To Our Friends—The Riders

HE dawn of new things has come. The things of yesterday are gone. They are of the past. The future is all before. New conditions flank us on every side. System has taken the place of disorganization. Slipshod methods have given way to systematized effort. He who plays the game must meet the new situation.

The saddlery business, as all others, has passed through a period unparalleled in changes. The demands of the trade have become more intense and the needs of the riders more keenly felt. To meet this condition, our entire effort has been focalized; and we have called to our aid some of the best mechanics the country affords, with the result that we are producing the most practical, up-to-date stock saddles that skilled workmen can make. And we are offering to that most exacting of all classes, the western rider, the most serviceable and artistically-finished saddle that has yet been manufactured. We have combined many years' experience with the knowledge gained by close association with the actual rider; consequently we have the finest product to offer our friends and customers that has yet been turned out in the saddle-making art.

With the view of fully acquainting every rider who wants the best with our goods, we invite the most scrutinizing examination of the pages that follow. And we leave the results to you.

Yours in the interest of the best,

S. D. MYRES SADDLE CO.

SADDLES

SADDLES are not luxuries, but necessities. From the earliest times man has been a rider. But no nation or people is so skilled in feats of horsemanship as are the Western stockmen or cowboys. They are a distinctive class, possessing the courage, skill, and fidelity which always characterize the noblest and the best of men. In their difficult range work they require the very best equipment, as not only the heavy ranch work, but oftentimes the safety of their very lives is dependent upon it. Hence the necessity of having the best, and our saddles are made strictly to meet these needs.

LADIES' ASTRIDE SADDLES have been our specialty for many years. In their construction, the same general principles are adhered to as in the making of the best stock saddles. For, if a lady is going to ride astride, and according to our way of thinking this is the only way for her to ride, she certainly is entitled to all the advantages of the very best stock saddle.

BUCK-SKIN INLAID SEATS: The demand for this special style of seat is ever on the increase, and by the best riders. We not only use it on astride saddles, but on many of the highest grade stock saddles. The seat is inlaid on the other seat in such a way that, in case it should wear out in the course of time, a good seat would still be maintained in the saddle. It is especially adapted to the "Myres' Special Tree." This seat will be used on any saddle, not showing the same, or we can put this seat on an old saddle. The prices range from \$9.00 to \$12.00 additional.

STYLE OF RIGGING: We generally make all saddles with double rig, but will change any style, and will use Center Fire, Three-Quarter, or Spanish.

TREES

The tree is **the important part** of any saddle. With everything else good, but with a bad tree, the inevitable result is a poor saddle—one that will give trouble and be unsatisfactory.

Our trees are specially made for us by the most skilled experts, men who have spent a lifetime in studying the rider's wants. The very latest style and designs are used. We keep strictly up-to-date on everything; in fact, lead the procession. Our trees come as near meeting all the requirements of the riders as is possible until all riders **ride alike and all horses' backs are shaped alike.**

Our trees are regularly made for medium size horses. If ponies or large horses are used, a narrower or wider tree should be made, accordingly. The trees are guaranteed against breakage for a period of two years. Should any of the trees hurt, we will gladly fix the same free of charge, when it is the fault of the tree. Several things could cause the saddle to hurt other than the tree:

First. Bad blankets, or carelessness in blanketing, often causing a wrinkle or fold in the blanket; but especially the continued use of wet, sweaty blankets

for days without having them washed or cleaned. This causes the back to become soft and tender. This is notably true in the hot months. Give good attention to the blankets, and many troubles will disappear.

Second. Sometimes the hurting is due to the peculiar condition or shape of the horse's back. This is especially true if the horse is thin or in poor condition.

Third. Possibly that which causes as much or more hurting than all other things taken together is the **way one rides**. Some riders never hurt with any saddle, while others hurt with every saddle. We have given this trouble special attention, and shaped the saddle seats to throw one as nearly as possible in the proper position in the saddle and thus overcome the condition brought about by loose or careless riding.

