LUBBOCK--Rodolfo Rocha, a Texas Tech University graduate student working toward the doctoral degree in history, has won a Danforth Graduate Fellowship for advanced study.

Fellowships provide tuition, fees and an annual stipend for up to four years of study in preparation for a career in college teaching. Rocha was among approximately 3,000 persons competing for the 100 fellowships awarded this year.

He will use his fellowship to work on his dissertation, a study of border raids in the lower Rio Grande Valley of Texas. Rocha is author of an article, "Banditry in the Lower Rio Grande Valley of Texas, 1915," which appeared last year in the journal, "Studies in History," published by the Texas Tech Department of History. He now is a member of the journal's Board of Editors.

Rocha's home town is Brownsville, and he attended Texas Southmost College there from 1965 to 1968. He transferred to Pan American University at Edinburg and there earned both the bachelor's and master's degrees. He is a part-time instructor at Texas Tech University and for four years taught junior high school history in Harlingen.

Among his other assignments at Texas Tech is membership on the Ethnic Studies Committee, charged with responsibility for the ethnic studies curriculum of the institution.

Rocha is son of Mr. and Mrs. Sabas R. Rocha, formerly of Brownsville but now living at 1273 S. Woods Ave., Los Angeles.

LUBBOCK--Samuel L. Boyd, third year law student at Texas Tech University, has been named 1977 International Graduate of the Year by Phi Delta Phi law fraternity.

Boyd holds a bachelor's degree in mathematics, awarded with highest honors by Texas Tech University. He is a May candidate for the master's degree of business administration as well as the doctor of jurisprudence degree at Texas Tech.

He was graduated from Stephen F. Austin High School in Austin, where he lettered in track, basketball and baseball. His parents now live at 301 W. Alpine, Plainview. His wife, Sheryl Hider Boyd of Wooster, Ohio, is completing requirements for the doctor of education degree at Texas Tech.

Boyd is managing editor of the "Texas Tech Law Review" and has held several other positions with the "Review." He is project coordinator for the incorporation of a Law Review Association.

He served on the Student Bar Association's Constitutional Revision Committee and, in 1974-75, was vice president of the Texas Tech chapter of the American Trial Lawyer's Association. He has worked closely with the Faculty Curriculum Committee and has been active in counseling prospective and beginning law students.

-more-

boyd / add one

With a partner, Don C. Dennis, he won the first Texas Tech Mock Trial Competition, and his team was a regional quarter-finalist in 1975-76 and a national semi-finalist in 1976-77.

The Jaycees named him an Outstanding Young Man of America in 1973.

Boyd was a captain in the U.S. Army Reserve. He served with the Green Berets. In Vietnam he was a platoon leader in the 173rd Airborne Brigade and later served as company commander in the 82nd Airborne Division. He holds four bronze stars for valor, three air medals, three Army commendation medals, the combat infantryman's badge and the master parachutist award.

He has helped to earn his way through school as a teaching assistant in the College of Business, by buying and selling real estate and as a law clerk. He also has served in the Lubbock Legal Aid Clinic.

He is a member of Phi Kappa Phi, national scholastic honorary, Kappa Mu Epsilon, the national mathematics honorary, and the Society for the Advancement of Management, a national business honorary.

Following his graduation he will be employed by Hughes, Luce, Hennessy, Smith & Castle law firm in Dallas.

Mrs. Boyd is the daughter of Mr. and Mrs. G. E. Hider, 2101 Smithville Western Road, Wooster.

LUBBOCK--Dr. J. Wilkes Berry, a member of the Texas Tech University faculty since 1964, has been named chairman of the Department of English.

Dr. Lawrence L. Graves, dean of the College of Arts and Sciences, said the appointment will become effective Sept. 1.

Berry will succeed Dr. Marion C. Michaels, with whom he is collaborating in writing a book, "A Critical Edition of Joseph Conrad's 'Youth'," scheduled for publication by Cambridge University Press in 1979. Dr. Michaels will return to full time teaching.

Berry was graduated summa cum laude from Abilene Christian University in 1960 and went on to earn the master's and doctor's degrees at Rice University, where he was an honorary Woodrow Wilson Fellow and a National Defense Education Act Fellow.

Berry's community activities include the vice presidency of the Lubbock Council of Camp Fire Girls. In 1975-76 he was a member of the Advisory Committee of the American Issues Forum, supported by the Texas Committee on the Arts and Humanities.

He and Mrs. Berry are Danforth Associates, named by the Danforth Foundation as people interested in student-faculty relationships and concerned with "human values as well as scholastic values."

-more-

berry / add one

At Texas Tech Berry has taught regular and honors sections of freshman and sophomore English, a junior honors seminar and an interdepartmental honors seminar in the humanities. He also teaches 16th and 17th century literature.

He has served as director of graduate studies in English and is an elected representative of the humanities on the Graduate Council and member of the departmental Executive and Graduate Executive Committees.

He is author of 14 scholarly publications.

Berry is the son of Mrs. Joe W. Berry, 3224 Greene Ave., Fort Worth.

LUBBOCK--"Metternich and Kissinger: Personalities and Methods" is the subject for an April 29 lecture at Texas Tech University by (day-Bear-tea-ay') (So-vin-ye') the distinguished historian Guillaume de Bertier de Sauvigny.

The lecture by the French historian will be given at 7 p.m., Friday (April 29), Room 75, Holden Hall.

Dr. James E. Brink of the Texas Tech history faculty explained that there is an obvious link between the Austrian statesman, Prince Metternich, and former Secretary of State Henry Kissinger in that Kissinger wrote his doctoral dissertation, "A World Restored," on Metternich.

