Fri	19		When I got up this morning Bill Brice's horses had been out on my wheat and fed right. They have ruined all my Maize heads. The Wagnon man was out and on the Kaffer rick I tied her behind the wind break so she would keep warm, and those horses kicked her loose she broke her rope. She ate so much she has been sick all day. I only wish he would keep his stock at home. They sure have bothered me. I went to work and fixed a pin to put my fuel heads in. Then I took Sallie to town to work. Came back and hauled the heads all in. I think a Mad fit when the cows would not come up. I had to quit my work and go for them. I rode the black Mare and run the Cows all the way home. Buss did not give any Milk to nite. Well if a fellow would just stop and think "What good does it do?" One would not get mad that way. Only to hate it and be sorry that one did it. I am going to try and not pull a fool stunt like that any more. It has not been so cold to day. However all the snow has not melted Not the ice on the tanks. Charge 5 gal gas Mission 88.	
Sat	20		It was not too cold to day. However, I think it was just about freezing all day. We went down town this P. M. I sold my Government Loan (938) cotton to Norman Lyles. Eight bales $1.50 per bale. I sure did need the Money too. $3.85 for a drum of Coal Oil. Coal $1.20. Coffee & sweet potatoes .50¢. Came home washed up the loose grain that shattered out when I had ricks.	Sold Cotton Loan. N.D.
Sun	21		We looked for the Kids all day. They did not come till about 4 P.M. Jim, Kay and Stanley stayed and Ada's went back home. Ruf and family went home. It is cold Now 11.55 P.M. Looks like snow now.	Cold all day.

Tues	20		I worked on the laying house for a while in A.M. Went over to see if the Negros were going to pull the balance of the cotton. I told them they could have it on the ½ deal. They said they would pull it if if Mr Brisco would let them stay in the house. I rigged up and plowed this afternoon. The ground was done plowed fine. Only a little wet. The wagon mare limps more than I thought she would. But after all 4 head plowed better than 3 head. Has been a pleasant day. Quite a lot of the old crop yet.	
Wed	21		The ground was frozen and I did not harrow up till about 10:30 A.M. Just as I was ready to start plowing Harold came. We had dinner and went down to Enda to see the Bank people about financing his farm operations. As his Resettlement loan fell thru, or would take so long and so much red tape that one can not deal that way if one can do otherwise. Harold and his mother went down to Buds. He and I went on S.C.S. note for $455.00 to put him on his feet so he can start farming again. That was all that could be done. So I think he will appreciate enough that he will work to the point to make good. Has been a very pleasant day. Some snow yet. Harold is here to-nite.	
Thurs	22		Harold & I went over to Bill Brisco's to see if he had a cow to sell. He did. We went out in the field to look at her. She was fresh last Monday. A very nice looking cow. $65.00 too much. I went down town with Harold. He taught 12 hens from his mother $6.00. He paid me $3.00 that he owes me. I was not in town long. Came home stayed by stove, cold South wind all day.

I put them back in the lot. But Oh Boy! hind end is all blistered I will have to stand up to eat. The rough riding hurts me bad. I planted sudan all p.m. Bud came for his other ties. I helped him load his trailor bed and ties. Have had some wind from N.W. to day.

Dont think I have my 21 a. planted. I have been out of tobacco all day. Mort Weldon came out to see me this p.m. He gave me a little tobacco well all he had. My Car is out again The fuel pump this time. I will have to catch a ride into town to get a new one. A little wind to day S.E.

Thurs 16 I had the shock of my life when I got up this Morneing. Sallie said I had a letter in my desk, but it had been opened. I read it with regrets, if I had known who wrote it I would have burned it with (out) mourned what was in it! — That hurt me. Would have thought any one in the world would have written such a letter but the writer of it. I sure was hit between the belt. No defence just a one side slap in the face. I will keep the letter. Nuff said. I knifed beds all day. No heart to do any thing. Has looked rainey today. Nice day.

Fri 17 I caught a ride in to town. Bought a fuel pump The parts man J. D. King said was what I needed I could not use but one piece of it, and then I could not get any gas thro the Carborator. Sent Dot over to Mr Atwells for him to come over and pull my car to town. He could not come but sent Mrs Atwell. She took Sallie so she could get some little Chickens feed and get back home without before nite. I took the car to Corleys Domicile shop he fixed it after I mad the exchange with King. Sat 18 I did not do any field work to-day. We all went up town (or down town) in the afternoon. Sold the 9 roosters we bought some time ago. We paid 5¢ and 6¢ for them. Sold for 4¢. Cocks depreciated in value. They were some older of course, but not too fat. I have been real coal to day. The chickens are pulling my cotton up as fast as it comes out of the ground. The sorrell horse has been sick all day. Bounds folks still have their tails over the line.

