## FOR IMMEDIATE RELEASE

CONTACT: Jane Brandenberger

The Board of Regents of Texas Tech University and School of Medicine will meet in called session Friday (July 8), 9 a.m., in the Regents' Suite of the Administration Building.

Chairman Judson F. Williams of El Paso said that the Regents will consider several routine matters on behalf of the university and medical school.

An executive session is scheduled immediately following the call to order and invocation. At 10:05 the Board will reconvene on behalf of the university.

Among items to be considered are approval of an interagency cooperation contract between the university and medical school for continued use of Thompson Hall and one covering current operating services provided by the university for the medical school over the next biennium.

The Regents will also discuss renovation of equipment for energy conservation, renovation and extension of the campus fire alarm system, remodeling of the old Library Building, planning for renovation of the Chemical and Petroleum Engineering Buildings to provide storage for hazardous materials, renovation of the Killgore Center at Amarillo and the Junction Center at Junction, acquisition

-more-

called session of tech regents / add one

of certain real property, and plans and specifications for construction of a storage warehouse.

Shortly after 11 the Regents will convene on behalf of the School of Medicine.

They will consider several routine financial matters, as well as designation of the State National Bank of El Paso as depository bank for the medical school's Regional Academic Health Center at El Paso.

Adjournment is set for 11:30 a.m.

LUBBOCK--A \$35,000 gift to the Texas Tech Ex-Students Association Endowment Trust by Mrs. Grace Ford of Moses Lake, Wash., has established a scholarship fund in honor of her late husband, Thomas A. Ford.

Ford, a 1935 engineering graduate of Texas Tech, died in February at the couple's Moses Lake home.

"Both Mr. and Mrs. Ford expressed an interest sometime ago in helping deserving young people receive an education," said Wayne James, executive director of the association. "We are quite pleased that Mrs. Ford has chosen to honor her husband's memory by creating these scholarships."

Under terms of the gift to the endowment trust the principal is to be invested and the interest used each year to finance the scholarships. Ther details of awarding the scholarships have not been determined, James said.

W. K. (Bill) Barnett, president of the Ex-Students Association, said, "This is a generous, valuable and meaningful act by Mrs. Ford, and it is deeply appreciated by all of us in the association and the university.

"Most noteworthy is the fact that Texas Tech and its former students are now mature enough to see our endowments truly grow.

LUBBOCK--Texas Tech University Agricultural Engineering Chairperson Marvin J. Dvoracek is one of five persons designated "Teacher Fellow" this year by the National Association of Colleges and Teachers of Agriculture (NACTA).

Since coming to Texas Tech, Dvoracek has been presented the AMOCO Distinguished Teaching Award and selected Outstanding Teacher in Agricultural Engineering by the Tech Student Branch of American Society of Agricultural Engineers for 1972-76, one of five outstanding teachers by Mortar Board for 1975-76 and Outstanding Engineering Professor in 1968, '75 and '76 by Tau Beta Pi.

Dvoracek was nominated by Dr. J. Wayland Bennett, director of industry relations for the College of Agricultural Sciences. The nomination was supported by evaluations by colleagues and current and former students.

The award was presented at the recent annual convention of NACTA, attended by Dvoracek and Bennett, at Penn State University. Bennett is a past president of NACTA.

LUBBOCK--In a time when even craters on the far side of the moon have been mapped and named, it may seem unlikely that there are still insects in West Texas and New Mexico that have never been catalogued. Yet finding one is not unusual, according to Dr. David E. Foster, curator of the entomology collection at The Museum of Texas Tech University.

Dr. Foster recently identified and will be responsible for naming over 20 previously unnamed species of the checkered beetle.

Most of what is known about insects concerns those that are important economically, like the boll weevil, medically, like the mosquito, or esthetically, like the butterfly. One way entomologists fill in gaps of knowledge about insects is with collections like the one at The Museum, which reflects distribution and rate of occurrence of insect life in the arid and semi arid regions of West Texas and New Mexico.

Insects are not usually on lists of endangered species, said Foster. But because some depend on certain plants for their existence, if the plants become extinct, they will also.

"It is possible," he said, "for unclassified insects to become extinct without our ever knowing they existed. Entomology collections like those at The Museum can prevent that."

-more-

entomology collection / add one<sup>6</sup>

Information collected on the ecological niche of each species will be preserved in the collection. Like other collections in the biological, physical and social sciences housed in The Museum, the entomology one serves as an index of man's effect on a region, he said.

About 250,000 specimens are included, and new ones are being added at the rate of 40,000 to 50,000 each year. Most are contributed by faculty members or students of the university.

Collectors use a variety of techniques. Because many insects are associated with plants, collectors examine plants and capture insects with aerial nets. Those active at night are lured to traps with ultra-violet light. Some are subterranean, so must be gathered in soil samples. Others are aquatic and must be collected in water.

To acquire insects associated with certain kinds of wood, Foster said he sometimes cuts pieces of wood in the field and brings the pieces back to the laboratory to store in boxes. Then he checks in the boxes periodically "to see what's emerged."

Insects are easy to preserve, said Foster, but they must be carefully handled because they become very brittle and fragile when dry.

Insect specimens in The Museum are kept in cases to protect them from dust, humidity and light. Dust obscures hairs and scales, humidity encourages growth of fungus, and light induces color changes, Foster said. Each case contains a repellent to prevent destruction of the specimens by live insects.

-more-

entomology collection / add two'

The Texas Tech collection is relatively new and therefore small. Having a small collection at this point is advantageous in that about one-third of it already has been recorded for computer processing and new additions can be computerized as they come in, he said.

Entomology students Sandra Benbow of Lubbock and David Ralston of Dallas are assisting Foster.

The entomology collection at The Museum is intended primarily to be a teaching and research tool, but it is made available to any qualified individual who wants to use it for scientific purposes.

LUBBOCK--Employment of new coaches for basketball and track and field teams of Women's Athletics at Texas Tech University was announced Wednesday.

Beta L. Little of San Angelo will coach the track and field team, and Thelma (Gay) I. Benson the basketball team.

Women's Athletic Director Jeannine McHaney commented that "Little is one of the few coaches who comes to us with college coaching experience." She has been instructor of physical education and volleyball and track and field coach at Angelo State University.

The women's volleyball team, initiated last year in the West Zone, placed fourth. The track team finished second behind Abilene Christian University, which position qualified eight girls to compete in the state meet. That group compiled sufficient points to place eighth in state and qualified two Tech stars for national competition.

"Benson brings with her a great deal of national and international playing experience and an extremely broad understanding of basketball strategy and technique," McHaney said. "I feel she is the person to build a very strong women's basketball program here."

Benson is former girls' athletic director and coach for all girls' sports at Slaton High School, where she compiled 15 years of experience.

-more-

new coaches / add one

With a basketball record of 337-97, she has coached teams to 11 district, one regional and one state championship title.

Slaton Tigerettes volleyball teams were district runners-up every year since Benson's employment in 1962. The track team also captured district championship honors.

Benson played college basketball for Clarendon Junior College, Northeastern Oklahoma A & M Junior College and Wayland Baptist College. She was a member of the National Amateur Athletics Union team in 1958, played in the Pan American Games and served as team captain of the U. S. team when they toured the Soviet Union. She was also named All-American.

Benson is the wife of Franklin Benson, 1520 West Lynn Street, Slaton. Little resides at 4902 Greenbriar, Apt. 100, San Angelo.

LUBBOCK--Registration for the second summer term of the 1977 summer session at Texas Tech University will be conducted from 7:30 a.m. to 6 p.m., Monday (July 11), in the Lubbock Coliseum.

Late registration will continue through Friday (July 15), the fourth class day, from the Registrar's Office in West Hall and in departmental offices.

The second summer term enrollment is expected to be approximately that of last summer's second session, 5,859. The second summer session ends Aug. 20.

The first summer session comes to an end officially this Saturday (July 9).

LUBBOCK--Prehistoric man did not live by berries alone. Nor was he satisfied with killing and eating only small, relatively docile animals.

