Mr. S. P. Slaughter,  
Saint Jo, Texas.

George F. Orr  
Dallas, Texas

January 7, 1925

Mr. S. P. Slaughter,  
Saint Jo, Tex.

Dear Sir:

This letter goes to you in a spirit of friendliness, of frankness and sincerity, with the conviction that you will receive it in the same spirit and read it with an open mind.

It carries to you news of a matter that concerns you as an individual -- it brings information you will be glad to have; it involves no obligation whatever, and any action you may take will be absolutely voluntary and because YOU wish to take it.

As a citizen of Texas you are keenly interested in every development which increases Texas prosperity. "Good Times" are contagious; they improve and react, indirectly, on your personal affairs. But where you take an active part in creating prosperity you feel the effects of it much quicker -- and to far greater extent -- than is the case when you stand off to one side and watch the other fellow do it.

All experience goes to prove that the quickest, simplest, safest way to achieve success is to become affiliated with a successful enterprise -- an enterprise that has already ARRIVED -- instead of expending a lifetime of hard work as an individual.

This is particularly the case when one is fortunate enough to gain access to a Successful Project after it has done its experimenting, proved its ability, established its markets, demonstrated the fact that it IS A SUCCESS and that its future prosperity is simply a question of expanding its productive facilities in proportion to demand for and consumption of its output.

This is not the place to give you a detailed history of this Texas industry; possibly you are already familiar with this highly interesting subject. In any case, here is what has been done:

Some eight years ago ONE MAN undertook the commercial growing, packing and marketing of Magnolia Figs.

The remarkable deliciousness of his product created urgent demand for it as fast as it could be introduced.

Realization of the fact that more people, from more widely scattered localities, could be most quickly reached on the dining cars of our great railroads than through any other channel, this product has been introduced to the dining car patrons of thirty-eight different trunk lines of railroads, and in addition thereto, to the patrons and members of the larger hotels and exclusive clubs of this country.

The popularity has been instantaneous. The first year's production was quickly sold - at fancy prices. The second year's production of 175,000 pounds - more than three times the first year's production - was all booked three months before harvest began.

Demand - stimulated by a carefully planned National Advertising Campaign - has now reached a point where a radical increase in production is imperative.

Meantime the business itself, during the short period of its existence, has, from its gross income and reinvested profits, developed a Fig Orchard of about a thousand acres - built a fully equipped preserving plant - increased the capacity of this plant by 500%, and established a market which is today insistently demanding much greater output than can be possibly supplied with present facilities.

As the business stands today, the business shows total assets of over \$1,000,000.00 (Certified Public Accountants' Audit and Appraisal Company inspection) virtually all of which are self-generated.

A carefully compiled Forecast of Earnings (detailed analysis to you on request), based upon results already achieved and an exceedingly conservative estimate of profits from operations during the ensuing five years on the present operated facilities, is as follows:

NOTE: These figures are NET, after liberal deductions for overhead and are premised upon completion of present financing.

1925:	Net earnings available for distribution	
	as dividends..	\$192,000.00
1926:	" " " " " "	.. 336,000.00
1927:	" " " " " "	.. 480,000.00
1928:	" " " " " "	.. 576,000.00
1929:	" " " " " "	.. 720,000.00

This is essentially a Texas Industry. The Magnolia Fig, which is a variety of unequalled excellence, has been

developed here and the Brand under which it is marketed has identified it throughout the United States and Canada as a Texas product.

Statements herein made relative to the urgent call for these Figs are decidedly conservative; as a matter of fact, inability to take care of the demand is the Corporation's greatest present handicap.

It is for the explicit purpose of overcoming this that the indicated expansion is now taking place, and it is this expansion which creates YOUR OPPORTUNITY to participate in this sound, established, going business. NATIONAL - yes. International - in scope and right on the verge of the attainment of a foremost place amongst the STAPLE Products industries of the nation.

Every existing circumstance points to the wisdom of identifying yourself with this Corporation before its membership ranks fill and your opportunity is lost.

The furnishing of detailed information is awaiting your prompt response to this letter.

Sincerely yours,

*Geo. E. Orr*

Mr. Luther Mangster  
St. Jo Texas.

Your letter received yesterday  
and was surely surprised to hear from  
you.

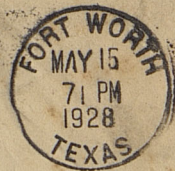

Referring to the oil in your  
vicinity, we are leasing quite a bit of  
holdings in the Western part of the  
State, none, however in your  
vicinity.

If you still send me topographical  
and survey descriptions of what you  
have, and any other stuff that might  
look good, we might be interested, and  
will have our scout who is out there  
now, to probably call on you. Let us have  
this data as soon as possible.

