LUBBOCK -- American know-how and West Texas friendliness are primary factors in attracting international students to Texas Tech University.

Besides Texas Tech's academic programs, the Lubbock community also offers other activities for the 700 plus students.

A volunteer group, the Community Coordinating Board, sponsors most of the community programs. One of them, the Occupational Host Program, is executed in cooperation with the university's International Programs Office. Under this program international students are assigned to local businessmen to observe American business methods.

"The students work with local businessmen for a period of six weeks. There is no salary involved and the students visit for about six hours every week," said Jennie W. Anderson, international students advisor at Texas Tech.

This year the program will begin Feb. 6. Last application date is Jan. 28. Interested students and businessmen can contact Dr. Charles E. Houston at 795-9990 or Ms. Anderson at 742-3667.

Care is taken to match the student's interests with those of the local business.

-more-

host program/add 1

Dr. Houston, a retired Texas Tech faculty member, is a member of the Community Coordinating Board and chairman of the five-year-old program.

Last year more than 15 international students worked for a variety of businesses, including banks, newspapers, and engineering and architectural concerns.

"We need more businessmen to participate in the program to provide for the different professional interests among the students," Houston said.

LUBBOCK -- Educators, psychologists, physicians, athletes, students, nurses and others can gain a general background in Yoga psychology as well as its practical applications during a Psychology East and West Workshop Thursday, Feb. 3.

The series of lectures, sponsored by the Texas Tech University Counseling Center, will be taught by Swami Ajaya, formerly Allan Weinstock. He is a member of the graduate faculty of the Himalayan International Institute of Yoga Psychology in Glenview, Ill.

The workshop will concentrate incorporating the techniques and benefits of Yoga and meditation into daily life styles and jobs.

"Yoga and meditation reduce blood pressure, muscle tension and other anxieties, which encourage better academic and athletic performance," said Dr. Timothy J. Thorpe, counselor for Texas Tech Counseling Center.

The program will include: "Psychology East and West," 10:30 a.m.-noon; lunch (not provided), 12 noon-1 p.m.; "Relaxation, Breathing Techniques and the Emotional Response," 1-2:30 p.m.; "The Psychotherapeutic Process and Meditation," 3-4:30 p.m., and "Meditation and Mental Harmony," 7:30-9 p.m.

The last session is open to anyone not enrolled in the workshop, as well as those who are enrolled, for \$1. Ajaya will discuss the ability of meditation to increase one's capacity for joy and peace.

-more-

The first three sessions will be held in the University Center Senate Room. The final lecture, "Meditation and Mental Harmony," will be in the University Center Coronado Room.

A fee of \$15 will be charged for area professionals, faculty, staff and general public enrolling in the entire workshop. Students will be charged \$10.

For further information, contact: Timothy J. Thorpe, Ed. D., Counseling Center, Texas Tech University, Lubbock, Texas 79409.

Swami Ajaya received his Ph.D. in clinical psychology from the University of California, Berkeley, followed by two years as a post-doctoral fellow in clinical psychology in the Department of Psychiatry at the University of Wisconsin Medical School.

He was assistant professor of psychology at Wisconsin State University and lecturer in the Departments of Educational Psychology and Behavioral Disabilities at the University of Wisconsin.

Two years were spent in the advanced study of Yoga, meditation and Eastern philosophy and psychology in Rishikesh, India, where he was ordained as a Yoga Swami.

LUBBOCK -- Because of demand a fourth basic weaving class has been added to the series co-sponsored by the Ranching Heritage Center at The Museum of Texas Tech University and the Lubbock Weavers Guild.

The first class was held Jan. 22, and others are scheduled for Jan. 29 and Feb. 5 and 19 in the Assembly Room of The Museum, 4th and Indiana in Lubbock. Twelve registrants are accepted for each class, and there still are openings in the Feb. 5 and the newly added Feb. 19 classes.