THE FOLLOWING TREES ARE USED: Visalia, Broncho Buster, Rough Riders, Caudle, Ladesma, Tipton, Jim Dandy, Bull Moose, Citizen, Western Queen Astride, Youth's and Myres' Special.

The favor in which the **Myres' Special Tree** has been received by the best riders is truly gratifying. The attractive feature of the saddle is the **specialty low cantle**.

Sterling, Brass, or Bell Medal horns will be used on any saddle not showing the same when desired, but for heavy work we recommend the regular iron horn tree, covered with leather or rawhide, as we consider it stronger than either the brass or the bell medal. When brass, bell medal, or sterling horns are wanted, add \$3.00 to catalogue price.

THE EXTRA SWELL FORK will be used on any saddle, not showing the same, at the following prices: 12-inch fork being taken as a base, add \$1.50 an inch up to 16 inches. On all swells over 16 inches, add \$2.50 for each additional inch.

For saddles with larger trees than described in catalog, add \$4.50 per inch for each additional inch for additional cost of material.

MATERIAL

All leather used in the construction of our saddles is from the famous Eberhard Tanning Company, of Santa Clara, California, who produce the finest skirting leather in the world. We also use their **bark-tanned wool skins, chaps and lace leather**, which are without an equal.

WORKMANSHIP

The manufacturing department is under the personal supervision of S. D. Myres. You may be sure that none but skilled mechanics touch your saddle

if it bears the name "Myres." The same scrutinizing care and attention is given to every detail as you would if you were making it with your own hands.

Special notice is called to the fact, that all points on high-grade saddles are **hand-laced**, which is much better than rivet work, inasmuch as rivets, after a time, will work loose and come out. **Lacing never does.** Tacks are practically discarded. Brass screws are used for all tree fastenings.

STAMPING

This department is under artists who, by nature and experience, have become past masters in this particular field. Many of the designs are original and entirely new. Nothing adds more to a high-grade piece of work than artistic finish, and this can be given only by one who is an artist in this special line of work. The favor with which our hand-carved saddles have been received for years by the very best riders is evidence of the quality and durability of our work. We call special attention to our **art leather goods**, which for mechanical finish and artistic design cannot be surpassed.

OILING

All saddles are carefully and skilfully oiled with Neatsfoot oil, unless otherwise ordered. **Oil is the life of leather.**

TERMS

All saddles in this catalogue are strictly **net, no discount, as it has always been our policy to give in quality instead of in discount.** Our prices are strictly cash; **no credit.**

In ordering, just give number as described in the catalogue. It is not necessary to destroy or mutilate the book in order to send picture.

Write your name, postoffice, and State plainly; also give your nearest express office.