Will write more next time  
Sincerely Otto Skippers

Dear Sir:

We have recently instructed the Crosley factory to send you a quantity of icy-ball folders.

They came back at us today stating that they do not find you listed as an authorized Crosley dealer. I might state that the writer sent your application in on March 20th but evidently it was lost in transit. Therefore, we are enclosing additional application and as ask that you sign the two and return them to us immediately that we may forward them on to the factory for the proper authorization

Very truly yours,

THE SHIELD COMPANY, INC.

W. F. SLAUGHTER, MANAGER

IDABEL, OKLAHOMA

Feb. 3rd, 1929.

Mr. Luther Slaughter,  
Saint Jo, Texas.

Dear Bro:

I just noticed a clipping which I am enclosing from the Texarkana Paper in regard to the Santafee extending its linge into Loveington.

Callaham has never done anything and dont think he will. He was in to see me yesterday and informed me that he had always told me if he put in a picture show here he would tell me. He is still bulling. He is no more going to put in a show here than I am going to put in the third one. I went over the things he had done, the lies he had told, the paste brush he stold from me, and he owned up to stealing some films and that it cost him \$350.00 to get out of it. Also told him about the talks he had been making about me around here the past six months, and that he had circulated it around Broken Bow that I had gone crazy. I told it might be true I was out of my head and probly crazy but that it was none of his dam business and that a fellow could say too much, and that I might get in the same shape again and that if I did he would be the first fellow I would look up. H esaid he didnt mean to be that way and couldnt help it. I told him no I guessed that he couldnt that he was just born that way.

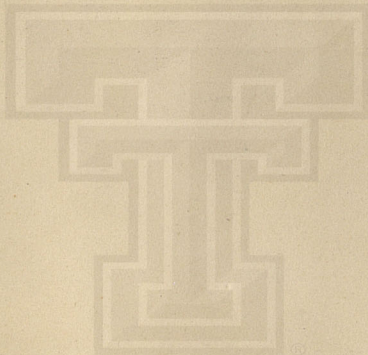

Are you going to Lovington? I dont think you should loose any time in getting out there and see what is going on. If you will bring mother over I will pay your expenses at the Rouleau and will go out there and investigate If you dont want to go and you can help Carl run the show.

Your brother,

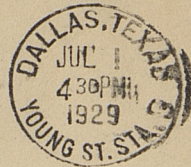

*Frank Slaughter*

## ATWATER KENT RADIO

DALLAS, TEXAS July 1, 1929.

6957-D

BULLETIN No.

5.

**IMPORTANT**

DO NOT DESTROY

TO ALL ATWATER KENT DEALERS:

Again we want to call your attention to --

NATIONAL DEDICATION WEEK  
July 8 to 13

For one full week we're going to stage a big celebration -- all of us -- and help dedicate the new ATWATER KENT Factory.

NOW DOUBLED -- NOW DOUBLY THE LARGEST

Many of you have ordered film trailers at \$5.45 for this occasion. Fine -- but HERE IS BIG NEWS you have a chance to win one of the 25 cups one of five fountain pen desk sets and one of five pocket fountain pens. How? By trimming your windows the best you can with ATWATER KENT Screen Grid Radio.

These prizes are for dealers in Missouri, Kansas, Arkansas, Oklahoma and Texas. You have a chance. None of these dealers are any better than you are. STRUT YOUR STUFF.

Read the rules in the factory bulletin or see the attached sheet -- then mail the card. DO IT NOW.

HARRISON SMITH COMPANY

GES'ADD

By-

P.S. We have some new dealer helps. Enough to help trim your window will cost only \$2.25. Wire us your order. Get started in time.

**1,000,000 Atwater Kent Sets This Year**

### HOW TO QUALIFY YOUR EFFORTS

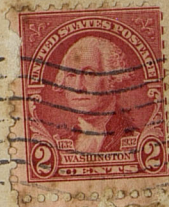

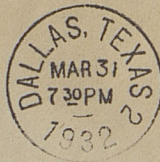

In order to enter your store as a prize contestant for activities surrounding the celebration of ATWATER KENT National Dedication Services, there are a few simple rules which must be followed. Here they are:

1. Secure a photograph of your window. This can best be done at night, with the aid of a flash. A competent commercial photographer will prove advantageous.
2. After your photograph has been secured, check it carefully for obscured lettering on show cards or elsewhere. Write on the back of it, or on a sheet of paper, securely attached, exactly the wording on the signs, so that it may be legible to the judges. Write your name and address on the back of the photo.
3. Clip carefully, preserving name of publication and date any and all references either to your own individual display or to the celebration of ATWATER KENT National Dedication Services in general.
4. Do not display the handsome lithographed ATWATER KENT Factory picture until the opening day of the National Celebration, July 8th. Show it for one full week. Display of this picture prior to that date will disqualify your entry in the contest. The picture need not necessarily be part of your window display.
5. On one sheet of paper write name of store, name of decorator, kind and cost of materials used, and duration of display. Promptly at the close of the contest forward photographs, newspaper clippings or any other material which may have been collected, directly to your distributor. Your entry will be judged by two competent authorities selected by your distributor and a member of the Sales Promotion Department, Sales Division of the ATWATER KENT Manufacturing Company.