"Many political analysts suggest," Brink said, "that Kissinger modeled himself after the conservative Austrian prime minister."

Metternich's influence rose in the early 19th century, and Prof. de Bertier is a specialist in this period and has written a large number of monographs in the field. Among his writings are "The Bourbon Restoration," "Metternich and His Time," "France and the European Alliance," and the three-volume "Metternich et la France apres le congres de Vienne." On two occasions he has received prizes for his work.

Prof. de Bertier is a member of the faculty of the Institut Catholique de Paris.

-more-

de bertier / add one

This semester he is serving as a visiting professor at New Mexico State University at Las Cruces. He has been to the United States on several previous occasions and has taught at several universities. He was a visiting professor at the University of Notre Dame on a regular basis from 1956 to 1969.

LUBBOCK--A 19th century treasure, hidden in trunks and boxes for 19 years, has come to light at The Museum of Texas Tech University.

It is a collection of women's apparel so meticulously and elegantly made that it is unmatched by today's fast-moving garment makers.

The wardrobe was owned by Eva Salisbury Barnes and her daughter, who was known to opera audiences as Edith Mason. The singer saved the costumes of shimmering silks, brocades, laces and other rich fabrics because they were too beautiful to destroy and too out-of-date to give away.

They came to The Museum of Texas Tech University through the Louis M. Allison family of Farmington, N.M. Allison is a nephew of the late Edith Mason. A portion of the collection is on display now at The Museum.

One of the costumes is a child's plaid taffeta dress, worn by Mason long before she made her operatic debut in 1912.

She was the daughter of Baron Steuben Barnes, a multi-millionaire grain market broker in the late 1800s, and Eva Salisbury Barnes, who, after her husband's death, served on the faculty of Iowa State University.

-more-

Most of the garments are Mrs. Barnes' and they were made in the United States and Europe, where she and her husband frequently traveled.

Betty Mills, curator of historic costumes at the Texas Tech Institution, described each of the garments as a work of art.

One is of unusual "silver tissue," a fabric combining silk with a metallic coated thread to give a gossamer effect. It is elaborately embroidered with roses and has additional accents of silver spangles and lace.

There is an opera cloak with an inner pleated chiffon lining, visible only to the most discerning eye and yet a mark of 19th century high couture.

Laces, braids and the elaborate trim called "passementerie" decorate this and other garments. Some of the lace is Battenberg or Renaissance, both highly prized, handmade decorations almost unavailable now.

"Each garment is a work of art in design and execution," Mills said. "They are of inestimable value to students of textiles and design."

The elegance was a part of Mrs. Barnes' life. She was a leader of St. Louis society and was said to be the first woman to earn the doctoral degree in psychology from the University of Heidelberg in the 1880s. In an April, 1900, edition featuring building, "Scientific American" magazine carried a cover story on the Barnes' St. Louis home.

While Edith Barnes Mason was singing at the Metropolitan Opera House in New York, with the Chicago Opera Company and in European

opera houses -- with such notables as Caruso, Pinza, Ponselle and McCormack -- she kept her mother's treasured possessions in her Chicago home. But in 1953 she and her husband moved to San Diego, and all that she did not need was put into storage.

It was not until after her death that the stored treasures were shipped to Farmington and unpacked by the Allisons. That was in 1972.

"It was a thrilling surprise," Mrs. Allison said. "We had no idea what to expect, and everything was lovelier than we could imagine."

The decision to give the costumes to The Museum of Texas Tech University was made, Mrs. Allison said, because of the family's wish to place them where they might be seen by the public and studied by students.

cutline-----

19TH CENTURY ELEGANCE--Mrs. Louis M. Allison of Farmington, N.M., sits before some of the elegant evening wear her family inherited. The garments were given to The Museum of Texas Tech University for display and study. Most of the wardrobe was owned by Eva Salisbury Barnes and was carefully stored by her daughter, known to opera audiences of the early 20th century as Edith Mason. The gown immediately behind Mrs. Allison is of silver tissue, elaborately embroidered and accented with silver spangles and lace. (Tech Photo)

LUBBOCK--Documentation of the little-known early history of Mexican-Americans on the South Plains is under way at Texas Tech University.

The university's historical research center, the Southwest Collection, has begun an extensive oral history project devoted to preserving on tape much of the heritage of Mexican-Americans in the region.

David Zepeda, Tech graduate student in applied music, is taping the interviews with area residents.

"The tapes will serve as a data base for students interested in both regional and ethnic history," Zepeda explained. "These tapes should be invaluable for researchers determining migration patterns for Mexican-Americans."

College students, businessmen, farm laborers, teachers, principals, church workers, social workers and Reese Air Force Base personnel have already been interviewed as a part of the project, Zepeda said.

"We are aiming at a cross-section of Mexican-Americans, as well as Anglos who have close ties. By interviewing people from college age to seventy, we are able to obtain firsthand information of family history dating back to the middle of the nineteenth century.

-more-

"Time is a critical factor in the project. Right now, many of the participants can document several generations, which provides us with information which would be lost forever if not recorded."

Zepeda said the project is yielding new information about Mexican-American history.

"Many families came to Texas in the early 1900's", Zepeda said. "Because conditions in Mexico were very poor, especially during the Revolution, many moved where there were greater economic opportunities. One man told me that the railroad in this region offered employment and housing in the 1920's, enticing his family to stay."

Because of the project some people are donating written information to the Southwest Collection, Zepeda added. "We need all the material we can get on this subject. Such information is not available in textbooks. By depositing diaries, letters and other kinds of papers in the Southwest Collection, the people can be sure that their heritage will be preserved, not just stuffed into a closet and later destroyed."