Early man filled his belly often with the larger, plentiful, relatively peaceful, now extinct bison. Archeologists, working from the Texas Tech University base, have found new evidence, a stone weapon-tool, re-confirming the bison hunting activity of man in the region some 9,500 to 10,000 years ago (in the Plainview period).

But early man was not content with a few bison for his meals.

Ambition, or maybe just ordinary tooth-and-nail, fight-to-the-death survival, prompted other prehistoric men to take on one of the most aggressive, meat-eating mammals of their time.

Some 11,000 to 12,000 years ago Clovis men hunted, killed, butchered and ate the short-faced bear (*Arctodus*), evidence now indicates.

"They must have been very brave, hungry or foolhardy to take on that bear. Or maybe it was just a case of kill or be killed," says Lubbock Lake Site director Eileen Johnson, zooarcheologist in charge of the Northwest Lubbock site.

-more-

"Hunting a short-faced bear had to be more dangerous than hunting a grizzly. The now extinct bear quite simply wasn't a berry or fish eater. He was an extremely active, aggressive carnivore, approximately one and a half to two times larger than a grizzly."

Johnson and her staff have uncovered bones and a five-inch canine tooth that belonged to a slaughtered short-faced bear.

"This is the first time that this fossil bear has been found in association with man," Johnson said.

The discovery has sparked the curiosity of one of the world's foremost authorities on fossil bears. He is Dr. Bjorn Kurten, a member of the faculty of the University of Helsinki in Finland. Johnson will furnish Kurten detailed information on the bear bones and tooth.

The archeologists, however, are equally excited about the stone tool find from a later prehistoric time, the Plainview point, only the second such point ever found at the Lubbock Lake Site dig.

What's so special about the chert (flint) point? The new find confirms previous discoveries of man's activities in the lake site area some 10,000 years ago, Johnson indicated.

The point, first used to kill bison, was then re-fashioned by Plainview man to butcher the slaughtered animals, the archeologist said.

Johnson and her staff are adding to present knowledge of man's prehistoric past on the southern High Plains. The lake site is in an old meander bend of the Yellowhouse Draw and has been sporadically explored since 1939.

lake site / add two

The goal of research at the site is to map its cultural sequence as well as to interpret geologic and environmental changes revealed in the earth layers deposited over the centuries. The National Science Foundation, the Texas Historical Commission and the Center for Field Research of Educational Expeditions International Earthwatch are supporting the work.

cutline-----

PROOFS OF ANCIENT KILLS--Two bones from an extinct bear, one of the bear's canine teeth and a stone weapon-tool were unearthed by archeologists at the Lubbock Lake Site in recent excavation work. The bear bones and tooth came from a slaughter site used some 11,000 to 12,000 years ago by prehistoric man. Discovery of the bear remains marks the first time that a fossil short-faced bear has been found in association with man, according to project director Eileen Johnson of Texas Tech University. The stone tool, a point, was used by man some 9,500 to 10,000 years ago not only to kill bison but also to butcher them. (Tech Photo)

LUBBOCK--German food, music and dancing for the whole family are some of the German Night activities at the Texas Tech University Center Ballroom scheduled for July 20, at 6:30 p.m.

Music will be by Pehl's Oompah Band from Fredericksburg. Led by 82-year-old Felix Pehl, the eight-member band will play polkas, waltzes and schottisches.

The group has performed at numerous festivals over the state, as well as in Washington, D.C., for the bicentennial celebration.

The evening meal will include sausage, potato salad and other German foods.

Cost for the meal and performance is \$4 for adults and \$2 for children, and for the performance only \$2.

More information can be obtained from Mary Beth Boring, Cultural Events advisor, at 742-3611.

LUBBOCK--Two national experts are in Lubbock to assess the community's need for long-term work opportunities for handicapped persons.

Texas Tech University's Research and Training (R&T) Center in Mental Retardation is sponsoring the assessment by Mike Gallazan, director of Jewish Vocational Services in Milwaukee, and Dr. Jerry Lorenz, University of Southern Illinois associate professor of Rehabilitation Administration and Services.

To prepare the experts for their visit, personnel representing 20 Lubbock mental retardation agencies responded to an R&T Center survey in May. The agencies responded that the community needs additional work settings for handicapped citizens. The agencies estimated that some 1,500 persons in the Lubbock area could benefit from such services. These survey results were sent to Gallazan and Lorenz prior to their two-and-a-half-day visit, to prepare them for their assessment.

While in Lubbock, Gallazan and Lorenz will inspect the four local work programs and assess the need for additional work settings for extremely handicapped persons.

Currently, there are four work programs for handicapped people in Lubbock. They are at the Lubbock State School, the Lubbock

-more-

handicapped assessment / add one

Regional Mental Health and Mental Retardation Center, Goodwill Industries of Lubbock, Inc. and Southwest Lighthouse for the Blind.

Most of the 250 handicapped persons who work at these programs are mentally retarded, and many of them eventually enter competitive jobs.

The work program proposed by the local agencies surveyed would serve persons with a variety of conditions, such as cerebral palsy, orthopedic disorders, as well as mental retardation. The program would be a long-term work project, designed for persons who need to remain in a sheltered, non-competitive work setting. Gallazan and Lorenz will evaluate the local agencies and determine whether the program proposed is acceptable.

The consultants' visit will include work sessions with professionals, volunteers and handicapped citizens. They will also inspect Lubbock programs for the handicapped.

Based on their findings, Gallazan and Lorenz will present their recommendations Friday (July 8). The meeting will be held in the Board Room of the Administration Building of the Lubbock Independent School District, 1628 19th St. The public is welcome.

Recommendation for the work program assessment emerged from an informal citizens' group led by Marian Moss of Lubbock, member of the board of directors of the Southwest Lighthouse for the Blind and the advisory committee of the Mental Health and Mental Retardation Center.

LUBBOCK--"The longest party in the history of the Southwest Theatre Conference" (SWTC), will begin Aug. 13 when approximately 130 persons will travel by rail to Chicago for the American Theatre Association (ATA) convention.

Fifteen Texas Tech University students and staff members will be among the travelers from Texas.

The trip is designed to save transportation and other costs, according to Ginger Perkins, Texas Tech business manager for theatre arts and "special Amtrack coordinator" for the SWTC.

Conventioneers will board the Lone Star Amtrack train in Houston, Fort Worth, Norman and Oklahoma City, Okla., Wichita, Emporia and Lawrence, Kan., and Kansas City, Mo.

The party will last 28 hours and cover 1,038 miles.

Interested ATA members may obtain reservation forms by contacting Perkins at the Texas Tech University Theatre, Box 4298, Lubbock, or by calling (806) 742-3601.

LUBBOCK--Don Wickard, associate registrar at Texas Tech University since 1969, has been named registrar, effective July 1.

The announcement of the promotion was made by D. N. Peterson, former registrar and now director of Admissions and Records. Peterson also announced other promotions in the department.

David Michael Smith was named associate registrar. He has served six and a half years as assistant to the registrar. Paul E. Mackey was appointed assistant registrar. He formerly was coordinator of academic systems and procedures. Jesse Rangel was elevated from admissions counselor to assistant director of undergraduate admissions.

Wickard, a native of Clovis, received the bachelor's and master's degrees from Eastern New Mexico State University at Portales. Both Smith and Rangel received degrees from Texas Tech University and Mackey's came from West Texas State University, Canyon.

All the appointments were effective July 1.

LUBBOCK--Beta L. Little has accepted the position of the Girl Track and Field Coach at Texas Tech University.

She was former instructor of Physical Education, volleyball coach and track and field coach at Angelo State University in San Angelo. She has also coached at Stanton Intermediate School and Lake View High School in San Angelo.

As the Lake View High School girls' varsity track coach, the teams captured six district wins, three third places in regionals, two fifth places in regionals and one sixth place in state.

At Angelo State, Little was the first director to include volleyball at the university. The team finished fourth in the West Zone. The track team finished second behind Abilene Christian University, qualifying eight girls to the state meet. They finished eighth in state and qualified two individuals for nationals.