Sun 19 We are raining some when we got up this morning. We had two little showers to day. Maby ¼ in. I went over to Joe Stokes this late P.M. for some seed corn. I traded tomato plants for the corn. Mr Stokes gave me the corn and I gave him the plants. I came by the Fox store for some gas. Has been cold to day. The hens are still pulling up my cotton and nothing I can do about it. Only keep them up, which I will do. We had fried chicken dinner. Sallie traded some tomato plants to Mrs Mc Williams for the chicken. We came by their place yesterday for the chicken.

Little Rain.

Mon 20 I went over to Robert Atwell's place for a plow point. Used real coal at that time. I planted some cotton this A.M. The chickens have destroyed some as much as I planted this forenoon. Sister Cyntie, her daughter Claire and grandson Klein came down for the day. Cyntie lives at Monahan Tex. I planted the corn Maby 50 2 A. Had notice to call at Sudan school building tomorrow to help in the signing up of the work sheets of all farmers in Sudan school district. The A.A.A. work sheets. Mr Baker called this p.m. to give me the needed dope. A Mr Loyd of Amherst came with him. Baker is the Sec. Lamb County A.C.A. We started to town for the paper but a cloud was coming up from N.W. So I turned back. An awful hard wind came out of N.E. and boy! did it blow sand. The watermelons vines were turned inside out. The sand burnt cotton and M. Vines. It did not blow long. Went to raining 1/2 in. 4 guess. Rained on till 10 or 11 P.M.

Mon. 24. We slept late Dat let Baby Fay fall off the bed some time after mid nite and we were all up and ex cited so we could not go to sleep for a long time. The little thing sure did get an awful bump. She cried for a long time. Of course Dat was not to blame but that did not help it none hurting the baby. She had had 3 or four falls like that. But this one seemed to hurt her most of all.
W. D. We had to turn the water mains all back in their old position that took till noon. I plowed cotton Sallie & Dot hoe cotton this P.M. I drove the car over in the field. So they could keep little Fay in out of the goat heads and sun. She messed the back seat of car up some. But they will do that every time. A fine day. No wind.

Tues 25 plowed and hoed all day. The meaning new foreman called. Told me he would be at my place tomorrow, he wanted me to sure be at home. I do need.
W. D. Not worry. I am at home every day.

Wed 26 I started in to hoe in the cotton. The boys called about 8.30 or 9 A.M. We finished measuring my place about 2.00 P.M. I plowed cotton feed and melons the balance of P.M.
W. D. Out of feed No grass, and the stock are eating the Sudan pasture close.

Thur 27 I helped Dat hoe in cotton this forenoon. Plowed corn & cotton all P.M. Peterman came over and wanted Dat to help hoe his cotton over. He has 12 or 15 hands.

Fri 28 I started in intending to hoe cotton till noon. But about 10 A.M. a N.E. Wind started blowing and before me it picked up the sand and moved it on. I hitched up to the cultivator and started center furrowing cotton, water m. and fed. I hardly stoped till Nite. I broke the Crust and stoped the sand from blowing. The Wind blew balance of day. I am sure some field North & East how nothing in them Alive. That blow sand will just burn down any thing green. Dat hoed for Peterman. I do Not know whether they finished or not.

N.E. sand storm

Sat 29 I hoed cotton all forenoon. One could see the sand in the North along the ridge of sand hills still moving this forenoon. That was a bad sand storm for this time of the year. I had some things that the sand and wind burned. Not much. Dat finished up her hoeing over at Petermans. She says all hands when they finish hoeing. That is more than some fellows around here. We all went to Sudan this P.M. Things in general look sad and down cast at Sudan. None of the old crowd. All strangers. The corrie horse had to be Dr. again. His "social disease" is coming back. He has worms in his sheath. Cool all day.

N.E.