Instructor Tommie Jan Pearson said that anyone interested in registering should call her at home, 763-9160. The \$15 registration fee provides the student with a nail-board loom, needle, and instruction. Classes are held from 9 a.m. to 4:30 p.m. Students are asked to provide their own lunches. Each student should bring a table fork to use as a tool.

LUBBOCK--The Tenth Annual Comparative Literature Symposium will begin Wednesday, (Jan. 26), at 7:30 p.m., in the Texas Tech University Center Theatre.

Boyd G. Carter, to whom the symposium is dedicated "for his outstanding contributions to the study of Spanish American literature," will deliver the keynote address.

Wolodymyr T. Zyla, chairman of the Interdepartmental Committee on Comparative Literature, said Carter, a visiting professor from the University of Iowa, "has a knowledge of the language, literature, and history of several European countries and of Ibero-America which is truly remarkable."

The symposium, Jan. 26-28, will reflect the theme "Ibero-American Letters in a Comparative Perspective."

Symposium activities include television programs, guest lecturers, musical and theatrical performances, panel discussions and exhibits.

Zyla said 50 to 60 people have registered from out-of-state and many more from Texas are expected to attend.

Additional information about the symposium may be obtained from Zyla at (806) 742-3286.

CONTACT: B. Zeeck

LUBBOCK -- If experience foretells the future, a capacity audience can be expected for the dedication recital of the Holtkamp organ at Texas Tech University Feb. 13.

Gerre Hancock, organist and master of the choir at St. Thomas Church in New York, will perform for the dedication of the 81-rank organ. Hancock formerly lived in Lubbock.

Acquisition of the organ by Texas Tech was made possible through a gift from Mrs. Tommye A. Moss of Odessa. The instrument, one of the three largest organs in Texas, is similar to one at the Air Force Academy at Colorado Springs.

At a recital given on the organ Jan. 23 by Texas Tech Prof. Judson D. Maynard, a capacity audience filled the 600-seat Recital Hall, and additional chairs had to be added in the stage area.

For the dedication recital, invitations are being sent to those particularly interested in organ music, music education and the cultural arts in West Texas. Admission will be by invitation only, until 10 minutes before the start of the 3 p.m. concert when the public will be admitted.

Dr. Harold Luce, who heads the Music Department, said that persons who want invitations should write to the Department of Music, Texas Tech University, Lubbock, Texas 79409.

-more-

"We shall try to fill as many requests as possible," he said. "And the public should know that every seat in the accoustically excellent Recital Hall is a good one. Those admitted without invitation can be assured of good seats."

The floor in the Recital Hall is steeply raked and designed so that each member of the audience senses a good relationship with performers. Accoustics can be adjusted for the "large" sound of the organ or the "smaller" sound of a single instrument or voice.

The organ is 28 feet tall, with a range closely matched to the human ability to hear. It has 4,484 pipes, 81 ranks and 59 stops. It was built about a decade ago by the late Walter Holtkamp.

His son now heads the Holtkamp organ company, which has volunteered to send representatives to the university before the Hancock concert to make minor adjustments to insure perfect voicing of the instrument. The voicing was done once before, when the organ was installed.

The organ was installed at the Oberlin College Conservatory of Music in Ohio. When it was learned that Oberlin wanted to sell the organ, Mrs. Moss offered to make it possible to bring it to Texas Tech University. Luce said that at current prices the organ's value has been estimated at a quarter of a million dollars.

Mrs. Moss's gifts to enhance the quality of the arts have included scholarships, support for the Midland-Odessa Symphony Orchestra and the Shakespearean Globe Theater in Odessa, contributions to provide an organ for her church and years devoted to the work of the Federated Music Clubs (FMC).

She helped organize the FMC in Odessa, is a past president of the Texas organization and served on the national FMC Board for eight years.

For many years she sang in the Baptist Church choir in Odessa, and she also had training in piano, but she has said she considers her primary contributions to have been in support of public music education.

In addition to music scholarships at Texas Tech University, she made a gift earlier of her late husband's law library to the library of the Texas Tech School of Law. He was Judge Paul Moss.

