LUBBOCK--Physics Prof. Raymond Pepinsky of the University of Florida will deliver the Robert A. Welch Foundation Lecture in Chemistry on March 29 at Texas Tech University.

Dr. Pepinsky will speak on "Static Magnetic Field Effects in Molecular Biology and Sensory Physiology" at the 4:40 meeting in Room 5 of the Chemistry Building.

Dr. W.O. Milligan, director of research at the Robert A. Welch Foundation, said, "The purpose of the Robert A. Welch Foundation Lecture is to make it possible for institutions of higher learning to bring to Texas eminent speakers who might not otherwise be acquired. We are pleased that Texas Tech University is bringing this distinguished scientist to its campus."

The lecture is open to the public at no charge.

Pepinsky received the bachelor's (summa cum laude) and master's degrees from the University of Minnesota and the doctoral degree in physics from the University of Chicago.

Before joining the faculty at the University of Florida in 1968, Pepinsky taught at Auburn, Pennsylvania State and Florida Atlantic universities.

-more-

He has written more than 140 papers and done extensive research in physical, chemical and surface crystallography. He also has done research in the fields of x-ray, neutron and slow electron diffraction, and structural mechanisms of crystal transitions.

In recent years Pepinsky's research has turned more toward various areas of biophysics, including that of static magnetic field effects in biological materials and processes, and their structural and functional significance.

Pepinsky has received numerous honors, including an honorary Doctor of Science degree from the Justus Liebig-Universitaet of Germany and Guggenheim and Smith-Mundt fellowships.

The physics professor has served on the governing board of the American Institute of Physics and the editorial board of the "Review of Scientific Instruments" and has been a member of six National Academy of Science-National Research Council committees. He is a Fellow of the American Physical Society and the American Association for the Advancement of Science.

LUBBOCK--Application deadline for Texas Tech University Woman of the Year Award is April 6.

Applications for the Texas Tech faculty or staff member who has contributed to the campus and community are available in the Student Life Office, Room 163 of the Administration Building.

Any organization or individual may submit an application. Five finalists will be selected on April 13, and awards will be given at a reception on April 20.

The award, sponsored by Mortar Board and Women In Communications, Inc., began in 1974, and replaced the former Faculty Woman of the Year Award given by the Association of Women Students.

Previous winners include Helen C. Brittin, 1978, associate professor of food and nutrition; Louise L. Luchsinger, 1977, associate professor of marketing; R. Jeannine McHaney, 1976, director of Women's Intercollegiate Athletics; Dr. Ann A. Daghistany, 1975, assistant professor of English; and Dr. Margaret E. Wilson, 1974, then chairperson of the Department of Health, Physical Education and Recreation.

The selection committee is composed of previous winners and student representatives from sponsoring groups. Final selection is on the basis of outstanding ability and service and contribution to campus, community, profession, students and the role of women.

LUBBOCK--Lionel Rivera of El Paso, a military science major at Texas Tech University, has been presented the George C. Marshall Award. The honor is bestowed annually by the Army and the George C. Marshall Research Foundation, and recognizes the outstanding senior in each of the nation's 280 college and university ROTC departments.

Rivera, son of Lionel Rivera of 9850 Verbena, El Paso, graduated from Irvin High School, El Paso, in 1974.

Rivera and the other award winners will attend the ROTC Award Conference on national security issues in Lexington, Va., April 19-21. The conference will be chaired by Gen. Maxwell D. Taylor, former chairman of the Joint Chiefs of Staff, and Henry Cabot Lodge, former senator and ambassador.

The award is named in honor of Gen. George C. Marshall, former Army Chief of Staff, Secretary of State, Secretary of Defense, and winner of the Nobel Peace Prize.

EDITOR'S NOTE: This list may not be complete. Because of state privacy laws, we cannot release hometown stories about students unless we receive their permission. Many do not give us this permission. Others often list Lubbock as their permanent mailing address when they really are natives of other cities and towns. This information may help you answer questions from parents whose honored students are not listed.

NOTE TO VERNON EDITOR: This is a repeat of an earlier release and is sent at the request of Dr. Ernest Fish, interim assistant dean of the College of Agricultural Sciences in response to a request by THE VERNON DAILY RECORD.

LUBBOCK -- More than 4,000 students at Texas Tech University qualified for the deans' honor rolls in the six colleges during the fall semester 1978.

