinois told the 16th annual Swine Short Course at Texas Tech Thursday (July 11) he sees a continued trend toward the confinement principle in the production of hogs.

"It looks like 'confinement' will be the common thing," Dr. A. H. Jensen, animal science professor at the University of Illinois, told the approximately 300 producers.

"The industry as a whole is moving in this direction," he said. "Fewer people are producing more hogs.

"In Illinois, and I'm sure it's true in most of the Midwest, there are 50 per cent fewer farms now producing hogs than 20 years ago, but the total number of swine has not decreased. I am reasonably sure, too, that the same trend prevails in West Texas."

He said he believed the pork industry is following the poultry industry which several years ago moved toward the use of big confinement units.

"In general," Prof. Jensen said, "the confinement method requires less labor and permits the use of more mechanized equipment and better feeding and care supervision," he said.

Dr. Jensen spoke on the role of management and housing in the swine industry Thursday.

(MORE)

Swine Short Course --- add one

"In many respects," Dr. Jensen said, "the swine industry in the Midwest differs from that in West Texas, but I believe the basic principles of management and housing are applicable to both areas.

"In regard to West Texas, I am most impressed by the young men in the group here in the hog business and I think this speaks very favorably for the future.

"Based on what I saw at the short course, the producers of this area are producing a quality hog which is essential for a bright future for the pork industry."

The short course is sponsored jointly by the Texas Pork Producers Association and the Animal Husbandry Department of Texas Tech.

It opened with a market hog show and judging contest in the Livestock Pavilion. Winners will be named after the 13 animals entered are slaughtered and processed Friday.

Professor L. F. Tribble of animal husbandry at Tech, short course director, will open the Friday morning program with a discussion of "Swine Feeding."

Other speakers include Dr. Jensen again on "Brood Sow Management, Housing and Breeding," and Dr. Don Brothers, Paducah swine producer.

LUBBOCK, July 11 -- A Jordanian graduate student at Texas Tech who twice has lost his home to the Israelis is looking forward to returning to his native land in about a year to take over the management and administration departments of the University of Jordan.

Thirty-six-year-old Kamel Moghrabi hopes to complete the requirements for a doctor of business administration degree from Tech next year.

He already has a doctor of philosophy degree from Texas A&M, a Master of Business Administration in management from Bradley and a Bachelor of Science from Marquette.

"My home is situated in a portion of Jordan occupied by the Israelis in the June war," Moghrabi said. "It was the second time for me to lose my home to them. I have hopes that it will be returned."

Dr. Moghrabi said he hopes to see the Arabs united one day but he said he tried not to let international politics interfere with his dedication and devotion to his studies in the United States.

He does not think there likely will be international events that will prevent his return to teach at the University of Jordan at Amman.

"They need management people," Moghrabi said of his university which has granted him a leave of absence to study in the United States. "And just as soon as I finish here I hope to go back and continue on the job."

(MORE)

Moghrabi -- add one

The visiting Jordanian is one of eight students from Jordan in Tech's School of Business Administration which boasts a large international student group.

He had high praise for Tech's School of Business, particularly the administration and management fields.

"With my experience as a foreign student in several United States institutions, I can say that I have found the faculty, students and administration at Tech exceptionally courteous and most pleasant to work with."

While attending Tech, he has taught Principles of Management to both graduates and undergraduates as a part time instructor.

He also had teaching duties at Marquette, the University of Georgia, Louisiana State and Texas A&M. He has spent 12 years in the U.S.

Mrs. Moghrabi is a sophomore at Tech, studying toward a major in English. They live at 2902 3rd Pl, Apt. C-27.

LUBBOCK, July 12 -- Jeanne Williams, widely known Southwestern author has named the Southwest Collection at Texas Tech the repository for her personal papers, according to announcement Friday (July 12) by Sylvan Dunn, director of the Collection.

"The latest shipment of materials from Mrs. Williams," Dunn said, "was received this week and they are being prepared for cataloging and storing."

The periodic arrivals include author's manuscripts, galleys of original manuscripts, carbon copies and notes and correspondence.

"Her selection of the Southwest Collection as a repository," Dunn said, "means that the Collection will receive materials in the years ahead and in time will gather professional correspondence with publishers, reviews and other valuable documents."

One of her latest novels is "Coyote Winter" which won the University of Oklahoma Professional Writing Award in 1966.

An adult novel, "Beasts With Music," with a Texas setting was published last fall. A supplementary history collection, "True Tales of Kansas," is in the process of being published this summer, and a young adult novel, "Oil Patch Partners," will appear this fall. It is about a "poor boy" drilling operation in the Permian Basin, she said.

Another adult novel, "Sons of the City Fathers," is in the hands of her agent. She has published approximately 50 shorter pieces, including fiction and articles.

Some of her other works include "To Buy a Dream" "Promise of Tomorrow," "The Horsetalker," which won the Western Writers of America Spur Award for Best Juvenile Work in 1957, "Tame the Wild Stallion" which won the Texas Institute of Letters Juvenile Award in 1957 and "Oh Susanna."

Many of her books have been successful sellers in foreign languages.

(MORE)

Several of her works are listed for supplementary reading in California schools and some are selections of various state reading circles; but none have been recognized in Texas even though a half-dozen have Texas settings.

"The books sell especially well in New York," Mrs. Williams said, "and most of my fan letters are from New York girls of junior high age. Some think I am a dark, handsome man and it must be a shock to learn I'm not."

The author was born in Elkhart, Kan., grew up in Kansas, Oklahoma and Missouri, and studied at the University of Oklahoma School of Creative Writing.

Except for three years in Germany, she has spent most of her adult life in Texas, recently in Abilene. A son, Mike, is a student at the University of Texas in El Paso and a daughter, Kristin, is an elementary school student at Sandia Park, N. M.

While a resident of Abilene she was active in the Unitarian Fellowship, served as public relations chairman of the Abilene Community Action Program, was a director of the Women in Community Service organization and chairman of the Literature Committee of the Abilene Fine Arts Festival.

She has conducted numerous writing workshops at the University of Oklahoma, Hardin-Simmons University and the YWCA.

LUBBOCK, July 22 -- A Texas Tech ex-student with a successful career in city government and civil engineering has begun to return interesting and valuable documents to the Southwest Collection at Texas Tech for public use.

In addition to his personal papers former City Manager Roy L. Dunlap of Killeen has placed numerous records pertaining to Killeen municipal affairs in the Collection.

"The materials donated by Dunlap not only mirror his life since 1951," Collection Director Sylvan Dunn said, "but also concurrently picture the development of the town of Killeen. Papers now on file include Dunlap's personal papers and Killeen municipal records dating back to 1954."

Economics Prof. Vernon Clover said the records will be of special value to students in Business Administration, particularly those with an interest in and majoring in public administration.

"Students whose interests lie in municipal government in the fields of purchasing, budgeting, finance, personnel research and management will find the Dunlap and Killeen materials a productive source for research and study," Dr. Clover said.

(more)

Dunlap's Donation . . . add one

The Killeen records consist of City Council agendas and minutes, City Planning Commission correspondence, minutes, maps and correspondence involving the city manager's office.

Also available for inspection and study are pictures of Killeen dating back to 1964 and several complete scrapbooks containing newspaper clippings pertaining to Dunlap and the city of Killeen since 1921.

The former city manager has included in his donation papers relating to the Snyder Rotary Club during the time of his presidency and the Texas City Managers' Association.

Dunlap graduated from Texas Tech in 1949 with a Bachelor of Science degree in civil engineering. Eight months later he was employed by the City of Lubbock and within three and a half years he became assistant design engineer.

During the next three years he worked in Snyder as city engineer and in Hamlin as city manager. He returned to Snyder in 1955 as city manager, remaining there eight years. In 1962 he became city manager of Killeen, a position he held until he was called to active duty in May 1968 to become commanding officer of the United States Naval Mobile Construction Battalion 22.

Dunlap was born in Canyon and graduated from Crosbyton High School.

LUBBOCK, July 22 -- Mrs. Thelma Whigham, assistant director of Texas Tech's Home Economics Instructional Materials Center, has been selected to participate in a national institute at Colorado State University beginning July 29.

Some 100 vocational educators from 47 states were named to study "Occupational Analysis as a Basis for Curriculum Development" at the five-day institute sponsored by a grant from the U. S. Office of Education.

Mrs. Whigham, a native of Dimmitt, holds BS and MS degrees in Home Economics from Tech. A member of the Tech staff since 1963, she joined the Materials Center when it was organized last year.

LUBBOCK, July 22 -- More than 500 students who have indicated they plan to enroll in Texas Tech this fall as new students will attend the New-Student Academic Advisement, Orientation and Early Registration Conference Monday and Tuesday (July 29-30).

More than 75 per cent will bring along one or both parents for the two-day conference, one of seven to be held at Tech this summer for new students.

"The young visitors to the campus," said Registrar James A. Watkins, "will be able to complete their registration up to paying fees and will be permitted to do that later this summer so that all they will have to do this fall is pick up their class tickets and start to school."

"During their visit here, we take the students through all the procedures, accompany them on visits to the schools of their choice, give them counseling, and in other ways acquaint them with life at Texas Tech.

"They and their parents will be housed in air-conditioned Coleman Hall for the early registration conferences."

Each student is assured individual attention in such matters as academic advisement, orientation and registration.

Only students who completed their admission are invited to participate in one of the seven conferences. Documents required include application, health data blank, high school transcript and the College Board S. A. T. scores, Watkins said. Students invited to attend one of the seven conferences may choose the one he prefers if it is not already filled.

Other conferences are scheduled for Aug. 1-2, Aug. 5-6, Aug. 8-9, Aug. 12-13, Aug. 15-16, and Aug. 19-20.

The visiting students and their parents will check into the residence hall and pick up general catalogs from 10 a. m. to 12 noon on the first day of the conferences. Academic advisement with major advisors will start at 1 p. m. on the first day.

(more)

Academic Advisement . . . add one

Students and parents will meet at 7 p. m. on the first day of the conference for orientation in student life and student services and activities in the Student Union Ballroom. The evening orientation program will be directed by Dean of Student Life James G. Allen.

The second day will be devoted to complete academic advisement and registration. Students will have their identification photos made and may purchase textbooks for the fall semester if they desire.

Tech Bookstore Manager Conner Cole said students would be permitted to place books in lay-away if they wished.

Dean Allen said that at the evening orientation program the parents would meet with students for the first hour.

During the second hour, parents will be told of the Texas Tech Development program with members of Alpha Phi Omega serving as hosts. The Lubbock Chamber of Commerce also will have a representative at the meeting to tell visitors about Lubbock and its plans for the future.

On the second morning, parents will be given guided tours of the campus with members of the Saddle Tramps, student spirit organization, serving as guides.

LUBBOCK, July 12 -- The fifth annual Cheerleaders School at Texas Tech closed Friday (July 12) with the announcement of winners in all divisions of competitions.

In the large groups with six or more cheerleaders on a team, Plainview High School, Robertson High of Las Vegas, N.M., and Levelland tied for first place. Caprock of Amarillo and Lamesa High tied for second. Lockhart High and Frenship High of Wolfforth tied for third. Honorable mention went to Tulia and Petersburg High. The spirit stick was awarded to the Levelland team.

Groups of five were so numerous they were divided into "odd" and "even" divisions, according to the school's director, Edsel Buchanan.

In the "Five-Odd" division, Farwell, Monterey of Lubbock and Lubbock High tied for first. Lorenzo and Melrose, N. M., high schools tied for second; Sudan took third; honorable mention went to Samuel Clemens of Schertz. Spirit sticks were presented Schertz and Monterey.

In the "Five-Even" division, Guyman (Okla.) High and Coronado of Lubbock tied for first; Dexter, N. M., and Abernathy tied for second; New Deal won third; honorable mention was awarded to Crane and Borger and the spirit stick went to Guyamn.

Hooker (Okla.) High took top honors in the groups of four, with Estelline, second; Crystal City, third; honorable mention to Sundown and Panhandle and the spirit stick to Hooker.

(MORE)

Cheerleading School -- add one

In groups of three or less, Cross Plains, Matador and Hagerman, N.M., tied for first; Boys Ranch and Seymour tied for second; Garden City and Shallowater tied for third; honorable mention to Christ the King of Lubbock and Southland High. The spirit stick was presented to Boys Ranch.