Little received the B.S. and the M.A. from Angelo State University. She lives at 4902 Greenbriar, Apt. 100, San Angelo.

LUBBOCK--Thelma Gay I. Benson has accepted the position of the Texas Tech University's Women's Athletic basketball coach.

She is former girls athletic director and coach for all girls sports for Slaton High School, where she served 15 years.

With a basketball record of 337-97, she has coached teams to 11 district championships, one regional championship and one state championship title.

Slaton volleyball teams were district runners-up every year since Benson's employment in 1962. The track team also captured district championship honors.

In 1974 she coached the North All-Star Basketball Team and served as camp director for "Little Dribblers" camps at Levelland. She continued in 1975 as the camp director.

She is a life member of the Texas State Teachers Association. She is also a member of the Texas High School Volleyball Coaches Association and the American High School Volleyball Coaches Association. She is president of the Texas High School Girls Coaches Association for the year.

She is the wife of Franklin Benson, 1520 West Lynn Street, Slaton.

ATTN: Agricultural editors and directors

Two state legislative appropriations, including a two-year budget for \$300,000, will increase beef cattle research at Texas Tech University.

"A two-year budget of \$150,000 each year has been allocated for Texas Tech research concerning efficient beef cattle production," announced Dr. Anson R. Bertrand, dean of the College of Agricultural Sciences at Tech.

"The significance of this action is that it marks the first time ever that the Texas Legislature has provided funds specifically for beef cattle research at Texas Tech. And we are extremely grateful to the legislature."

Bertrand said the agricultural sciences faculty already has begun to prepare the best research projects possible to make use of the money. He said the legislative action reveals the confidence placed in past and ongoing beef cattle research at the university.

The second appropriation for Tech beef cattle research has come in a one-year budget of \$240,000 for renovation and improvement of the feedmill, laboratory and office space at the Killgore Beef Cattle Center at Pantex, the dean reported.

The improvements will allow Texas Tech to enhance its beef cattle research at the center and to perform new types of research.

-more-

cattle research / add one

"We will be able to perform research being sought by the Texas Cattle Feeders Association, research we have not been able to do before," Bertrand said.

LUBBOCK--Approximately 1,400 junior and senior high school musicians have enrolled in the Texas Tech Band Camp. The students come from Texas, New Mexico, Oklahoma, Colorado, California and New Jersey.

The two-week-long camp will continue through Friday, July 22.

Approximately 1,250 of the 1,400 students are band members and will be involved in 12 concert bands, six stage bands, and twirling, flag and rifle precision handling.

A series of concerts will begin with bands three through six, Saturday (July 16) at 8:00 p.m. in the University Center (U.C.) Theatre. Bands one and two will present a concert Sunday (July 17) at 2:00 p.m., in the U.C. Theatre. The six stage bands will be featured in concert at 7:30 p.m., Thursday, July 21, in the U.C. Theatre.

The final gala concert will be presented at 1:00 p.m., Friday, July 22. It will feature all 12 concert bands.

During the second week of the camp, students will be under the direction of special guest conductor Dr. Travis McBeth, nationally known band composer from Oachita Baptist University, Kansas.

Trumpet students will be under the direction of guest trumpet teacher Haskell O. Sexton, professor of trumpet emeritus at the University of Illinois.

While at Texas Tech, the students are housed in Hulen, Clement, Wall and Gates residence halls.

-more-

band camp / add one

The band camp is sponsored by the Texas Tech University Department of Music and is under the direction of Professor Dean Killion, director of Bands at Texas Tech.

LUBBOCK--For Texas Tech students and faculty looking for action, with some athletic learning thrown in, the Department of Recreational Sports and the Recreational Aquatic Center have scheduled a busy July and August.

Entries are due for various sports events and competition beginning July 15, including co-educational recreational (co-rec) softball, volleyball and badminton. Entries should be made at the office of Recreational Sports.

Racquetball entries are due July 20 and players begin competition July 21. Softball, volleyball and badminton tournaments begin on the 20th.

Three-on-three basketball competition for men and women will begin July 29, with registration deadline, July 27. Men's spaceball entries are due Aug. 3 and play will begin Aug. 5. Entries for partners golf are due Aug. 5. The golf tournament begins Aug. 13. Tennis buffs may enter singles tournaments for men and women. The tournaments will begin Aug. 12, with entries due Aug. 10.

The aquatic center will have various classes along with two midnight swims, the latter on July 31 and Aug. 13. On Aug. 13 a dance will also be held. Both events begin at 10 p.m.

-more-

summer activities / add one

Co-rec inner tube basketball entries are due July 27 and competition will begin Aug. 1.

The center will also offer classes in boating and cardio-pulmonary resuscitation (CPR). The CPR class will meet from 6-9 p.m., Mondays, Wednesdays and Fridays. Registration will be July 18 and classes will begin July 27.

A basic boating class, centering around the flatbottom and canoe, will also be offered in the center. Registration is July 25.

Texas Tech staff, faculty and students are offered all activities with no fee. Those interested in water sports and classes may register at the aquatic center. Other sport entries may be turned in at the recreational sports office in the Intramural Gym, located across from the men's tennis courts. For more information call Recreational Sports, 742-3351.

LUBBOCK--Approximately 78 teachers of home economics vocational education for handicapped students and those with other special learning needs are participating in a three-week workshop at Texas Tech University.

The College of Home Economics-conducted workshop will continue until July 22.

Course study will include planning and orientation to coordinated vocational-academic education for special students of home economics for the handicapped, laboratory work in food and clothing service, and special projects such as field trips to industries, library assignments, conferences and equipment demonstrations.

Coordinated Vocational-Academic Education (CVAE) is a vocational program designed by the Texas Education Agency (TEA) for students with special learning needs.

Vocational Education for the Handicapped is a separate TEA program to meet the needs of handicapped students.

The Texas Tech workshop provides home economics teachers in these vocational programs necessary training to meet TEA requirements.

Categories of teachers required to attend the workshop include those holding vocational homemaking certificates and employed to replace former VEH teachers; teachers employed for a new program

-more-

LUBBOCK--Planting a dozen or two petunias in your backyard flower bed is one thing, but 8,000 of them...that's a lot of knee-bends and push-ups.

That's just one of the jobs assigned to some of the 30 young men and women students implementing beautification plans designed by the landscape specialists in the Grounds Maintenance Department. Dewey L. Shroyer is department director.

Twenty-two of the students are enrolled in the summer term and work 24 hours a week.

Some are in landscape architecture, but many come from other disciplines, including home economics, accounting and social welfare.

Most of the students said they enjoy their work because it is outdoors, helps keep them healthy, and they just like it.

One of the mowers is Patti London, senior from Farwell. She said working with the large tractors is no problem because she was reared on a farm. London works half a day and goes to school the other half.

Foreman Jim Strader, a 1973 Texas Tech park administration graduate, said the Grounds Maintenance Department hires a large number of females in the summer because they are especially careful in planting flowers.

-more-

grounds maintenance / add one

"So far, we've had real good progress in getting things to grow," Strader said.

Seeding grass is one of the major projects. The swimming pool, Holden Hall and the Law School sites are some of the areas where grass is now being planted.

Other grounds maintenance duties include hoeing, leveling, trimming, transplanting, watering, weeding and keeping the grounds clean.

"I love being outdoors instead of in an office all afternoon," said Kathy Rawlings, senior social welfare major from Borger.

"Working on the grounds makes the day go by fast."

Some of the females reported that the clothing they wear and the type of work they are doing gets them some "funny looks."

But they don't mind. "I am proud of my work and I think it is good for me," Kathy Einerson said. "I've even lost some weight."

## FOOTBALL PROGRAM GENERAL INFORMATION

CONTACT: Mark Haller

Texas Tech University, one of the four major university systems in the state, has set new goals in the areas where great universities are meant to excel.

With the crunch of a rapidly expanding enrollment and the need for additional physical facilities eased, the leaders of this university can concentrate total efforts on ever increasing higher quality in education, research and public service.