Among them were 17 from Vernon: Mathew Baker, Rt. 2; Julia Bowers, 4230 Paradise; Donald Davis, 2901 Paradise; Jeanne Goins, Rt. 1; Donna Jones, 2813 Peck Circle; Leah Lambert, Rt. 3; Mark Lehman, Rt. 3; John Lucas, 2226 Clair Drive; Starla McGee, Rt. 2; Ricky Morgan, 2225 Clair Drive; Don Olive, 2212 16th; Thomas Richardson, 2019 Lamar; Lezlie Roberson, 2811 Nabers; Scott Smith, 120 Harrison; Lela Williams, 4601 Yamparika; Deana Wright, Rt. 2; and Kathy Zaicek, Rt. 2 Country Drive.

To qualify for a dean's honor roll a student must have a grade point average of 3.0 or more on a 4.0 scale and must have taken as many as 12 semester hours of work.

Texas Tech University has an enrollment of more than 22,000 students in six colleges: Agricultural Sciences, Arts and Sciences, Business Administration, Education, Engineering and Home Economics. There also are a Graduate School and a School of Law.

LUBBOCK--Plainview's sixth grade students attend Ash Elementary School, and all 460 of them are expected at The Museum of Texas Tech University Tuesday (March 27) to learn about the world they live in, the heavens above and the West that was.

For the second successive year, The Museum has planned Ash Learning Day on a minute-by-minute basis so that each of 18 groups of students will attend a session in Moody Planetarium, three sessions in The Museum building and two sessions at the Ranching Heritage Center.

All museum programs for the Ash School students are planned so that the museum experience will help expand their understanding of classroom studies.

Students will bring sack lunches and, after groups are separated, each group will be assigned a guide and a color. With colored tags, individuals can follow the proper guide and group for the day.

Within The Museum, they can learn basic techniques of spinning wool; learn to look for patterns formed by minerals in nature; discover how the skeleton is used differently by various vertebrates; understand the relationship of clothing to culture or how Indians used plants.

-more-

There will be studies in art, with some emphasis on the mechanics of color; conservation of objects and exhibits for museums; early 20th century medicine as practiced on the South Plains; and geology with explanations of rock and fossil specimens.

Students will tour the Moss Memorial/Goodwin Gin and hear a brief lesson on cotton production and the fiber's importance worldwide.

At the Ranching Heritage Center groups can experience history as they tour the Matador Half Dugout, Hedwigs Hill Double Log Cabin, the JY Masterson Bunkhouse, the Bairfield Schoolhouse, the Box and Strip House and the Reynolds-Gentry Barn.

Graduate students enrolled in the Museum Science Program will assist with tours and interpretations, helping students understand the life of early ranchers, cowboys, immigrants, children of the past, early education and how museums preserve buildings as well as objects.

The museum science students and museum docents will assist also with programs in The Museum building and the Goodman Gin. Moody Planetarium Director Ronald A. Johnston will present the planetarium program.

Programs similar to those prepared for Ash Learning Day are made available by The Museum to Lubbock public school students annually although the group of 460 pupils expected March 27 is the largest who come at one time, according to Judy Hunter, coordinator of Tours and Programs for The Museum.

ATTENTION: Agriculture and Education Editors

LUBBOCK--Norman W. Hopper and Fred C. Bryant have been named outstanding teachers of the 1978-79 academic year by the students' Aggie Council of the Texas Tech University College of Agricultural Sciences. Awards will be presented March 30 at the annual Aggie Honors Banquet.

Dr. Hopper, fall semester honoree, is an associate professor in the Department of Plant and Soil Sciences. He is a member of the college's Undergraduate Teaching Committee and the Teaching Improvement Committee.

Dr. Bryant is an assistant professor of range and wildlife management. He is an adviser to the Alpha Zeta agriculture honorary fraternity and has been adviser to other student organizations.

Both teachers were honor students during their graduate years and both are relative newcomers to the Texas Tech faculty. Hopper came to Texas Tech in 1976 and Bryant in 1977.

Hopper earned the bachelor's and master's degrees at Texas Tech and his doctorate at Iowa State University. His major interests are in crop production and plant physiology. He has primary responsibilities in curriculum development, advising undergraduate students and in teaching beginning plant science courses. Hopper also teaches a junior level seed technology course. He taught at The Ohio State University from 1970 until 1976 when he joined the Texas Tech faculty.

While at Ohio State he coached the crops team for five years, served as chairperson of the national Collegiate Crops Judging Contest Coaches Committee and headed the American Society of Agronomy Crops Judging Contest. He received the OSU Agronomy Department's Distinguished faculty Award in 1972. In addition to membership in numerous honor societies, Hopper is listed in American Men of Science and has published scholarly articles on his research, relating particularly to corn and soybean production.

Hopper was born at Ralls and attended public schools in Petersburg where he grew up. His parents, Mr. and Mrs. R.N. Hopper, live at 2503 Itasca, Plainview.

Bryant, spring semester honoree, earned his bachelor's degree at Texas Tech, attending the university on a football scholarship. He earned the master's degree at Utah State University and the doctor's degree at Texas A&M.