Sam Houston Junior High at Amarillo and Tatum (N.M.) Junior High tied for first place in junior high competition. Littlefield Junior High and Alamo Junior High of Midland tied for second; Frenship, Tulia and Brownwood junior highs tied for third; honorable mention went to junior high schools at Perryton and Muleshoe and the spirit sticks went to Frenship and Brownwood.

Approximately 450 cheerleaders from junior and senior High schools from four states attended.

By Dan Tarpley

LUBBOCK, July 12 -- The Texas Tech Music Department this week-end completed plans to welcome 500 or more students from elementary through high school levels Sunday (July 14).

Youth Music Camp Director Joel Leach of Tech said indications are that last year's enrollment of 420 will be equalled or surpassed by the young musicians here for the two weeks of school.

They will receive special instruction in band, stage band, orchestra, choir, twirling, and drum majoring.

To be eligible for band, students must be in the seventh grade or above; for orchestra, students in elementary school through high school are eligible, and choir students must be in the ninth grade or above.

A blue-ribbon faculty of Tech and visiting musicians will work with the students.

On the band staff will be Dr. Francis McBeth of Ouachita Baptist University, Dean Killion of Tech; Eldon Janzen of Irving, Jim Sudduth of Lubbock and Bill Bradley of Big Spring.

Orchestra faculty will include Robert Mann, conductor of the Midland-Odessa Symphony, Paul Ellsworth of Tech and George Robinson of Lubbock.

Choir directors will be Charles Schaefer of Emporia State College and Gene Kenney of Tech. Phil Hewett of Fort Worth heads the stage band staff.

Former Tech Band Drum Major Marlin Lindsay will offer special instruction in drum majoring. Audrey Fisher Robinson of Portales will join with Tech Band Feature Twirlers Chris Adrean and Marsha Dement to assist elementary, intermediate and advanced twirling students.

Registration and auditions are scheduled from 9 a.m. to 3 p.m. Sunday (July 14).

LUBBOCK, July 1 -- Texas Tech President Grover E. Murray today announced a series of changes in the university's housing policy highlighted by the redesignation of Coleman Hall as a men's dorm on an experimental basis.

Coleman Hall, one of three high rise dormitories in the Wiggins Complex, was completed in the fall of 1967. This fall, it will operate under an experimental plan in which men living in the hall will not be provided with food or telephone service.

Cost for the 1968-69 academic year will be \$450 per person for double room occupancy in Coleman and \$517.50 for single occupancy.

In a letter to all Tech students regarding the regulation changes, Dr. Murray said that Coleman "will be reserved for men students whose part-time work prohibits living in a standard residence hall."

The basic policy of requiring all students attending Tech to live on-campus is unchanged, but exemptions to the policy were broadened. Students who may apply for off-campus residency include:

Junior and senior men whose work conflicts with living in the dorms, graduate students, senior men needing less than 12 hours to graduate, senior men over 21 before September 1, 1968, students over 25 before September 1, married students and students living with parents and relatives, students who have financial hardships or health problems, and veterans with at least 1½ years service.

Dr. Murray stressed that those students who request exemption from the residence halls must apply to the office of the Dean of Men or Women before Sept. 10.

(MORE)

Housing Policy --- add one

The new realignment of Coleman Hall increases space to 4,147 men in Tech dormitories this fall with accommodations remaining for 4,740 women.

"These regulations were established after consultation with the Board of Directors, members of the administration and students," Dr. Murray said. "All students are sincerely requested to study them carefully. These regulations are designed to insure a desirable variety of quality accommodations at reasonable rates."

LUBBOCK, July 1 -- The first of three workshops at Texas Tech in clothing and textiles got underway Monday (July 1) with emphasis on "Special Problems in Family Clothing."

Chairman of Clothing and Textiles Gene Shelden said graduate students may enroll for one, two, or three weeks to earn graduate semester hours' credit.

Dr. Shelden said the study would include clothing needs and desires and social psychological aspects of clothing for the different ages in the family and on clothing for the handicapped.

Special features will be a talk on buying men's suits by Jim Kopf of S & Q Clothiers of Lubbock; a panel of elementary teachers discussing the psychological aspects of clothing on the elementary child and a panel of local teen-agers discussing clothing for their age group.

Teachers will be Dr. Shelden and Mrs. Myra Timmons, instructor in clothing and textiles.

Classes will meet in the Home Economics department from 10:40 a.m. to 12:40 p.m. daily this week, except Thursday, July 4.

The second workshop will be held Aug. 5-9 with emphasis on teaching clothing creatively; the third Aug. 12-17 with emphasis on advanced techniques in fitting.

LUBBOCK, July 1 -- Classic guitarist Jorge Morel will come to Texas Tech July 9 for a concert performance under auspices of Tech Union.

In his program at 8 p.m. in the Union's Coronado Room, Morel will present compositions from an extensive repertoire which ranges from classical to his native South American music. There will be no admission charge.

Born in Argentina, Morel began studying the guitar at the age of 11 under the tutelage of his father, also an accomplished musician. Later, at the University of Musical Studies in Buenos Aires, he majored in guitar under the guidance of the noted South American guitarist and composer, Pablo Escobar.

At 18, after receiving his degree, he began to experiment and to develop the unique style which distinguishes his performance. His technique, which was called "impressive and formidable" by the New York Times, also has been described as "a delicately controlled range of nuance and volume which enables him to play like an orchestra of guitars, or to produce a wisp of sound suggesting distant music on a summer breeze."

Morel will open his Tech program with selections by Milan, Paganini, Sor, Tedesco and Albeniz. The second portion will include compositions by Villa-Lobos, one of his own works, "Chacarera," and arrangements of Zalvidar's "El Humahuaguena" and Bustamante's "Misionera." He will close with Escobar's "Chopi."

Morel came to the U.S. in 1961 and made his debut at Carnegie Hall. He is an RCA Victor recording artist and has filled concert dates from coast to coast, in Hawaii and Puerto Rico.

LUBBOCK, July 1 -- A rodeo team consisting of a Nebraska sand hills cowboy and three Southeast Texas cowgirls will represent Texas Tech in the National Intercollegiate Rodeo Association (NIRA) finals in Sacramento this week.

Competition for the best collegiate rodeo performers in the nation will get underway Wednesday (June 3) but Tech's Craig Haythorn, junior from Arthur, Neb., is scheduled to arrive early to help take care of the national association's business affairs. Haythorn, who recently was named all-round cowboy for the Southwestern region, is a director.

Joining Haythorn to represent Texas Tech will be Tech co-eds Marianne and Nancy Munz, of Alvin, and Anita Ramsey of El Campo.

Marianne Munz is "Miss NIRA" and will defend her world championship title in the goat-roping contest. She took national goat-roping honors in 1966 in Vermillion, S. D., and in 1967 in St. George, Utah.

Haythorn will compete in calf roping, ribbon roping and bulldogging. He is an animal business major at Tech and plans to do some professional rodeoing after graduation.

Both Nancy and Marianne are home economics education majors and Marianne is now studying foods and nutrition and animal science at the graduate level. Nancy was runner-up for the queen honors at the national competition in 1966.

Miss Ramsey is a junior business education major.

LUBBOCK, July 1 -- Three Dallas officials of the Southwest Marketing Division of Mobil Oil Corporation presented the Mechanical Engineering Department of Texas Tech a \$500 cost of education grant Monday (July 1).

Mechanical Engineering Chairman L. J. Powers accepted the check for Tech from E. F. Kendall, C. N. Lemon Jr., and Carey W. Frisby, Mobil officials.

Kendall is manager of employee relations for the Southwest Marketing Division; Lemon, commercial manager; and Frisby, chief engineer. Frisby is a 1958 Bachelor of Science graduate of Texas Tech.

Prof. Powers said the money would go into a fund which helps faculty members and graduate students to attend meetings, conferences and seminars to keep abreast of the latest developments in their teaching and research fields.

This is the second year Mobil has made such a contribution to Tech's engineering school. The Mobil representatives spent several hours visiting faculty at Tech and touring the campus before returning to Dallas.

and Roswell, N.M.

LUBBOCK, July 2 -- Two students from the Texas Tech School of Law and their faculty adviser left Tuesday (July 2) for Houston to compete in appellate court competition with representatives from seven other Texas schools of law.

Richard Maxwell of O'Donnell and R. Charles Gentry of Dexter, N.M., will represent Tech. Law Prof. C. Tom Reese accompanied them.

The competition will be held in Houston Thursday and Friday (July 4 and 5) under the sponsorship of the State Junior Bar of Texas. Dean Richard B. Amandes of the Tech School of Law will be in Houston for the competition and the State Bar Association meeting, as will Mrs. Betty Leeman, assistant law librarian.

Dean Amandes pointed out that Tech students will be competing against second and third year law students from the other law schools in the state, but "we know Maxwell and Gentry will represent us well, even against more advanced students," he said. "We are happy to get the opportunity to participate."

Students will present preliminary arguments Thursday before judges of civil appeals courts, district judges and other attorneys. Final arguments will be presented Friday before the nine judges of the Texas Supreme Court.

"The program is designed to afford students an opportunity to acquire skill and training in legal research, brief writing and appellate arguments," Amandes said. "Programs such as this add a note of realism to the first year work which is largely theoretical in orientation as opposed to the skills area."

to Lubbock news media.

LUBBOCK, July 2 -- Some 40 professionally-qualified interviewers began a canvass of Metropolitan Lubbock's business community this week to gain information to go into a comprehensive report on the city's economic base.

Marketing Prof. Robert D. Amason and Economics Prof. John Wittman of the School of Business Administration are co-directing the task of making 3,000 contacts by mail, telephone and personal interview to obtain data on sales and purchases and employment from inside and outside Lubbock county.

The information sought is for the calendar year 1967. Drs. Amason and Wittman have asked the cooperation of Lubbock businessmen in providing the data sought which, they say, will prove of economic value to them and the entire metropolitan area.

Dr. Amason pointed out that an initial step toward meeting the public problems of a community is to develop detailed knowledge of its economic base. This knowledge, he said, is essential in forming sound decisions regarding master plans, zoning ordinances, transportation systems, renewal programs, and other public improvement plans designed to stimulate growth.

The Tech professors estimated the survey will require 15 to 20 working days to complete.

LUBBOCK, July 5 -- The National Association of Teachers of Singing (NATS) and Texas Tech's Music Department will conduct a vocal workshop Sunday through Friday (July 7-12).

Registration for music educators, choral directors, private voice teachers, college voice teachers, college voice students and others interested in attending will be conducted in the Music Building Sunday afternoon and Monday morning.

Workshop Director Charles W. Post, music professor at Tech, said the workshop would be open and profitable to persons interested in serious vocal music, including show music, and they are invited to attend all or portions of the institute. Registration fee is \$40 for the entire workshop or \$8.50 for one day.

Guest artist for the "low cost program of continuing study" will be Edwin McArthur, conductor, composer, accompanist, coach, director and teacher who only recently was appointed professor of music at Eastman School of Music.

At Eastman he will head the Musical Preparation Department which includes involvement with the performances of organizations, operas and recitals and working with students in preparation.

For 28 years McArthur was conductor and accompanist for opera star Kirsten Flagstad. He has conducted the Wagnerian Repertoire at the Metropolitan, Chicago and San Francisco Opera companies and has served as guest conductor with practically every major symphony orchestra in America.

In the Tech workshop he will conduct master classes and speak of the role of the accompanist and coach. He has collaborated with stars from all areas of the musical world, including Pinza, Rethberg, Swarthout, Meisel and Berger, and from the theater, Patricia Morrison, Earl Wrightson and Betty White.

Vocal Workshop --- add one

The program here will be the first of four regional summer workshops sponsored by the National Association of Teachers of Singing, Post said. Others will be at colleges in Murray, Ky., Spokane, Wash., and Los Angeles.

Visiting professors on the workshop faculty will include Oren Brown, lecturer in voice therapy at Washington University Medical School, St. Louis, and Bruce Lunkley, choral director and chairman of vocal studies at Austin College.

Tech will be represented by Choral Director Gene Kenney, voice instructor Charles Roe and Psychology Prof. Nathan Denny.

Brown's assignments will include analysis of vocal problems. An experienced teacher and therapist, he is a fellow in NATS, chairman of the national organization's Committee on Vocal Education and a member of the Administrative Committee.

Lunkley, governor of the Southwest Region of NATS, is a specialist in the field of English diction. He will be honored at a Governor's reception at 7:30 p.m. Sunday in the Music Building.