Relatively new expanded academic areas are in graduate level museum science courses, microbiology, childhood development in Home Economics, professional schools of law and medicine, graduate degrees in fine arts and additions in other arts and sciences.

Research funding, projects and activities have increased annually during recent years. And 1976-'77 has reached new heights. For the first ten months of the past academic year, research funding already exceeded total awards received during the 1975-'76 academic year. In '76-'77, Tech received 175 research-grant awards totaling more than \$6 million, as compared with 182 awards totaling \$5.5 million in '75-'76.

### Students Have Wide Choice

Tied closely to research are scores of public service projects, including the International Center for Arid and Semi-Arid Land Studies, the Textile Research Center, the Institute for Energy Research and the Energy Research Foundation of Texas, the Research and Training

football program / add two

67,920 degrees have been granted in the university's 53 years of existence.

With approximately 3,275 full-time faculty and staff members, Texas Tech is a vital part of the West Texas community.

The students who have chosen Tech for their higher education are enrolled in the Colleges of Agricultural Sciences, Arts and Sciences, Business Administration, Education, Engineering and Home Economics, as well as the Graduate School and Schools of Law and Medicine.

The TTU School of Medicine was authorized by the 61st Legislature in May, 1969. The medical school is the first operational institution within the Health Sciences Centers, which will ultimately encompass several health professional schools. The first class of medical students entered in the summer of '72 and the first graduates were awarded diplomas in the spring of '74.

The university's physical plant consists of 206 buildings, valued at \$216 million.

#### An Atmosphere of Enthusiasm

The 1,839-acre campus is one of America's largest in terms of contiguous acreage. In addition, the university owns almost 1,000 acres of agricultural land in northern Lubbock County and approximately 2,250 in Terry County.

The university operates a 13,822-acre agricultural and biological laboratory, the TTU Center at Amarillo, and a 411-acre educational facility in the Texas Hill Country, the TTU Center at Junction. The Texas Tech University School of Medicine maintains

Center in Mental Retardation, and numerous seminars, institutes and workshops.

Other major areas are continuing education and social work for the benefit of the aging and retired men and women who need financial, nutritional and home management counseling.

The more than 22,000 students who have chosen Texas Tech University for their higher education may select from 96 areas of study in the undergraduate level, 70 areas at the master's level and 31 at the doctorate level.

#### Students From 45 States

A typical Texas Tech student? Maybe there is not one; possibly there are 22,000 of them.

They come from 245 counties of Texas, with 7,419 listing Lubbock as their legal residence. Dallas County is second with 2,091, Tarrant third with 982, and Harris fourth with 877.

Texas leads all states with a total of more than 20,700. New Mexico is second with approximately 240. Other states in double figures include Colorado, Oklahoma, California, Arizona, Arkansas, Connecticut, Florida, Illinois, Indiana, Iowa, Kansas, Louisiana, Maryland, Missouri, New Jersey, New York, Ohio, Pennsylvania, Virginia, Wisconsin and Wyoming. Forty-five states are represented.

There are more than 600 foreign students on campus. Iran leads with 105 students. Taiwan is second with 97, Hong Kong third with 41, Nigeria and South Vietnam have 40.

The past year held special significance as Texas Tech University conferred it's 1,000th doctoral degree and the 10,000th master's degree in the Spring, 1977, commencement ceremonies. A total of

football program / add three

regional academic health centers in Amarillo and El Paso, with affiliation agreements with community and public hospitals throughout West Texas.

Texas Tech University is one of the youngest major universities in the nation. A spirit of enthusiasm for intellectual growth which pervades the campus provides inspiration for the students and the society their education serves.

LUBBOCK--Barbara N. Conely of Marble Falls has signed a letter of intent as a scholarship competitor on the Texas Tech University's women's athletics track and field team.

Conely, a Marble Falls High School graduate, was a member of the state champion track team during 1976-'77. She consistently placed second in the triple jump during the year's competition. Her best jump was 34 feet, 5 inches. She was ranked third at state competition in the 100-yard dash. Her best time was 10.9.

She was the anchor leg in the 440 relay state champion team for two years. The team's best time was 47.8. In the 220 yard dash Conely's best time was 24 flat. She was first in district and captured second in state competition.

She also lettered four years in basketball and was all-district for one year and honorable mention in district for a year.

During her sophomore and senior years she was voted best girl athlete. She was named to the A honor roll during her three years at Marble Falls and was a member of the National Honor Society. During her sophomore year she was honored with awards in home economics and biology. She was honored as a member of the top ten in her graduating class.

Conely lives at 207 Ave T, Marble Falls.

LUBBOCK--Patti R. Johnson of Nocona will participate on the Texas Tech University women's athletics golf team on scholarship during the 1977-'78 season.

While attending Nocona High School, Johnson participated on the women's golf team. She took the title of district medalist in 1973, 1974 and 1975. She was regional medalist in 1973 and runner-up medalist in 1974 and 1975. In state competition she was runner-up medalist in 1973 and 1975.

During 1976-'77 Johnson was on the Temple Junior College women's golf team as a freshman business major. She was runner-up medalist in the college's tournament. She was also the National Junior College champion in 1976 and was seventh in 1977.

She played on the high school girls' basketball team. She was all-district and captain during her senior year. She was also district champion in tennis doubles and was one of the members of the regional runner-up team during her junior year.

Johnson was also on the honor roll and a member of the National Honor Society.

She is the daughter of Mr. and Mrs. Henry W. Johnson, 206 Oaklawn Ave., Nocona.

LUBBOCK--Approximately 5,515 students have enrolled for the second summer session at Texas Tech University, D. N. Peterson, director of Admissions and Records, announced.

An unofficial breakdown shows approximately 116 students registered in the School of Law, more than 1,360 enrolled at the graduate level and more than 4,000 undergraduates registered.

Official figures will be tabulated later this week.

The second summer session continues through Aug. 20. Final examinations for the second summer session will be given Aug. 16-17.

Enrollment for the second summer session, 1976, was 5,829.

LUBBOCK--An old military bomber base is being redesigned into a college campus by 19 Texas Tech University architecture students for the Texas State Technical Institute (TSTI) in Amarillo.

TSTI, which has used the former Amarillo Army Air Base during the past six years, asked Tech's Department of Architecture to assign a class to develop fresh, young ideas for phasing out old buildings and constructing new ones in a more compact area.

TSTI wanted a plan condensing the campus to 106 acres so that all areas could be reached by foot within 10 minutes.

An architecture class in urban design, directed by Prof. A. Dudley Thompson and Instructor James P. Williamson, began work on the project during this summer's first session.

The class compiled information on architecture of semi-arid regions, energy systems utilizing the sun, wind and shade, man-devised heating and cooling systems, industrial architecture and the natural environment of Amarillo.

TSTI told the students that funding will permit construction of only one building at a time.

Each student developed his own design idea. Thompson then divided the class into five teams to develop a comprehensive design program.

-more-

architecture project / add one

The students studied TSTI course offerings and found many were similar, such as graphics and drafting. They then designed the campus so that similar parts of the curriculum would be in close proximity.

The class also asked TSTI faculty to add design ideas.

After working out alternative concepts, the teams presented five proposals in mid-July to TSTI for comments and suggestions.

Currently the class is evaluating TSTI's suggestions and will produce models of buildings, as well as drawings of campus proposals.

"One of the challenging aspects of this project is that it should appear complete during any phase of its implementation," Thompson said.

The class will present final concepts to TSTI administration in late August for the final decision, he said.

The Texas Tech professor said the project not only gives the Institute a creatively designed campus but also offers the architecture students valuable, on-the-job experience.

"This is a remarkable educational tool for the students and they have responded well. Their presentations and research into the cost analysis of the project have been excellent."

Work on the project is expected to continue through at least 1995, according to Thompson.

LUBBOCK--Texas Tech University's Early Registration Conferences for Entering Freshmen have confirmed for enrollment 3,889 prospective students for the 1977 fall semester.