The Southwest Collection houses more than 2500 oral history interviews related to the history of the region, as well as books, periodicals, maps, photographs and manuscripts from throughout West Texas and the near Southwest.

cutline-----

IT'S ME, CATHY--David Zepeda of Ft. Worth, Texas Tech University music graduate student, plays for his wife Cathy an oral history tape, one of many interviews he has made related to the history of Mexican-Americans on the South Plains. The tapes have been compiled as a part of an extensive oral history project by Texas Tech's Southwest Collection, historical research center for the university and the region. Cathy, also a music graduate student from Midland, is a former student assistant employee of the Tech repository.

LUBBOCK--How much does it cost to prevent land losses to desertification, and what is the net benefit of the investment?

Answers to these questions don't come easily, but the United Nations (UN) needs them in preparing for a World Conference on Desertification, Aug. 29-Sept. 9, in Nairobi, Kenya.

Some answers are being provided by Dr. Harold E. Dregne, director of the International Center for Arid and Semi-Arid Land Studies (ICASALS) at Texas Tech University.

A senior officer of the UN Development Program, Dr. Ruben P. Mendez, who is also financial adviser for the proposed conference on desertification, arrived in Lubbock from New York last week to meet with Dregne in an effort to "quantify" benefits of anti-desertification efforts.

Desertification is the term used to describe spread or intensification of land degradation in arid and semi-arid regions of the world because of climatic changes or man's activities.

"Thousands of human beings and even greater numbers of livestock died in the Sahelian desert in Africa during the severe droughts in the early seventies. The desert has advanced in these areas considerably since then, and the UN is concerned about similar incidents in the future," Mendez said.

-more-

Dregne has estimated that the world loses about \$13 billion annually in food and livestock production because of desertification.

Dregne is chairman of the Advisory Committee on Desertification, created for a two-year period by the American Association for the Advancement of Science. Calvin H. Raulerson, executive director of ICASALS, is a member of the committee, which is responsible for developing a scientific program to combat desertification on a global scale.

"We are in process of consulting international authorities on desertification, and that is why I am conferring with Dr. Dregne," Mendez said.

The UN is seeking estimates of the amount of land that is lost to desertification each year.

"More specifically, the UN is interested in estimating what kind of land is lost to advancing deserts. Is it range, dry crop, or irrigated land?" he said.

A third of the earth's land mass is either semi-arid or arid, and valuable data is needed on how this land mass could be used beneficially. "But there is also need for preventing fertile areas from being converted into deserts," Dregne said.

He gave Mendez preliminary estimates on net benefits of investing money in anti-desertification programs. Additional work will be done on the subject between now and Aug. 29, when the world conference begins.

LUBBOCK--The Lubbock County Bar Association and the Texas Tech University School of Law will present a seminar, "Estate and Gift Tax Changes of the 1976 Tax Reform Act", April 29-30.

The seminar will begin at 12 noon, Friday, with registration in room 109 of the Law School until 1:20 p.m.

The program opens at 1:30 p.m. with discussions on "An Overview of the Estate and Gift Tax Revisions" and "The Impact of the Unified Tax Concept."

"New Carryover Basis" will be the topic from 3:20 p.m.-4:20 p.m., with a question and comment session to follow.

The seminar will continue at 8:30 a.m., Saturday, with "Interspousal and Family Transfers" and "Generation-Skipping Transfers" at 9:15 a.m.

"Family Farm and Closely Held Business Real Property", 10:15-11:15 a.m., and "Potpourri", 11:15-11:45 a.m., will conclude the seminar. "Potpourri" will include accumulation trusts, disclaimers, transfers with retained voting control, section 303 stock redemptions, qualified retirement plans exclusion and orphans' exclusion.

Faculty for the seminar will include Clarence Brazill and John Freels of McClesky, Harriger, Brazill and Graf; R. Don Collier

LUBBOCK--A professional association of scholars interested in study of social and human environments of the world's arid and semi-arid regions was recently established, with headquarters at the International Center for Arid and Semi-Arid Land Studies (ICASALS) at Texas Tech University.

The organizational meeting of the "Association for Arid Lands Studies" was held at Denver, Colo., April 22, in conjunction with the Western Social Science Association's annual meeting.

The newly formed association will be an affiliate of the latter group.

The organizational meeting was attended by representatives from universities in Texas, Colorado, Montana, New Mexico, Arizona, Utah and California. Their professional interests included history, sociology, political science, economics, geography, urban planning and earth sciences.

Dr. Idris R. Traylor, deputy director of ICASALS, was elected executive secretary and will serve as editor for the association's newsletter.

Prior to the organizational meeting, two sessions on Human Adjustments to Arid Lands featured seven papers from various

-more-

universities, with Dr. Traylor and Dr. Otis W. Templer, also of Texas Tech, serving as moderators.

Drs. Traylor, Templer and Clark Knowlton, director of the American West Center and professor of sociology at the University of Utah, who have been working on establishment of the association for the past six months, were elected to the Executive Committee.

"Arid and semi-arid regions of the world have been receiving much attention from agricultural experts, but not enough has been done to study the human experience in these areas," Dr. Traylor said.

"Purpose of the association is to bring together social scientists and humanists interested in all aspects of man's adaptation to arid environments--past, present and future."

"The need for such an association was evident from the attendance at the organizational meeting," Templer said. He will be program chairman for the association's meeting in Spring, 1978.

There will be a \$2.00 annual membership fee for interested persons. Additional information is available from Dr. Traylor, ICASALS, Texas Tech University, Lubbock, Texas 79409, or (806) 742-2218.