Roe, a baritone, will be presented in a 7:30 p.m. recital Tuesday (July 9). He has been a frequent guest soloist with Lubbock and area symphony and choral groups and won the Southwest Regional Singer-of-the-Year title in 1966 and was runner-up in National ATS competitions.

Kenney will lecture on vocal problems related to choral music. He has become widely known as clinician and adjudicator for music workshops and competitions throughout the Southwest.

Dr. Denny will discuss "Learning Aspects of Vocal Music." He has specialized in problems in human learning and currently is engaged in research dealing with behavioral problems in this field.

Chairman Post of Tech's vocal division is lieutenant governor of the North Texas-Southwest region of NATS.

This release distributed 7-5-68

dailies.

LUBBOCK, July 5 -- Animal husbandry experts from Texas Tech and the Extension Service and several highly successful Texas hog producers will present the program for the 16th annual Swine Short Course at Texas Tech Thursday and Friday (July 11-12).

The principal speaker and panelist will be Dr. A. H. Jensen, professor of animal science at the University of Illinois. He will speak at 2:20 p.m. Thursday on "Swine Management Studies with Buildings and Equipment," at 9:20 a.m. Friday on "Brood Sow Management, Housing and Breeding" and on a panel at 11:10 a.m. Friday on Swine Production.

He is dean and director of the Animal Science Department at the University of Illinois and his special field is animal nutrition with a particular interest in swine.

With Dr. Jensen on the Friday morning panel will be Dr. D. B. Hudman, animal husbandman from the Extension Service at College Station; Prof. Walter Grub of Tech's Agricultural Engineering Department, and Dr. L. F. Tribble, professor of animal husbandry at Tech and chairman of the short course committee.

The Texas Pork producers Association and the Animal Husbandry Department at Tech are sponsors of the course to be held in the Livestock Pavilion and Coronado room of the Student Union.

A 10 a.m. market hog show and judging contest will highlight the Thursday schedule. Each producer may enter one animal. The judging committee are L. M. Hargrave, professor of agricultural education at Tech; James Stuart, head hog buyer for Farm Pac Kitchens; and Paul Gross, Howard County agricultural agent.

The show and contest follow the first formal session at 9 a.m. with Drs. Dale W. Zinn and B. B. Breidenstein of Tech presenting lectures and demonstrations on "Form and Composition of the Meat Hog."

(MORE)

Swine Short Course --- add one

The Thursday afternoon program will feature lectures and demonstrations by Dr. Hudman on "Going Into the Hog Business? Things to Think About;" Dr. Jensen; Grub on "Ventilation and Insulation of Swine Buildings;" and Mrs. John B. Fair of Gunter on "Consumer Survey on Pork and Texas Porkettes."

Each of the presentations will be followed by question and answer sessions.

Littlefield swine producer Jack Barton will moderate a Thursday evening panel on "Stump the Experts" made up of Lubbock hog producers T. Euel Liner, Roy Poage and Buddy Winter, Larry Tackitt of Happy, Monte Griffin of Lamesa and Ernest Harris of Ralls, also producers.

The Friday morning program will feature Dr. Tribble on "Swine Feeding," Dr. Jensen; Producer Don Brothers of Paducah on "Texas Pork Producers Role in the Swine Industry" and the production panel.

The final session Friday afternoon calls for announcement of results of the carcass contest reported by Drs. Breidenstein and Gary Gann, supervisor of the meats laboratory at Tech, and of the judging contest by Hargrave.

Presiding will be Liner Thursday morning, Dr. Brothers Thursday afternoon, Dr. Sam E. Curl Friday morning and Dr. Zinn Friday afternoon.

Attendance is estimated at between 300 and 400 persons.

LUBBOCK, July 5 -- The fifth annual Cheerleaders School at Texas Tech opens Sunday (July 7) with an enrollment of 550 persons from four states participating.

"They will be here from Oklahoma, New Mexico, Colorado, and many portions of Texas," co-Director Edsel Buchanan of Tech's Intramural Department said, "to get instruction in the techniques they need to improve their ability in cheerleading in their respective schools."

The school is open to junior high, high school and college students, he said. The course includes instruction in boosting school spirit, sportsmanship, novelty yells, crowd psychology, demonstration of yells, stunts and skits, techniques, planning pep rallies, songs and chants, tumbling and footwork routines.

"The staff will be supplied by the National Cheerleaders Association (NCA), all trained by Lawrence R. Herkimer of Dallas, executive secretary," Buchanan said.

Working with Buchanan and his co-director, Willard Holsberry of Tech's Intramural Department, will be 17 representatives of the national association.

Robert Shields, clinic coordinator for the NCA and clinic director for the Tech school, conducts similar training sessions across the nation each summer.

(MORE)

Cheerleading School --- add one

Mrs. Shirley Kountz of Dimmitt public schools will conduct a poster competition for the third year as a highlight of the school.

All participants will be housed in Hulen Hall. Total cost to the enrollees is \$50 if they live in the dorm. Special entertainment and recreation including the university swimming pool and tennis courts will be available to all registered students.

Registration will be conducted from 2 to 5 p.m. Sunday, with the first session scheduled for 8 to 10 p.m. Sunday in the Intramural Gymnasium.

Monday's program calls for class-work from 8:30 to 11:15 a.m., a picture-taking session from 1 to 3 p.m., a meeting in the main ballroom of the Student Union from 3 to 4 p.m., a meeting of head cheerleaders from 4 to 5 p.m. and a class session and demonstration in the gymnasium from 7:30 to 10 p.m.

The course will be concluded at noon Friday.

LUBBOCK, July 5 -- A panel of teen-agers from Lubbock and area schools told a Texas Tech Clothing and Textile summer workshop class Friday (July 5) what they want and like in colors and styles in school clothing.

The nine high school and junior high panelists answered questions from the persons enrolled in the workshop and Director Gene Sheldon and Instructor Myra Timmons.

The panelists concurred that their styles followed closely those of college and university students and that they wanted their clothing to be "acceptable" to their classmates and friends.

They discussed the importance of color and style, buying practices, and the relationship between the type of clothing students wear and their behavior.

Panelists included Dunbar sophomore Ronnie Sneed, Atkins Junior High ninth grader Curtis Roberts, Monterey junior Debbie Landers, Cooper High sophomore twins Cinda and Linda Harden, Ralls High senior Jackie Poteet, Monterey junior Tom O'Jibway, Monterey 1968 senior Kenny Koontz and Monterey junior Roger Schultz.

The workshop is the first of three to be presented this summer by the Department of Clothing and Textiles. It deals with problems in family clothing and clothing needs in relation to age, occupation, sex, role and economic status. It concludes Saturday (July 6).

The second workshop will be Aug. 5-9 on "Teaching Creatively;" the third Aug. 12-17 on "Advanced Techniques in Fitting."

Each workshop is worth one semester hour credit.

11-7-5-68

LUBBOCK, July 5 -- Texas Tech is one of two schools in the nation chosen by the Army for use by its civil schools branch of the Office of Personnel Operations, according to announcement Friday (July 5) by Dr. Vincent Luchsinger, acting chairman of the Management Department.

"The Army will send officers to our Management Department," Dr. Luchsinger said, "for data processing and systems analysis management training."

Three have been approved to begin training this fall, he said, and more are expected before the fall semester starts.

"Upon completion of the work in 18 months to two years," the management chairman said, "they will receive Master of Business Administration degrees. The officers chosen for the work will be in grades captain through colonel.

"We will use our regular educational program to help Army officers get the training they need," he said.

Dr. Luchsinger said the selection of Tech for Army training gives the institution and its School of Business added stature.

The work outlined for the Army officers will stress systems management, data processing, information systems and organizational administration.

This release distributed 7-10-68
to Lubbock news media.

LUBBOCK, July 10 -- The works of 17 students participating in a sculpture workshop at Texas Tech featuring aluminum casting with styrofoam will go on display at 2 p.m. Thursday (July 11).

The show will conclude the special course which began with the opening of the summer session.

"Aluminum casting with styrofoam is a relatively new process and though we have been pouring aluminum here at Tech for only a little more than a year, it has already taken its place above plaster, concrete and some of the other materials as a most valuable aid to the teaching of sculpture," said Art Prof. John Queen.

"Aluminum is light, inexpensive and probably the most durable of metals," he added. "The foundry process itself is relatively simple and is much less time consuming than the more traditional sand casting and lost-wax casting methods.

"In essence, the process involves the constructing of a styrofoam model, packing the model in a mixture of common river sand and fire clay, and pouring the molten aluminum through an opening or 'sprue.' Styrofoam is an inexpensive insulating product that can be sawed, carved, burned, or worked with any hot tool.

"Styrofoam also can be laminated and fabricated for large architectural sculpture. The molten aluminum vaporizes the styrofoam and replaces its form in a near perfect manner."

(MORE)

Sculpture Workshop -- add one

Prof. Queen pointed out that the relative ease with which styrofoam may be worked and the fast foundry process allows the student to see his composition in a permanent medium in a matter of hours. This encourages the student and speeds the learning process to its ultimate.

"I am continually amazed at the quantity of work a class can produce in just one semester and how much this added production affects the finished quality," Queen said.

"This class, though working under the most frustrating conditions brought on by lack of ample work space and the most primitive of shop facilities, has done remarkably well," Queen said. "It would be interesting to see what people of their caliber could do with adequate facilities."

Coleman McSpadden, Lubbock junior working toward a Fine Arts degree, said there are three major steps involved--first the idea, second a drawing, third the molding and casting.

The students have worked in a crowded area inclosed by a temporary fence at the rear of a temporary building. They heated the aluminum into a molten state in a home-made melt furnace powered by natural gas and forced air.

They used river sand and fire clay, Queen said, mixed with some rather worn West Texas top soil.

Most of the works to be displayed Thursday near the southeast corner of the Home Economics Building will be available for purchase by art collectors.

By Dan Tarpley

FOR RELEASE SUNDAY, JULY 14

LUBBOCK, July 13 -- Dr. Owen L. Caskey, whose teaching career began more than a quarter of a century ago in Lubbock public schools, has been appointed to the newly-created office of Vice President for Student Affairs at Texas Tech effective Sept. 1.

Announcement of the appointment was made Saturday by Tech President Grover E. Murray.

"Dr. Caskey's long career in education here, at Oklahoma State, at Colorado State and as a consulting industrial psychologist provide him with outstanding experience for this important administrative position," Dr. Murray said.

"I am looking forward to the assignment and the challenge that goes with it," Caskey said of the appointment. "It will give me an opportunity to grow in the field of educational administration and still give me time to do some teaching and research at the graduate level."

The new Tech vice president returned to the University for the second time in 1964 as a professor of education. He has been responsible for graduate programs leading to Masters' and Doctoral degrees in educational psychology and guidance and counseling.

Caskey received his Doctor of Education degree from the University of Colorado in 1952, his Master of Education from Tech in 1948 and his Bachelor of Science from Tech in 1947.

For a year before returning to the Tech faculty he served as director of University Counseling Services and as a professor of psychology at Oklahoma State University.

From 1958 to 1963 he was consulting industrial psychologist for a firm serving management. He taught as associate professor of psychology, headed the Psychological Service Center and served as coordinator of counseling services at Colorado State University from 1954 to 1958.

(MORE)

CASKEY --- add one

His first association with Colorado State was from 1950 to 1954 as assistant professor of psychology and education and coordinator of Teacher Education. Most of 1954 he spent with the Veterans Administration Department of Medicine and Surgery, Counseling Psychology Service and Clinical Psychology Section.

Dr. Caskey's first tour as a Tech faculty member began in 1947 as instructor in the Department of Psychology and Education and as counselor in the Tech Guidance and Counseling Center.

During World War II, he was a personnel officer and assistant to executive officer three years in the U.S. Navy.

He taught in Lubbock public schools from 1941 to 1943.

At Tech he is coordinator of the Mexican American Counselor Education Program, director of the Counselor Education program, full member of the Graduate Faculty and elected member of the Graduate Council, and member of numerous other student and faculty committees. He has authored many papers and books relating to education, some of the recent ones dealing with the teaching of Mexican Americans.

Mrs. Caskey is the former Billie Jo Jones of Lubbock. They have two children, Leigh Ann, 17, and Deborah Jane, 14. They live at 6205 Kenosha.