Sun 30 We went down to Buds. They were fixing to come up here. But we beat them on the 'draw.' Bud & I went down to Lottie's place to get my wire that I loaned Harold when he and Lattie were living together that was 1937 when he borrowed the wire to fence his sedan pasture. Lattie may not like it but it is my wire and I need it. I have needed it several times before but let it off going down for it. Some wind today

Sun. 14. Bud and Talka came up for dinner. We could hardly keep cool any place. Bud & Ida started about 5 P.M. they went to town, heard while in Selma that a freight train had wrecked up the track close to Mule shoe. They came back picked Sallie & Mary up and we started out. But found the wreck happened 3 or 4 mi North of Mule Shoe. We stood around there for a while and came back home. No one was hurt and out side of train delays. No damage that amounted to much. Dot was awful mad. She wants to go every place we go.

Mon 15 We had out balance of cotton in AM. I went down to Reds for some corn and Millet. Was hot all day. Billy came in about dark. Is here for the night.

Tues 16 I started hoeing Sallie to plowing. Harold, Dellie and boys came in about 10 A.M. We took off for the day. Harold says his crop looks Ok. for so much dry weather.

W.D. My early Kaffer corn is gone by the hoard. The heads have died in the boot. Too thick and No rain just when it needs rain.

S.D. Some S.E. wind to day.

Thur 18 Hoed and plowed in the cotton and peas.
Fri 19 " " " " " "

Part of day I cut gotat heads out of watermelons in afternoon. They sure have grown the last two or three days. Sallie & Dot canned peaches.

Sat 20 We / Sallie and I finished up the West water melon patch. It is clean now. We all went up to Sudan in p.m. Talked to Mr Porter he said he could let me have 100 bundles of Kaffer corn to finish plowing over. We sure do need a rain on the early feed. Does not look very promising to me.

Sun 21 We just set around all day and waited for Monday to come A cloud came up from N.W. and we all watched that till it blew east. Rain Only about ¼ in rain fell here. I think a big rain fell North and east of Sudan.

Mon 22 I had to go to town early. Whitaker and I had to move the table out of the Kitchen house to the Cleveland building. Ben Pearce also helped. This is the Gov. mattress set up. Sallie went to work here. She found out from Mrs Yarbough the matteress forewoman that we could make Dale Mattress tomorrow. Mrs Porter sent word that she would come by for Sallie, Dot and baby. I sure am thankfull. for I want have to go, and can now. I went over this p.m. to Mr Porters for the feed I got from him 100 bundles of Kaffer corn. Good feed. Bill in here to-night He said he would not be on this run any more. He said he might have a count cant of Rain. The little rain will be quite a help to all late crops.

Tues 23 I plowed all day, Mrs Porter called for the folks, and they made the Mattress and worked home by 2.30 p.m.

Hot day.

Thur. 25. Sallie plow cotton till Noon. I hoed till Noon. Was so hot this P.M. We did not go out in the field. I thought Moby Bud would come up. But I guess they are on a trip with Idas people from Hill Co. We all stayed in the shade fall after Noon.

Sat. 27. I went to town early, left the cream at Malvern Produce house. Went to Mr John Harveys place. Hot being the place of precinct # 7 holds election. Came a little shower in P.M. Not enough only to scald crops. We did not finish the tabulation until 8:30 P.M. I brought the reports of the election back to Judson. Turned them over to Joe Covington. and on home. I think W. Lee O'Daniel will go over as big as he did in 1938. Altho the politicians have fought him every way they could think of. The dry weather is getting something fierce. Sun. 28 I walked over some of the melons this early A.M. They cant make large melons if we do not get some rain soon. Too much hot sun and hot winds. The wind blows out of the south west all the time and any old timer knows what the results is when the wind stay out of S.W. I went down to Sudan for election returns. With what dope the press has A Daniels is "it" with and a run off. about 54% of what votes has been tabulated Well I am truly glad. I do not think he is too hot for the Governor. But the way these hi birds in politics has slung mud. I am glad he beat the whole field 6 or 7 I think was in the race. Has not been so hot and windy to day. But too hot at that. We cut our first water-melon this P.M. Took Fay to town.

Mon 29 I took Wade out of some feed to day. Sallie finished the cotton plowing this A.M. I think I will fix up my water melon stand soon. I think I will have several pick melons in a few days. They will not be a good grade on account of the long dry spell. No rain yet, and things are sure burning up. It is discouraging to work hard and see the crops wilt away. But nothing we can do about it. Not so hot.