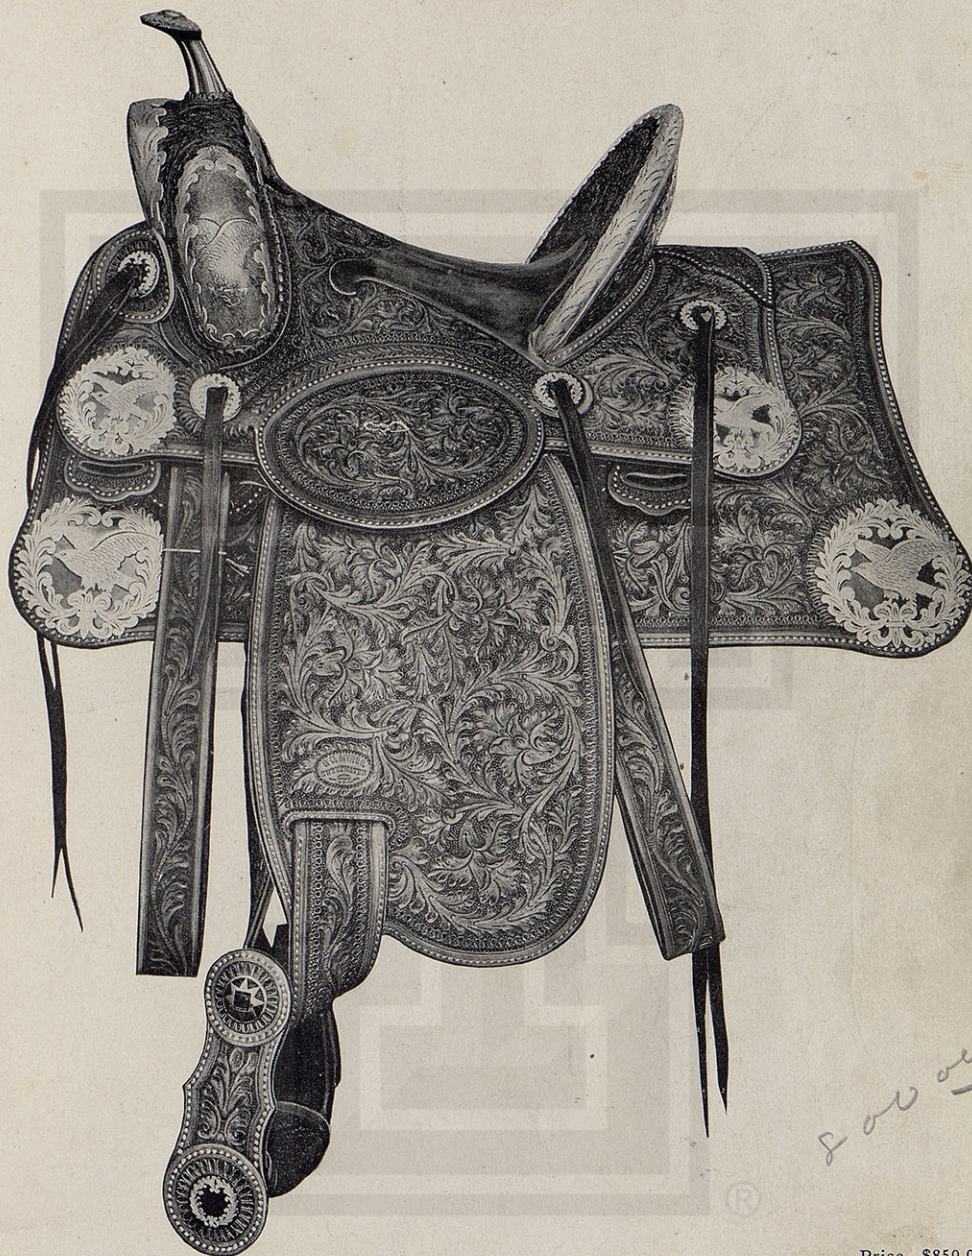

All orders will have strict and careful attention, and will be filled as promptly as possible.

Special orders will receive our best attention, and we will make you **exactly** what you order.

At least 25 per cent of catalog price should accompany order. This saves time, as it is not then necessary to look up financial references. The goods will be sent C. O. D. for balance. This is especially necessary where special orders are made.

In view of the rapid fluctuation of the leather market, all prices are subject to change without notice.

"Myres' Special" Sterling Horn Tree—15-inch

This saddle is made on a 15-inch tree with 15-inch fork, seat, cantle, front jockies and side jockies in one solid piece of leather. Thirty by 16-inch skirts, lined with bark tan wool skin, 3-inch stirrup leathers doubled at points. The design in hand-carving with bracket combination is very artistically executed and makes a beautiful finish for a saddle.

This saddle was presented by the Cattle Raisers' Association of Texas to the inspector as a reward of "merit" for securing the most members for the association between March 1st, 1915, to the close of the Fortieth Annual Convention at Houston, Texas, March 21, 22 and 23, 1916. And the order was duplicated by the Executive Committee and the saddle will be again given away in March, 1920, at the Annual State Convention.