LUBBOCK, July 8--Texas Tech's Music Department and the National Association of Teachers of Singing (NATS) joined forces to open a vocal workshop at Tech Monday (July 8).

Workshop Director Charles W. Post, music professor at Tech, said it was the first vocal workshop here in several years. Approximately 15 persons registered for the full week of work, with daily registrations increasing enrollment to approximately 20.

The workshop here is one of four sponsored by the NATS. Others will be conducted at colleges in Murray, Ky., Spokane, Wash., and Los Angeles.

Guest artist Edwin McArthur, lectured and conducted a master class from 9:30 to 10:30 a.m. and from 2 to 3 p.m. Monday and will continue that schedule for the remainder of the week.

McArthur is a widely-known conductor, composer, accompanist, coach, director and teacher, and only recently was added to the faculty of the Eastman School of Music.

Other visiting professors are Oren Brown, lecturer in voice therapy at Washington University Medical School at St. Louis, and Bruce Lunkley, choral director and chairman of vocal studies at Austin College.

Tech is represented by Choral Director Gene Kenney, voice instructor Charles Roe, Psychology Prof. Nathan Denny and Music Prof. Charles A. Lawrie.

(MORE)

Vocal Workshop--- add one

A highlight of the workshop will be a recital by Roe, a baritone, at 7:30 p.m. Tuesday.

Roe has been a frequent guest soloist with Lubbock and area symphony and choral groups and won the Southwest Regional Singer-of-the-Year title in 1966 and was runner-up in National ATS competitions.

He will be accompanied by Mrs. Gertrude A. Post at the piano. This will be the final Lubbock recital for Roe, who later next month will leave for Ypsilanti, Mich., where he has accepted a position as assistant professor of music at Eastern Michigan University.

By Dan Tarpley

LUBBOCK, July 8 -- A total of 543 cheerleaders from four states arrived at Texas Tech for the one-week Cheerleaders School which will continue through Friday noon. (July 12).

The visiting cheerleaders, from junior high through college age, participated in classes, posed for pictures, and competed in yell-leading contests for a full day of activities Monday. They represent schools in Texas, Colorado, Oklahoma and New Mexico.

The 16-member staff of the National Cheerleaders Association (NCA) are leading the instruction in boosting school spirit, sportsmanship, novelty yells, crowd psychology, stunts and skits, techniques, planning pep rallies, songs and chants, tumbling and footwork routines.

NCA clinic coordinator Robert Shields of Dallas is serving as clinician.

"The trend in cheerleading," he said, "is toward bigger motions and slowing the cheers down so that the leaders have better control over the crowd. More emphasis is being placed on personality development for the cheerleaders, too.

"We are making an effort to teach cheerleaders to lead the crowd rather than just perform for it," he said. "We are de-emphasizing the wrist-flapping wiggles in favor of stronger and bigger movements. They are more effective in obtaining a response from the crowds."

The visiting cheerleaders attended an orientation program Sunday night.

A full schedule of activities from 8 a.m. to 10 p.m. is planned through the week, according to Edsel Buchanan of Tech's Intramural Department, co-director of the school.

Certificates will be presented to cheerleaders at the conclusion of the course.

LUBBOCK, July 8 -- Dr. William Powell, director of the Center for Reading Research and Instruction at the University of Illinois, is meeting with the Workshop for Special Reading Teachers at Texas Tech during this final week of the institute.

The workshop is being conducted at Tech for the Education Service Center for Region XVII public school teachers working with Title I programs.

More than 40 elementary and secondary teachers are participating in the six-week workshop, with individual and group projects, demonstrations and guest speakers.

Prof. Dorothy Filgo of the Elementary Education Department at Tech is director. Mrs. Shirley Mohler, visiting instructor who received her Master of Education degree from Southern Methodist with major emphasis in reading research, is the assistant director. Mrs. Mohler worked the past year as special reading teacher in Ozona public schools.

Vernon Stafford, elementary counselor in Lubbock public schools, Dr. Walter Cartright, professor of sociology at Tech and Mrs. Patricia Marlow, a former education staff member are serving in consultant capacities.

Other visiting consultants included Richard Woodcock, director of the Research Center, George Peabody College for Teachers at Nashville; Don Hodes and Thurman Johnson, directors of Communication Skills Project, Los Angeles County Schools; Dr. Carl Rosen, director of reading programs for the University of Texas at El Paso; Dr. Donald Neville, director of Child Study Center, George Peabody; Dr. Elizabeth Ott, director of the Southwest Educational Development Laboratory, Austin; and Dr. Katherine Steiert, general supervisor of Fairfax County Schools, Va.

WESTWARD--The aluminum cast was produced in a sculpture workshop at Texas Tech and will go on display Thursday (July 11) with other works which came out of the class. The student who produced the work he calls "Westward", Coleman McSpadden of Lubbock, explained it this way: The bottom portion connotes a plow, the rear part a sail, the front segment a part of a sword, and the top a wagon wheel. The final product was covered with a brown wax. It is mounted on a black walnut base finished with lemon oil. (Tech Photo)

POURING MOLTEN ALUMINUM--Two Texas Tech art students, Coleman McSpadden of Lubbock, left, and Burl Cole of Brownfield, are pouring molten aluminum onto a styrofoam model buried in river sand and fire clay. The hot aluminum burns away the styrofoam and solidifies into a cast to take the same form as the model. It is all a part of a sculpture workshop at Tech which ends this week. McSpadden is working toward a fine arts degree, Cole will teach art at South Plains Junior College, Levelland, this fall. (Tech Photo)

LUBBOCK, July 15 -- Enrollment for the two-week Youth Music Camp at Texas Tech is nearing 500 to surpass last year's figure of 420.

Young musicians completed auditions Sunday and have been assigned to band, orchestra, choir, drum majoring or twirling groups for activities through July 26.

Band students range from seventh through twelfth grades, orchestra students from elementary through high school age, and choir students from ninth through twelfth grades.

Camp Director Joel T. Leach said a full schedule of activities is planned for the visiting musicians, including, in addition to instruction, entertainment in the form of dancing, swimming, bowling and recitals.

The curriculum includes theory, music appreciation, brass ensemble, woodwind ensemble, percussion ensemble, conducting, baton twirling, drum majoring, and private lessons. There are 35 faculty members.

LUBBOCK, July 15 -- A teaching aid, "Business Problem Computer Programs," has been completed by a Texas Tech marketing and management professor and is ready for distribution.

Dr. Harry H. Elwell said Monday (July 15) copies of the book are going to members of the American Association of Collegiate Schools of Business as examples of the type of research work being done by Tech.

"The booklet will also be distributed to interested faculty and graduate students on the Tech campus and elsewhere for use in instruction and research activities," Dr. Elwell said.

The 84-page booklet was written, edited and published with funds to the Tech School of Business Administration from the state for interested school of business administration professors. It will provide a source of frequently used computer programs that are designed specifically for business problem solutions.

"The book is a continuation of the crusade to expand the usage of computers in business research and instruction," the professor said. "The purpose is to present programs useful to the solution of business problems and to do so in a form easily understood by those who do not have a long experience with the use of computers.

"The compilation, editing, re-programming, and testing of the programs in the text is the result of recognizing that a 'communications barrier' often exists," he added. "Teachers and students of business, as users of programs, have needs which many times cannot be clearly defined to engineering-oriented programming specialists.

"Also, problem solutions and logic can be made available to business users by mathematicians and statisticians, but again a language barrier frequently stands in the way of proper understanding. To bridge this gap is the reason for presenting this text at this time."

LUBBOCK, July 16 -- John L. Bonnici, agricultural chemist with the Department of Agriculture on Malta, will be the guest of Texas Tech's Water Resources Center this week.

He will arrive tomorrow to visit the Frank Gray farm and a Texas Tech research project, both of which use city of Lubbock effluent for crop production. He will discuss the use of treated effluent for industrial use with Dr. Dan M. Wells, director of the Water Resources Center.

Gray's farm has used effluent successfully for irrigation purposes since the late 1940's. The Texas Tech research project, at Indiana and 4th Street, is under study by Department of Agronomy researchers Dr. Clark Harvey and Chester C. Jaynes.

LUBBOCK, July 16 -- Approximately 400 U.S. Army reservists in Civil Affairs units in Texas and Oklahoma have begun two weeks of active duty training at Texas Tech, Academic Vice President S. M. Kennedy announced Tuesday (July 16).

Camp Commander Col. Milburn Beitel of San Antonio, commanding officer of the 321st Civil Affairs Group headquartered in the Alamo City, said the seminar will place emphasis on Latin and Central America.

A rigid schedule of academics and military duties gets the officers and enlisted reservists up at 6 a.m., out for breakfast by 6:15, and in class from about 7:30 a.m. to 4:30 p.m.

Members of the Tech faculty are providing all the instruction in the academics, including economics, geography, sociology, government and history.

The reservists are housed in Clement Hall, fed in the college cafeteria, and assigned to classes in Clement and Gates halls.

In addition to members of the 321st Civil Affairs Group, men assigned to the 362nd Civil Affairs Area Headquarters in Dallas, the 486th CA Company from Tulsa, the 413th CA Company from Lubbock, and the 490th CA Company from Abilene are attending the seminar.

Assistant Seminar Director Haskell Taylor of Tech said this is the first year for this university to host the duty training seminar for the civil affairs reservists.

"Civil Affairs groups," Col Beitel said, "during time of war or occupation serve as advisors to the military commanders and work with local officers and civic leaders in the countries where they are assigned."

"Most of our men have college educations or are attending colleges and universities," he said, "and the training we receive at Tech will contribute to the ability and efficiency of our groups to perform if called to active duty."

dailies.

LUBBOCK, July 16 -- Texas Tech President Grover E. Murray announced Tuesday (July 16) that the Board of Directors has awarded the contracts for the construction of the new \$2.45 million School of Law building.

Members were polled by telephone after they had received recommendations from Tech officials; and in all cases the contracts went to the low bidders.

Dr. Murray and Law Dean Richard B. Amandes also announced ground-breaking ceremonies for the building, to be situated on the campus near 19th Street and Indiana Avenue, will be conducted at 11 a.m. Saturday (July 20).

The general contract was awarded to H. A. Lott, Inc., of Houston, on a low bid of \$1,737,900. The board accepted the base bid of \$1,677,000 with two alternates which added \$60,900.

The mechanical contract went to Drew Woods, Inc., of Lubbock at a figure of \$451,000. Watco Electric Co., of Lubbock received the electrical contract on a base bid of \$213,000, with alternates which reduced the figure to \$208,242.

Those figures plus the fee charged by the contractor to oversee work by sub-contractors pushed the total cost to \$2,451,902.18, well within the funds earmarked for the structure.

Lott was the contractor for the dormitories in the Wiggins Complex, the new Biology building, the Textile Research center and several other older buildings.

Woods did the mechanical work on the School of Business Administration and Biology buildings.

(MORE)

Law School Building -- add one

Architects are Harrell and Hamilton of Dallas. Howard Schmidt and Associates of Lubbock served as consulting architects.

Dean Amandes said this first portion of the Law building is scheduled for completion by September 1969.

The building will have a basement and three levels above ground with more than 80,000 square feet of assignable space. It will house a courtroom with fixed seating for 100 persons, the rapidly growing Law Library, a forum (or informal meeting and reading room) and several large classrooms, one of which will seat 150 persons.

Among those who will participate in the ground-breaking ceremony are Lubbock attorney George McCleskey, Levelland attorney Alvin R. Allison, member of the Tech Board, and Judge James A. Ellis of the 137th district court.

Dr. Murray and other top officials at Tech and the School of Law will also participate in the ground-breaking.

Many area attorneys and judges are expected to attend. The public is invited.

To reach the site, motorists should enter the campus on Flint Avenue from the South and drive west along the north side of the Wiggins Dormitory Complex to the site.

LUBBOCK, July 16 -- Problems of special interest to professional home economists are being explored this week in a series of short courses and seminars sponsored by Texas Tech's School of Home Economics.

A visiting lecturer, Dr. J. Joel Moss of Brigham Young University, is directing a seminar in child development and family relations designed to meet the needs of county home demonstration agents. The study emphasizes program planning and distribution of material, according to Home and Family Life Chairman Estelle Wallace.

Tech Prof. Donald S. Longworth is conducting a workshop dealing with new approaches in teaching human relations to high school and beginning college students.

Home Economics Education Chairman Ann Buntin is directing a short course aimed at assisting teachers who work with disadvantaged youth.