Tues 30 I took most of day. I found where some boys went into my late melon patch and mined 15 or 20 nice melons. They were all green. They just stomped them. Did not even pull them off the vine. That is bad. I cant stay up to watch them.

Last day. I had a talk with Bounds this A.M. he was in his melon patch I just walked up and asked him what he was sore about. He said that he was not mad. He just imagined he was mad at him.

Fri 6 $3.77	I went over and bought 24 Melons from Bounds. He charged me 40¢ per hundard pounds. They averaged 35 pounds per Melon. Bounds set the price on my work I did for him back in the winter. (April 8-9th) He also set the price on his Melons and weighed them on a pull down pair of scales. Well I wont buy any more of his Melons. I am even with him now and I think it is but that I stay that way. In all I sold $3.77.				
Sat 7 $1.95	Was in the stand all day. Did Not do much. Saturdays are dull days. Only made $1.95.				
Sun 8 $5.30	I was out early. Loaded up the stand, and it took all the Melons I could find to do it. Will have to lay off for a while until they ripen some more. I had a very good day. The stand made me $5.30. I had to go to the Fox store for some gas. Fox charged me 14¢ for the white gas. I will buy at town from now on. We all went out east of Sudan to see some Melons at a Mr Crouch place. I can buy nice Melons for 10¢ field delivery.				
Mon 9 $4.15	I was up early and went over east of town for a load of Water melons. I bought 21 at 10¢ each. & at 5¢. He gave me 3. $2.40. I sold Nearly all of them. The stand made $4.15.				
Tues 10 Cold	The wind was out of the N.E. and cold when I got up. I did Not open up for business at all today. Bill Brisco sent a Man to cut my millet. We Were Nearly all forenoon on it. The cotton pullers came out early, wanted to start in to the wet cotton I had to let them pull or quit I should have let them quit. For I did take a good skimming before nite. They finished the first bale by 2 P.M. 166 field wt. Sort 20# at gin. They pulled so much green cracked bolles that it ruined my sample, and the bale only weighed 435# an other big loss from the green wet cotton. I caught the bus 7 00 P.M. I met them as I came out home and I payed them off. They said what I owed them I gave them a check for the amount. Came home and checked up and found they had beat me for 150#. A very bad lot they are. Bill is here to nite.

Wed 2 I went down to Sudan early thought I might find some cotton pullers, but did not. I went over to Amherst with Bill Rmiller. Deposited $20.00 in Amherst Bank. Bought two new tires of Glenn Gatewood Mgr. Mission S.S. Payed him $7.50 which was 1/2 of the bill $15.00. Told him if his collator came by and wanted his money for the tire that I would give him a check on Amherst Bank for it.

I went to town to see if I could get some fullers could have gotten boarders, But I do not want to board hands. I went over to Amherst to see if the check I gave to Robert Cotton had been cashed. It had. I also drew $20.00 just to pay Cotton Fullers when I get any. Not paying any more with check. Sallie & Dad cleaned out the hen houses. I bought dope to kill lice & mites Also 100 # laying Mash.

Sallie & I also Alameta went down to Buds. I wanted to get his Negros to pull my cotton. But could not get them. Bud had promised Mr. Stenson he could have them. However I be- lieve I could have used a little tact and told him that some of us in the family need them. Stenson has 50 or 60 A. in Cotton and a home for them. Why did he not get him some hands. We are now pulling on the 4th bale. We did not pull as much today as we did yesterday.

Fri 1		I started early to put the corrigated roof on sheds & barn. I finished by Night fall. I scraped around and had enough tin to put roof on all the shed. I rigged it up and took it over to the field for her. Bill came about the time we got trailor spoted.			
Sat 2		I piddled about barn in for noon. We all went up to Muleshoe in p.m. Sallie & Dot went to the show. Fay made them wish they were any place but in the show place. Came home had a general mix in with Dot. She was raising the devil about me not paying her for her cotton pulling. I payed all the Negroes and paid out all my money to the bank. But she is like the rest of them if I owe them any thing they talk about me to my back. But if they owe me that is Ok. I have made all kinds of sacrifices for the help of all. And yet they have bit the hand that has tried to help them. When they get on their feet a little they talk when I owe them. Not thinking where they would have been if I had not taken from my self and helped them to a start. That is what hurts. I cant work and provide as I could 10 and 15 years ago. But they expect me to. And living under the strain that I have lived for the last 5 years.

