Anne Murray has never enjoyed the success in Britain which she does in the Americas, but with saturation television and press promotion of this album, then all that may change in the next few months.

Sixteen tracks are featured including her only British successes, 'Snowbird' and 'You needed me'. More than half the tracks were recorded in the last three years, (which have been her most successful). 'Where do you go when you dream' the title track from her latest album is included, as is, 'Another Sleepless Night' her most recent British single.

This isn't a collection of her greatest hits, (You'd need a double album for that), but it does feature some of the cream of her recent work.

Maybe this album will crack the British market for her, We'll see.