The workshops will end Friday (July 19).

LUBBOCK, July 17 -- A Texas Tech anthropologist has made what he believes to be one of the most important archaeological finds on the Llano Estacado (South Plains) in recent years.

Prof. Kenneth Honea of Tech's Department of Sociology and Anthropology said Wednesday (July 17) the Lamb County find ties in with two of the other well known late ice age discoveries in the Southwest.

The discovery was made, he said, just three days before a scheduled field course at the site was concluded.

As a result of the find, he said, "we will continue to make excavations at the site under funds made available by a faculty research grant from Tech."

He said he believed the find links the site with the Lubbock Site and the Blackwater Draw Site near Portales. Both are situated on or near the same drainage as TT 5, the designation given the area of the find.

The site is situated in the sediments and on the beach of a Late Pleistocene (Late Ice Age) pond on the edge of Blackwater Draw, a major stream during that age.

"The digging will continue at TT 5 to about the middle of August to explore fully this lowest bone bed," the anthropologist said. "Examination of bison remains shows a beast nearly twice as large as the bison which roamed the area until the 1800's."

"We found three distinct habitation periods at the site," Honea said. He described them as "late prehistoric," "early prehistoric" and "earliest prehistoric."

The site was excavated and the finds made by eight students enrolled in the field course led by Dr. Honea. Also on the site daily was Andrea Honea, 14-year-old son of the professor who has been accompanying his father on excavation work since he was about five.

Dr. Honea will be assisted in his continued search through Aug. 15 by two anthropology students yet to be chosen.

(MORE)

Lamb County Dig --- add one

The first find at the site which Dr. Honea called a blowout (where winds have blown the sands from the old lake area) revealed the remains of the occupation by bison hunters about 1400 A.D.

"The remains were recently exposed," Honea said, "by moving out of blow sand from the edge of the old pond. We found large hearths of caliche rock, piles of bison, deer and antelope bone resulting from butchering.

"Associated with hearths and bone piles were arrow points of the type Harrell (an archaeological designation), as were stone knives, scrapers and other stone tools.

"There is evidence, too, of extensive trade indicated by obsidian, turquoise and pottery from the areas near Santa Fe, along with some pottery from North Central Texas. We also found traces of Alibates dolomite apparently traded in from near Amarillo.

"Some of the metal pieces, copper or brass chain and bell, may suggest a second late prehistoric occupation in the 18th century A.D."

About eight feet down, Dr. Honea said, artifacts indicating an occupation 5,000 or 6,000 years ago were discovered. They included stone tools, hearths, cracked and burned bone. The cultural affiliation is unknown but radio carbon (C 14) tests may reveal it.

The earliest prehistoric discovery is the one which excited Honea.

"We found the large extinct bison buried in the deepest pond sediments, about 15 feet below the dry pond surface," he said. "Some of the bones appeared to have been cracked as from action by humans. There have been no stone artifacts yet recovered from this level, but the bones and other evidences may be associated with the Folsom culture.

"Numerous C 14 specimens of organic material were excavated from all occupation levels of the site. Their dating will provide an excellent absolute chronology of the site, which can be called one of the most important to have been excavated in the South Plains in recent years."

New excavations are expected to uncover any cultural material associated with the fossil bison in the lowest strata of the site.

(MORE)

Lamb County Dig --- add two

A big block of extinct bison bone will be removed from the site for exhibition at Tech.

"Digging the fossil bone," the anthropologist said, "is like trying to excavate soft butter from sandstone without damaging the butter . . . mighty tedious and hard."

Dr. Honea chose the site after it was called to his attention by Mark Randall of Littlefield who had scouted the area.

"We didn't miss a day of work at the site during the first summer term," Dr. Honea said. "Even though the site is in the sandhills and blowing sand at times handicapped our efforts, we worked every day. Only a driving rain, I guess, would have kept us from the diggings."

The team of students working at the site included:

Arthur Black, Tech senior anthropology major from Brownfield, son of Mr. and Mrs. George Black of 1604 E. Buckley, Brownfield.

Danny Sessums, senior anthropology major at Tech from Borger, now living at 2217-B 10th St., Lubbock.

Randall Callahan, Tech freshman anthropology major from Megargel, son of Mr. and Mrs. Carl M. Callahan of Megargel.

Mark Randall, Tech senior anthropology major from Littlefield, son of Mr. and Mrs. H. C. Randall of 309 E. 11th St., Littlefield.

Doug Yarbrough, University of Texas senior philosophy major from Littlefield, son of Mr. and Mrs. R. M. Yarbrough of 502 Crescent Dr., Littlefield.

Robert Hayley, Tech sociology major from Seymour, son of Mr. and Mrs. Robert Hayley of Seymour.

Mrs. Darby (Judy) Trotter, graduate psychology major, 3505 25th St., Lubbock, and formerly of Kansas City.

Kathy King, senior anthropology major at Tech from San Antonio, daughter of Mr. and Mrs. W. C. King of 443 Oak Glen, San Antonio.

LUBBOCK, July 17 -- Sixty-five high school debaters and drama students from West Texas will attend a speech workshop at Texas Tech July 22 through Aug. 3.

Forty will participate in forensics and 25 in drama, according to the speech workshop director Prof. Vernon McGuire of the Tech Speech Department. Fred March is assistant director.

Tech senior debaters Doug Andrews of Lubbock, Robert Trapp of Perryton and David Bradley of Denison and Jerry Sanders, director of forensics at Wooster (Ohio) College will help with the instruction. Sanders formerly was a Littlefield radio station owner and operator.

Registration will begin at 8 a.m. Monday at the University Theater. Lecture sessions will be conducted from 9 a.m. to noon daily with group study and work sessions from 1:30 to 4 p.m. daily. The workshop will conclude with a full day of performances Aug. 2.

9-7-17-68

This release distributed 7-17-68
to Lubbock news media.

LUBBOCK, July 17 -- The James Dutton Quartet, a percussion paced combo noted for its broad scope and unique style, will perform at Texas Tech Monday (July 22) under auspices of the university's Student Union.

At the 8 p.m. program in the Union's ballroom, the musicians, each of whom has several instruments at his command, will play selections from a repertoire which ranges from Bach to Bernstein and from rock to ragtime. There will be no admission charge.

Under the leadership of Dutton, whose forte is the marimba, the ensemble has been cited for technical brilliance and the ease with which members "switch from instrument to instrument in a display of fascinating rhythms and melodies." Some 50 instruments are used in the show.

The group has performed on tour with Roger Williams, played engagements with Godfrey Cambridge and Dionne Warwick and has appeared on the Mike Douglas and Lee Phillips TV shows.

Dutton, who holds bachelor's and master's degrees in music from Northwestern University, has racked up achievements in several fields. He has worked professionally in the Pop business with Roger Williams, the classical field with Herbert Von Karajan and the musical theater with Oscar Brown Jr.

A member of a family orchestra at the age of three, he began his study with woodwinds, then turned to piano and by the age of 12 had selected percussion as his major interest. He has been a member of such musical organizations as the Broadway Musical Company of "Mr. Kicks," the Bolshoi Ballet Orchestra and the Vienna Philharmonic.

Two members of the quartet, Paul Dickinson who plays mallets and percussion, and Don Simmons, drummer, are studying toward bachelor's degrees at the American Conservatory of Music in Chicago.

(MORE)

James Dutton Quartet --- add one

Dickinson played three years with the Chicago Youth Orchestra and in 1967 was named principal percussionist with the Illinois Youth Orchestra and the Chicago Civic Orchestra. He has toured with the Chicago Percussion Trio, appeared with the Chicago Artists Orchestra and plays vibes in the American Conservatory Lab Band.

Simmons has earned a reputation as a show drummer in the Chicago area where he has worked in top night clubs at the Ambassador East, the Drake, the Palmer House and the Conrad Hilton.

On a recent tour with the Chicago Percussion Trio, he was applauded for his skill in playing three instruments simultaneously -- chimes, glockenspiel and drums.

Mike Gerry rounds out the quartet with his performances on the electric bass, guitar, tenor and also saxophone, clarinet and flute. He also writes some of the group's arrangements. Although only 20, he has appeared with several nationally known bands, including those of Glen Miller, Peter Palmer, Ray Conniff, Bob Crosby and the King Family Show. He also participates in jazz and rock groups in the midwest and performs with the American Conservatory Lab Band.

to Lubbock news media.

LUBBOCK, July 19 -- Ground will be broken in ceremonies at 11 a.m. Saturday (July 20) to signal the beginning of construction of the School of Law Building at Texas Tech at 19th Street and Indiana Avenue.

Principal remarks will be made by Levelland attorney Alvin R. Allison, member of the Tech Board of Directors and one of the founders of the concept of establishing the Law School.

Lubbock Attorney George W. McCleskey of the firm of Nelson, McCleskey & Harriger will serve as master of ceremonies. Hon. James A. Ellis, judge of the 137th district court, will offer the invocation.

Dean Richard B. Amandes of the School of Law will welcome guests.

Tech President Grover E. Murray and Dean Amandes have jointly invited attorneys, judges, and others in the legal profession to attend the ceremonies.

Indications are that many area attorneys and judges will participate. Dr. Murray, Executive Vice President Glenn E. Barnett and other top administrative and academic officials of Tech will participate in the ground-breaking as will several member of the Board of Directors and other longtime friends and supporters of the University.

"This is an important milestone in the continuing growth and development at Texas Tech," Dr. Murray said, "and we hope as many of our friends, especially those associated with the Bar, will be our guests at the ceremonies."

To reach the site for the ceremony, visitors should enter the campus from the south at Flint Avenue, drive to the service road north of Wiggins Complex and turn west. The site for the Law building is on campus near where Indiana Avenue would intersect if extended across 19th Street.

(MORE)

Ground Breaking --- add one

Dean Amandes said occupancy of the new structure is scheduled for the fall of 1969. When completed, the building will provide space for classrooms, library, faculty and administrative offices for the needs of a school of 575 students and approximately 30 faculty members.

"The planned structure has been designed to maintain dominant features of the best kind of current, conventional legal education while permitting the assimilation and addition of prospective developments," Dean Amandes said.

In reviewing the history of the school, Amandes recalled that the Tech Board voted to create a law school July 15, 1963.

Subsequently the action was approved by the Texas Commission on Higher Education and by the Commission's successor, the Coordinating Board, Texas College and University System.

Instruction began last fall. The School of Law received provisional approval from the Supreme Court of Texas under the Rules Governing Admission to the Bar of Texas in 1967, and final approval in June 1968.

The school met the requirements for provisional approval by the American Bar Association and was so notified by the Council of the Section of Legal Education and Admissions to the Bar in February 1968.

On Dec. 13, 1966, the architectural firm of Harrell and Hamilton of Dallas was selected to design Texas Tech's new law school building, based upon preliminary drawings developed by Howard Schmidt & Associates of Lubbock, consulting architects.

The general construction contract has been awarded to H. A. Lott, Inc., of Houston, builder of several major buildings at Tech. Total cost will be \$3,055,485.

to Lubbock news media.

LUBBOCK, July 19 -- Lubbock High School honor graduate Armando Pena has been named recipient of Texas Tech's \$2,000 Hiram Parks Scholarship for 1968.

Pena, who plans a career in commercial art, will enroll in Tech's School of Arts and Sciences this fall. Under the terms of the scholarship, he will receive \$500 each year for four consecutive years of undergraduate study. He is the son of Mr. and Mrs. Geronimo Pena, 2702 Baylor Street.

The scholarship, established in 1945 by Mr. and Mrs. Hiram Parks of Lubbock, is awarded annually to an outstanding student of Mexican descent. Selection is based on character, leadership potential and the applicant's high school records.

Pena, a straight-A student throughout high school, ranked at the top of his 413-member class. Active in student affairs, he was several times a student council representative, president of his homeroom in his senior year, a member of the National Honor Society and the LHS Art Club and runner up for the title of All Westerner Boy, one of the school's top awards.

He was twice honored by local civic clubs, as Junior Kiwanian in his sophomore year and Junior Rotarian last fall.

"Armando is a versatile and talented student," said a Lubbock school administrator. "He not only excels academically but also is an artist of ability and an enthusiastic athlete."

(MORE)

Armando Pena -- add one

As a guard on the Lubbock High football team, Pena won the title of Westerner Lineman of the Year and several popular citations, including KLBK's Most Valuable Football Player Award.