# DIXIE TIRE SERVICE COMPANY

DISTRIBUTORS

## THE GENERAL TIRE

CORNER EIGHTH AND TRAVIS

Wichita Falls, Texas

August 24, 1934

Mr. Luther Slaughter,  
Saint Jo, Texas.

Dear Sir:

Thank you for your letter of August 20.

There is evidently some confusion in the size that you mentioned. There is no such size tire as 28x4.75-18 and you evidently have 28x4.75-19 tires.

Our best tube in this size is \$2.15 and four would be \$8.60. The Blow-out Proof tire in this size is a six ply tire but it is not built with the Silent Safety tread but with the Dual Grip tread. These tires are \$12.50 each, or four would be \$50.00. The four ply General tire in this size is \$7.44.

We can assure you that all of our stock is fresh merchandise, as we do not carry an extremely large stock but receive shipments every day or two.

If you are going to be in Wichita Falls at any time in the future we would appreciate an opportunity to show you these tires and tubes.

Again thanking you for your letter, we are

Yours very truly,

Mr. Luther Slaughter,  
Box 55,  
Saint Jo, Texas.

Dear Mr. Slaughter:

We appreciate your letter and sketch but we do not furnish blue prints or plans for plumbing or housing service. We have added to your sketch, which we are returning, to show the location of fixtures you probably will find most convenient. From the standpoint of material and labor economy, however, it would be better to locate the closet where the lavatory is shown and the lavatory nearer the door on the same side of the wall.

Our 4" vitrified sewer tile is 14 $\frac{1}{2}$  cents a foot and fittings to fit are 65 cents each. A septic tank circular is enclosed to show how this part of your system should be installed. Farm drainage tile is 10 cents a foot. A 4" stack with fittings will cost about \$16.00, and a built-in shower unit may be purchased at the prices in our catalog.

Call for your order if you like, but we suggest sending it in several days before you call to avoid a tedious wait. If a complete estimate is required more definite information must be sent. Use the prepaid envelope for placing your order with us.

# An Ounce of Prevention is Worth a Pound of Cure *What is More Important Than Protection of Human Life?*

## Our Hercules Sanitary Septic Tank Will Protect the Life and Health of Your Loved Ones

An important function of a modern plumbing and house drainage system is to carry waste water and waste matter away from the building.

No matter how much money is spent on your plumbing system or how carefully it may be planned, complete sanitation cannot be assured unless some effective means is provided for final disposition of these wastes.

Disease germs cannot be seen with the naked eye but thousands of them may lurk in a single drop of water.

In towns and large cities, where such disposal means are adequately provided by municipal sewerage systems, the problem does not present itself, but in the country where the city sewers do not reach, the installation of a safe and sanitary system of sewage disposal is of paramount importance.

## Pure Drinking Water a Most Important Health Factor

Surveys indicate three out of four farm water supplies are sufficiently polluted to be unsafe for drinking. The old style outhouse with its contaminating swarms of flies and disease-breeding germs is largely responsible for the higher rural death rate, which statistics prove to be a fact.

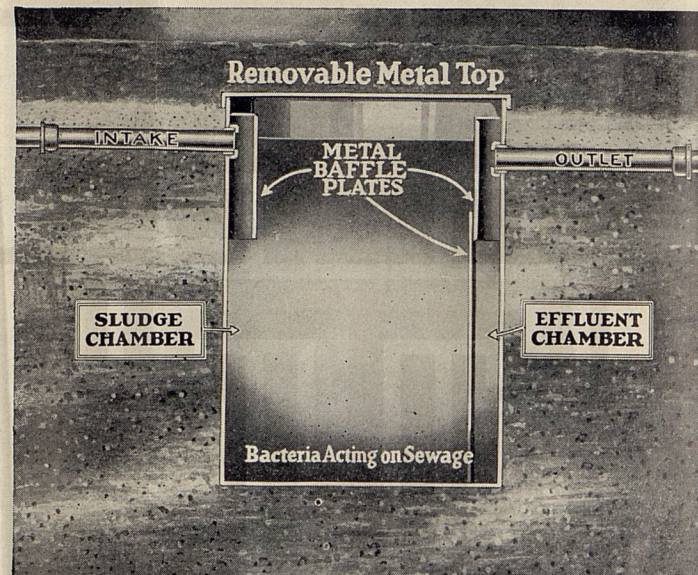

Purity of water supply should be the first consideration of the farmer, though the fact is seldom realized until sickness or death visits some loved one.

