## MAKERS OF FAMOUS COW BOY SADDLES

Weight, 37 Pounds

No. 21

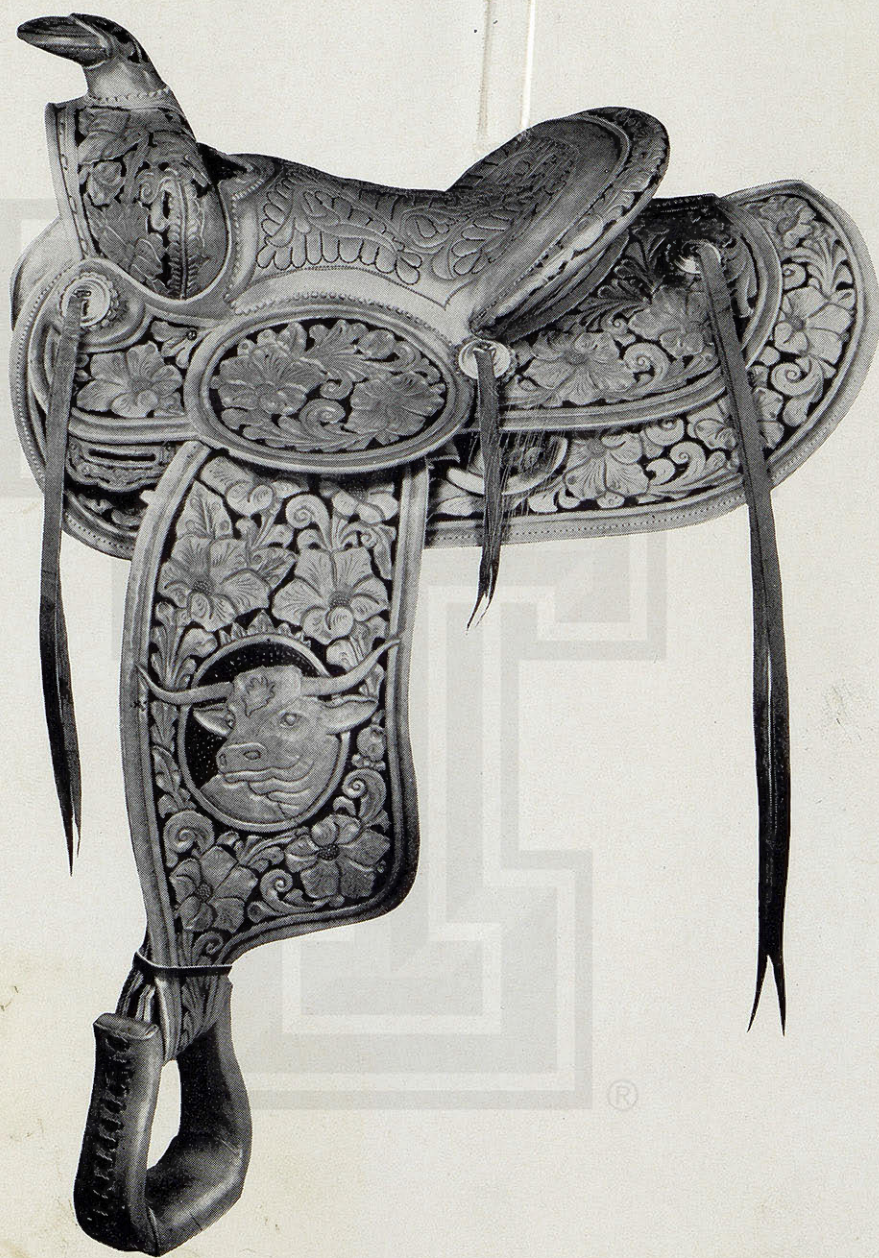

Price \$157.50

### Improved Rattan Tree—14x18-inch

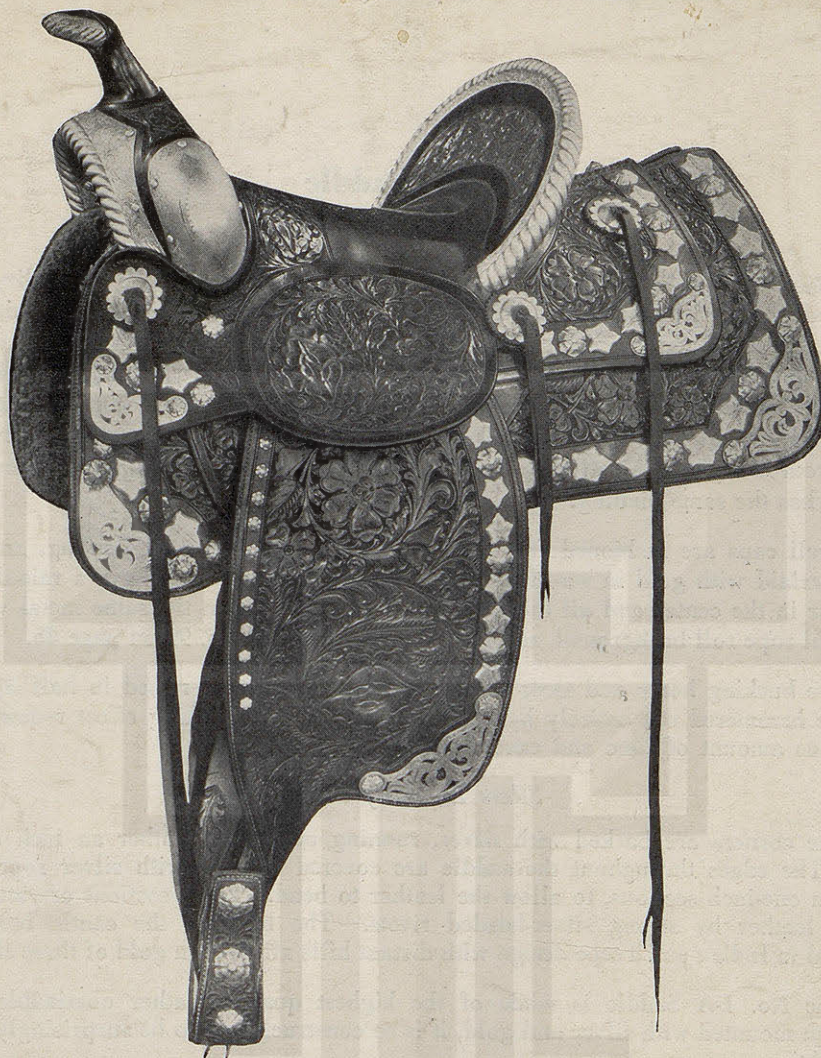

This saddle is made on 14-inch Rattan tree with 18-inch swell fork; a larger or shorter tree will be used, also fork. This tree has many strong qualities and will appeal to those who like a dish cantle.

This is a masterly saddle in every respect and one of the finest mechanical and artistic production. If you want something swell, you can't let this get away. ONE OF OUR SWELLEST SADDLES IN EVERY RESPECT.

**No. 3-A Saddle**

The No. 3-A Saddle is made on Miles City tree, with ornaments of Sterling silver. It is excellently well balanced in design—not too large nor too small. Front and cantle binding, and binding on horn, are in heavy rope roll effect. Swell caps are made in thick silver and permanently fastened with heavy silver headed nails. Back of cantle covered entirely with solid silver, with your brand or initials inscribed in gold. Leaf and flower design on edges of skirts, and large corners on fenders, are of very thick silver, featuring a filagree pattern which permits the leather to show through. All silver is artistically engraved and substantially made throughout. Fenders are lined with very fine leather and are cut as shown in illustration unless otherwise specified. Also made, if desired, with straight or turned stirrup leathers. If you prefer straight leathers and wish to have them "broken in," we will gladly do so.

The No. 3-A Saddle can be had in black leather or tan with black inlay in carving, or all tan. The carving is the finest throughout. Your brand, or any special design you wish to have executed, will be expertly carved. Rigging can be furnished in either flat leather style, flat bronze ring, or ordinary ring. Also, you have choice of single or double rig without additional cost. When ordering this saddle you are invited to make any suggestions or any changes you wish. If changes will entail an additional cost, we will immediately advise you. We are always glad to submit design for your approval.

No. 385 cinch, with carved leather-covered rings, is furnished if not otherwise stated.

**Price, as illustrated . . . . . \$785.00**

## No. 1-A Saddle

(Illustrated on opposite page)

The No. 1-A Saddle is one of the leaders of the Bohlin line of quality saddles, and as such it is without duplication in the saddle-making business. This saddle, as illustrated on the opposite page, is made on the Miles City Tree, and is beautifully hand-carved on black leather. It can also be made in tan, or black and tan, with any style rigging preferred. The rigging shown in the accompanying picture is three-quarters style with flat leather rig, and the front and cantle binding is made from heavy sterling silver in rope roll design. The horn, with flower ornament on top, has the same binding.