The Avalanche-Journal named him to the newspaper's All City Team, All South Zone Team for 3-AAAA schools and twice honored him as Lineman of the Week. His scholastic ranking earned him a spot on the All West Texas Academic Football Team.

Pena's early interest in drawing and design was fostered in graphic art and painting classes at Lubbock High where, as a beginning artist, he experimented with various types of techniques, mediums and materials. Examples of his work were selected for display in a statewide Young Artists Exhibit sponsored by the Texas Education Agency in Austin during the past academic year.

He is the second Lubbock resident to receive the Parks Scholarship since 1947, said Dr. Scotti Mae Tucker, Tech professor of foreign languages and chairman of the selection committee.

FOR RELEASE AFTER 8 P.M. SATURDAY (JULY 27)

LUBBOCK, July 27 -- Two gifts of \$25,000 and \$50,000 have been received today by Texas Technological College from well known ranchers in Texas and Oklahoma to be used as matching grants for the establishment of an authentic Ranch Headquarters on the site of the new International Center for Arid and Semi-Arid Land Studies-Museum complex at the university.

The grants will be available when an additional \$75,000 is raised to meet the requirements of the gifts.

A representative of the Mallet Ranch and Dr. and Mrs. W. C. Holden, chairmen of the Ranch Headquarters Planning Committee, interested the Ewing Halsell Foundation of San Antonio in making the initial gift of a \$25,000 matching grant to start the Ranch Headquarters Fund.

Ewing Halsell, son of William E. Halsell, the founder of the Texas and Oklahoma Halsell Ranches created the Ewing Halsell Foundation. His father, a well known early day Southwestern rancher represents the Cattleman in the world famous Peter Hurd mural in the Rotunda of the Museum at Texas Tech.

In 1901, William E. Halsell purchased a part of the original XIT Ranch in Lamb and Castro counties known as the Spring Lake Division, now called the Halsell Spring Lake Ranch. It was on this land that the present day towns of Amherst and Earth near Lubbock were founded by the Halsells and where the Halsell's old friend, the famous cowboy-humorist Will Rogers often visited.

Ranch Headquarters --- add one

Trustees of the Ewing Halsell Foundation who made the seed money grant for the Ranch Headquarters development are Gilbert Denman, chairman, Miss Helen Campbell, LeRoy Denman Jr., William H. George and Mrs. Jean McDonald, niece of Ewing Halsell.

Planned for location on ten acres of the ICASALS-Museum site, the Ranch Headquarters will be an authentic composite of the buildings and facilities used by the early day ranchers in the Southwest. A committee of ranchers and historians have been searching the Southwest for more than a year for representative buildings which can be relocated on the Texas Tech campus as a nucleus for the unique headquarters complex.

The Ranch Headquarters Planning Committee say that the headquarters can be built in two phases. Phase one is scheduled to begin when \$200,000 is pledged and the necessary buildings, equipment and furnishings located.

Total cost of the Ranch Headquarters, which is proposed to be as authentic and attractive an interpretation of ranching heritage as are Sturbridge Village or other famous national historical sites, is estimated at \$400,000.

The committee is still seeking information and photos on early day historic ranches, equipment and furnishings from the 1870 to early 1900 period in Texas, New Mexico, Oklahoma, Arizona and Colorado. Information may be sent to the Office of Development, Texas Tech, Lubbock, Texas, 79409.

LUBBOCK, July 29 -- Experts in garment design and fitting will lead discussions at a series of summer workshops for graduate students sponsored by Texas Tech's Department of Clothing and Textiles, Chairman Gene Sheldon has announced.

Mrs. Priscilla Miller, a member of the New York staff of McCall Corporation, will address sessions of a five-day workshop on "Teaching Clothing Creatively," which opens Aug. 5. Mrs. Miller prepares books, leaflets and magazine articles for the firm's educational department.

She holds a bachelor's degree in Clothing and Related Arts from the University of Rhode Island and a master's in Clothing and Crafts from the University of Tennessee. Before joining McCall's she was an instructor at Syracuse University, in extension work in Massachusetts and a teacher in Manneheim, Germany.

Dr. Thelma Berry of the University of Southern Illinois will conduct a workshop on "Advanced Techniques in Fitting" Aug. 5 through 16.

A recognized authority on problems of fitting garments, Dr. Berry is the author of numerous articles and has taught extensively in this field. She holds degrees from the University of Rhode Island, Syracuse and Columbia University and has done special studies at Brown and New York University.

Classes will meet at 10:40 a.m. in the Home Economics building.

LUBBOCK, July 29 -- Twenty-three employees of the Soil Conservation Service (SCS) and two guests from Tunisia opened a two-week short course on "Irrigation Water Management" at Texas Tech Monday (July 29).

The Tunisian guests are graduate students at Texas A&M who were given permission to attend the course sponsored by the Texas Tech Agricultural Engineering Department and the SCS Training Center at Fort Worth.

"The emphasis here is to determine the amount of irrigation water needed on the land and the measurements necessary to supply that water," Training Center Supervisor Walter E. Chessmore of Fort Worth said. "It all boils down to efficient use of water.

"We will emphasize that if there is unused water in our irrigation systems, there are means of saving it.

"Conservation of water is our main concern, whether it is underground water or from streams or surface lakes.

"We have enough water for most projects," he said, "if we just know how to take good care of it."

Chessmore and Warrent Turkett, assistant Training Center supervisor, are here for the short course. Instructors are SCS engineering specialists Grant Woodward of Lincoln, Neb., Martin Vavra of Austin and Y. E. McAdams of Lubbock.

SCS personnel from 11 states are in attendance. Chairman Willie L. Ulich of the Tech Agricultural Engineering Department said Tech is providing some equipment and facilities for the course.

About half the course will be conducted in the field.

LUBBOCK, July 29 -- Eighteen high school photographers, two teachers and an adult enrolled Monday (July 29) in the 11th annual photojournalism workshop at Texas Tech.

The one-week institute is sponsored by the Tech Department of Journalism and the Southwestern Council of Student Publications.

Workshop Supervisor Ralph Sellmeyer said emphasis will be placed on camera and photo techniques, actual working with news cameras, processing film, printing and picture editing and layout.

Darrel Thomas, student publications photographer, and Milton Adams, student assistant, will serve as instructors.

This week's workshop precedes the main Southwestern Council of Student Publications summer workshop next week designed for student yearbook and newspaper editors and student photographers. More than 450 persons are expected for the main workshop.

LUBBOCK, July 31 -- Another 500 or more prospective Texas Tech freshmen and their parents are scheduled to arrive on campus Thursday (Aug. 1) for two days of orientation and early registration.

Registrar James A. Watkins said Tech officials expect as many or more for this second of seven groups who will receive academic advisement and orientation and complete registration for the fall term with exception of payment of fees.

The first group, estimated at approximately 500 students, attended the first of the conferences Monday and Tuesday (July 29-30).

The students and parents will check into Coleman Hall and pick up catalogs from 10 a.m. to noon Thursday, with academic advisement with major advisors scheduled to begin at 1 p.m.

Students and parents will meet at 7 p.m. Thursday in the Student Union for orientation in student life and student services and activities. Dean of Student Life James G. Allen is in charge of the evening orientation.

Students and parents will meet together the first hour then divide for the second hour. Members of Alpha Phi Omega will serve as hosts to the parents' meeting.

On Friday students will complete academic advisement and registration. They will have identification photos made and they may purchase textbooks for the fall semester if they desire.

Parents will be given guided tours of the campus with members of the Saddle Tramps, student spirit organization serving as guides on Friday.

(MORE)

Freshmen Orientation --- add one

Saddle Tramps have set up a table at Coleman Hall to welcome the visitors and deliver catalogs to the prospective students, all of whom have previously applied for admission.

The conferences will be held at the rate of two per week during the weeks of Aug. 5 and 12 with the final group due Aug. 19-20.

LUBBOCK, July 31 -- Staff Sgt. William K. Belknap Jr. of the Army ROTC instructor unit at Texas Tech was honored in a retirement ceremony Wednesday (July 31).

His completion of three years as personnel administrative specialist at the Tech ROTC unit gave him 20 years of service, making him eligible for retirement.

Sgt. and Mrs. Belknap and their two daughters, Sue, 17, and Rhonda, 7, live at 4512 37th St.

"We will continue to live in Lubbock, at least temporarily," Belknap said. "I don't have any immediate plans." He is an instrument rated commercial pilot and hopes to secure a job as a pilot.

In the brief ceremony in the office of the professor of military science at Tech, Maj. Kenneth Schreiber read the certificate of retirement order. Col. Maxwell Murphy presented the bound certificate to Belknap. Mrs. Belknap attended the ceremony.

Belknap began his service in the Army in May 1946 and has served continuously with exception of about two years when he returned to civilian life to complete his college career at Oklahoma A&M, now Oklahoma State University.

His last assignment before coming to Tech was with U.S. Army Signal Research Unit 10 in Tehran, Iran.

His retirement became effective July 31.

LUBBOCK, Aug. 1 -- The International Center for Arid and Semi-Arid Land Studies (ICASALS) announced Thursday (Aug. 1) that it will join the Tech Union in sponsoring the second annual World Affairs Conference at Texas Tech.

The theme for the conference to be held March 6-8, 1969, will be "Latin America: Past, Present and Future."

Union Program Director Dorothy Pijan and ICASALS Deputy Director Idris R. Traylor Jr. said several major addresses will be presented by distinguished Latin American diplomats, governmental figures and scholars and by United States experts on Latin America.

Many internationally known academicians in the field of Latin American studies will be guests at the conference and will conduct seminars on a wide range of topics pertaining to the past, present and future of Latin America.

"The speakers and participants in the 1969 conference," Mrs. Pijan said, "will be every bit as widely known and as much an authority in their fields as were the distinguished persons who were here for the 1968 conference which placed the emphasis on the Soviet bloc of nations and their influence on world affairs."

History senior Cathy Obriotti of San Antonio has been named director of the 1969 conference with Tom Melton, Fort Worth public administration major, as assistant director. Both helped to plan the 1968 conference.

(MORE)

WORLD AFFAIRS CONFERENCE --- add one

Two other members of the student planning committee, Mary Lyn Anderson of Lubbock and Claire Gillespie of Temple, also were in the 1968 planning group. Other members of the 1969 planning committee are Gary Ashcraft of Sherman, Cathy Cotner of Austin, Carol Clover of Lubbock and Everett Urech of Bellaire.

Dr. Traylor and language Prof. Harley D. Oberhelman are faculty sponsors. Mrs. Pijan, Union program director, will work with both the sponsors and the blue ribbon student committee.

Dr. Oberhelman is chairman of the Department of Classical and Romance Languages and has been active in ICASALS activities. Dr. Traylor, in addition to duties at the International Center, is an assistant professor of history.

Students who register for the conference next spring will be able to select four or five seminars to attend in addition to the major addresses.

Registration is open to Tech students, and student representatives from other universities will also be invited.

"The International Center's 'Focus on the Arts' program during the first five months of 1969 has designated March as the month to feature exhibitions and performances from Latin America so as to complement the World Affairs Conference and to emphasize to students other aspects of Latin American life and culture," Dr. Traylor said.

(MORE)

WORLD AFFAIRS CONFERENCE ---- add two

Some of the topics for the 1969 conference are "Alliance for Progress," "Education - Student Impact - Free University," "Business Intervention - Effect," "Continuing Revolution - Economic, Social, Political, and Religious." "Communism and the Leftist Influence," "Technological Development with Emphasis on Transportation," "Cuban Political Possibilities," "The Impact of ICASALS," "The Role of Military Elites in Latin America" and "Land Reform."

LUBBOCK, Aug. 1 -- Fifty teachers from West Texas Schools will study techniques for instructing children with learning problems Aug. 5-23 at Texas Tech's orientation workshop for new teachers of the mentally retarded.

Highlights of the intensive three-week course will include a fully-equipped two-classroom school set up in campus buildings X52 and X53, a series of lectures by authorities in the field of special education and a daily work session at Project IMPACT, the model library and instructional media center at Maedgen Elementary School.

The main objective of the workshop, said Tech Education Prof. Stanley Fudell, is "to provide basic, practical training for teachers entering the field of special education."

The demonstration school, with a student body composed of youngsters from special education classes in Lubbock Public Schools, will be operated from 9 a.m. until noon each day under direction of Mrs. Bennie Rusk and Mrs. Phyllis Pipkin, both of Lubbock.