LUBBOCK--The Texas Tech University ROTC Angel Flight was awarded the Purdue Cup, the top national award, at the recent Annual Arnold Air Society-Angel Flight National Conclave in New Orleans.

The Lewis C. Ellis Jr. Angel Flight of Texas Tech was presented the cup by Mindy Margin, Angel Flight national commander, at the awards banquet.

"If the sky's the limit, this flight is in the clouds and still climbing," Cindy Wiebold, past commander of the Texas Tech Angels, said.

The Angel Flight has been active on campus and in the community throughout the year. Their activities include hosting the Dad's Day football game, organizing the card section for the Homecoming game and marching at several football half times.

Individual Angel flight members have served as members and officers of the Junior Council, Mortar Board, President's Hostesses, homecoming queen and finalists in 1976, and Miss Texas Tech and Miss Playmate in 1975-'76.

The flight has participated in marathon runs, answered phones for the Jerry Lewis telethon and brightened local nursing homes with Christmas wreaths.

-more-

They have also assisted the Air Force, AFROTC, Arnold Air Society and Silver Wings Society in their activities. They have hosted Reese pilot graduations, hosted picnics and smokers for local corps, recruited incoming freshmen and participated in campus sports.

The corps was presented a four-foot trophy as best flight in the nation. The last year Texas Tech was awarded the honor was in 1969.

Missy M. Farrell, junior from Houston, was selected as the best image of an Angel and presented the John P. Robins Silver Wings Award, based on points given by the national Angel Flight staff.

Farrell is executive officer of the Angel Flight and Little Major of the Texas Tech Arnold Air Society. A recruiter of new members, she served as pledge trainer.

She also arranged a farewell party and dinner for Col. Taylor F. Stem, Professor of Aerospace Studies and Angel Flight advisor.

She has been on the dean's lists five semesters. She is a member of Chi Omega sorority, math honorary, French honorary and Alpha Lambda Delta, a women's honorary.

LUBBOCK--Dr. Metin Tamkoc, professor of political science at Texas Tech University, has been named Outstanding Professor of the Year by students of Pi Sigma Alpha, political science honorary.

Students who nominated Tamkoc cited as reasons for their selection his "thorough knowledge of his subject areas," "ability to get students to use their potential," and "time spent advising students concerning college studies and career planning."

Tamkoc, who has been on the Tech since 1964, teaches in the areas of international relations, international law, U.S. foreign policy and Middle Eastern politics. He is author of "The Warrior Diplomats," a recently-published book dealing with modern-day Turkish leaders, and various articles on Turkey and the Middle East.

Born in Ankara, Turkey, Tamkoc earned a law degree from the University of Istanbul. He earned the master's in international relations from the University of Maryland and doctorate in international law from Georgetown University.

After postgraduate work in international law at the Hague, he was a Fulbright Scholar and Fellow of the North Atlantic Treaty Organization.

LUBBOCK--For the southern African nation of Botswana, apartheid is not a problem in the same fashion and degree as it is in neighboring Rhodesia, although inter-tribal differences and political friction between the tribes and the democratically elected central government still exist.

"Even within individual tribes there are a number of undecided political and social issues that are reducing the pace of rural development," observes a Texas Tech University political scientist in a recently published book.

"Botswana, Rural Development in the Shadow of Apartheid," by Dr. Richard Vengroff, notes that individual ownership of land among the members of a tribe is insecure and the question of inheritance is not settled, thereby increasing the risk involved in any government investment.

In an analysis of the 10-year history of independent Botswana, Vengroff focuses on relationships between contending local leadership groups and linkages established between them and the rural masses on the other.

Vengroff, a 1972 graduate of Syracuse University, has done extensive work in Africa and serves as consultant to the Niger Cereals Project

-more-

at Texas Tech University. The project is aimed at increasing sorghum and millet production in the African nation of Niger. It is coordinated by Tech's International Center for Arid and Semi-Arid Land Studies.

In his book Vengroff suggests that the Village Development Committees (VDC), if promoted, might prove to be the most useful government organs, "through which change, both in the provision of services and in a fundamental economic sense, can be implemented."

VDC workers are more open to change and committed to improvement of the rural standard of living than any other elements in the society.

"They are well known, respected and trusted in their communities, encompass both traditional and elective authorities and are most likely individuals to successfully establish and encourage participation in rural modernization."

VDCs should be allowed to administer farmland for cooperative production and marketing of crops, he thinks. Participating farmers could pool their land, efforts and resources. Agricultural demonstrations of improved farming techniques could concentrate on VDC farms and so could government loans for the purchase of tractors, improved seeds and fertilizers, the book suggests.

Botswana is a sparsely populated nation and one of the few in Africa with a democratically elected government.

The country is of the size of Texas (222,000 square miles), landlocked by Rhodesia, Zambia, Namibia and South Africa. The 1971 population figure was 630,379.

botswana / add two

Since its independence from British rule in 1966, democracy, development, self-reliance and unity were the four goals established for the country by the ruling Botswana Democratic Party.

LUBBOCK--Turkey's warrior diplomats, who controlled the middle eastern nation's foreign policy for half a century, "knew what they were doing on the chessboard of international politics."

That is the view of a Texas Tech University political scientist who has written a book on "The Warrior Diplomats," which has been acclaimed by reviewers as a pioneering study of the political leaders of Turkey since World War I.

(Tam-Kosh)

"It is small wonder," Dr. Metin Tamkoc says in his book, "that the Turkish warrior diplomats have, for the last 50 years, been successful not only in protecting the territorial integrity and political independence of Turkey but also in accomplishing exemplary progress on the road to modernization."