Swell caps are fashioned from extra heavy silver to prevent denting, and are also overlaid with gold in scroll and flower design. The leaves have a raised vein of silver in the center and all the tie conchas are made from the same metal with a beautiful rope roll background, as illustrated in Ornament No. 99 on page 45.

The hucking horse and steer designs on the corners are raised in half figures, and are hammered out entirely by hand. To obtain this striking effect requires an enormous amount of time and exceptional skill.

### *Silver Liberally Used*

The corners are backed with silver, running under the leather an inch and a half. The edges throughout the saddle are covered entirely with silver rope roll, made in one-inch sections, to allow the leather to bend. These sections are attached to the leather by strong silver-headed rivets. The back of the cantle board is mounted in Indian and Teepe design with distant hills all done in gold of three shades.

The No. 1-A Saddle is made of the highest quality leather obtainable, and although mounted with silver and gold, it is so constructed as to be surprisingly light in weight.

The description as given is of the saddle illustrated, while you may have any design you desire. A saddle of this kind requires the closest cooperation with the customer, as there are many little things you may want added or changed. We always invite your suggestions and will carry out your specifications to the letter. We are here to serve and to serve with unqualified satisfaction.

**Price, without taps, \$1,550. If desired with taps, \$275 additional.**

Taps can be made either with eagle-beak or monkey-nose, as you prefer.

No. 1-A Saddle

"Truly a Masterpiece of the Art of Saddle Making"

(Described on opposite page)

without 1550<sup>00</sup>  
Tape 250<sup>00</sup>

## No. 2-A Saddle

(Illustrated on opposite page)

The No. 2-A Saddle is outstandingly the finest saddle made. Matchless beauty, incomparable workmanship, and the finest quality materials, combine to give this saddle the highest possible rating known to the saddle world. It is the very acme of achievement in precious metal on leather. Some conception of the painstaking care required in making the No. 2-A saddle may be gained from the fact that six weeks are required from the time work is first started until it is completely finished.

This saddle is made with heavy Sterling silver front and cantle rope roll, as in the No. 1-A saddle. The horn has rope roll binding with flower design on top, and is wrapped entirely with one piece of silver. Swells are covered with silver caps, are mounted with flower ornaments, and are filigreed. The rigging shown in the illustration is three-quarters style, with flat leather. The corners have rope roll edges, extending underneath the leather; also filigreed design with raised steer heads in three shades of gold. Leaves have a raised vein of solid gold, as also have the buds in the center of the flowers.

### *The Acme of Workmanship*

The conchas are made like No. 99, as shown on page 45. The stirrups are mounted with a silver plate and filigreed flowers. The back of the saddle has a solid plate of silver, with initials and steer heads in three shades of gold, and is filigreed in a most intricate design.

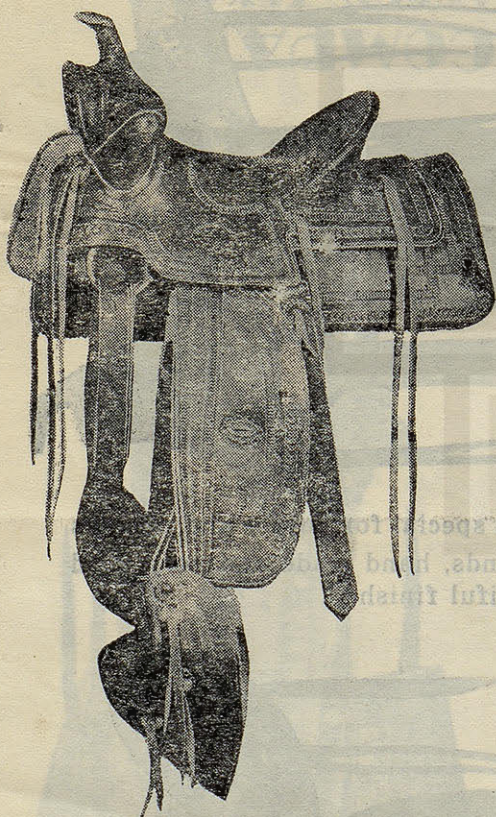

This saddle can be made to your own design of fender and stirrup leathers. Also it can be made with tan leather and black inlay in the carving.