LUBBOCK -- For two days there will be public demonstrations at The Museum of Texas Tech University on the art of gun engraving.

Ren-aye Del-core

Leezh

Rene Delcour, professor of engraving in Liege, Belgium, will demonstrate his expertise from 10 a.m. to noon and from 1:30 to 5 p.m., Saturday, and from 1 to 5 p.m., Sunday, at The Museum.

The occasion is the opening of an exhibit, "Belgian Gunmaking and American History," developed by the Belgian government for the American Bicentennial. It is circulated by the Smithsonian Institution Traveling Exhibition Service in Washington.

West Texas Museum Association members will have a preview of the exhibit Friday evening, and then it will be opened to the public at 10 a.m. Saturday.

Delcour was sent to The Museum of Texas Tech University especially for this occasion. The showing in Lubbock is the first outside of Washington, D.C. Delcour has been practicing the art for 31 years at one of only two schools for gun engraving in Europe.

LUBBOCK--Classical guitarist, David Grimes, will be in residence at Texas Tech University, Feb. 1-3, with his main performance Thursday (Feb. 3) at 8:15 p.m. in the University Center Theatre.

Grimes' schedule includes meeting with guitar, music literature and philosophy classes on the campus. A performance also will be given at the Lubbock State School Tuesday (Feb. 1) at 6:30 p.m.

The guitarist will conduct an open guitar workshop for the public at 3:00 p.m. in room 110 at the University Center.

Thursday (Feb. 3) at noon a mini-concert, "Afternoon Delight," will be performed by Grimes in the University Center Courtyard as a prelude to the evening program.

The 8:15 p.m. performance on Thursday will include works by several Latin American composers including Sor, Moreno-Torraba, Villa-Lobos and Castelnuovo-Tedesco.

Grimes is head of guitar instruction at California State University, Fullerton.

LUBBOCK--Celanese Chemical Company at Pampa has donated a mass spectrometer, valued in excess of \$100,000, to the Texas Tech University Department of Biological Sciences.

The instrument is being used by Dr. Murray W. Coulter, associate professor of biology, to isolate and identify minute concentrations of hormones in cell tissues in order to determine why certain tissues develop as they do.

The mass spectrometer breaks up molecules and spins the particles in a magnetic field. Analyzed results assist in identification of the hormones.

With the new instrument the process takes approximately 30 minutes, compared with the previous time of weeks or months required to complete nine analytical procedures.

Celanese Chemical Company also provided shipping costs and a technician to install and service the instrument and to give instructions on its use. Coordinating the transfer of the mass spectrometer, including additional parts and accessories, for the company was R.T. Lemmons.

LUBBOCK -- Should a new police officer be white, black, Mexican-American, or of another ethnic origin? And should the person be male or female?

Time was when there was only one answer to this question: male, white.

Things have changed and federal regulations require that applicants for public or private positions should not be evaluated on race, religion, sex, age, color, marital status or national origin.

What these federal regulations mean and how small Texas cities and counties can accurately and profitably comply with them is the subject of a 30-page report prepared by the Center for Public Service at Texas Tech University.

The report underlines that cities and counties applying for federal grants for community development programs are finding that affirmative action plans often are being required before the grants are awarded.

"A Model Affirmative Action Plan for Smaller Texas Cities and Counties" was prepared at the request of the South Plains Association of Governments and some individual cities in the Texas South Plains Region.

The first portion of the model affirmative action plan was developed for the city of Littlefield with a population of 7,000. With slight variation it may be adapted to other smaller cities and counties in the state.

affirmative action/add 1

The Center for Public Service received cooperation of the municipalities of Littlefield and Floydada and other cities in the South Plains of Texas region. Plainview's city manager Marshall Pharr and director of finance and personnel Norman Huggins also provided the center with assistance.

The second part consists of a "do-it-yourself" kit for cities and counties.

The report suggests five basic rules for equal opportunity/affirmative action employment.