In his book, Tamkoc says the foreign and domestic policies were interlinked in an effort to modernize the country internally and keeping the peace externally.

"In a nutshell," he said, "the warrior diplomats were masterful diplomatic bargainers because they were patient and persistent in their positions and because they displayed deep insight into the intricacies of diplomacy and they were aware of the strengths and weaknesses of their opponents. They were also capable of making

-more-

Tamkoc is a member of the political science faculty at Texas Tech. He was named outstanding teacher of the year by Tech political science students this year.

He calls his subjects "warrior diplomats" because most of the men of whom he writes had military education and experience.

While primarily for the scholar, the book is written in an easily understood style and has in the appendix valuable biographical sketches of the "foreign policy elite" of Turkey.

It was published this academic year by the University of Utah Press.

Tamkoc holds a law degree from the University of Istanbul, master's degree in international relations from the University of Maryland and his doctoral degree in international law from Georgetown University. He did postgraduate work in international law at the Hague and was a Fulbright Scholar from 1964 to 1966. He began his research for "The Warrior Diplomats" in 1967 as a Fellow of the North Atlantic Treaty Organization.

accurate and realistic assessment of the forces at work and balancing their objectives and their means."

LUBBOCK--ALCOA Foundation Scholarships of \$750 each have been awarded John R. Stark of Midland and Henry C. Harjes of Lubbock. Both are students in the Texas Tech University College of Engineering.

Harjes is majoring in electrical engineering. Son of Mr. and Mrs. H. C. Harjes, 1902 25th St., he is a graduate of Lubbock High School. He was recipient of the C. C. Perryman Award in 1975.

Stark is majoring in mechanical engineering. Son of Mr. and Mrs. Ralph E. Stark, 3104 Auburn, Midland, he is a graduate of Midland Lee High School.

The scholarship checks were presented to the College of Engineering earlier this week (week of April 24) by John W. Havins, production manager of the Rockdale (Tex.) Works of the Aluminum Company of America (ALCOA), and David L. Smith, chief process engineer, Rockdale Works. Havins is a 1960 graduate of Texas Tech where he earned his degree in industrial engineering.

LUBBOCK-- Governor Dolph Briscoe has announced the reappointment of Texas Tech University's Southwest Collection Director Roy Sylvan Dunn to the Texas State Historical Records Advisory Board.

Dunn's term will be for three years.

The board serves as a central advisory body for historical records planning to the federally-funded National Historical Publications and Records Commission, sponsors surveys of the conditions and needs of historical records in Texas, and reviews project proposals for preservation and publication of historical materials.

LUBBOCK--The 40-voice Women's Swing Choir of Texas Tech University will swing into spring with a free concert at 5 p.m., Sunday, May 1, in the campus recital hall.

Popular selections on the program, including "You Are the Sunshine of My Life" by Stevie Wonder, "Let It Be" by Lennon and McCartney, "Sunshine on My Shoulders" by John Denver, "Vincent" by Don McLean and "Song Sung Blue" by Neil Diamond, will be balanced by a classical sequence of works by Berger, Tellep and Mozart.

Instrumental accompaniment will be provided by the Jim Green Ensemble, a guitar quartet, and Patricia Shurbet, Miss Lubbock of 1976, on the piano.

The Jim Green Ensemble features Steve Hughes on tenor sax and clarinet, Jim Green on trumpet and flugel horn, Dave Gentley on bass, Dave Slusher on percussion and Marty Moore on guitar.

Members of the guitar quartet are Gary Eflin, Mark Foster, Dannie Hagood and Lanny Fiel.

This will be the first concert for the Women's Swing Choir since its inception in September of last year, although it has performed on several civic occasions.

LUBBOCK--Barbara Barber will offer a preview of a program to be offered next fall by the Texas Tech University Department of Music as she presents her violin students in recital at 3 p.m., Sunday, May 1, in the chapel of the First Christian Church.

In September Barber will assume duties as director of the university's Suzuki string program. The Suzuki String Method is a method of teaching young children to play a musical instrument using the "mother's tongue" approach. Children learn to play by imitating recordings they listen to every day, just as they learn to speak at a very young age by imitating sounds around them.

Violinists performing at the recital include Anne Herzer, John Herzer, Alexandra Lamb, Amy Paul, Martha Perez and Walter Taylor, all junior high and high school students.

Members of the Suzuki violin class are Marcus Amonett, age 7, Chris Billings, age 9, Christopher Busch, age 4, Ross Cansino, age 12, Bonnie Cauble, age 3, Beth Dietz, age 7, Lica Hartman, age 3, Sloane Lamb, age 8, and Vincent Tjia, age 4.

There is no admission charge for the recital and parents interested in enrolling their children in the Suzuki string program in September are invited to attend and encouraged to bring their children. The Suzuki string program will be open to children ages three through eight.

EDITOR'S NOTE: Students within your circulation area are noted in this release.

LUBBOCK--Suzanne Tooker of Abernathy has been elected president of the Texas Tech University chapter of Kappa Mu Epsilon (KME), national honor society for students of mathematics.

Members must have at least junior standing and a 3.0 grade average overall and in mathematics of a possible 4.0.

Other new officers include: Vice President Mark Storrs, son of Mr. and Mrs. S. J. Storrs, Lubbock; Secretary Donna Kay Terral, daughter of Mr. and Mrs. Donald Terral, 207 Wherry, New Boston, Tex.; Treasurer Tim Mayberry, Tucumcari, N.M.; and Pledge Trainer Rhonda Luxton, daughter of Mr. and Mrs. C. R. Luxton, 2611 Judy, Odessa. All but Storrs are mathematics majors. He is a student of electrical engineering.