Disease germs cannot be seen with the naked eye and thousands may lurk in a drop of water or in a particle of waste matter no larger than a pinhead. Well water may be as clear as crystal and still be thriving with germs. Herein lies the hidden danger.

From specific germs or parasites that may at any time exist in contaminated water there may result typhoid fever, dysentery and intestinal worms, of which the hook worm, round worm, whip worm, eel worm and tape worm are the most common.

Contaminated water may contain also the causative agents of numerous ailments common to live stock, such as tuberculosis, hog cholera, anthrax glands and intestinal worms.

## Illustration Below Shows Our Hercules Septic Tank in Sectional View Buried in the Ground Ready for Service

### A Sound Investment

The Hercules Septic Tank is adapted for sewage disposal from any building where running water is available. By the natural process of bacterial action it provides a safe, effectual, and inexpensive means of disposing of all household wastes. Placed underground, out of sight, it brings to the rural or suburban home the advantages of modern city sewers. As health insurance it is one of the best investments you can make. It gives you a system endorsed by health and sanitation authorities everywhere, at a very nominal cost and with no operating expense whatever.

The sectional view above shows how the tank is placed in the ground and illustrates its function. Baffle plates are so placed as to provide greatest efficiency. The built-in pipe collars have flanges or stops to prevent the pipe slipping too far into the tank, thus keeping the pipe in exactly the position that it should be and insuring proper installation. The cover is removable, allowing easy access if desired.

### Free Engineering Service

The table below shows the number of persons the different size tanks are designed to accommodate. We recommend the selection of a tank one size larger than actual requirements. Our Engineering Department is equipped to give you competent advice and suggestions with reference to any particular problem you may have to meet. Feel free to write us for any information desired, as this service is gladly furnished without cost or obligation on your part.

## Steel Tank Most Practical

Hercules Septic Tanks are made of corrosion-resisting copper bearing steel, covered with a thick coating of asphalt. They are water tight and unbreakable—seams are electrically welded. Built-in pipe connections keep the inlet and outlet pipes in exactly the right position.

For practicability, low cost and durability, steel as a material for a septic tank is far ahead of concrete, chiefly because it will not crack. No matter how well a concrete tank may be constructed, once a crack develops there is bound to be leakage, which cannot possibly occur in a steel tank.

As to expense of installation, the steel tank is so much more reasonable in cost that there is no comparison. The cost of the materials alone, including the forms, etc., required for the construction of any concrete tank would amount to more than the cost of our Hercules Steel Tank completely installed.

## Sanitary—Economical—Permanent— Odorless

Hercules Septic Tanks are scientifically designed to promote the greatest intensity of bacterial action on sewage. It is the action of the bacteria in the septic tank, together with the nitrification or aeration process which goes on in the tile disposal bed which purifies the sewage and destroys the germs. It is the same process as used in the most expensive sewage disposal plants installed by large municipalities throughout the country. The practicability and proven effectiveness of this process is unquestionable. In operation our Hercules Septic Tank is absolutely odorless.

The raw sewage as it comes into the septic tank contains considerable animal and vegetable solids which must first be broken up and oxidized so as not to be offensive or dangerous. There are thus two separate operations to be provided for if the sewage is properly purified. Both of these processes are carried on through the action of microscopic vegetable bodies known as bacteria. Certain bacteria called anaerobes, because they can thrive and work only when protected from the air, have the power to change animal and vegetable solids to liquids and gases. Other bacteria called aerobes, because they can thrive only when kept in contact with air, have the power to purify the liquids produced by the anaerobes by oxidizing them and changing them to pure water and gases.

As the raw sewage is collected in the liquefying chamber, the anaerobes start to work tearing up the animal and vegetable solids. A thick, leathery scum forms on the surface, which acts as a protection from air and what little light there may be. A bed of loose solid material or sludge full of bacteria forms on the bottom, where decomposition takes place. This process of decomposition goes on continually without any attention whatever.

## Costs Nothing to Operate

Our Hercules Septic Tank is a sanitary and health necessity, it is economical to install and to operate and when once installed it is a permanent fixture that will continue to function for many years. There are no chemicals of any kind used in our Hercules Septic Tank.