With instructions that $7.45 was due on my 1938 subscription and $7.45 was for the 1939 subscription. I received the paper all 1939 and Never had a word from Star Telegram office that the check had not been paid. Also Dad Ketcham sent in my subscription for 1940 and they did not write at any time that they were holding an unpaid check of mine for 1938 Sub. I do not understand how come them to send out my paper for 1939. when they claim I owe this check. We have had no paper to read to nite.
Sun is bad when one has no daily paper that has had one as long as I have.

Fri 10 One of the bigest frost. I think I ever saw this morning. Was like a little snow. I set around untill after dinner. I decided I would go down town. I was down town till near nite. Some one sent me a Star-Telegram. It was in the Mail box. I guess it was A. Shuttlesworth. I sure do hate to miss a single copy. Dot is talking of going to California with Harold & Dellie if they go. That is if he will let her go with them. He aught too and help her get her a job. That would give Dellie a rest and a chance to be her self again. I think now with the responcebley of Little Ameta she would be O.K. if she could get a job keeping house for some one when she could be to her self. And it would be a lot better for us.

AMOUNT OF PAINT REQUIRED FOR A GIVEN SURFACE.—It is impossible to give a rule that will apply in all cases, as the amount varies with the kind and thickness of the paint, the kind of wood or other material to which it is applied, the age of the surface, etc. The following is an approximate rule: Divide the number of square feet of surface by 200. The result will be the number of gallons of liquid paint required to give two coats or divide by 18 and the result will be the number of pounds of pure ground white lead required to give three coats.

TO DETERMINE THE CONTENTS OF CISTERNS.—A simple rule for determining the contents of a cistern, circular in form, and of equal size at top and bottom, is the following: Find the depth and diameter in inches, square the diameter and multiply the square by the decimal .0034, which will find the quantity in gallons for one inch in depth. Multiply this by the depth, and divide by 31½, and the result will be the number of barrels the cistern will hold.

For each foot in depth, the number of barrels answering to the different diameters, are:

5 feet diameter	4.66 bbls.	8 feet diameter	11.93 bbls.
6 feet diameter	6.71 bbls.	9 feet diameter	15.10 bbls.
7 feet diameter	9.13 bbls.	10 feet diameter	18.65 bbls.

By the rule above given, the contents of barnyard cisterns and manure tanks may be easily calculated for any size whatever.

TO MEASURE SQUARE TIMBERS.—Multiply the length, width and thickness together and divide the product by 12.

SHINGLES REQUIRED IN A ROOF.—To the square foot it takes 9 if exposed four inches; 8 if exposed 4½ inches, and 7½ if exposed 5 inches to the weather.

Find the number of shingles required to cover a roof 38 feet long and the rafters on each side 14 feet. Shingles exposed 4½ inches. 28 x 38—1064 (sq. feet) x 8—8512 shingles. Answer.

To find the length of the rafters, giving the roof one-third pitch: Take three-fifths of the width of the building. If the building is thirty feet wide, they must be 18 feet long, exclusive of projection.

HOW TO WEIGH A HAYSTACK.

Measure the length and breadth of the stack; take the height from the ground to the eaves; add to this last one-half of the height from the eaves to the top; multiply length by breadth and the product by the height, all expressed in feet; divide the amount by 27, to find the cubic yards, which multiply by the number of pounds supposed to be in a cubic yard.

FLOOR, WALL AND ROOF MEASURE.

To find the number of square yards in a floor or wall, multiply the length by the width or height (in feet), and divide the product by nine. The result will be square yards.

HOW TO CLEAN FEATHERS.

Feathers are prepared by exposing them to the sunshine, or in a stove, until perfectly dry, and then beating them to remove dust and loose dirt. When carelessly collected and dirty they may be cleansed with lime water, or still better, with a weak solution of carbonate of soda, or with water containing a little solution of chloride of lime, after which they are rinsed in clean water and dried as before. Old feathers are purified and cleansed in the same way.

FACTS FOR HOUSEKEEPERS.

Rain-water and soap will remove machine grease from washable fabrics.

Fish may be scaled easier by first dipping them into boiling water for a minute.

Milk which has changed may be rendered fit for use again by stirring in a little soda.

Fresh meat beginning to sour will sweeten if placed out of doors in the air over night.

A tablespoonful of turpentine boiled with your white clothes will aid the whitening process.