Dan Gary, son of Mr. and Mrs. Jerdy Gary, 3 Ridgeway Circle, Denison, was named outstanding Texas Tech senior student of mathematics at the honor society's spring banquet. Maria Fuente, daughter of Sr. and Sra. Abelardo Fuente, Calle 59, No. 454, Merida, Yucatan, Mexico, was named the outstanding graduate student in the department.

Robert Moore, majoring in mechanical engineering and the son of Robert J. Moore Jr., 1928 Beech, Amarillo, was named outstanding KME pledge for the spring of 1977.

Scholarship winners for the 1977-78 academic year included: Paul Lockhart, son of Charles W. Lockhart, 6520 Fulton, Amarillo, who was presented a \$200 Emmett Hazelwood award; Danny Marion, son of Mr. and Mrs. Jack Marion, 3210 32nd St., Lubbock, recipient of the KME \$50 scholarship; and Julie Scott, 3311 Forest Dr., Cheyenne, Wyo., recipient of the first Richard E. Heinemann award of \$200.

Add one

Not only did they have the book, but also the author's autobiography and some of his personal papers as well."

According to Carlson, no one has ever attempted to survey the history of the sheep and goat industry from Spanish beginnings to the present.

"Sheep and goats have been raised in every state in the union, and I suspect in every county in Texas. Of course, this study will focus mainly in the Edwards Plateau, the Texas Hill country and Southwest Texas because that is where the industry has dominated."

Carlson said he will use extensive oral history information in his study. In addition to researching the numerous interviews held by the Southwest Collection, he plans to spend the summer tape-recording persons who have had an important role of the development of the industry.

Recipient of a Ph.D. in history from Texas Tech, Carlson taught at Texas Lutheran for three years before accepting a one-year appointment at Tech. He is author of 19 historical articles dealing with the history of the West.

LUBBOCK-- Visitors at The Museum of Texas Tech University Sunday (May 1) will be invited to participate in a new view of exhibits, as seen by a touring troupe of student actors.

Cindy Melby, who is working toward the doctoral degree in fine arts, has developed the program in which students respond to objects and exhibits, improvising speech and actions to stimulate increased audience participation in the creative process. Her program begins at 3 p.m.

"By responding to art objects and exhibits with the art of theater we hope to extend the original artist's work and give it new life through the actors' creative, critical response," Melby said.

"The audience completes the creative experience in art as in theater, and we hope museum visitors will enjoy this new view of exhibits."

Melby devised the experiment under the direction of Prof. George W. Sorenson of the Texas Tech faculty in speech and theater arts. It is her semester project as a member of a museum management class.

Acting students have been visiting The Museum this week to prepare for the Sunday experiment. It is open and free to the public.

-30-

EDITOR'S NOTE: Melby is the daughter of Mr. and Mrs. Verner Melby, 1811 S. 133rd St., Omaha.

LUBBOCK--The Texas Tech University Concert Band and Choir take their final bows of the season in a double concert at 8:15 p.m., Tuesday, May 3, in the University Center Theatre.

The Texas Tech Choir, directed by Gene Kenney, will sing three contemporary choral works, "Songs of Farewell by Frederick Delius, "The Ebb and Flow" by Gordon Binkerd and "Landscapes" by John Paynter.

Darrell Knapp on piano and Sally Whitlock on oboe will accompany the choir in presenting "Landscapes."

The Concert Band, under direction of Dean Killion, will perform "Bolero" by Maurice Ravel, transcribed by Texas Tech student Mark Rogers, "Kaddish" by Francis McBeth, and "Armenian Dances" by Alfred Reed.

McBeth dedicated "Kaddish" to the late Clifton Williams, the composer's theory and composition teacher at the University of Texas. The piece is based on a Jewish cant for the dead.

Membership in both the Choir and the Concert Band are by audition only and include students majoring in all academic disciplines of the university. Both groups have toured extensively and presented several local concerts this year.

There will be no charge for admission.

LUBBOCK--The Texas Tech University Department of Music presents the doctoral dissertation concert of E. Maurice Alfred at 8:15 p.m., Friday, May 6, in the campus recital hall.

The concert will feature choral music by Achille-Claude Debussy as performed by the Odessa College Choir, A Capella Choir and Women's Chorus.

Alfred, director of the Odessa College choirs, is completing his tenth year at Odessa College and previously served as director of choral music at Odessa High School and Stark High School in Orange. He holds a bachelor's degree from Hardin-Simmons University and master's from Texas Tech. He has completed further graduate work at the University of Texas in Austin and the University of Southern California.

The Odessa Junior College choir consists of 40 voices chosen by audition. Annual tours have taken the choir through Texas, New Mexico, Colorado, Oklahoma and Louisiana in concerts for churches, public schools, universities, veterans hospitals and servicemen.

The choir performed in 1968 at the Hemisfair in San Antonio and in 1970 for the American Choral Directors Convention in Dallas. The singers were selected by tape audition to appear in the International Youth and Music Festival, Vienna, in 1975.

The concert is free and open to the public.

LUBBOCK--Clyde E. Jenkins, Texas Tech University doctoral student in marketing from Cedartown, Georgia, has been nominated by the Business Administration Marketing Area to attend the 1977 American Marketing Association Doctoral Consortium, August 3-7 in Philadelphia, Pa.

The University of Pennsylvania's Wharton School of Business in Philadelphia will host the program headed by Professor Jerry Wind.

Discussion topics will include the analysis of perceptions and preferences, stochastic choice models, management science and computer applications in marketing, and recent developments in the study of consumer behavior.

The meeting is a summer research consortium for advance doctoral students in marketing.