Here to lecture at the 1 p.m. afternoon session Aug. 12 will be Dr. Edward L. Meyen, Director of the Special Education Instructional Materials Center at the University of Iowa. Other speakers will include faculty members of Tech's Special Education Department. Lectures will be in Room 108 of the Plant Science Building.

LUBBOCK, Aug. 2 -- Scores of family groups with the members ranging in age from pre-schoolers to great-grandparents have given the Texas Tech campus a tourist atmosphere during recent days.

These groups from many parts of the nation are visiting dormitories, classroom buildings, laboratories, administrative offices and the Union, making a kind of business-vacation of it.

A closer look at each group usually reveals one 18-to 20-year-old with a Tech catalog and a packet of materials under his arm.

This scene will continue through Aug. 20.

The 18-20 age men and women have indicated they plan to attend Texas Tech this fall and they have come for new-student academic advisement, orientation and early registration conferences.

Tech officials estimate 75 per cent of these students who have been invited to participate in the conferences bring along one or more parents, and quite frequently other members of the family come along for the ride and the excitement.

Two such conferences were held this week. Two more are scheduled next week, two the following week, and the final two-day conference period is scheduled Aug. 19-20.

The purposes of the seven two-day early-registration conferences are to permit students who plan to attend Tech to visit the campus with their parents, receive orientation, advisement and counseling and complete all the registration procedures with exception of payment of fees.

Freshmen orientation --- add one

The family of Charlotte Bowers, of Houston thinks it is a great idea.

Her mother, Mrs. T. L. Bowers, says "We're having a great time. Everything has been lovely and we're enjoying every minute of it."

"And the food is great," echoed the father, and repeated the compliment later in the conversation. The Bowers live at 5208 Holly, Bellaire, a suburb of Houston.

"I chose Texas Tech," Charlotte said, "because a lot of my friends from Bellaire High came to Tech and they have influenced me to come here." She plans to major in elementary education.

"As for registration procedures, I have found them really well organized, and we haven't had a bit of trouble learning what to do and where to go," she said.

"I very definitely intend to be here this fall and study voice," said Mary Jane Rose, daughter of Mr. and Mrs. Rex Rose of 505 N. Gray, Pampa. "I have an older brother, Rex Wheatley Rose, who will be a senior this year. He's an art history major here at Tech."

"Secondary education will be my major," said Betty Brown of El Paso's Coronado High. She is the daughter of Mr. and Mrs. J. Dudley Brown of 1200 Galloway, El Paso, who arrived for the second day of the early registration conference.

Everything has gone very smoothly for me and I have found everybody helpful in the counseling and advisement sessions," she said. She plans to major in secondary education with an English specialty.

The third group of prospective freshmen will arrive on campus Monday morning (Aug. 5) for the two days of orientation, academic advisement and registration conferences.

(MORE)

Freshmen orientation -- add two

In all the conferences, the students spend the first morning in checking into living quarters at Coleman Hall and picking up catalogs.

Members of the Saddle Tramps, Tech spirit organization, welcome the visitors at Coleman Hall, then take the parents on tours of the campus on the second morning.

Prospective students spend the first afternoon in academic advisement.

Parents and students meet together from 7 to 8 p.m. the first day in the Union for orientation.

Separate programs of orientation and information are prepared for students and parents during the second hour.

The second day is devoted to complete academic advisement and registration, picture taking for identification, and purchase of textbooks if students desire.

LUBBOCK, Aug. 2 -- More than 450 high school newspaper and yearbook editors and photographers and approximately 30 advisors are expected to attend a student publications workshop at Texas Tech Sunday through Friday (Aug. 4-9).

The Tech Journalism Department will host the Southwestern Council of Student Publications Summer Workshop with registration scheduled from 2 to 6 p.m. Sunday.

Workshop Coordinator W. E. Garets of the Journalism Department said the visiting students and faculty will attend an opening assembly at 8:30 a.m. Monday in the Student Union.

The group will be divided into newspaper, yearbook and photography sections. Prof. Ralph Sellmeyer will serve as photo supervisor, Prof. Bob Rooker of Tech as newspaper supervisor and Jerry Dixon of Dallas, yearbook supervisor. Dixon is with Taylor Publishing Company.

Other members of the workshop faculty include Norman Dowdy, Ken Varden, Chester Sullivan and Floyd Hobson of the Taylor Publishing Company, Carolene English of El Paso, Chet Hunt of the University of Texas, and Darrel Thomas, Milton Adams, Dorothy Walker, Rosemay Title and Bill Dean of Texas Tech.

The students will attend lectures and demonstrations during the days, with recreation and entertainment programs planned for the evenings.

The workshop concludes Friday afternoon with presentation of certificates and awards.

LUBBOCK, Aug. 2 -- Texas Tech President Grover E. Murray announced Friday (Aug. 2) that the Board of Directors has approved a contract for paving parking areas which will add more than 500 spaces to the campus.

The contract went to Pioneer Pavers, Inc., of Lubbock on a low bid of \$109,195.80. Additional spaces based on a unit price will add an estimated \$3,200 and curb and gutter work in connection with moving two entry stations will increase the total by \$1,922.

Tech's Maintenance Department will move two entry stations at an approximate cost of \$1,000, hiking the estimated cost of the entire project to \$115,317.80.

Completion of two of the major paving projects is scheduled for Sept. 15, two others Oct. 15.

Two of the areas to get permanent topping are for reserved parking. Fees for reserved spaces are \$20 per long session and \$8 for summer sessions.

The paving contractor has begun topping the area between Jones Stadium and University Avenue, with completion scheduled Sept. 15, the day dormitories open for the fall term and in time for the first Red Raider home football game Sept. 21 against Cincinnati.

(MORE)

Parking ... add one

This area has been used for parking but has not been topped.

Work will begin Monday (Aug. 5) on paving parking areas in the vicinity of Wiggins Complex to accommodate at least 150 additional vehicles. That completion date is Sept. 15.

Two reserved parking areas to handle 355 vehicles will be completed by Oct. 15.

One area to accommodate 218 cars lies immediately south of the Math-Foreign Languages Building and the other to handle 137 vehicles is situated just east of the new Business Administration Building and southwest of the Meats Laboratory and Veterinary Science Building.

Traffic Parking Counselor Frank C. Church said these new reserved parking lots are available to faculty first at the regular rate of \$20 per long session and \$8.00 per summer session.

These new areas will increase total parking facilities on the Tech campus to handle approximately 9,200 vehicles. The figure does not include parking areas such as those for the Bookstore, Infirmary and for two-wheeled and special purpose vehicles.

The Broadway entry station will be moved to the west end of the mall and the station near the Meats Laboratory will be moved westward on 15th Street to near Flint Avenue.

This release was distributed 7/22/68 to
all Lubbock media & Continental Oil Co.

LUBBOCK, July 22 -- Continental Oil Company officials from Houston and Westlake, La., have delivered a \$2,000 check to the Texas Tech School of Engineering, Dean John R. Bradford announced Monday.

The money, Dr. Bradford said, will go into the professional development program which helps to finance travel and expenses of faculty to seminars, institutes and association meetings which help keep them abreast of developments in their educational fields.

"It is only through such help as this," Dr. Bradford said, "that we can hope to help our faculty attend and participate in activities which keep them in touch with other educators and industrial leaders.

"It is vital that engineers in education and industry maintain a close relationship because of the inter-dependence of the two groups."

The contribution from Continental is part of a continuing program of support from that company to Tech's engineering school.

The check was delivered by R. M. Botkin, Louisiana district manager for Continental Pipe Line Co.; Jim E. Barnes, general manager of the Continental Oil Company's natural gas and gas products department; and F. Wayne Packard, staff engineer for planning and new products in the natural gas and gas products department of Continental's Houston offices.

Botkin is a 1966 industrial engineering graduate from Tech whose home originally was Hereford. Packard is a 1967 Tech chemical engineering graduate from Temple.

LUBBOCK, July 22 -- A Texas Tech ex-student with a successful career in city government and civil engineering has begun to return interesting and valuable documents to the Southwest Collection at Texas Tech for public use.

In addition to his personal papers former City Manager Roy L. Dunlap of Killeen has placed numerous records pertaining to Killeen municipal affairs in the Collection.

"The materials donated by Dunlap not only mirror his life since 1951," Collection Director Sylvan Dunn said, "but also concurrently picture the development of the town of Killeen. Papers now on file include Dunlap's personal papers and Killeen municipal records dating back to 1954."

Economics Prof. Vernon Clover said the records will be of special value to students in Business Administration, particularly those with an interest in and majoring in public administration.

"Students whose interests lie in municipal government in the fields of purchasing, budgeting, finance, personnel research and management will find the Dunlap and Killeen materials a productive source for research and study," Dr. Clover said.

(more)

Dunlap's Donation . . . add one

The Killeen records consist of City Council agendas and minutes, City Planning Commission correspondence, minutes, maps and correspondence involving the city manager's office.

Also available for inspection and study are pictures of Killeen dating back to 1964 and several complete scrapbooks containing newspaper clippings pertaining to Dunlap and the city of Killeen since 1921.

The former city manager has included in his donation papers relating to the Snyder Rotary Club during the time of his presidency and the Texas City Managers' Association.

Dunlap graduated from Texas Tech in 1949 with a Bachelor of Science degree in civil engineering. Eight months later he was employed by the City of Lubbock and within three and a half years he became assistant design engineer.

During the next three years he worked in Snyder as city engineer and in Hamlin as city manager. He returned to Snyder in 1955 as city manager, remaining there eight years. In 1962 he became city manager of Killeen, a position he held until he was called to active duty in May 1968 to become commanding officer of the United States Naval Mobile Construction Battalion 22.

Dunlap was born in Canyon and graduated from Crosbyton High School.

This release was distributed 7/22/68 to all Lubbock media and regional dailies.

LUBBOCK, July 22 -- More than 500 students who have indicated they plan to enroll in Texas Tech this fall as new students will attend the New-Student Academic Advisement, Orientation and Early Registration Conference Monday and Tuesday (July 29-30).

More than 75 per cent will bring along one or both parents for the two-day conference, one of seven to be held at Tech this summer for new students.

"The young visitors to the campus," said Registrar James A. Watkins, "will be able to complete their registration up to paying fees and will be permitted to do that later this summer so that all they will have to do this fall is pick up their class tickets and start to school."

"During their visit here, we take the students through all the procedures, accompany them on visits to the schools of their choice, give them counseling, and in other ways acquaint them with life at Texas Tech.

"They and their parents will be housed in air-conditioned Coleman Hall for the early registration conferences."

Each student is assured individual attention in such matters as academic advisement, orientation and registration.

Only students who completed their admission are invited to participate in one of the seven conferences. Documents required include application, health data blank, high school transcript and the College Board S. A. T. scores, Watkins said. Students invited to attend one of the seven conferences may choose the one he prefers if it is not already filled.

Other conferences are scheduled for Aug. 1-2, Aug. 5-6, Aug. 8-9, Aug. 12-13, Aug. 15-16, and Aug. 19-20.

Coleman Hall The visiting students and their parents will check into the residence hall and pick up general catalogs from 10 a. m. to 12 noon on the first day of the conferences. Academic advisement with major advisors will start at 1 p. m. on the first day.

(more)

Academic Advisement . . . add one

Students and parents will meet at 7 p. m. on the first day of the conference for orientation in student life and student services and activities in the Student Union Ballroom. The evening orientation program will be directed by Dean of Student Life James G. Allen.

The second day will be devoted to complete academic advisement and registration. Students will have their identification photos made and may purchase textbooks for the fall semester if they desire.

Tech Bookstore Manager Conner Cole said students would be permitted to place books in lay-away if they wished.

Dean Allen said that at the evening orientation program the parents would meet with students for the first hour.

During the second hour, parents will be told of the Texas Tech Development program with members of Alpha Phi Omega serving as hosts. The Lubbock Chamber of Commerce also will have a representative at the meeting to tell visitors about Lubbock and its plans for the future.

On the second morning, parents will be given guided tours of the campus with members of the Saddle Tramps, student spirit organization, serving as guides.

This release was distributed 7/23/68 to
all Lubbock media.

LUBBOCK, July 23 -- Twenty-four employees of the Soil Conservation Service from 11 Southern states and Puerto Rico will attend a two-week irrigation short course at Texas Tech beginning Monday (July 29).