One teaspoonful of ammonia to a teacup of water applied with a rag will clean silver and gold jewelry.

Wetting the hair thoroughly once or twice with a solution of salt and water will keep it from falling out.

Boiling starch is much improved by the addition of sperm or salt, or both, or a little gum arabic dissolved.

Kerosene will soften boots and shoes that have become hardened by water, and render them pliable as new.

Clear boiling water will remove tea stains; pour the water through the stain and thus prevent it from spreading.

Salt will curdle new milk; in preparing porridge, gravies, etc., salt should not be added until the dish is prepared.

Applying kerosene with a rag when you are about to put your stove away for the summer will prevent it from rusting.

Paint stains that are dry and old may be removed from cotton or woolen goods with chloroform. First cover the spot with olive oil or butter.

A teaspoonful of borax put in the last water in which clothes are rinsed, will whiten them surprisingly. Pound the borax so it will dissolve easily.

Charcoal is recommended as an absorber of gases in the milk-room where foul gases are present. It should be freshly powdered and kept there continually.

MISCELLANEOUS RULES

TO ASCERTAIN THE NUMBER OF TONS OF HAY IN A STACK.

Measure around the stack in the largest place, multiply the number of feet by one-third of the height, point off the two right hand figures, and you have the number of tons in the stack.

TO FIND THE NUMBER OF TONS OF WELL PRESSED HAY IN A MOW.

Measure the number of yards the bay is long, and the number of yards the bay is wide; multiply the two together; that product multiplied by the number of yards the bay is deep and divided by 15 will give you the number of tons the mow contains.

TO DETERMINE THE PRICE PER LOAD OF HAY.

Multiply the weight by one-half the price per ton, point off the three right hand figures; the figures at the left will be the amount of dollars and cents that the load comes to.

MEASURING CORN IN THE CRIB, HAY IN THE MOW, ETC.

This rule will apply to a crib of any kind. Two cubic feet of sound, dry corn in the ear will make a bushel shelled. To get the quantity of shelled corn in a crib of corn in the ear, measure the length, breadth and height of the crib, inside the rail; multiply the length by the breadth and the product by the height; then divide the product by two, and you have the number of bushels in the crib.

ANOTHER RULE.

Multiply the length of crib by the width of crib and that again by the height of corn in the crib; that product multiplied by .63, as .63 is the fractional part of a heaped bushel in a cubic foot; the result will be the heaped bushel of ears. For the number of bushels of shelled corn multiply by 42 and you will have the amount of corn in crib.

Rule when the crib is flared at the sides. Measure the top and bottom of the crib, add the two together and divide it by 2, multiply that by the height, and that product by the length of crib, which last product multiplied by 63 for ears, or 42 for shelled corn, gives the amount the crib contains.

MEASURING GRAIN IN BINS.

Multiply the length of bin by the width of bin, and that product by the depth of bin, and multiply that amount by 5, and divide the product by 4, and you have the number of bushels the bin contains.

TO DETERMINE THE WEIGHT OF CATTLE, SHEEP AND HOGS BY MEASURING THEM.

CATTLE.

For cattle 5 to 7 feet in girth. Girth just behind the shoulder-blade, and find the number of inches; then measure from root of tail along the back, just front of the shoulder-blade, and find the number of inches; multiply the two together, divide that product by 144, multiply that product by 23, and you have the weight.

For cattle girthing over 7 feet, multiply by 31 instead of 23. If they girth less than 5 feet, multiply by 16. If the cattle are very fat, add five per cent, or, if very poor, deduct five per cent.

HOGS AND SHEEP.

Measure the same as for cattle. Multiply the two measurements together, and divide by 144, and multiply that product by 11, and you have the weight.

The interest on	10,	27 days,	at 6 per cent.,	.05
The interest on	1,	27 days,	at 6 per cent.,	.00
Whole sum of interest sought, ...				$93.88

In the same manner proceed with any other amount, or any other time or rate per cent.; and if for more than one year, multiply the interest for one year by the number of years for which the interest is sought; if for twenty, thirty, sixty, or any other amount between ten and one hundred dollars, multiply the interest on ten dollars by the number of tens in the amount, which gives you the whole sum of interest sought; the same rule holds good on hundreds, between one hundred and one thousand, and also on thousands.

To find interest at 5 per cent., take one-half of the ten per cent. rate; and, of course, the interest works the same on all of the tables, for the different rates of per cent.