# SEARS, ROEBUCK and CO., The World's Largest Store

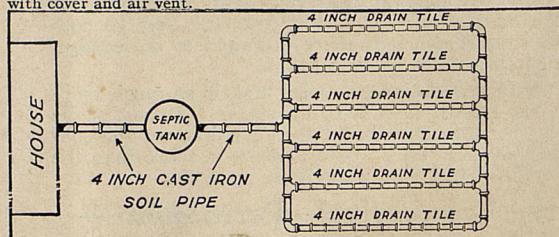

### Easy to Install

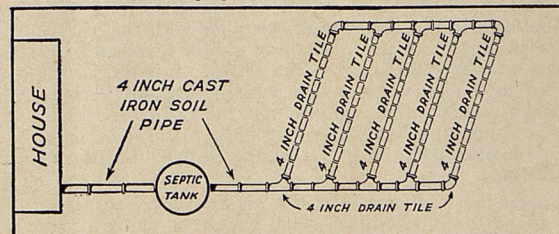

Hercules Septic Tanks are easy to install, no skilled labor being required, and after they are installed they require no further attention whatever. The Septic Tank may be located within 10 feet of the building, but should be at least 15 feet away from any well or spring. Top of tank should be at least 12 inches to 18 inches below surface of ground.

To complete the installation of any septic tank sewage disposal system, it is necessary to provide an Absorption Bed or a Dry Well for disposal of the fluid after it leaves the tank. We illustrate below several plans by which the overflow or clarified water from the septic tank may be distributed through four-inch porous farm drain tile. The absorption bed should be sufficiently large to provide for twenty-five feet of tile for each person in the household. The tile can be laid as shown in the diagrams. Butt open joints of tile end to end and cover tops of joints with tar paper pads or broken tile. The runs of tile should be at least four feet apart. Drain tile should be laid with a slight down grade from tank. Where the soil is hard and non-porous, provide 30 to 50 feet of tile per person, and a little gravel, crushed stone, or cinders, should be placed in the bottom of the trench before tile is laid, and also on top of the tile before filling in with dirt. The aerating process which takes place in the absorption bed supplies the nitrogen which is necessary for the final purification of the sewage. From here it soaks away into the soil as a clear, harmless liquid.

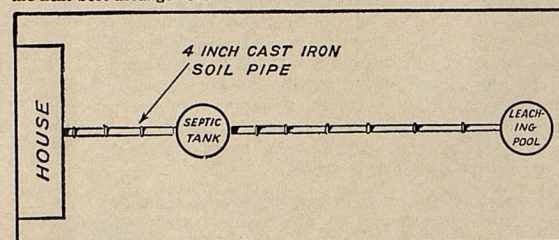

Where a dry well or leaching pool is used, wall it up with material which allows water to percolate through wall, such as dry brick work, with the bottom left open to the soil. Bottom of well should be at least six feet below inlet pipe and not less than four feet in diameter. Equip with cover and air vent.

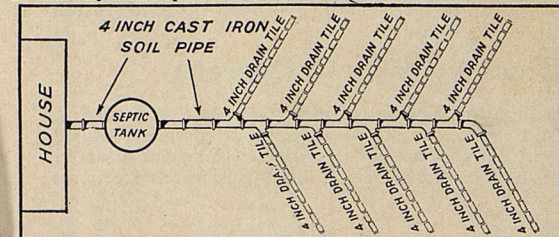

**Plan Number One:** This scheme for laying the tile in the absorption bed provides best distribution of the effluent and assures proper aeration.

**Plan Number Two:** Where Plan Number One cannot be conveniently followed, this plan is offered as the next best arrangement.

**Plan Number Three:** For sewage connection between the house and tank use four-inch cast iron soil pipe. For connection between the septic tank and leaching pool, use porous drain tile laid over a bed of cinders or gravel. This plan should be used only where space is very limited.