LUBBOCK--Jim Busby, a writer for the "Lubbock Avalanche-Journal," has been awarded the 1977 Robert S. Newton prize for the best short story published in the 1976-77 academic year by the Texas Tech University Department of English.

The \$100 prize is presented annually by Mrs. Robert S. Newton. It honors her late husband, a Lubbock businessman who had a special interest in creative writing.

Busby's prize-winning story, "Supplication," was published by the English Department in a magazine called "At the Writing Workshop."

The award was presented Thursday (April 28) by Prof. Walter McDonald, who heads the creative writing program at Texas Tech, and Chairman Marion Michaels of the Department of English.

Busby is the son of Mr. and Mrs. E. K. Busby, 517 Westview Drive, Abilene. He holds a bachelor's degree in English from Texas Tech University and has done additional graduate work at the institution. He began his studies at Hardin-Simmons University.

LUBBOCK -- Blacksmithing and furniture making as arts are being practiced at the Ranching Heritage Center of The Museum of Texas Tech University just as the skills were performed a hundred years ago on the frontier.

Blacksmith Michael Hennerty of El Rito, N.M., and furniture maker David Garrison of Uvalde, Tex., are artists-in-residence, supported by a grant from the Texas Commission on the Arts and Humanities.

The purpose of the program, which is being conducted in conjunction with the Lubbock public schools, is to help visitors "discover the sense of roots, of being part of a continuity of people."

Hennerty and Garrison demonstrate their skills on Mondays in the public schools. During the remainder of the week the Ranching Heritage Center they demonstrate for school children who tour and all visitors during the 12 noon to 5 p.m. public hours.

Betty Rhea Moxley, coordinator for museum public programs, said that the program should teach some of the skills of traditional artistry which once were handed down from grandparent to parent and to the child. But it is hoped, she said, that children will also learn to value the craftsman's care, workmanship and love for artistry which "is the hallmark" of the folk artist.

"The folk artist," she said, "is motivated by a joy in creativity and finds dignity in his workmanship. We want children to understand this, to learn it by seeing the artist at work."

-more-

The Ranching Heritage Center is an authentic outdoor exhibit depicting a century of ranching history. Its artists-in-residence program was made possible, Moxley said, through a cooperative agreement with the Artist in the Schools program in Lubbock.

Hennerty studied blacksmithing under Frank Turley at Turley Forge in Santa Fe in 1972. In that same year he set up a shop and began by repairing hand tools, sharpening and repointing plows and making articles for sale at craft shows. His work is typical of what one might find in the late 1800s.

He no longer works as a conventional blacksmith but devotes his entire time to craft blacksmithing. He has completed all the iron work for a house in La Cueva, N.M., and is working on a house in Hyde Park Estates.

Garrison studied architecture at Texas A&M University and worked as an apprentice with a Maryland architect whose work was centered in historic preservation. When he moved back to Texas with his family, he practiced carpentry until he was asked one day to build two pieces of furniture, a coffee table and a safe.

"I found what I wanted to do, and I have been making furniture ever since," he said. "I interviewed all the old timers I could find and studied what little has been printed, but your hands have to learn."

Garrison's work is devoted almost entirely to handmade early Texas style furniture.

The artists have two-month contracts to work at the Ranching Heritage Center.

CUTLINE-----

HISTORIC ART--Artisans David Garrison, left, and Michael Hennerty are in residence at the Ranching Heritage Center of The Museum of Texas Tech University, where they demonstrate blacksmithing and furniture-making for visitors. Both modern day craftsmen have mastered skills used a century ago and help visitors understand the frontier creative spirit. Hennerty works daily in the Renderbrook-Spade blacksmith shop at the door of which he is standing. Garrison's temporary workshop is on the porch of Las Escarbadas, once a division headquarters for the XIT Ranch. (TECH PHOTO)

FOR RELEASE AFTER 7 P.M. FRIDAY, APRIL 29

LUBBOCK--Seven outstanding scholars in the Department of Agricultural Engineering at Texas Tech University were honored at a departmental awards banquet Friday (April 29).

The first \$200 Jack Wiggins Memorial Scholarship honoring a former graduate was presented by Mrs. Wiggins to Arthur Neil Phillips, a senior and son of H. J. Phillips of Newcastle.

The newly appointed chairman of the department, Prof. Marvin J. Dvoracek, was presented the Outstanding Faculty Award by the students.

Ronald P. Schwertner, senior from Miles, Tex., won both the senior scholastic achievement award in agricultural engineering and the American Society of Agricultural Engineers Student Honor Award, presented by the national organization.

The top student in mechanized agriculture, Brian C. Thomas, son of Charles M. Thomas, 6012 Toreon Drive, N.E., Albuquerque, also was recognized. Thomas is a senior.

Harold Kent Beck, a senior from Vera, Tex., received from his fellow students the ASAE Student Branch Award, peer recognition for his contributions and leadership.

Three awards were presented by Alpha Epsilon, national agricultural engineering honorary, to top scholars in the freshman,

-more-

sophomore and junior classes. These went to James Waller, freshman, son of Clarence W. Waller, Albany; James Cromer, sophomore, son of James R. Cromer, San Saba; and Craig Loftin, junior, son of Jack Loftin, Windthorst, Texas.

The Wiggins scholarship was made possible by a memorial fund established at the time of Jack Wiggins' death in 1975. He was a lifelong resident of Hagerman, N.M. He held a degree in agricultural engineering from Texas Tech University and was a member of Alpha Epsilon and Tau Beta Pi, national engineering honorary society. He was a farmer and rancher. Mrs. Wiggins is a resident of Lubbock.