Twenty-nine by 16-inch skirts, lined with bark-tanned wool skins; 3-inch stirrup leathers doubled at point; solid front cover. Finely Mexican hand-carved in artistic designs, full covered and tipped stirrups; 1 7/8-inch long and 2 1/4-inch short latigos, rope strap on off side; stamped leather rosettes.

This is a great saddle and has been a favorite with the best riders and can be truly recommended in the strongest terms; it has been tried and made good. You cannot make any mistake in ordering this saddle. This design of stamping has been used on other styles of saddles and it is a beauty.

Weight, 35 Pounds

No. 303

Price, \$125.00

"Myres' Special" Sterling Horn—15-inch

This saddle is made on 15-inch "Myres' Special" Sterling horn tree, with 15-inch fork. A larger tree will be used. Solid front cover laced in front; full buckskin inlaid seat—this seat is inlaid on the other seat in such a way that in case it should ever wear out a solid seat is still retained in the saddle. All of our seats are made in this way. Twenty-nine by 15½-inch skirts lined with wool skin; 3-inch stirrup leathers doubled at point. The contrast between the hand-carving and the plain make a very tasty combination and beautiful finish. All points hand-laced; 1⅞-inch long and 2¼-inch short latigos; angora front and No. 21 flank cinch.

THIS IS A GREAT SADDLE, AN EASY RIDER AND WILL STAND HEAVY WORK.

Price, \$125.00

"Myres' Special" Iron Horn Tree—15x14 inches

This saddle is designed especially for those who want a light, up-to-date saddle, something to ride well, wear well and look well. This style has been a phenomenal success as such, and I can recommend it to my friends with pleasure, as I well know that they will be pleased with it. The same is made on a special tree, 15-inch; skirt 29 by 16 inches, lined with bark-tanned wool skins, 3-inch stirrup leathers doubled at point, full hand-carved in artistic designs, all points hand-laced, full seat; cantle, seat and jockeys in one solid piece of leather, buckskin quilted seat inlaid on the other seat, which makes the only practical seat of this kind; 1 1/8-inch long and 2 1/4-inch short latigos, brass-bound stirrups, the best cinches, rope strap on off side.

This makes a fine light saddle, and is especially designed for light riding. It is made of high-grade light stock and will give splendid service.

This is one of the latest astride trees, 14½-inch, with 14-inch full swell fork. The swell fork saddles are now in demand by the very best lady riders. If the swell forks are good for the men and boys, why not for the ladies? THE BEST ARE COMING TO THEM. Solid fork cover, but will be laced on the sides if desired; full buckskin inlaid seat; inlaid on the seat in such a way that in case it should ever wear out a good seat would still be retained in the saddle. Beautifully hand-carved in elaborate design, which makes a very attractive and beautiful saddle. Sweat leathers lined with patent leather. Stamped leather rosettes.

THIS SADDLE IS MADE IN THE VERY BEST MECHANICAL WAY, ON THE VERY BEST TREE, AND THE BEST MATERIAL; AN EASY RIDER AND WILL GIVE THE BEST SERVICE.

The Princess Astride Tree—14½-inch

This is one of the latest astride trees, 14½-inch, with a 14-inch swell fork. The swell fork saddles are now largely in demand by the best lady riders. If the swell forks are good for the men and boys, why are they not for the ladies? **THE BEST ARE COMING TO THEM.** The frontal piece is one solid piece of leather, but will be laced on the sides if desired; full buckskin inlaid seat quilted with silk; the combination between the hand-carving and the solid set stamp blend into artistic effect. Twenty-eight by 15-inch skirts, lined with bark-tanned wool skin; the fenders are lined with patent leather, as in all of our astride saddles; full covered and tipped brass-bound stirrups; 1½-inch long and 2-inch short latigos; Angora front cinch. Leather stamped rosettes.