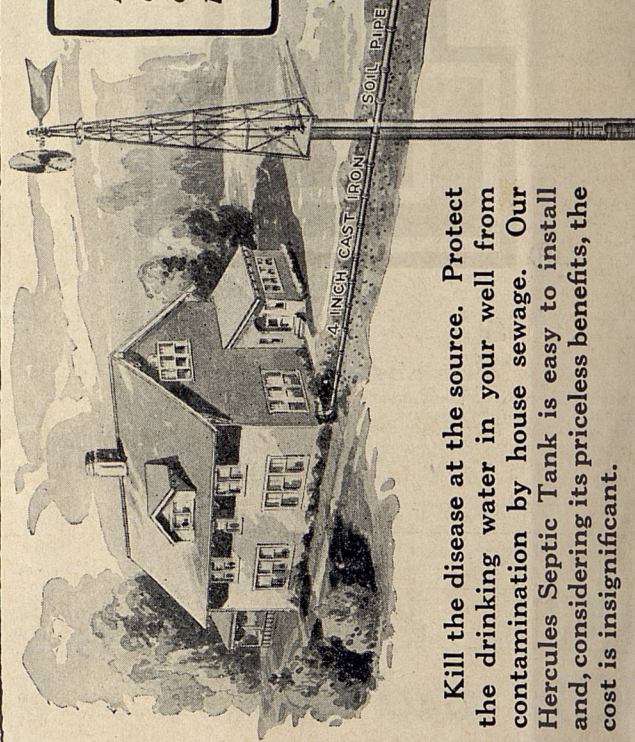

**Plan Number Four:** This plan is used where plenty of space for the absorption bed is available. It provides very efficient distribution.

### Easy to Install Made in Four Sizes

Tile filter or absorption bed where liquid effluent from tank is finally purified. Here it seeps away into soil as a clear and harmless liquid.

Hercules Septic Tank, where bacterial action takes place completing the first stage of purification.

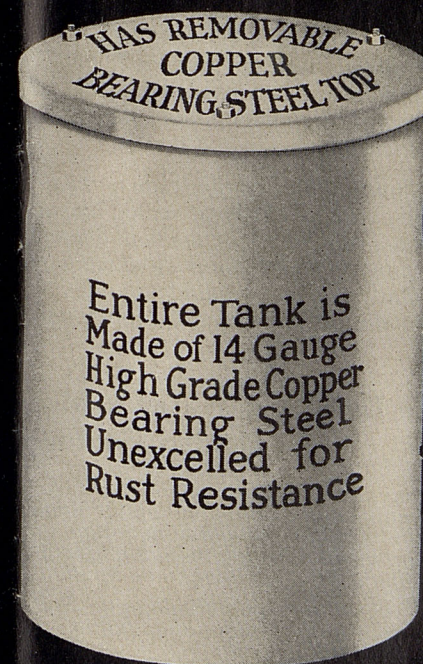

Kill the disease at the source. Protect the drinking water in your well from contamination by house sewage. Our Hercules Septic Tank is easy to install and, considering its priceless benefits, the cost is insignificant.

No Chemicals Used  
First Cost Is Only Cost

PHONE 256

BOWIE, TEXAS

DELAVAL SEPARATORS

Novemebr 14, 1934.

Mr. Luther Slaughter.  
St Jo, Texas.

Dear Mr. Slaughter:

You no doubt will have some electrical work, and possibly some gas lines to run, in addition to the plumbing work which we have estimated for your. We will be glad to take care of both of these items for you also, and can give you price on same after knowing just what you may require.

Thanks for the opportunity of figuring your job, and trust that we will get to do the work for you.

Yours truly

The Electric Shop.

**THE ELECTRIC SHOP**  
**E. SCOTT AVERY**

ELECTRICAL AND PLUMBING

PHONE 256

BOWIE, TEXAS

DELAVAL SEPARATORS

November 14, 1934.

Mr. Luther Slaughter.  
St Jo, Texas.

Dear Mr. Slaughter:

Some work came up which prevents my coming to St Jo to look over your job, however I am figuring it from the information you gave me.

I am not including in my estimate any ditching, as that is an uncertain quantity due to the possibility of running into rock, and as you no doubt will have a laborer on the job, you can probably do the ditching cheaper than we could.

I am not figuring any clay tile for drainage lines, or septic tank work or material; we are however figuring 4" cast iron soil pipe from the bath room to the location of the septic tank, which distance you said was not over 30 feet. We are also including enough 2" Galvanized pipe to run from the sink to a point below the septic tank, to avoid running the sink water through tank.

Our estimate covers necessary drain pipe and water pipe for all roughing work under the house, to take care of a closet combination, built in tub, pedestal lavatory, kitchen sink, and hot water heater, and labor of installing said materials and setting the above named fixtures. The fixtures and water heater are to be furnished by you, together with all trimmings for same such as bibbs, faucets, traps, supply pipes, sink brackets, in other words all fixtures and parts above floor line to be furnished by you.

Our estimate covers lead drum trap for your tub, as this has to be made up to fit your job.

We have figured the cold water line from fixtures to outside of house only, as we don't remember your telling us how far your water supply system was from the house, so we will bring the cold water line just outside the foundation, and you can either make your own connection, or we will, at an extra charge.

Our estimate covers gas line from nearest opening, to the water heater, but no other gas work covered.

All drain lines to be either cast iron soil pipe, galvanized iron pipe, or lead. Water pipes all will be galvanized iron pipe. Installation to be in a substantial and workmanlike manner. Our price on above work and material, \$176.67.