This is an increase of 318 over last summer's early registration program, according to Mike Smith, associate registrar.

As of July 14 each college had the following number enrolled for orientation sessions: Agriculture, 285; Arts & Sciences, 1,632; Business Administration, 867; Engineering, 515; Home Economics, 218; and Education, 372.

The early registration conferences are scheduled for July 25-26, 28-29, Aug. 1-2, 4-5, 8-9, and 11-12 and a one-day orientation, Aug. 23.

Only the Aug. 23 conference is open for Arts & Sciences, Business and Engineering. The Aug. 11-12 and 23 conferences have openings for Agriculture. Home Economics has openings in the last four conferences for prospective students, and Education has availabilities in the last three dates.

Total admissions for Texas Tech are up 12% over last year at this time, according to Assistant Dean of Students David Nail.

Nail said total fall enrollment figures could be as much as 300-800 more than last year.

The early registration conferences provide entering freshman with a chance to receive academic advisement and to register for

early registration / add one

classes ahead of other students. Freshmen who don't register at one of the early registration conferences must wait until the regular Aug. 24-26 registration.

Academic advisement for each early registration conference will be conducted for each college in: Agriculture, Agriculture Auditorium; Arts and Sciences, Business Administration 202; Business, Business Administration 358; Engineering, Architecture 5 and the courtyard area; Home Economics, Business Administration 57; and Education, Hulen-Clement television lounges.

Only students who have submitted all admission documents are eligible to attend one of the conferences. The documents include the application, high school transcript and SAT or ACT scores.

Early registration conferences also provide the opportunity for credit by examination in more than 30 Texas Tech courses.

Other programs offered in the Early Registration Conferences for Entering Freshman include a cost seminar for parents in the Wiggins Game Room, a minority students seminar in the Wiggins Game Room, a housing seminar in the Wiggins Game Room and Greek (fraternity and sorority) seminars in room 156 of the Business Administration Building.

A watermelon feast will be sponsored by the Saddle Tramps and the Student Foundation in the Wiggins Complex at the close of each session.

LUBBOCK--Eight public school foodservice employees, six from Lubbock and two from Plainview, will receive Texas School Food Service Certification in ceremonies at Texas Tech University's Department of Food and Nutrition Friday (July 22).

The eight are among 30 school foodservice employees who have participated in workshops conducted by the Food and Nutrition Department this summer. The certificates will be presented by Prof. Margarette L. Harden of the department.

To receive certification workers must have completed five units in the program originated by Texas Tech in the summer of 1975. This is the first year that participants have been able to qualify for certification, since at least three summers of work are required for completion for all five units. Only two units can be completed during a summer program.

The 1977 recipients of certification include, from Lubbock, Frances Kleiber, 3611 57th St.; Lola M. Whitfield, 5420 45th St.; Judith A. Welborn, 903 E. Queens; Betty Stewart, 6403 23rd St.; Theola Alley, 4505 45th St.; and Loretha Buckner, 2815 65th St.; and from Plainview, Emaline Spain, 309 N. E. Alpine; and Martha White, 2915 Wood Ave.

-more-

foodservice workshop / add one

The five units are on basic foods and introduction to nutrition, food service production and institutional equipment, sanitation and hygiene and school foodservice math and required records, interpersonal development and advanced nutrition and meal planning and work simplification and problems in school food service systems.

Harden and Charles Ketchum, director of Foodservice, Snyder Consolidated Independent School District, are coordinators of the workshops and the certification program at Texas Tech. Advisors include Dr. Donald S. Longworth, dean of the College of Home Economics, and Dr. Charles V. Morr, chairperson, Food and Nutrition and Food Technology, both of Texas Tech.

Others from Lubbock who attended this summer but who have not completed all five units include Juanell Tyler, 5019 42nd St.; Evelyn Brilies, Route 7, Box 449; Mary E. Boyd, 1918 62nd St.; Ollie Fae Mayers, 4720 66th St.; Jane Carrico, 6007 Orlando; Norma R. Wahl, 3605 55th St.; Oleta Viaille, 4825 W. 15th St.; Thelma A. Box, 3814 40th St.; Linda J. King, 4813 40th St.; Flossie B. Anderson, Route 7, Box 451; Marie Booth, 3316 28th St.; Ethlyn Byrd, 4801 52nd St.; Allie Fay Cox, 4203 41st St.; Dollie Marie Forbus, 2411 Utica; Irma Corine Horn, 711 E. Quinn; Alice Manley, 4504 43rd St.; and Estelle Thorne, 4901 12th St.

Others from Plainview include Carolyn Alvin, Box 1475; Maurine Kirkpatrick, 2308 W. 10th St.; Mavie Shipman, 810 Zephyr; Anita Sisemore, 907 Galveston; and Patsy Willborn, 1410 Thunderbird.

LUBBOCK--Moody Planetarium at The Museum of Texas Tech University will be closed July 28-30 for annual maintenance on its Spitz A-4 star projector. The planetarium will resume its 3 p.m. daily showings of "The Loneliness Factor" Sunday, July 31.

A representative from Spitz Space Systems, Inc., will dismantle the machine to clean and check each moving part in the apparatus, which is capable of projecting 2,600 stars on a 30-foot dome and of using precise controls to rotate the stars in their regular paths.

Shows are given daily except Mondays. Admission is \$1 for adults and 50 cents for students.

The "Loneliness Factor," which deals with the possibility of other intelligent beings in the universe, drew 700 persons to shows in the first two and a half weeks of its schedule.

It postulates that in the death of supergiant stars billions of years ago were born the elements of life that are scattered in space. The elements of the human body were once the chemicals of earth, and the chemicals of earth were once inside gigantic stars.

"The Loneliness Factor," produced under a grant from the American Chemical Society and W. R. Grace & Co., is syndicated nationally by the Hansen Planetarium, Salt Lake City.

LUBBOCK--Incoming freshmen at Texas Tech University will have another alternative to physical education or band requirements this fall.

The Texas Tech Department of Military Science is offering a re-designed Military Science 111 course, featuring study methods and other information in addition to an introduction to military science.

The course, called the "Red Raider Special," will require no homework and no uniform or haircut standards, and students will come under no military obligations by taking the course, according to Capt. Michael C. Wilgen, assistant professor of military science at Tech.

"As our publicity indicates, we are focusing on freshman needs, college life, studying, taking exams and community affairs, and awareness to help freshmen get off on the right foot in college," he said.

The one-hour class and one-and-a-half-hour lab will offer choices not only in student needs but also in lab work, ranging from college life and leadership discussions to rappelling, marksmanship and drill training, Wilgen added.

Classes may be arranged to suit student schedules if the regularly scheduled classes are impractical, he said. The course begins this fall.

1 minute

INCOMING TEXAS TECH FRESHMEN, TAKE NOTE. THE RED RAIDER SPECIAL IS COMING YOUR WAY THIS FALL, BRINGING YOU AN ALTERNATIVE TO PHYSICAL EDUCATION OR BAND REQUIREMENTS. THE SPECIAL IS MILITARY SCIENCE ONE-ELEVEN (111), BUT IT IS MUCH MORE THAN JUST A MILITARY SCIENCE COURSE. FIRST, THERE WILL BE NO HOMEWORK. NEXT, YOU'LL BE ABLE TO LEARN ABOUT YOURSELF AND ABOUT COLLEGE LIFE AND HOW TO STUDY FOR AND TAKE EXAMS. YOU'LL ALSO GET ACQUAINTED WITH COMMUNITY AFFAIRS. YOUR ONLY WEEKLY REQUIREMENTS ARE TO ATTEND CLASS ONE HOUR AND COME TO LAB ONE AND A HALF HOURS. IN LAB, YOU CAN CHOOSE AMONG DISCUSSIONS ON STUDY METHODS AND COLLEGE LIFE AND MARKSMANSHIP TRAINING, (RUH-PELL'-ING) RAPPELLING, ORIENTEERING AND EVEN DRILL TRAINING. THE CHOICE IS YOURS. THERE WILL BE NO UNIFORM OR HAIRCUT REQUIREMENTS, AND YOU'LL BE UNDER NO MILITARY OBLIGATIONS WHATSOEVER. THE RED RAIDER SPECIAL IS DESIGNED FOR YOU, INCOMING FRESHMEN, AND CLASSES CAN EVEN BE ARRANGED TO SUIT YOUR SCHEDULE, AT TEXAS TECH UNIVERSITY.