Execution of the design of this saddle is of a most tedious and intricate nature, as all the filigree work must be done by hand. The large pieces, such as the swell caps, for instance, are very hard to handle while in process of filigreeing, but the highly skilled workmanship that characterizes all Bohlin products is especially emphasized when the requirements are the most exacting. The exceptional beauty of the No. 2-A saddle, as well as its practicability, testify to the high standard of Bohlin craftsmanship.

Price, as illustrated . . . . . **\$2750.00**

THE WORLD'S FINEST  
SADDLES

Cowboys' Wants a Specialty

## To my Friends and Customers:

Fifty years ago the writer left the ranch to learn the Western saddle making trade. After four years work as an apprentice in the best known saddle shop of the West, he drifted westward and into the range country, where he made saddles for the REAL Cowboy and Western riders; and there formed the association of the GREAT characters of the West, some of whom have become national immortals. He touched elbows with and knew the pioneers, the buffalo hunters, the ranchmen and the cowboys—all sons of the plains. These men were his customers and his friends—all great hearted characters, and what an opportunity has been his to have such men as friends and to have learned their slant on life, the way they viewed things, and the way they did things. From these great men we learned much and especially about the requirements of the riders, and with the mechanical knowledge gathered by years of training, we have applied the things learned from THOSE WHO KNOW.

The catalogue which we send to you shows some of the things in saddles which were developed under the conditions mentioned—the knowledge derived from our years of experience is now given to you for inspection. What we have done speaks for itself—we leave it to you to judge.

When we can serve you, it will always give us pleasure. May the best always be yours. BE HAPPY—RIDE A MYRES SADDLE.

Yours most truly,

## Trees

The tree is *the important* part of any saddle. With everything else good, but with a bad tree, the inevitable result is a poor saddle—one that will give trouble and be unsatisfactory.

Our trees are specially made for us by the most skilled experts, men who have spent a lifetime in studying the rider's wants. The very latest styles and designs are used. We keep strictly up-to-date on everything; in fact, lead the procession. Our trees come as near meeting all the requirements of the riders as is possible until all *ride alike and all horses' backs are shaped alike*.

Our trees are regularly made for medium sized horses. If ponies or large horses are used a narrower or wider tree should be made accordingly. The trees are guaranteed against breakage for a period of two years. Should any of the trees hurt, we will gladly fix the same free of charge, when it is the fault of the tree. Several things could cause the saddle to hurt other than the tree:

FIRST. Bad blankets, or carelessness in blanketing, often causing a wrinkle or fold in the blanket; but especially the continued use of wet, sweaty blankets for days without having them washed or cleaned. This causes the back to become soft and tender. This is notably true in hot months. Give good attention to the blankets, and many troubles will disappear.

SECOND. Sometimes the hurting is due to the peculiar condition or shape of the horse's back. This is especially true if the horse is thin or in poor condition.

THIRD. Possibly what causes more trouble than any one thing is the manner in which one rides. Some riders never hurt with any saddle, while others hurt with every saddle. The skill of being able to properly balance in the saddle will go far to cure most of the hurts. So watch your balancing in the saddle and note the results. Our seats are shaped to assist in overcoming the condition brought about by loose or careless riding.

FOURTH. BE CAREFUL NOT TO PUT YOUR SADDLE ON THE HOT RADIATOR OF A CAR. We have seen the trees warped, the linings and the skirts burned out from this cause and the saddle made to hurt—when otherwise it would not. Watch this and you will get around some other troubles.

Sterling, brass or bell metal horns will be used on any saddle not showing the same, when desired, but for heavy work we recommend the regular iron horn tree, covered with leather or rawhide, as we consider it stronger than either the brass or the bell metal. When brass, bell metal, or sterling horns are wanted, add \$3.00 to catalogue price.

*The Extra Swell Fork* will be used on any saddle, not showing the same, at the following prices: 12-inch fork being taken as a base, add \$1.50 an inch up to 16 inches. On all swells over 16 inches, add \$2.50 for each additional inch.

For saddles with larger trees than described in catalogue, add \$3.00 per inch for each additional inch for cost of material.

## Buckskin Seats

This is something that we have specialized on for years and the favor with which these seats have been received by the actual riders, and the service which they have given, enables us, in the strongest manner, to recommend the same to you. These seats are inlaid on the regular leather seat in such a manner that in case they wear out or are not wanted, they can be removed at any time and a good seat would be maintained in the saddle. It is our experience that nine out of every ten who use this seat once will order the same again. This is conclusive proof of their efficiency and satisfaction. These seats will be used on any saddle not

showing the same at from \$7.50 to \$10.00 extra, depending on the size and style of saddle.