LUBBOCK--If military life on the frontier was trying for soldiers, it was even more so for the wives who came west with them.

Byron Price, a Texas Tech graduate student of history and research coordinator for the Ranching Heritage Center, will talk about the lifestyle and ingenuity of military wives on the western frontier at 2 p.m., Sunday (May 8), at The Museum of Texas Tech University.

His is the final program in a series offered for adults by students of museum science at Texas Tech. His lecture will be informal and will include primarily anecdotes related by the pioneer women who lived in the West.

He will talk about the importance of lace curtains from New York brought west to hang in the dirt floor, adobe New Mexican quarters, about the invaluable sawhorses which supported boards for a dining table or an ironing board, and about self defense as a skill necessary for survival.

His discussion will include stories of how the women came West, their servants, children, death, and the overwhelming influence of the loneliness factor in their lives.

He also will tell of the great festivities they organized to celebrate Christmas and the 4th of July.

The program is open to the public. There is no charge.

LUBBOCK--Texas State Archivist Dr. David B. Gracy II, Texas Tech graduate and former employee of the Southwest Collection, returned to the university this week to lecture to a graduate seminar.

Speaking to museum science students enrolled in a course related to sociological uses of historical data, Gracy explained the differences and similarities in function and scope between manuscript repositories such as the Southwest Collection and archival agencies, such as the Texas State Archives.

Gracy served as Southwest Collection Archivist from 1965 to 1971 before being named director of the Southern Labor Archives at Georgia State University. He was appointed State Archivist of Texas in January.

LUBBOCK--Harold and Lorraine Roberts, masters of miniature interior design, replicating historic homes, will demonstrate their skills at the official spring opening May 7 of Cogdell's General Store at the Ranching Heritage Center in Lubbock.

The Roberts' noted miniatures have been on sale since the general store opened in the David M. DeVitt and Mallet Ranch Building at the center, an authentic outdoor exhibit of ranching history at The Museum of Texas Tech University. Store hours are noon to 5 p.m.

There is no admission charge for the Roberts' exhibit and demonstration, and the public is invited to browse the general store for the special spring event featuring new stock. The store is operated by the Ranching Heritage Association and all profits go toward development of the center.

The Roberts will display six candlelight corners depicting historically correct room settings, a log house with loft and fireplace furnished as a pioneer home, a turn-of-the-century carpenter shop still under construction, charts illustrating woods used, construction techniques and relative sizes of real objects with their miniatures built on a 1 to 12 ratio.

The Roberts are both retired from their first jobs. Roberts worked as a materials engineer in the aircraft and electronics

-more-

industries and his wife as a teacher of art. Roberts majored in architectural engineering in school but learned cabinet work and carpentry from his father. For their children and grandchildren and as a hobby, they began making miniatures, including work with wood and fabrics.

Their work has now grown to a business with commissions from collectors and museums.

While their newest handmade pieces will be on display for general store shoppers, there also will be a great variety of other items including the butcher's wax for fine furniture and wood surfaces. This is the wax used on pieces in the furniture collection of The Museum of Texas Tech University.

And there will be old oaken buckets, crock bowls, handmade quilts, old fashioned muffin pans, metal art sculpture and as big a variety of other items as customers would expect to find in the general store their great grandparents patronized.

cutline-----

MAKER OF MINIATURES--Harold Roberts who, with his wife, Lorraine, will be exhibiting their art at Cogdell's General Store May 7, displays some of his craftsmanship. The Roberts' miniature interiors are all historically authentic, and the variety includes the primitive pioneer homes as well as more richly furnished colonial dwellings. The general store is in the David M. DeVitt and Mallet Ranch Building at the Ranching Heritage Center of The Museum of Texas Tech University. Hours are noon to 5 p.m. (Tech Photo)

(RELEASED BY TELEPHONE TO ALL LOCAL NEWS MEDIA)

The extension of Indiana Avenue through the Texas Tech University *Campus* will be opened tomorrow afternoon, Executive Vice President Glenn E. Barnett announced today.

Signal lights exist at intersections at 4th, 19th and Tech Freeway and are also being installed at locations near the Tech Law School and Greenhouse. Access to Indiana Avenue from the university campus will be temporarily controlled by stop signs or during rush hours by a university ~~policeman~~ *PATROLMAN*.

While there are also left turn lanes at most intersections, there is no left turn lane for northbound traffic at Indiana and Tech Freeway, and no left turns will be permitted.

Maximum speed on the new extension will be 30 miles per hour.

Still to be completed are street lighting and right-of-way landscaping.

LUBBOCK--Jennifer Smith of Lubbock has been named the "highest ranking junior, university-wide," by the Texas Tech University chapter of Phi Kappa Phi honor society and, as a consequence, vice president of that organization for the 1977-78 academic year.

All other officers are faculty members. They are Dr. Rae L. Harris Jr., president; Dr. Vera L. Simpson, president elect; Dr. James W. Graves, secretary, and Dr. Helen C. Brittin, treasurer.

They were inducted at a banquet for new members Thursday (April 28) at which Smith also was awarded \$100 for academic achievement and Jeraline E. Cole of Lubbock was awarded another \$100 as the "highest ranking sophomore in the College of Home Economics."

Smith, a dance major, is the daughter of Mr. and Mrs. L. Edwin Smith, 3214 39th St. and Cole, a food and nutrition major, wife of William D. Cole, 2502 22nd St.

Also honored at the banquet was William A. Shaver, a pre-med student, who has won a \$3,000 national Phi Kappa Phi fellowship to continue his medical studies. He is the son of Judge and Mrs. William R. Shaver.

The society recognizes students with the highest scholastic standing in the university.