Yours truly  
The Electric Shop.

Mr Luther Slaughter  
Saint Jo  
Texas

Dear Mr Slaughter

Almost everyone who has traveled in other countries, comments on the absence of the plumbing conveniences to which they had been accustomed in this country.

Here an enameled bathtub with hot and cold running water, and perhaps a shower, a good lavatory, and a sanitary vitreous china water closet are a part of millions of homes, whereas they are encountered in only the finer homes and hotels of Europe. The health and vigor of the American people are in part due to the widespread use of sanitary, up-to-date plumbing.

There is no need for any one to be without the convenience of modern plumbing, no matter how far they live from the city water mains. Bathroom fixtures, up-to-date kitchen sinks, and laundry tubs with running hot and cold water, and many similar conveniences cost little and are easy to install. Sears prices bring them within the reach of everyone.

Right now the purchase of plumbing is a most excellent investment. Prices are lower, and a home with up-to-date plumbing is worth much more and easier to sell, or to borrow money on than one without it. It increases the comfort, health, and welfare of the family in addition to adding so materially to the value of the property.

Sears prices are at a new level. Our finest fixtures now sell for less than we formerly asked for our less expensive fixtures, and no matter which fixture you buy, you get Triple A-A-A Quality. Our prices on "firsts" are less than others ask for culls or "seconds."

Now that colorful bathrooms are greatly in demand, we are right up to the front with the most popular and most beautiful shades and tints of colored fixtures. They are a delight to the eye and lend the soft tone of luxury to any bathroom. The hard, smooth, glistening surface of these fixtures will never chip nor crack from ordinary use, assuring cleanliness, beauty, and sanitation always.

So far we have not received an order for the plumbing fixtures that you wrote us about recently, and we are wondering if there is any other information that you would like to have. Just mail your order or letter in the enclosed stamped envelope, and it will be given our personal attention.

Sincerely,

Enc. TPOB, SE.

- ✓ Acetone ----- 2-Oz.
- ✓ Ammonia ----- 4-Oz.
- ✓ Green Soap (Liquid) -- 2-Oz.
- ✓ One tea spoon. baking soda.
- ✓ One tea spoon pulverized borax.
- ✓ Distilled Water. 25-Oz.

(You can add enough distilled water to make one gallon and it will work fine.)

Add Soap, Water, Soda & Borax. Shake until dissolved. Then add the other ingredients.

Wash part <sup>thoroughly</sup> in solution. Rinse then in Benzole, Benzine, Emery, or high test gasoline.

Texas are very dull here. I'd have been if I could, but I've got my home here and I can't sell it. I <sup>might</sup> have it away if I owned the business. a fellow could make a fairly good living out of it. I am at present working on ~~commission~~ percentage. have been for 4 years. Be sure to stop and see me when you come through Hugo, this summer.

P.S. Excuse this writing. Frank }  
but only you can read it. Ed. L.

Very truly, W. F. Leonard.

## *Santa Fe Railroad May Extend Into Oil Lands*

WASHINGTON, Feb. 2.—(AP)—A 90-mile extension into oil territory around Lovington, N. M., is contemplated by the Atchison, Topeka and Santa Fe system.

ot  
lling  
rious  
s. No  
usiness  
e born  
was a

A subsidiary of that company, the South Plains and Santa Fe railway, asked the interstate commerce commission for authority to build from Seagraves, Texas, to Lovington, N. M., and to extend a branch line southward from Lovington into oil regions.

# THE JEWELERS BUYERS DIRECTORY

---

**A QUICK AND READY  
REFERENCE**

---

**AN INDISPENSABLE AID TO  
THE JEWELRY STORE BUYER**

---

Concise and complete—it is a compilation of the names and addresses of the manufacturers, wholesalers and importers in the jewelry and allied industries.

The classified listings are arranged alphabetically and geographically, grouping the sources of the various lines carried and services used in the retail jewelry store.

This, the 40th edition of THE JEWELERS BUYERS DIRECTORY, will be found more complete, more perfect and in general a better reference book of its kind than has ever before appeared. It has been carefully revised and edited to bring it up to date in every particular.

239 WEST 39<sup>TH</sup> STREET  
NEW YORK

August 1, 1939

Dear Subscriber:

We take this means of making you aware of the fact that the newest edition of THE JEWELERS BUYERS DIRECTORY, complete and carefully edited, has just come off the press. You will want a copy of this directory, a quick and ready reference for sources of supply and a necessity in every retail jewelry establishment. As a subscriber to THE JEWELERS' CIRCULAR-KEYSTONE, it is available to you at 50 cents. The regular price is \$1.00.