They include elimination of any suggestion that a particular sex or race normally fulfills a particular position; erasure of age requirements, other than a minimum of 18 for employment and 65 or older for retirement; deletion of rules prohibiting employment of husband and wife or other close relative; provision of fringe benefits equally to men and women; and insuring that all policies relate to the employee's ability to perform and elimination of any policies based on other factors.

The report was prepared by Prof. N. Joseph Cayer of the political science faculty at Texas Tech. Prof. James Clotfelter, director of the Center for Public Service, and Prof. James Essinger of the Texas Tech School of Law, assisted. G. Patrick Black and David Hunter, graduate interns in the public administration program at Texas Tech, also worked on the project with Joseph Minkley, then personnel director for the City of Lubbock.

LUBBOCK--John Gillas, whose singing career spans more than 800 performances, will present his audience on Feb. 5 with an unusual opportunity to hear some of the western world's best little known works.

Gillas, a tenor who is director of the Texas Tech University Music Theater, will give his recital Saturday, Feb. 5, at 8:15 p.m. in the new Recital Hall in the University Center/Music Building addition.

The program will open with the eighteenth century "Salve Regina" by Giovanni Battista Pergolesi and end with Irish folk songs and spirituals from America. He also will perform ten too little known works by the Finnish composer Yrjo Kilpinen, three from "Lieder der Liebe," four from "Spielmanslieder," and three from "Lieder um den Tod." These are from the composer's opuses 60, 61, 77, and 62, respectively.

Gillas explained that Kilpinen, who was educated in Germany, was a songwriter of considerable merit but not widely recognized in the United States. He included his works so that the audience might become better acquainted with the composer.

-more-

After intermission he will sing two songs from William Blake's "An Island in the Moon," by Nicolas Flagello, "Adam Was My Grandfather," by Douglas Moore, two Irish songs arranged by Herbert Hughes, and the spirituals, "Bye and Bye," arranged by Edward Boatman, and "Let's Have a Union," arranged by Hall Johnson.

In addition to academic studies in the United States, principally at Indiana University, Gillas has studied in Italy and performed throughout Europe, most often in German opera houses. It was while he was a Fulbright scholar in Italy in the 1960s that he changed from the baritone to the tenor repertory.

Including baritone and tenor roles, he has sung nearly 500 operatic performances since 1958, and his total public appearances as recitalist, with concert and symphony orchestra appearances and in opera, number more than 800. These appearances have been in Europe and America on stage and television, including the network performance of "Music for a Summer's Night" in which Gillas was a soloist.

LUBBOCK--Women's Athletics at Texas Tech University fared well during the Fall semester and have moved into Spring competition in several sports, according to Women's Athletic Director Jeannine McHaney.

She added that only seven per cent of the teams' members are seniors.

The volleyball team is the only one to have already completed the 1976-'77 school year competition. "For a team that has been competing only two years in intercollegiate sports," McHaney said, "it fared very well in taking fifth in state and regional."

This year's team had no seniors and only two juniors, with the balance being sophomores and freshmen. The team ended with a 56-7 record, despite competition against the nation's best teams in state and regional meets. Regionals include teams from Texas, Oklahoma, Louisiana and Arkansas.

In preparation for Spring competition in March the golf team will begin practice on a daily basis as soon as weather permits.

The basketball team has a record of eight wins and ten losses and will be playing until the end of February. If they go into state and national competition, the women will continue play into March.

McHaney said the tennis team possesses more talent than in the past. The Fall season ended with a 3-3 record against nationally ranked teams. They began Spring competition Saturday (Jan. 29) against Texas Christian University.

-more-

The swimming team has concentrated on endurance and strength training during Fall practice. The team was fifth in state last year, and McHaney expects they will do even better this year. In Fall competition they captured third at New Mexico State in competition against Olympic swimmers, and placed second at Oklahoma University.

The track and field team will begin outdoor meets in February and host an invitational meet in March.

Swim, track and field teams must have qualifying times to compete in state and national meets, while other teams are judged by season records.