THIS IS CERTAINLY A SWELL JOB, MADE OF THE VERY BEST MATERIAL, ON THE BEST TREE. AN EASY RIDER AND WILL GIVE THE VERY BEST SERVICE.

No. 227

Price, \$90.00

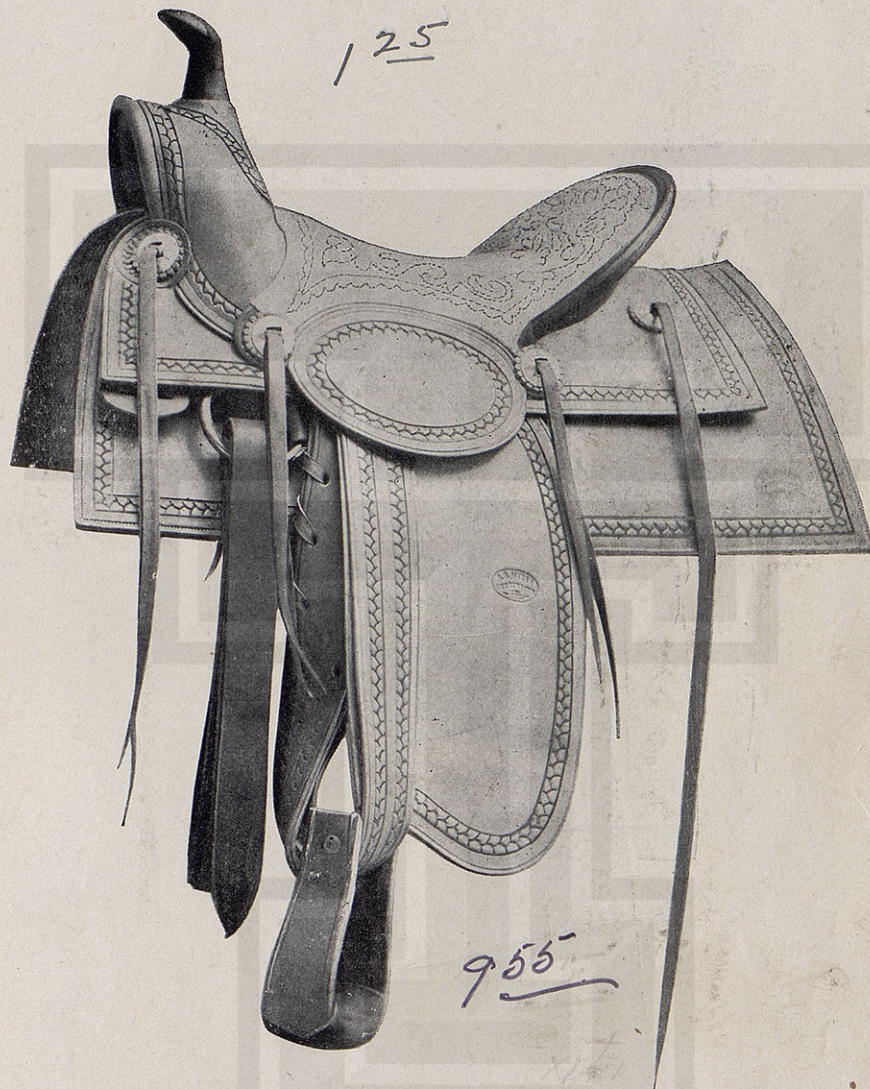

Myres' Improved Astride Tree—15x14-inch

This saddle is made on special astride tree, and designed strictly for an easy rider; the cantle is low but wide, and the seat is specially shaped to give comfort to the rider; the full buckskin quilted seat is inlaid in such a way on the underlying seat as to always insure a good seat in the saddle—this is a special method that is mine for putting the seat on astride saddles, and has proven a most wonderful success; skirts 27x14 inches, with bark-tanned wool skins; 2½-inch stirrup leathers; 1½-inch long and 2-inch short latigos; brass-bound stirrups; best Angora cinch. The saddle is artistically stamped in a unique style and design, which gives a very strong effect and makes a handsome saddle and is sure to please.

