## TEXAS TECH UNIVERSITY

---

Texas Tech is a state-assisted, multipurpose university of approximately 29,000 students enrolled in ten colleges—Agricultural Sciences and Natural Resources, Architecture, Arts and Sciences, Business Administration, Education, Engineering, Honors, Human Sciences, Mass Communications and Visual and Performing Arts. The Graduate School and the School of Law provide graduate and professional programs. The Texas Tech Health Sciences Center—a separate institution—shares the Lubbock campus with the University. The common-campus arrangement, with a law school, is unique among the state's higher education institutions.

As is necessary for an educational institution of its scope and purpose, Texas Tech operates in several locations. Beyond its 1,839-acre Lubbock campus—all in one tract—the University operates agricultural and biological facilities at Texas Tech University at Amarillo, various research activities at the East Campus Research Center, and the Institute of Environmental and Human Health at Reese Center. Other agricultural research and teaching facilities are in Lubbock County. The Texas Tech University Center at Junction, in the Texas Hill Country, is a 411-acre unit including teaching, conference, and lodging facilities. There are Texas Tech University recognized Higher Education Teaching Sites at Amarillo, at Abilene, at Fredericksburg and at Highland Lakes. Texas Tech University Health Sciences Center is a multi-campus institution with Lubbock as the administrative center and regional campuses at Amarillo, El Paso and Odessa.

Paul Whitfield Horn, the first president of Texas Tech, drew from the broad open plains of West Texas his vision for the institution. "Let us make the work of our college fit into the scope of our country," he said. "Let our thoughts be big thoughts and broad thoughts. Let our thinking be in world-wide terms."

Horn's challenge to Texas Tech, now embarked on its eighty-second year, continues as a viable force. His insight is most evident as we—faculty, staff, and students, alumni, supporters, and friends—strive to shape the University's programs and activities to meet the highest standards of excellence in teaching, research, and public service.

**ALMA MATER  
“MATADOR SONG”**

Fight, Matadors, for Tech!  
Songs of love we'll sing to thee.  
Bear our banners far and wide,  
Ever to be our pride.  
Fearless champions ever be.  
Stand on heights of victory.  
Strive for honor evermore,  
Long live the Matadors.

***Terry Allen (b. 1943), Read Reader, 2002, Bronze***

Known for its narrative content, Terry Allen's work illuminates human foibles with metaphor and wit. Allen's artwork challenges long-established values and institutions, daring the viewer to think, question, and reevaluate beliefs and views about the world (and art).

Standing between two large repositories of books on Texas Tech's campus, Allen's bronze sculpture depicts a figure in forward motion made entirely out of cast books. The spines of eight books are aligned vertically to make up the backbone of the figure, and a book splayed open on its head resembles a graduation hat.

With an irreverent spirit and "tongue firmly planted in cheek," the artist selected old self-help books for their hackneyed titles and warped, wavy pages. The artist employed a burnout casting process to ensure that embossed lettering and delicate textures of pages were retained. Watchful viewers are drawn to the work for its treasure-hunt qualities, smiling as they spot titles such as *He Got Hungry and Forgot His Manners*, *Confessions of a Conservative*, *What Every Woman Should Know about Love and Marriage*, and *Keep Calm If You Can*.

In a sardonic poke at the youthful clumsiness that one experiences during any new intellectual pursuit, the artist cast the *College Edition Dictionary* upside down in the figure's hands—for to grow intellectually one must lose the fear of being wrong, looking lost, or shedding previously held beliefs.

Dorothy L. Sayers once said, "Books...are like lobster shells, we surround ourselves with 'em, then we grow out of 'em and leave 'em behind, as evidence of our earlier stages of development."

Allen's fanciful sculpture invites viewers to examine the shell-like layers of books that they outgrow during their academic quests.

Allen was born in Kansas, grew up in Lubbock, and studied at Chouinard Art Institute in Los Angeles. In addition to his artworks in Lubbock, Allen's works are included in prominent collections around the nation, including the Los Angeles County Museum of Art, the San Francisco Museum of Modern Art, the Dallas Museum of Art, the Metropolitan Museum of Art in New York City, and the Museum of Modern Art in New York. He also has completed more than 20 major public art projects at sites such as the George Bush Intercontinental Airport in Houston, the L.A. Louver Gallery in Venice, Calif., Sony Pictures Entertainment in Culver City, Calif. and the Denver International Airport in Denver, Colo.