LUBBOCK--Greg Fowler, Texas Tech University landscape architect graduate from Mound, is a recipient of the National Honor Award of the American Society of Landscape Architects.

Fowler received the award on the basis of high academic achievement and quality work in his field of study.

Fowler recently was employed by a landscape design construction company in Dallas. He is the son of Mrs. Helen Fowler of Mound.

LUBBOCK--The George R. Jowell ranch house, built by a skilled stonemason to repel marauders a century ago, is in the final stages of restoration at the Ranching Heritage Center of The Museum of Texas Tech University.

One of the earliest structures moved to the outdoor museum of ranching history, the Jowell House had remained until this year unroofed and empty, awaiting archeological and historical studies which would insure the accuracy of reconstruction.

It was built in Palo Pinto County about 1875 after the family's original home was burned by Indians. Jowell was away on a cattle drive at the time of the raid and returned to discover his home gone but his family safe at a neighbor's. It was then he decided to build his second house of stone for protection. It stood, with its gunports to the east, on Bluff Creek, 16 miles northwest of Palo Pinto and near the present Mineral Wells and Possum Kingdom Lake.

When completed at the Ranching Heritage Center, the structure will have its original outbuildings, a cooler for perishable foods and a stone cistern with its charcoal filter for clear water. It will look as it did when it served as headquarters for Jowell's Joly Ranch.

The restoration is being supervised by Prof. Willard B. Robinson, acting director of the Ranching Heritage Center and a member of the

Texas Tech University architecture faculty. Robinson is known nationally for his work in architectural history.

"We hope to restructure the walks in the Jowell house area to conform to the paths at the original site," Robinson said. "It should look exactly as it did originally. We have determined the roof line from photographs of similar structures in the Palo Pinto area and through the archeological studies," he said.

Robinson said that a skilled stonemason built the house. Several were on the 1880 Palo Pinto census rolls and one, a Joseph Harp, is said to have lived for a time with Jowell's father, J. A. Jowell.

The 12-acre Ranching Heritage Center has a score of ranch buildings moved from their original locations and authentically restored and furnished to depict the history of ranching in the American West.

Archeological and historic studies of the Jowell house began four years ago. The total cost of moving and restoration is estimated at more than \$65,000, Robinson said.

More than \$35,000 of the funding came from unrestricted funds of the Ranching Heritage Association, a 1,300 member non-profit organization formed to locate and restore structures at the center. A \$20,000 gift toward restoration was made by Roy B. Davis Jr. of Houston in honor of his mother. Jowell was a brother of Mrs. William Metcalfe, the maternal grandmother of Mrs. Davis Sr.

Jeff and the late William Browning donated \$11,500 for the Joly Ranch building in memory of their ancestor, Col. C. C. Slaughter, who held deeds of trust in 1887 and 1890 on land on which the building stood. Other restoration gifts included those of J. Holt Jowell and Mrs. Robert Wright Reeves and others.

George Radcliffe Jowell was born in Marion County, Ala., in 1840 and moved, with his family, to Texas in 1844. He joined the Confederate Army in 1862 and, after the war, returned to Palo Pinto County which his father had helped organize.

He lived there until 1882 when he moved his family to Stonewall County where he ran cattle on the open range until 1887. That year the Jowell family moved west again to Deaf Smith County on Tierra Blanca Creek, five miles east of the present city of Hereford. There he established the Lucky HIT Ranch. A son was elected sheriff of Deaf Smith County in 1898. George R. Jowell died in Hereford five years later at the age of 63.

Jowell had sold the land on which the stone house stood in 1881 to I. W. Stephens who, in 1889, sold it to Ewen, Small and Simpson. That firm later became Ewen, Small and Taylor who held the well-known SET Ranch. In 1910 the property was sold to L. E. Seaman whose heirs gave the building in his memory to the Ranching Heritage Center. The most recent purchaser of the land was a land development agency.

"While virtually all evidence of the old Joly Ranch has disappeared from Palo Pinto County, the durability of the pioneers who built it is commemorated at the Ranching Heritage Center," Robinson said.

cutline-----

RESTORATION--Gene Burgeson, right, Lubbock stonemason, cuts sandstone to replace lost portions of the Joewll house which stands partially restored at the Ranching Heritage Center of The Museum of Texas Tech University. He is assisted by Enrique Nerioz, left. When fully restored, the fortress like home will appear as it did in 1875 when it was built as headquarters of the Joly Ranch in Palo Pinto County. LUBBOCK--The first of six two-day early registration conferences for entering freshmen opened Monday and continued Tuesday in Hulen-Clement Hall.

Approximately 580 students are in the process of registering in one of the six academic colleges at Texas Tech: Agricultural Sciences, Arts and Sciences, Business, Engineering, Home Economics and Education. Almost 4,000 prospective freshmen have indicated they will participate in the early registration conferences.

During extra time entering freshman and accompanying parents toured the campus by bus. Saddle Tramps are conducting the tours. Students also received information concerning campus activities and organizations, both academic and social.

A watermelon feast sponsored by the Saddle Tramps and the Student Foundation concluded the Monday registration portion of the conference.

Other conferences are scheduled for July 28-29, Aug. 1-2, 4-5, 8-9 and 11-12. There will also be a one-day orientation, Aug. 23.

A total enrollment of 3,889 is expected for the freshman orientations. According to associate registrar Mike Smith, this is an increase of 318 over last summer's early registration program.

LUBBOCK--Jay McClure, head golf professional at Lubbock's Meadowbrook Municipal Golf Course, has been named the women's golf coach at Texas Tech University, Jeannine McHaney, director of Women's Athletics, announced.

McClure came to Meadowbrook in 1955, following one-and-a-half years on the professional tour, and became head pro in 1958.

McClure has 33 years of professional experience, five years of collegiate coaching experience and many years of teaching experience. He served as the men's golf coach at Texas Tech from 1958-'63 and coached the Red Raiders to a Southwest Conference championship in 1959.

McClure holds numerous awards for his teaching successes, receiving the Horton Smith Educational Award from the West Texas Chapter of the PGA five times. He was awarded the Smith award by the Northern Section of the PGA one year and has been nominated for the award again for 1977. He recently taught at the Northern Texas Section of the PGA Golf Academy, held on the North Texas State University campus, Denton.

The West Texas Chapter of the PGA named McClure "Golf Pro of the Year" three times, with the Northern Section of the chapter selecting him for the award one year.

-more-

golf coach / add one

McClure attended Hardin-Simmons, University of Oklahoma, UCLA and Texas Tech, playing on the Red Raider golf squad in 1945.

Active in the PGA, McClure served from 1971-'73 as vice president of the National PGA, representing District 11, and as the president of the Northern Texas PGA for two terms. He has also served on rules committees of PGA championships and on the rules committees of Rider Cup matches, including those at St. Louis and Muirfield, Scotland.

"Good players are the key to good coaching," McClure said. "I think the secret of college coaching is to stress the mental side of playing golf as well as teaching the athletes how to read golf courses and keep their fundamental movements intact and correct."

McClure will assume coaching duties at Texas Tech in September.

LUBBOCK--Appointment of three department chairpersons in the College of Arts and Sciences at Texas Tech University was announced today by Dr. Lawrence L. Graves, dean of the college.

Dr. James E. Jonish was named to head the Department of Economics, Dr. Joe Wilkes Berry Jr., the Department of English, and Dr. Thomas I. Bacon, the Department of Germanic and Slavic Languages.

All three appointments are effective with the fall semester.

Jonish, who will replace Dr. Robert L. Rouse, has been a professor of Economics at Texas Tech since 1973. He received the B.A. and M.A. degrees from the University of Illinois and Ph.D. from the University of Michigan. He has published 22 articles in economics journals.