Chairman Willie L. Ulich of the Tech Agricultural Engineering Department said the course is sponsored jointly by the SCS Southern Training Center, Fort Worth, and Tech.

Warren Turkett, assistant head of the Fort Worth training center, will be the coordinator for the course. Instructors will include SCS engineering specialists Grant Woodward of Lincoln, Neb., Martin Vavra of Austin and Y. E. McAdams of Lubbock.

About half the course will be conducted in the field and will be concerned with water management. The participants will be housed at the Plainsman Motor Hotel.

Dr. Ulich said the Agricultural Engineering Department will provide some equipment and facilities for the short course.

LUBBOCK, July 23 -- Approximately 25 high school teachers and students will attend the early session of the 11th annual Southwestern Council of Student Publications photo workshop at Texas Tech Sunday through Friday (July 28-Aug. 2).

Registration is scheduled for Sunday afternoon in the Journalism building, according to the workshop supervisor, Prof. Ralph Sellmeyer of the Journalism Department.

The visiting teachers and students will receive instruction in camera techniques, photo techniques, processing and printing, picture editing and layout for newspapers and yearbooks, and shooting of groups and formal pictures.

The workshop will conclude with the presentation of awards Friday afternoon.

Workshop assistants will be Darrel Thomas and Milton Adams. Thomas is staff photographer for student publications, Adams head student photographer.

The following week Aug. 4-9 the Student Publications Summer Workshop will be held with 450 to 500 persons expected to attend. It will be divided into yearbook, newspaper and photo sections.

Journalism Chairman W. E. Garets is workshop coordinator.

Others who will participate in instruction and supervision include Profs. Sellmeyer and Bob Rooker of Tech; Thomas, Adams, Jim Davidson, Dorothy Walker, Rosemary Title and Bill Dean, also of Tech, Jerry Dixon, Norman Dowdy, Ken Varden, Chester Sullivan and Floyd Hobson, all of Taylor Publishing Company of Dallas; Carolene English of El Paso and Chet Hunt of the University of Texas.

LUBBOCK, July 24 -- Noted puppeteer Daniel Llords will bring his marionette show for adults, Llords' International Concerttheatre, to Texas Tech for a one-performance run August 9.

The performance, sponsored by Tech Union as a highlight of its summer season, will begin at 8 p.m. in the Union's Coronado Room. It will be open to the public without charge.

Llords, who has been called "the Segovia of the puppet strings," will present his miniature actors in a costumed production featuring dramatic scenes ranging from Shakespeare's "Macbeth" to Stravinsky's "The Firebird."

A talented choreographer, musician and director, he is credited with being the first marionettiste to recognize the rich potential of the puppet theater as a medium for adult entertainment when coordinated with major symphonic works.

Llords' International, according to one critic, "actually is not a puppet show or a marionette show. It is a spectacular tailored for mature appreciation."

In "The Firebird," Llords manipulates the strings to bring to the stage a Russian folktale relating to a simple story in which Goodness, represented by the iridescent Firebird, triumphs over Evil, personified by the ogre, Kastchei.

"Macbeth," a tale of terror in four colors performed to movements from Hector Berlioz' "Symphonic Fantastique," recreates Macbeth's encounter with the witches, the murder of King Duncan, the sleepwalking scene and other high moments in a plot which reaches a climax as "Birnamwood marches to high Dunsianane."

Puppets --- add one

Mendelssohn's Fourth Symphony provides the mood for "Holiday," a musical montage suggested by the pages of Holiday Magazine. Other items in Llords' repertoire include "Commedia Dell'Arte," a harliquinade performed to Jacques Ibert's "Divertissement," and "Moments Concertates," a series of mini-classics ranging from Mozart to modern.

The one-man marionette theater differs in another respect from the more conventional puppet show. The stage is so constructed that Llords manipulates his characters in view of the audience, using a variety of special effects that add much to the mood and atmosphere of each production.

A native born American, Llords has been in the theater almost all his life. He made his debut at the age of seven playing a Mozart piano concerto as a guest soloist with a professional symphony. He has appeared in 23 motion pictures, with such celebrities as Judy Garland, Jack Benny, Charles Laughton, Maurice Chevalier, Bing Crosby, Ruth St. Dennis, and Gracie Fields. He has been a featured singer on radio and a designer for leading theatrical and opera companies.

Llords makes and dresses all of his puppets, some 700 characters and animals, which constitute the "full strength of the company." In two around-the-world concert tours, he has performed at several international festivals, given shows in more than 30 nations, and has been the subject of magazine articles in many languages.

LUBBOCK, July 24 -- Texas Tech officials have announced that more elaborate plans than ever before are being made to handle a record number of foreign students this fall.

The plans call for additional courses of instruction to help international students bridge the language gap, and an orientation program to help them adjust to American campus life and to fit into the social, cultural, and technical community life.

Tech's advisor to international students, Jon Hartshorne, (cq) said today he expects approximately 150 foreign students from as many as 40 countries on campus in September. This last year the figure was 119.

"They come from Latin America, Europe, the Middle East and North Africa, Middle Asia and the Far East," Hartshorne pointed out.

"The Latin American group includes students from Mexico to Argentina. The largest group of Europeans are West Germans.

"The Middle East and North Africa area includes the Arab world. The Middle Asia group are mostly from India and Pakistan. The countries in the Far East which send most students here are Taiwan, Japan, Thailand, Australia and Korea."

More than half are graduate students, with most of the foreign students attending the Schools of Arts and Sciences, Engineering and Business Administration, Hartshorne said.

Four English language courses for international students, two in writing and reading and one in speaking and listening, will be offered starting with the fall semester.

Prof. Faye Bumpass, who has served with the U.S. State Department and other governments as consultant on English as a second language, is consultant for the new program. Teachers will be Margaret Tucker, formerly chairman of written and oral English courses at the University of Puerto Rico, and Speech Prof. Helen A. Lindell.

Foreign Students --- add one

Expanded activities of the International Club on campus are scheduled to get underway with arrival of the new students this fall.

Abdurrahim Ashour of Libya is the new president of the club.

Ashour joined with Hartshorne in emphasizing that the International Club is not only for foreign students, but also for American students. Its purpose is to help bridge the communications and social gap between foreign students and Americans.

"I think we have failed to emphasize enough in the past that American students are invited, even encouraged, to join the club because it will be of benefit to them as well as our guests from other nations," Hartshorne said.

A new organization, tentatively called the Coordinating Board for International Student Affairs, will serve as a clearing house for ideas, program plans and other activities.

Hartshorne said it will be made up of a group of interested persons and families in the community to pioneer cross cultural programs involving international students. Rev. Clements Lamberth of John Knox Presbyterian Church is chairman.

"We have had a host-family program in effect in Lubbock for several years," Hartshorne said, "and it has proven very effective. But this coordinating Board should greatly expand community programs for foreign students."

The office of advisor to international students announced a special orientation program, lasting more than a week for foreign students. It will begin Sept. 12.

"We hope during that week to learn how to anticipate the needs and requirements of the individual foreign students," he said. "We will try to help them actually become 'involved' in their new academic, social, cultural and technical environment at Tech and in Lubbock."

Hartshorne, a native New Yorker, has devoted full time to the office of advisor to international students at Texas Tech since last Sept. 1.

Foreign Students --- add two

He attended high school at Hamilton, N. Y., received a Bachelor of Arts degree from Lawrence University, Appleton, Wis., and later a Bachelor of Divinity degree from Yale University in 1967.

He is a member of the Episcopal Church and served as interim minister in a Congregational church in Hayden, Colo., in the summer of 1965.

He taught English at the junior high and high school level near Jerusalem during the 1965-66 term as an internship while a divinity student at Yale.

He also spent some time between his sophomore and junior years in college traveling in Europe where he picked up a speaking and reading knowledge of German.

"I find working with international students a very satisfying assignment," he said. "There are times when these students, most of them outstanding or they would not be here, really educate me about their country.

"I would like other people to have the same opportunity, and my work is designed with this end in mind."

Hartshorne also announced that effective this fall he will serve as an advisor to American students going abroad for work, study or travel.

"We are now in the process of ordering and receiving materials which will be most helpful in advising our own students about opportunities for study and travel abroad and we will welcome the opportunity to counsel with them.

Hartshorne is the advisor and counselor for foreign students after they have been admitted. What many people do not know, he said, is that for a year Dr. Maryanne Reid has served on a part time basis as director of foreign student admissions.

She handles all the correspondence and transactions with international students until they are admitted. Then they are referred to the advisor's office.

LUBBOCK, July 25 -- The appointment of Jack F. Maddox, New Mexico utility company executive, and Charles D. Mathews, Dallas attorney and freight line executive, to the Texas Tech Athletic Council was announced Thursday (July 25).

Tech President Grover E. Murray said the appointments will become effective Sept. 1 and will be for one-year periods. Maddox and Mathews will serve as at-large members replacing C. I. Wall of Amarillo and Marvin Shurbet of Petersburg on the council.

"We are indeed fortunate to have men of this caliber working for Tech and its athletic program," Dr. Murray said. "We look forward to our association with them in the growth and development of our intercollegiate athletic activities.

"Too, the university is most appreciative to Mr. Wall and Mr. Shurbet for their service on the council."

"I am honored to have an opportunity to serve on the Athletic Council," Mathews said. "I have served on the board of directors of Texas Tech and I love the institution. I feel even closer to it now that I have a daughter in school there."

President of Redball Motor Freight, Inc., since June of this year, Mathews served on the Tech board from Aug. 1, 1962, until 1966.

His daughter, Betty Mathews, will be a junior at Tech this fall.

Mathews grew up at Floydada. He attended the University of Texas, graduating with a law degree in 1937. At the University, he received many honors and was president of the senior law class of 1937.

He practiced law in Lubbock immediately after receiving his law degree, moving to Austin in 1943. He served in World War II in Europe and was prosecutor at war crimes trials in Dachau of former German SS troopers.

Athletic Council -- add one

In 1947 he was appointed executive assistant attorney general by Price Daniel and in 1950 he was made first assistant to the Texas attorney general.

His appointment to the Tech Board of Directors in 1962 was made by Gov. Daniel. At that time Mathews was vice president and general council for the motor freight firm he now heads as president.

Maddox, a Texas Tech ex-student, is chairman of the board and president of the New Mexico Electric Service Company with headquarters in Hobbs. He holds the same positions with the Cochran Power and Light Company.

A native of Menard, Maddox was graduated from Tech with a degree in textile engineering in 1929.

In addition to land holdings in southeast New Mexico, Maddox is a director and member of the executive committee of the New Mexico Bank and Trust Company; president and director of the Industrial Development Corporation of Lea County; chairman of the board of Llano, Inc., an industrial gas supplier in Hobbs; vice president and director of Hobbs Houses, Inc., and a director of Clyde Fabrics, Inc., of Newton, N. C.

Maddox served as president of the Texas Tech Foundation from 1965 to 1967 and president of the Ex-Students Association in 1953. In 1967, he was the recipient of one of the first Distinguished Alumnus awards from Tech.

Other members of the Athletic Council are Prof. T. L. Leach, chairman; and Drs. J. William Davis, Paul Woods, Robert Rouse, Arthur Draper and Philip Johnson of the Tech faculty, Vice President for Academic Affairs, S. M. Kennedy, ex officio member, G. C. Dowell of Lubbock, alumni representative; and Mike Riddle, student body representative.

This is a special release sent only to Hamilton, N.Y., Lawrence University, Appleton, Wis., and Yale University.

LUBBOCK, July 26 -- Jon Hartshorne, who holds bachelors degrees from Yale and Lawrence University, Appleton, Wis., has completed plans for a record number of foreign students at Texas Technological College this fall.

Since last Sept. 1, Hartshorne has devoted full time at Texas Tech to his duties as advisor to international students.

"I find working with international students a very satisfying assignment," he said. "There are times when these students, most of them outstanding or they wouldn't be here, really give me a liberal education."

In preparing for the estimated 150 foreign students at Tech this fall, Hartshorne has announced plans for additional English courses to help foreign students bridge the language gap, an expanded orientation program to help them adjust to American campus and community life, a more active International Club, and a new Coordinating Board for International Student Affairs made up of interested Lubbock and area community leaders.

Hartshorne received a Bachelor of Arts Degree from Lawrence. His Bachelor of Divinity Degree came from Yale in 1967.