Myres' Improved Astride Tree—15-inch

This saddle is made on special astride tree, and is designed strictly for an easy riding saddle; the cantle of the tree is very low, but wide; the seat is specially shaped to give the easiest position to the rider. It has a full buckskin inlaid seat—this seat is so made that in case the buckskin should ever wear out, the underlying seat would be the same as if the buckskin seat had never been used; 27x14-inch skirts lined with bark-tanned wool skins; 2½-inch stirrup leathers; brass rings; brass-bound stirrups; 1¾-inch long and 2-inch short latigos; finished with shell border stamp. This makes a handsome saddle and will give the best service and will please the most exacting.

With swell fork, \$2.50 extra.

Price, \$70.00

Myres' Special Misses' Astride Tree—13-inch

Twenty-five by 14-inch skirts, lined with bark-tanned wool skins; $2\frac{3}{4}$ -inch stirrup leathers doubled at points; all laps hand-laced, as is on all my saddles; full buckskin inlaid seat quilted in fancy designs, hand-carved throughout in artistic designs and well finished in every respect; $1\frac{1}{8}$ -inch long and 2-inch short latigos; wood stirrups with taps, made so that it is practically impossible for the foot to go entirely through—no accident could possibly occur with this stirrup. This is made in every respect on the same principle as that of the best grade men's saddles, of select stock and on the very highest grade tree, and by the best mechanics, and is designed to fill the long-felt want of a strictly high-grade youth's saddle—it is suitable for either boys or girls. This saddle is the best that is possible to make, and will please in every respect. **THIS IS NOT A LADIES' SIZE SADDLE.**

Swell fork, \$2.50 extra.

Special Youth's Iron Horn Tree—14-inch

This saddle is made on a 14-inch tree, with a 14-inch swell fork, nicely hand-carved in artistic design, which makes a very handsome finish. Twenty-eight by 15-inch skirts lined with bark-tanned wool skins; 2½-inch stirrup leathers doubled at point; 1¼-inch long and 2-inch short latigos; fish cord front and No. 21 flank cinch.

THIS IS A GREAT SADDLE FOR A 12 OR 15-YEAR-OLD BOY. IT IS SOMETHING GOOD AND WILL STAND HARD SERVICE.

S.D.MYRES SADDLE COMPANY

Weight, 25 Pounds

No. 220

Price, \$68.50

Special Youth's Iron Horn Tree—13-inch

Twenty-five by 14-inch bastos, lined with bark-tanned wool skins, full seat; cantle, seat and jockeys in one solid piece of leather, made of select stock, finely hand-carved in artistic designs, solid nickel star conchos strung with chrome lace, full covered and tipped stirrups, 1 3/4-inch long and 2-inch short latigos, rope strap on off side.

This makes one of the best youth's saddles that can be made—everything that goes into the make-up of the saddle is the VERY BEST. The saddle is intended to fill the long-felt want of a strictly high-grade youth's saddle; it is specially constructed to this end.

When wanted, will put the uckskin inlaid seat in same at \$3.50 extra. This saddle can be used both as a youth's saddle and astride.

In ordering please give age of user, so the rosaderos can be made the right length.

Swell fork, \$2.50 extra.

INDIAN NAVAJO SADDLE BLANKET

The Indian Navajo Saddle Blanket is a product of the Navajo Indians, who raise their own sheep and produce the wool from which the blankets are made, using natural colors to embellish their beautiful handiwork as only an Indian can. Their squaws weave and make the wool into blankets in their camps in the forest. The supply of Navajos is very limited, and each year marks a decrease in the number produced for commercial purposes. It is only a question of time when this will be an extinct art.