## Material

The leather which we use in our saddles is the very highest grade from the famous Eberhard Tanning Company at Santa Clara, California. These tanners have made our leather for the last forty years and the quality of their product is unequaled. We use not only their leather, but wool skins, chap leather and lace leather.

## Workmanship

Three things are necessary in making any good saddle:—

First the *tree*, second the *material* and third the *workmanship*. Appreciating the importance of the workmanship, all of our mechanics have had years of training in our place and are familiar with all details and have the best practical knowledge of Western saddle making—only the BEST work for us.

It may not be amiss here to state that our saddles, except the cheaper, are all laced with buckskin laces, instead of being put together with rivets and where tree fastenings are necessary, we use screws instead of tacks or nails and the superiority of our workmanship is one of the *marked features* of our saddles. Examine our saddles and you will find their supremacy.

## Stamping

Stamping is an art and it comes down to us from the earliest times. History advises us that the old Moors who over-ran Spain left traces of their handicraft in that country. The Spaniards carried it to Mexico and we got the same from that country. Hand-carving in the hands of an artist on the *right kind of leather* will increase the wearing power of the leather at least 50%. We speak from forty years of experience and observation when we make this statement; hence we can recommend the hand-carved work in the strongest way, as a wearing element to say nothing of the beauty which it adds to the finished product.

Please note our leather products and their high class. Our carvers are past masters in the art and our designs are new, distinctive and original; hence the supremacy of our work.

## Oiling

All saddles are carefully and skilfully oiled with Neatsfoot oil, unless otherwise ordered. *Oil is the life of leather.*

## Terms

All saddles in this catalogue are strictly *net*, *no discount*, as it has *always been our policy to give in quality instead of discount*. Our prices are strictly cash; *no credit*.

In ordering, just give number as described in the catalogue. It is not necessary to destroy or mutilate the book in order to send picture.

Write your name, postoffice, and State plainly; also give your nearest express office.

All orders will have strict and careful attention, and will be filled as promptly as possible.

Special orders will have our best attention, and we will make you *exactly* what you order.

At least 25 per cent of catalogue price should accompany order. This saves time, as it is not then necessary to look up financial references. The goods will be sent C. O. D. for balance. This is especially necessary where special orders are made.

*In view of the uncertainty of the leather market, all prices are subject to change without notice.*

---

## SPECIAL NOTICE

We give special attention to the repairing, relining, restringing and fixing of old saddles, regardless of their condition or the maker. Also we will place new trees in old saddles or use the old trees in new ones. Special work will have our best attention and we will go our limit at all times to please in every respect, both as to workmanship and price.

## SPECIAL ATTENTION

Many inquiries come to us, asking if we will use old saddles on new ones. We are pleased to state that we will use your old saddle at the very best market price. We also have inquiries asking if we have old saddles for sale. We always try to keep a fair stock of old saddles and sell them at the most reasonable prices.

## "Myres' Special" Iron Horn Tree—14½-inch

This saddle is made on a 14½-inch tree, seat, cantle, front jockeys and side jockeys in one solid piece of leather, 30x16 inch skirts, lined with the best wool skins, Sam Stagg or Strap rig. Beautiful combination carving, artistically executed, genuine sterling silver trimmings with heavy sterling plate on stirrups. For artistic beauty and mechanical skill this saddle has no superior. It is designed for the heaviest work and especially roping. This will fill with gladness the heart of the most exacting.

This saddle carved without the sterling trimmings is \$150.00. The same saddle made plain, without the silver trimmings, is \$115.00.

### Joe Gardner Tree — Mexican Horn

This masterly saddle—stands out as a monument to the high art of classical saddle making—words cannot describe its modest beauty—It appeals to all who love fine art as expressed in leather.

Its workmanship is from a master's hand—the material is the finest—who rides this saddle rides with the knowledge that he has THE BEST.

This saddle made on 14-inch tree with 13-inch fork—larger can be used.

## "Myres' Special" Tree Sterling Horn—15-inch

This saddle is made on the celebrated Myres' Special tree, which is especially adapted for easy riding, roping and all ranch work. It has many friends. The saddle is elaborately carved in the most artistic designs, the carving is surrounded with a beautiful border, which is strongly embellished in colors and which brings out an unusually fine effect of the stamping. This special job was made for W. T. Johnson, Rodeo promoter and stockman of San Antonio, Texas.

We cannot too strongly recommend this saddle. It is distinctive in itself.