His primary research interests are in wildlife habitat, grazing management and range nutrition, and prescribed burning. He also has published his findings. Students honored Bryant in 1978 when the Range and Wildlife Club presented him its Certificate of Merit for Outstanding Service.

Bryant is well known in Lubbock and San Antonio. He was a leader at John Marshall High School in San Antonio, holding several class offices, lettering in five sports and receiving 13 varsity letters. While attending Texas Tech he served two years as president of the Fellowship of Christian Athletes.

His parents, Mr. and Mrs. John M. Bryant, live in Dripping Springs, near Austin.

LUBBOCK--Texas Tech University students Patrick C. Donnelly and Evelyn K. Boyd, both from San Antonio, will participate in the University Theatre's production of "PANCHO!" on April 6-11. "PANCHO!" dramatizes the life of Francisco Pancho Villa, who, according to the script, was called by God to lead his people in a Mexican revolution.

Donnelly, senior theatre arts major, will portray Angeles. He was Finian in "Finian's Rainbow" last spring at the Lubbock Civic Center. He has also performed in "The Royal Hunt of the Sun" and "The Adding Machine" at the University Theatre. Donnelly is the son of Mr. and Mrs. Paul E. Donnelly of 9319 Fernglan Dr., San Antonio.

Boyd, freshman, will perform as a singer and dancer. She has performed as Robin in "Godspell" and as Sharon McLonergan in "Finian's Rainbow" in San Antonio. She is the daughter of Dr. and Mrs. W.C. Boyd of 2919 Trailend, San Antonio.

The play is directed by author Clifford C. Ashby, Texas Tech theatre arts professor. His wife, Sylvia Ashby, former English teacher in Lubbock, wrote the lyrics and Charles Addington, a Lubbock businessman and publisher of two albums, composed the music.

Diana Moore, professor of dance at Texas Tech, is the choreographer for the production. Moore is blending structure and spontaneity in the dance scenes in "PANCHO!"

pancho/add one

The play will feature an in-house historian, Manuel Machado Jr., a visiting professor from Montana who is writing a book about Villa. Also, the play will include slides about Villa's life.

To prepare the mood for the play, music, dance and Mexican stands will be set up at the entrance to the theatre. According to Ashby, the play has everything in it except the tacos and margaritas.

LUBBOCK--Vicki L. Wooldridge, Texas Tech University senior theatre arts major from Garland, will perform as a singer and dancer in the University Theatre's production of "PANCHO!" on April 6-11.

Wooldridge is the daughter of Jean McKelvy of 1918 Cranford, Garland. She has performed in "Romeo and Juliet" at Texas Tech.

"PANCHO!" dramatizes the life of Francisco Pancho Villa, who, according to the script, was called by God to lead his people in a Mexican revolution.

The play is directed by author Clifford C. Ashby, Texas Tech theatre arts professor. His wife, Sylvia Ashby, former English teacher in Lubbock, wrote the lyrics and Charles Addington, a Lubbock businessman and publisher of two albums, composed the music.

Diana Moore, professor of dance at Texas Tech, is the choreographer for the production. Moore is blending structure and spontaneity in the dance scenes in "PANCHO!"

To prepare the mood for the play, music, dance and Mexican stands will be set up at the entrance to the theatre. According to Ashby, the play has everything in it except the tacos and margaritas.

LUBBOCK--Architects, engineers or others responsible for building designs which must withstand heavy wind loads will be offered two short courses at Texas Tech University June 25-29,

The university's Institute for Disaster Research will offer "Standards of Practice for Wind Load" as the first course and "Tornadic Loads for Design and Evaluation of Structure."

The courses, each lasting two and a half days, can be taken individually or in sequence. The institute has offered similar courses in other years, but these are the first since 1977.

In the first course, participants will study the nature of winds--including hurricanes, tornadoes and other extreme winds, design loads for buildings and other structures, American National Standards Institute A58 (building code requirements for minimum design loads in buildings and other structures) provisions and impending revisions, roof and cladding design and wind tunnel test concepts.

The second course will cover information on the nature of tornadoes, assessment of risk, damage mechanisms, tornado wind field models, tornadic loads on structures and design in relation to tornado-generated missiles.

-more-

One of the short course instructors, Dr. Kishor C. Mehta, is chairperson of the A58 Committee Subcommittee on Wind Loads. Other principal instructors will be Drs. James R. McDonald and Joseph E. Minor. All are members of the civil engineering faculty at Texas Tech University. Minor is director of the Institute for Disaster Research. All specialize in wind engineering.

For more information regarding the short courses, write or call the institute, Box 4089, Texas Tech University, Lubbock, Texas 79409, phone 806:742-3476.