McHaney credits improvement of team competition to scholarships and better coaching. For the first time in Texas Tech's history the Women's Athletic Department has been able to offer scholarships. McHaney said although scholarship funds are not large, they allow scholarship recipients to devote time to their sport, instead of working to pay their college expenses.

McHaney added, "Our overall coaching staff is probably the most talented in the South."

LUBBOCK -- Can someone hear without understanding? The answer is yes.

Many people with impaired hearing ask this question and complain that they have no difficulty hearing the volume of voices and noises but cannot distinguish what is being said.

Texas Tech University Speech and Hearing Clinic will offer lip reading classes, beginning Feb. 8, as an alternative to the isolation and suffering caused by impaired hearing. Classes are open to the public.

"Many people can't wear hearing aides or the hearing aides don't help them that much in distinguishing the words. Lip reading will give them an alternative to the isolation -- the inability to communicate effectively is isolating," said Carol Streltzer, audiologist at the clinic.

Classes will be held Tuesdays, 3-4 p.m., in room 110 at the Speech and Hearing Clinic and will continue for approximately 10 weeks. Transportation can be arranged through various agencies.

Dr. William K. Ickes will instruct the class, which will demonstrate lip reading as well as the use of cues other than auditory, such as visual and environmental, to communicate more effectively. The classes also benefit anyone without impaired hearing.

-more-

"At the beginning of many of the classes we invite the members to bring their spouses or a close friend, not only to help practice but so that that friend or spouse can also gain increased understanding," said Streltzer.

Anyone interested in attending the classes or wanting further information should call Streltzer, 742-3908.

Texas Tech Speech and Hearing Clinic provides services to children and adults. The services can include evaluation of hearing problems, hearing aide selection evaluation, and help with stuttering and voice and language problems.

Dr. David J. Draper, clinic director, is especially interested in stuttering and encourages anyone with the problem to contact the Speech and Hearing Clinic.

"If enough people get in touch with us, I would be willing to set up some evening classes," he said.

LUBBOCK -- If you grow fruit or nut trees in your backyard, here is how you can receive pruning tips.

A seven-week lecture-demonstration class in pruning fruit and nut plants for Lubbock area residents will begin Feb. 7 (Monday), 6:30 p.m., at Texas Tech University. Classes will be held in Room 108 of the Plant Science Building.

Texas Tech's Division of Continuing Education and Department of Plant and Soil Science are sponsoring the class as a community service.

"It's getting close to blooming time, and proper pruning and trained development of a tree's framework are important in securing the best crops and assuring the easiest possible harvest," said Dr. George O. Elie, professor of horticulture, who will conduct the classes.

Enrollment is limited to 25 with a \$15 fee payable at the first class day.

This is the third year of the non-credit course.

"The growing season begins in March and most of the pruning should be done just before that. The course will include pruning to thin stone fruits after growth has begun."

-more-

pruning course/add 1

Following the first two class meetings Elle plans to use part of the time for demonstrations of pruning and spreading techniques in Texas Tech's experimental orchard. Elle has conducted experiments on apples, figs, pears and cherries in the orchard.

Details may be obtained from Dr. Elle at 742-2837 or from the Division of Continuing Education at 742-3797.

SUGGESTED RELEASE DATE: MONDAY, JAN. 31

LUBBOCK--Gov. Ella T. Grasso of Connecticut has been named recipient of the 1977 Thomas Jefferson Award honoring public officials who defend and protect the freedom of the news media to inform the public.

The award will be presented at a Thomas Jefferson Award banquet Feb. 18, the final day of Mass Communications Week at Texas Tech University.

Sponsors of the national award are the Texas Press Association, the Texas Daily Newspaper Association, the Texas Association of Broadcasters and Texas Tech University.

The presentation banquet is held jointly by the Department of Mass Communications at Texas Tech and the winter meeting of the West Texas Press Association.