Berry who has been with the Texas Tech English Department since 1964, will replace Dr. Marion C. Michael. Author of 14 publications in literary journals, he is writing a book which is scheduled for publication in '79. He received the B.A. degree from Abilene Christian University and M.A. and Ph.D. degrees from Rice University.

Bacon will replace Dr. Carl Hammer Jr. Bacon has been with the Germanic and Slavic Languages Department at Texas Tech since 1974. He previously taught at Furman University and served as director of German studies there from September, 1970, to May, 1974. Recipient

-more-

new chairpersons / add one

of the B.A. degree from Texas Tech in 1963, he was awarded the M.A. in '67 and Ph.D. in '70 from the University of Texas at Austin. He authored four publications including one book, "Martin Luther and the Drama," 1976.

Rouse, Michael and Hammer will remain at Texas Tech in teaching capacities.

LUBBOCK--A part of the defense against disastrous winds is good design in buildings, and 32 specialists are expected to participate in two short courses, Aug. 1-3 and Aug. 3-5, in Designing for Wind and Designing for Tornadoes.

The short courses will be conducted by the Texas Tech University Institute for Disaster Research.

The basic objective of the course in designing for wind is to acquaint participants with current approaches to the design of structures to resist wind loads. Engineering background on the nature of extreme winds, including hurricanes, and their effects on the behavior of structures will be emphasized.

Director of the institute, Dr. Joseph E. Minor, said that methods for the design of glass in buildings will be treated as a special topic.

The second workshop will include current information regarding the intensity, frequency and geographical distribution of tornadoes in the United States.

Examples of tornado resistant designs, Minor said, will be presented to illustrate the type of protection needed for various types of facilities, including nuclear power plants, schools, hospitals, public buildings and private residences.

-more-

wind short courses / add one

"The need to provide occupant protection in public and private buildings," he said, "to maintain vital functions and public services and to prevent accidents in nuclear power plants and nuclear related industries have made engineers increasingly aware of the requirements for designing against damage from tornadoes.

"Research in recent years has demonstrated that it is desirable, practical and within economical bounds to design certain structures to resist tornadoes," he said.

The courses, which will be taught at the Lubbock Memorial Civic Center, has attracted engineers, architects, personnel from government agencies and educators. The fee for either of the courses is \$250 and for both courses \$400.

The civic center stands on a site which received some of the heaviest damage in the 1970 Lubbock tornado, and it is a memorial to the 26 who died in that disaster.

"It is interesting to note," Minor said, "that if there were two good things to come from the tornado they are the civic center and the Disaster Research Institute with its emphasis on wind engineering at Texas Tech University, and these two will be joined in these short courses."

Lecturers will include Minor, Dr. James R. McDonald and Dr. Kishor C. Mehta, all on the civil engineering faculty at Texas Tech; Dr. Richard E. Peterson, a meteorologist on the Texas Tech geosciences faculty, and Robert F. Abbey of the federal Nuclear Regulatory Commission.

LUBBOCK--Solution of the High Plains water problem, declining underground water supplies, lies in state regulation, and already the legal groundwork has been laid in Rio Grande Valley water litigation.

Writing in the spring edition of the "Texas Tech Law Review," a lawyer of 40 years experience called for court action to end dominance of the "absolute ownership" principle concerning underground water.

The lawyer, city attorney for Weslaco since 1949, is Garland F. Smith. As attorney for the Hidalgo and Cameron Counties Water Control and Improvement District #9, he was involved in 14 years of Valley water litigation. He also is a trustee of the Texas Tech University Law School Foundation.

Smith believes litigation could "put our own house in order" before the state seeks to transfer water across state lines to replenish the declining water table.

Smith made his comments in "The Valley Water Suit and Its Impact on Texas Water Policy: Some Practical Advice for the Future," the lead law review article.

"On the High Plains, the availability of a dependable water supply" determines the value of the land, Smith wrote.

-more-

water rights story / add one

"Yet water rights are still ascertained under the concept of absolute ownership--a concept rooted in the English Common Law but the very antithesis of present-day needs.

"The absolute ownership doctrine...gives the person owning the surface (the) ownership of all percolating water underlying his land.

"The landowner has the right to use as much of the water as he desires, and any drainage of water from underneath his neighbor's land is not actionable (in court)."

Smith said advocates of absolute ownership "may be able to drain all underground reservoirs before the law is settled, and their real solution is in finding a way to replenish the reservoirs."

Why would any state want to supply a valuable resource like water to Texas if Texans cannot or will not regulate their own surface and subsurface water supplies, he asks.

The result of the Rio Grande Valley water litigation bears directly on the High Plains situation, Smith said.

This marks the end of "stale riparian dogma" dictating "that those whose lands front on a stream have a right that the stream 'flow undiminished in quantity and undiluted in quality.'"

Some Valley landowners also claimed the right to divert water from the stream for irrigation and other uses. This diversion was in such quantities as "to use up the stream--and even overcommit its entire flow," Smith maintains.

"In its wisdom, the Legislature adopted the Common Law of England, and the courts (with the aid of the Bar) for over a century tried to adapt the non-consumptive riparian doctrine to the consumptive use of irrigation. The garment never fit."

The Valley legal battle resulted in state regulation of Rio Grande water usage based not only on legal claims, but also on water availability and on need from Amistad Reservoir to the Gulf of Mexico.

Every landowner along the river is now allocated his pro rata share of the U.S. share of the water. Smith said that in this fashion, both upstream and downstream landowners' rights are protected.

Because absolute ownership proponents stand in the way, determination of water rights in the High Plains is delayed, and carefully regulated use of this diminishing water source is prevented, he said.

LUBBOCK--Dolls, dolls, dolls. More than 75 are on exhibit at The Museum of Texas Tech University, a portion of the newly acquired Forrest Memorial Collection, "Dolls from Around the World."

One doll is completely hand knitted. Many have embroidered or woven detail. All are authentically costumed.

They were collected by the late Mrs. S. Lamar Forrest in her travels around the world. Her trips are well known on the South Plains because of the film travelogues she presented for women's and civic clubs.

Originally the dolls were collected for her granddaughters, Kay Copenhaver Bower and Carolyn Copenhaver. They were presented to The Museum by Mrs. Garth English, Mrs. Forrest's daughter, who had arranged for their careful preservation over the score of years in which they were collected.

Craftsmanship of construction and authenticity of costume were two features sought by Mrs. Forrest, her daughter said. These characteristics are visible in the collection. Doll faces have human expressions, and even tiny details are executed with care.

Mrs. Forrest was Myrtle Robertson before her marriage. She was the daughter of Mr. and Mrs. W. M. Robertson of the former Robertson community and of Lamesa.

LUBBOCK--The executive committee for the Texas Tech University College of Education Advisory-Development Committee was elected, then named its officers at an organizational meeting on campus early this week.

Dr. Morris S. Wallace, professor emeritus of education at Texas Tech, was elected chairperson. He was a professor of education at the university from 1955 to 1974. Dr. Gordon Downum was elected vice-chairperson and Dr. Weldon Beckner, executive secretary.

Other members of the committee are W. Graves Blanton, Priscilla Butler, Omer Douglas, Katherine Evans, Ronald Gooch, Jay Gordon, Jim Gray, Cecil Green, Roy T. Grimes, June Hogue, Ed Irons, Clinton Johnson, Helen Devitt Jones, E. C. Leslie, Jr., Raymon Magallanes, Frank Mullican, Nat Williams and Charles Verner.

Most of the members are Texas Tech education faculty or associated with the Lubbock public school system. Irons is superintendent of Lubbock public schools, Nat Williams a former superintendent, Verner a Lubbock banker, and Magallanes is with the Plainview public school system.

Purpose of the council is to serve as an advisory and evaluative agent to the college; to advise, assist and provide input to the dean and staff of the college in program and curriculum development; to assist in developing financial support of the College of Education program and development through scholarships, grants, bequests and

-more-

education council/add one

other types of philanthropy; to assist in developing and implementing an organized program of student recruitment; to aid in development of a college public relations program, and to assist in development of an alumni organization of graduates and former students in the college.