The enclosed leaflet fully describes the directory. Make use of the order form on back of the leaflet to get your copy. Remittance can be made with stamps. If you prefer to pay by check, and are reluctant to draw one for less than one dollar, you can include the cost, \$2.00, of the renewal of your subscription to THE JEWELERS' CIRCULAR-KEYSTONE, for one year from the present expiration date.

In any event, avail yourself of this opportunity of getting a copy of this handy, comprehensive pocket size directory at the discount price to subscribers of THE JEWELERS' CIRCULAR-KEYSTONE.

Very truly yours,

THE JEWELERS' CIRCULAR-KEYSTONE

INSURANCE PROTECTION FOR ALL NEEDS

1-1-42    Renewal of Fire-Lightning, Gas Explosion policy    \$2.78  
            Rent Dwelling, \$500.00

In as much as this dwelling is vacant, it is necessary to attach a Vacancy Clause which reduces the face of the policy during the time it is vacant. The reduction is one-third.

Due to the greater hazard of fire of a vacant dwelling, it takes a higher rate however this increase is made in the reduction of the face of the policy instead of an additional charge.

## EXTRACT DEPARTMENT

### XXXX VANILLA

Made only from best quality, whole 7-inch Vanilla Beans.  
Pint, \$1.65; quart, \$3.00; gallon \$12.00

### XXX VANILLA

Compound of Vanilla, artificially strengthened and colored. Well aged. Suits many as well as straight Vanilla Extract, and much cheaper.  
Pint, \$1.35; quart, \$2.25; gallon, \$8.50

### XXXX LEMON EXTRACT

This is the best grade Lemon Extract for soda fountain and ice cream. Made according to State and National legal requirements, but stronger. Contains no color. We advise dealers to always specify "XXXX Lemon" when they want the best and most economical. One ounce flavors a gallon of syrup perfectly.  
Pint, ; quart, ; gallon,

### XXX LEMON FLAVOR (Soluble)

This is not an "imitation," but the real soluble part of the lemon extracted by soluble process. Two ounces to a gallon makes a clear syrup for bottlers and soda fountain use.  
Pint, \$1.25; quart, \$2.25; gallon, \$8.00

### XXXX ORANGE EXTRACT

Same quality and process as "XXX Lemon." Not colored.  
Pint, \$1.85; quart, \$3.50; gallon, \$12.00

### XXX ORANGE FLAVOR (Soluble)

Same quality and process as "XXX Lemon." Harmless color or colorless, as desired.  
Pint, \$1.65; quart, \$3.00; gallon, \$12.00

## EXTRACTS AND FLAVORS

### NATURAL PRODUCTS

Celery, Ginger, Peppermint, Cherry, Cloves, Root Beer, Cinnamon, Nutmeg, Sarsaparilla, Spearmint.  
Pint, \$1.25; quart, \$2.25; gallon, \$8.00

### ARTIFICIAL FLAVORS

Apricot, Peach, Raspberry, Banana, Pear, Strawberry, Blackberry, Pineapple, etc., etc.  
Pint, \$1.25; quart, \$2.25; gallon, \$8.00

### ACID PHOSPHATE, XXXX

For acidulating syrups, making phosphate syrups, and in place of Fruit Acid.  
Quart, \$1.00; gallon, \$3.00.

### STAR SODA FOAM, XXX

Do not confuse our Soda Foam with the various compounds of chemicals, gelatine, eggs, etc., sold at \$1.00 to \$1.50 per gallon. Better pay a fraction more and get a foam that does not affect the taste of your syrup nor cause them to ferment.

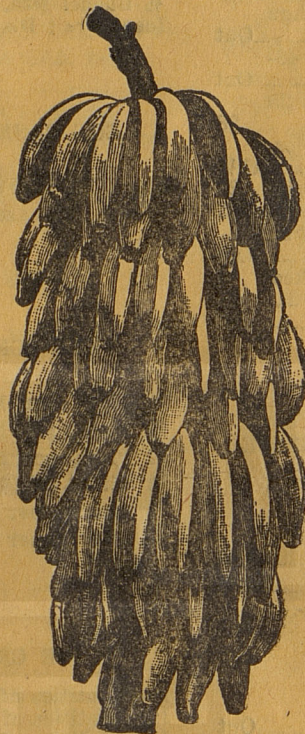

Use one ounce Star Soda Foam to a gallon of syrup.  
Per quart, \$1.60; per gallon, \$8.00.

# BANANAS!

If we are not shipping you  
Bananas, ask your neighbor  
who ships the finest Banan-  
as in the State of Texas!

Fancy Yellow Pre-cooled Bananas  
always just right