Gov. Grasso served in the Connecticut General Assembly, as the Secretary of the State, and as a U.S. representative from Connecticut's sixth district before being elected governor. She also held numerous national and state agency and commission offices.

The governor's nomination was submitted by the Connecticut Chapter of Sigma Delta Chi (SDX), the society of professional journalists, which cited her as "singularly responsible for this state having established what we believe to be the most effective open government law of any of the 50 states."

-more-

The unique feature of the law, the SDX chapter statement said, is the creation of a three-member Freedom of Information (FOI) Commission which rapidly adjudicates complaints of violations of the state's right-to-know laws.

Gov. Grasso, immediately after her election, had introduced in the legislature a bill "to take government out of the closet" and establish the FOI Commission. In its first year the commission received about 250 complaints, the vast majority coming from individuals rather than from the media.

Her career was described as one of "openness and candor," with her office door always open to the press and public. While in Washington Ms. Grasso established the "Ella-Phone," a direct line for citizen use to her congressional office.

Not only did Gov. Grasso ask the Connecticut legislature to pass the FOI bill, but, after it was passed, she became a "staunch supporter of the commission" and has said she will seek a larger appropriation this year for the FOI.

"Ella Grasso, in summation, has been a consistent, committed supporter of the cause of open government," the SDX statement said. "In word and deed, she has advanced the cause of the public's right to know in this state."

The Thomas Jefferson Award was established in 1972. Previous winners include U.S. Sen. Sam J. Ervin Jr. of North Carolina, Gov. Edwin Edwards of Louisiana, Rep. Robert J. Kastenmeier of Wisconsin and Leon Jaworski of Texas.

The Thomas Jefferson Award banquet will be held at 7 p.m. in the Ballroom of the University Center at Texas Tech University. Tickets are available at \$5 per person by writing the Department of Mass Communications, Texas Tech University, Lubbock, Tex. 79409.

LUBBOCK--Invitations to the Texas Tech University Spring Forensic tournament, to be held Feb. 11-12, have been sent to 275 high schools in the western half of Texas. Approximately 600 students from 50 schools are expected to participate.

Tournament events will be in the new Mass Communications building.

Events will include individual competition in extemporaneous speaking and interpretation in poetry and prose and team competition in debate. Debate this year will have two divisions, championship for more advanced debaters, and junior for the less experienced.

"We hope this will encourage all schools, particularly the smaller ones, with beginning debate teams, to participate," said Vernon R. McGuire, associate professor of speech communications and director of forensics.

Awards will be presented in the separate events, and a sweepstakes trophy will be awarded to the school with the highest number of points. Points are awarded for individuals or debate teams placing in semi-final and final competitions and for winning first, second or third place in the tournament.

LUBBOCK--The new University Center-Music Complex Grand Opening continues with special recognition for James G. Allen, executive director of the Texas Tech Dads Association, Thursday (Jan. 27), for his contributions to the establishment of the first student center.

The fifth day of the grand opening events includes a demonstration of glass blowing by Bill Bagley from 10 a.m.-4 p.m. in the courtyard.

Refreshments will be available during the noon hour.

Dr. Cecil Mackey will attend the 4 p.m. presidential coffee in the courtyard to visit with students.

Bill Vanaver and Livia Drapkin, vocalists, instrumentalists and folk dancers, will perform in the courtyard from 12 noon-1 p.m. and 8:15 p.m. in the University Center Theater.

The two performers' goal is to "bring to life international cultures in their music and dance."

LUBBOCK--Texas Tech University junior Don Shipman^{of Berger} will appear in the university musical performance, "A Funny Thing Happened on the Way to the Forum."

Shipman, a Theatre Arts major, has appeared in several one-act plays at Texas Tech and in "The Royal Hunt of the Sun."

He is the son of William T. Shipman, 303 Ozmer, Berger.

Performances will be 8:15 p.m. ~~every Friday~~^{daily} from Feb. 24-March 2. A special preview performance, Feb. 24, will include a pre-show dinner. Funds from the Latin comedy will go toward scholarships in Performing Arts.