A large and well selected stock always on hand

I get all my blankets direct from the reservation, and am very particular as to the size and quality—
THE RIGHT SIZE IS ONE OF THE MOST DIFFICULT THINGS TO SECURE IN A SADDLE
BLANKET.

This blanket is in a class to itself—it has no equal as a saddle blanket, as all riders and stockmen will testify.

Double Navajos range in weight from six to eight pounds; the price is \$2.00 to \$3.00 per pound, according to selection.

MAKE THE CELEBRATED SWEETWATER SADDLES

MISCELLANEOUS

Duxbak Cravenette Divided Skirt

The DUXBAK DIVIDED SKIRT is so designed that it may be used for either a riding or walking skirt. The two large divisions, or legs, of the skirt, are united in front by a separate panel, which is fastened by eighteen ivory buttons, as shown in the illustration. This gives the appearance of an ordinary walking skirt.

When used for riding, the front panel is unbuttoned at the left side, folded over and buttoned down on the right side, or may be removed entirely. When dismounted the panel may be buttoned in place again, and the walking skirt is once more yours.

When riding and "roughing it" in all kinds of weather, this skirt is a necessary part of the outing trip. The DUXBAK DIVIDED SKIRT more than meets every expectation. While it can be used as a walking skirt, we would not recommend it as such.

In taking measurements for skirts, take the waist measure, the hip measure six inches below the waist line, also front and back length of skirt.

Price, \$9.50

Ladies' Riding Breeches

Price, \$7.50; Postage, 45c.

Made of Duxbak cloth. In ordering give waist measure, hip measure, inseam measuring below the knee.

Leggings to match. Price, \$3.50; Postage, 15c.

In ordering, give size at ankle, calf and just below knee.

Sawyer's Excelsior Brand Khaki Pommel Slicker

Something New and Up-to-date.

I wish to call your attention to the Sawyer's Excelsior Brand Khaki Pommel Slicker, which garment is made similar in style and color to the Pommel used by the United States Army.

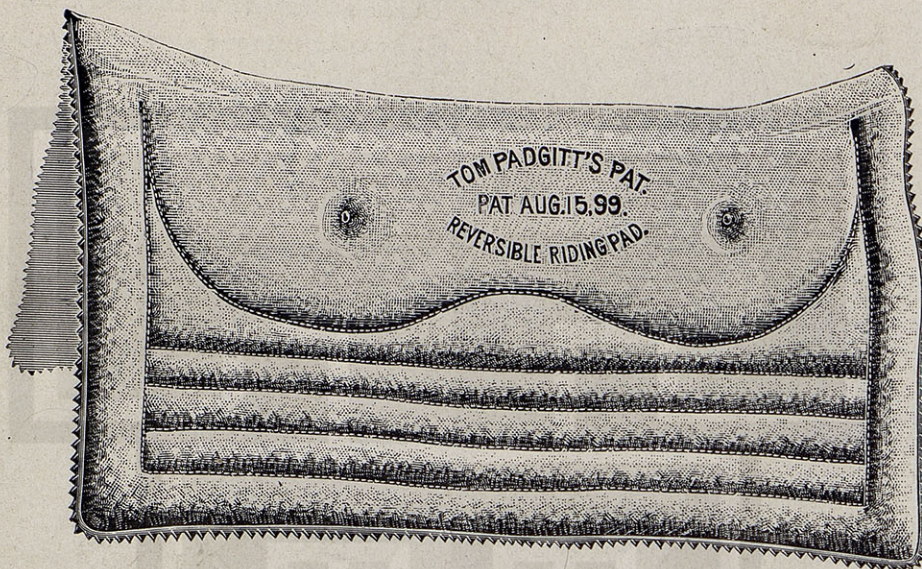

It is furnished with a corduroy collar and is fastened with brass, rust-proof buckles and snap buttons securely attached through leather stays.

These slickers are waterproofed with a special compound, which makes them soft and pliable, and they are guaranteed to be absolutely waterproof and never to become sticky.