Education Dean Robert H. Anderson said membership in the advisory-development council is to be made up of undergraduates currently enrolled, graduate students and ex-students and other individuals who have an interest and commitment in the development of a "dynamic" College of Education.

He said graduates from colleges of education from other institutions are welcome to join.

The first meeting of the proposed council was conducted last fall. The next membership meeting will be in November and regular meetings will be held in July and November. There are approximately 80 charter members.

"We are expecting the council to be of continuing help academically, professionally and financially to the college," Dean Anderson said. "We are happy that the College of Education has taken this step toward building a lasting relationship between our students, ex-students and friends."

LUBBOCK--Providing information to prospective students defines the purpose of two symposiums at Texas Tech University, Aug. 4 and 9, both beginning at 7:30 p.m. in Building X-15.

Women's Continuum is sponsoring the sessions specifically designed to help men and women who want to continue their educations whether for degrees or for the pleasure of learning.

Persons returning to school after a lapse of time in jobs, careers or other endeavors often need help with the "how-to's" of re-enrolling in college, said Continuum representative Mary Botkin.

"The symposiums will provide information on financial and practical considerations for returning to school, ways to shorten the time required to complete a degree and alternatives to day classes," Botkin said.

Both sessions will have the same content and will be held in Continuing Education Building X-15, with parking available across the street in the Lubbock Municipal Auditorium parking lot.

Symposium panelists will include Dr. William J. Carter, supervisor of testing and evaluation; S. Ronny Barnes, director of financial aids; Janice Summerhill, career counselor; Dennis R. McMillan, veterans' representative; Beatrice E. Russell, assistant to the director of continuing education; and Dr. Harvey Joanning, counseling psychologist.

-more-

Others to discuss academic advisory roles are Dr. Evelyn I. Montgomery, professor of anthropology, and Dr. Merrilyn N. Cummings, assistant professor of home economics education.

For more information contact Barbara Pillow, Ridgley L. Denning or Botkin at the Dean of Students Office, 742-2192.

LUBBOCK--The spring edition of the "Texas Tech Law Review," now in its eighth year of publication, has been dedicated to former Texas Tech School of Law Dean Richard B. Amandes.

The law review staff, praising Amandes' direction of the school, states, "Graduates 50 or 100 years from now will realize the key role which Dean Amandes played in giving Texas Tech a sound foundation.

"For this we thank him and extend our best wishes in his future endeavors."

The review dedicated in his honor features an article on Texas water law, "The Valley Water Suit and Its Impact on Texas Water Policy: Some Practical Advice for the Future," by Garland F. Smith, and other articles dealing with community property, remote electronic banking and recent court decisions.

Amandes, who will teach at the University of San Diego Law School, was Tech's first dean, taking office in July 1966. He served in that office until June 1, this year. Frank W. Elliott, coming from the University of Texas Law School, assumed Amandes' duties at that time.

LUBBOCK--Ruth Kay Mansfield, 1319 4th Ave., No., Great Falls, has joined the Red Raiders of Texas Tech University as a women's intercollegiate freestyle swimmer.

Mansfield, a 1977 graduate of Great Falls High School, lettered three times in swimming and was voted Most Valuable Swimmer, 1975-'77. She holds five Montana state records for swimming.

Texas Tech swimming team members condition in the early fall with competition beginning in late fall and lasting through early spring. Texas Tech also offers tennis, track, volleyball, golf and basketball in intercollegiate competition for women.

Texas Tech University is one of four multi-purpose universities in Texas, with an enrollment of more than 22,000 students.

Mansfield is the daughter of Mr. and Mrs. Richard Mansfield of Great Falls. Mansfield plans to major in special education while at Texas Tech. She is also one of 34 freshman recipients of Texas Tech University academic scholarships.

LUBBOCK--Kathy Lynn Kuhne, 3304 56th, Lubbock, has joined the Red Raiders of Texas Tech University as a women's intercollegiate tennis player.

Kuhne, a 1977 graduate of Lubbock Monterey, was selected as Most Valuable Tennis Player at Monterey for three years. She was the District 4-AAAA girls singles champion in 1975 and '76, and District 4-AAAA girls doubles champion in 1977.

Texas Tech Women's Tennis Team has a year-long season with most of the competition in the spring. Twenty tournaments and team matches with other collegiate players culminate in the state tournament in the spring.

Kuhne is the daughter of Mr. and Mrs. Cecil Kuhne of Lubbock. She plans to study physical education while at Texas Tech.

LUBBOCK--A 100-year-old cotton gin, a prize example of the transition from the antebellum plantation gin and the commercial one of the late 19th century, will be dedicated Sept. 16 at The Museum of Texas Tech University.

The gin was given to The Museum in 1961 and restored by the Texas Cotton Ginners and the Plains Ginners associations as a memorial to the late Ennis Moss Sr., inventor of the Moss Lint Cleaner.

The unusual gin was built about 1875 by Samuel A. Goodman who used oak beams, yellow pine studs and cypress siding for the 64' x 34' building. Equipment consisted of one gin stand with 48 10" diameter saws, a highly unusual two-story screw press and the necessary transmission apparatus, all powered by mules.

A hard day's work could produce six ginned bales. Cotton was delivered from the field to a receiving platform leading into the second floor of the gin.

Four men carried cotton in baskets from receiving stalls to the gin stand, shoveled seed from the floor in front of the gin stand and assisted the ginner.

One man operated the gin stand, powered by two teams of mules. There was a baling crew that carried cotton in their arms from the

-more-

gin / add one

lint room to the press, packed the cotton in the press box with their feet and operated the wood screw press which was powered by two mules.

The press is unique even among wood screw presses common to the last century. Most screw presses operated by means of two mules attached to levers which turned the wooden screw. However, the Goodman press was operated by two mules turning the entire press box around the wooden screw, forcing it up or down.

Goodman, a South Carolinian, moved to Texas with his family in 1857. He practiced law in Tyler until the Civil War when he volunteered to serve the Confederacy. After the war he went into farming and built the gin. His daughter, Mrs. Sallie Goodman Callaway, maintained the gin as a historical resource for almost half a century before her death. Her heirs gave it to The Museum.

The South Plains Ginners Association arranged for the dismantling and transportation of the gin to The Museum and provided restoration funds.

Moss, born in St. Augustine, Tex., grew up in the ginning industry. His father was a ginner who brought his family to the Plains when Ennis was about 10 years old. Ennis Moss moved to Lubbock in about 1932, but it wasn't until 1952 that he and James (cq) Gordin of Dallas formed a company to manufacture the Moss Lint Cleaner. The company changed hands in the late 1950s, but by that time the Moss Lint Cleaner was serving gins throughout the world.

Ginners who helped dismantle the gin and move it to The Museum in 1961 included Rufus Phillips of Sugarland, Orville Bailey, Anton, Bill Thompson, Shallowater, Gene Smith, Ralls, and the late Les Wienke, Lubbock. Others were Alf Pendleton, then a ginning specialist

with the U.S. Department of Agriculture, and Beverley Reeves, then ginning specialist with the Texas Department of Agriculture.

Reeves drew the prints which assisted with the restoration.

Instrumental in its restoration has been the Texas Cotten Ginners Association, headed in 1961 by Executive Vice President Ed Bush and now by his successor, Tony Price, who is in charge of dedication arrangements.

Price said that the public is invited to the dedication, scheduled for 2 p.m., Sept. 16.

Willard B. Robinson, faculty member and authority on architectural history, has been supervising the restoration.

"From an architectural point of view," Robinson said, "the Goodman Gin is noteworthy for its beauty of craftsmanship, functional form and innovative mechanical operation.

"The reconstruction has been based on Bush's drawings and old photographs. The building came with the original press, but we have had to replicate the wheels that powered the gin stand and incorporate some steel support which will not be visible to visitors."