### Special "Little Wonder" Iron Horn Tree

This saddle is made on a 13-inch tree with 14-inch fork. (See No. 64 saddle for fork view.) The shape of the tree gives the greatest possible seat room. Full round skirts lined with bark tanned wool-skin, extended seat, 3-inch stirrup leathers doubled at points, beautifully carved in artistic design, back ground is darkened which brings out the elaborate carving. 19 $\frac{1}{4}$ -inch long and 2 $\frac{1}{4}$ -inch short latigoes, best grade Angora front cinch with No. 21 flank cinch, stirrup full leather covered and carved.

This is a beautiful piece of work and is an ideal saddle for roping and specially shaped for easy riding—for Ladies use it has no equal. We have had the strongest reports from this tree from Old Time Cowboys who state that it is the easiest rider and best roper they have ever used. If you want to head the procession ride this saddle.

## Improved "All-Around" — Iron Horn Tree

This saddle is made on a 13-inch tree with 14-fork—owing to the shape of the tree it gives greater seat room than the average, hence a shorter tree can be used. This saddle is designed with special shaped skirts which are lined with woolskin—this style of skirts is indorsed by some of the best riders in the West. The saddle is made with single cinch, however, the same can be made with the double at \$4.50 extra.

The quality of the material and the workmanship is the best and it gives us pleasure to recommend this style of saddle and specially the tree to the most exacting riders.

The saddle is finished with No. 7 stirrups 1½-inch long latigo, 2½-inch short latigo and Angora cinches. When a double rig is requested a No. 21 cinch is included.

This is a practical saddle and one that will give excellent service—we recommend it.

This saddle is made on a 14-inch tree with 12-inch fork, with full round skirts—woolskin lined, 3-inch stirrup leathers double at points—BUCKLES WILL BE USED WHEN WANTED; 1¾-inch long and 2¼-inch short latigoes, soft cord cinch, No. 21 flank cinch and metal covered stirrups.

The border stamp brought out in dark colors makes a most attractive finish for the saddle. If color is not desired deduct \$2.00 from price.

The tree in this saddle was designed for an easy rider and an ideal roping saddle in a light heft. The riding value of this saddle equals the best and for light roping it will measure up to the expectations of the most exacting. For quality, weight, price and looks it is distinctive in itself.

## "Myres Little Roper" Iron Horn Tree

A 14-inch tree with 12-inch fork and 2½-inch cantle is used in this saddle. The tree is heavy beef covered with the same shaped bars as used on "Myres Special" tree. The saddle is made of heavy chrome latigo leather. This is a strong and tough stock with good wearing value. A well proportioned saddle with round skirts. Cheyenne cantle roll, reinforced front rigg. No. 7 stirrup—1½ inches long—2-inch short latigoe, No. 21 flank—1½ inches, soft cord front cinch.

This is a knock-out saddle for quality, riding value and weight. An ideal saddle for guests.

### "Arizona Special" Iron Horn Tree

This saddle is made on a tree with 14-inch seat and 14-inch swell, and of LATIGOE LEATHER. With full round skirts lined with bark tanned woolskin, 3-inch stirrup leather doubled at points, 1½-inch long and 2¼-inch short latigoes, and No. 21 flank cinch, metal covered stirrups, soft cord front cinch.

For weight — for price — and for wearing value and riding qualities this saddle is WITHOUT AN EQUAL. This saddle was designed for "GUEST RANCH WORK" but in a number of instances we have had reports where the actual cowboy had adapted this saddle and abandoned his heavy stock saddle. When desired buckles will be put on the stirrup leathers. This is a great saddle and you can make no mistake in using same.

### "Myres" Astride Tree—14-inch

This is one of the latest astride trees, 14½-inch with 14-inch swell fork. The swell fork saddles are now in demand by the very best lady riders. If the swell forks are good for the men and boys, why not for the ladies? THE BEST ARE COMING TO THEM. Solid fork cover, but will be laced on the sides if desired; full buckskin inlaid seat; inlaid on the seat in such a way that in case it should ever wear out a good seat would still be retained in the saddle. Beautifully hand-carved in elaborate design, which makes a very attractive and beautiful saddle.

THIS SADDLE IS MADE IN THE VERY BEST MECHANICAL WAY ON THE VERY BEST TREE, AND THE BEST MATERIAL; AN EASY RIDER AND WILL GIVE THE BEST SERVICE. MADE ALSO WITH FULL ROUND SKIRTS.