In addition to sculpture, Allen is a songwriter. His songs have been recorded by numerous recording artists and he has recorded 12 CDs of his own. He has produced works in painting, video, musical and theatrical performances and written music for television and film. He has received National Endowment for the Arts Fellowships, a Guggenheim Fellowship, New York's 'Bessie' Award, San Francisco's Isadora Duncan Award, and was inducted into the Buddy Holly Walk of Fame in Lubbock in 1997.

## **THE TEXAS TECH UNIVERSITY PRESIDENTIAL MACE**

---

The Texas Tech University Presidential Mace is the symbolic staff of power and authority of the University. The mace is crowned by a flame symbolizing the Light of Knowledge. It is constructed of lathed and molded bronze that has been covered with a layer of 24K gold. The school crest is presented on either side directly under the flame. Hand-rubbed black walnut has been used for the connecting shafts.

The mace was designed by Robly A. Glover, an Associate Professor of Art at Texas Tech University. Mr. Glover's artwork is shown throughout the United States. His work has recently been included in the permanent collection of the Art Institute of Chicago, Chicago, Illinois.

From earliest times flags have served as symbols of ideals, aspirations and loyalties, representing in modern times the national states and invoking sentiments of pride and patriotism. Every flag has its own tale, with the symbols and the colors having meaning for each nation. Texas Tech University has students from every state of the United States and from more than 100 other countries. It is with pride that the University displays the colors of those countries who have representatives among our students.

## ACADEMIC DRESS AND PROCESSION

The wearing of academic dress at commencement dates from the early history of the oldest universities somewhere in the twelfth or thirteenth century. Since educated people were almost always of the clergy, the black gown is somewhat of adaptation of the cope, a mantle of silk or other cloth worn by church dignitaries in processions and on other occasions. The long gown and cowl (similar to the academic hood of today) were worn by priests and monks for warmth in the cold medieval buildings.

In the early centuries, a great diversity of color and style of cap, gown, and hood appeared in different universities of Europe. The European custom of wearing academic dress was later introduced at American colleges. Not until after 1895 was a uniform academic code of dress adopted by most colleges and universities in the United States. Today, the black robe, hood, and cap are worn at most institutions of higher learning.

The gown is cut differently for the bachelor's, master's, and doctor's degrees. Usually the bachelor's robe has long pointed sleeves; the master's has closed sleeves, square at the end with a slit at the elbow; the doctor's is faced with velvet and has round open sleeves with three bars of velvet.

The doctor's hood has side panels and is slightly longer than the one worn for the master's degree. The color used in the velvet border of the hood indicates the field of study. The velvet border is widest on the doctor's hood. The colors of the lining of the hood indicate the college or university that conferred the degree. For example, those who have received advanced degrees from Texas Tech University wear hoods lined with red and black.

The Oxford—the so-called mortarboard—is black and has a long tassel fastened to the center. The tassel is usually worn pendant over the left front of the cap. Different colored tassels are often worn on the bachelor's and master's caps to indicate the type of degree. The tassel on the cap of the doctor's candidate, except for professional degrees, is either gold or black. The doctor's degree holders may also wear the velvet tam with a gold tassel as well.

Candidates for the undergraduate degree will wear the tassel on the right side of the cap at commencement. After the degrees have been conferred, baccalaureate degree recipients will turn the tassel to the left side of the cap, thus showing that they are now graduates. Those graduates who have the Official Texas Tech Alumni Association Class Ring are invited to turn their rings at this time.

All candidates who wear the red cord are honor students who possess a minimum 3.50 grade average and will graduate *Cum Laude*, *Magna Cum Laude*, or *Summa Cum Laude*. Texas Tech University has four university-wide honoraries: Golden Key, Mortar Board, Omicron Delta Kappa, and Phi Kappa Phi. Candidates wearing the red cords have earned the Latin designations of *cum laude*, *magna cum laude* or *summa cum laude* based on their cumulative grade point averages. Candidates wearing kite-shaped medallions are Honors College graduates earning a minimum of 24-hours of Honors coursework, with red ribbons indicating a notation of "With Honors" (non-thesis) and gold ribbons indicating a notation of "With Highest Honors" (thesis).

The following is a list of colors established by the Intercollegiate Code to represent the different departments of learning.
