LUBBOCK, Tex., August --. Ample rooming and boarding accommodations in approved private dormitories and houses are assured for all students of Texas Technological College for the session to open September 14, according to announcement of President Bradford Knapp. Reservations already made and other facts upon which estimates are based indicate that Tech will open with the largest enrolment in its history.

#

LUBBOCK, Tex., August --. Two tons of iced melons were consumed at the annual summer session Texas Technological College watermelon party on the lawn south of the administration building Thursday evening of this week. About 500 persons participated in the event, a regular feature of the summer school recreational program.

Colored motion pictures depicting the history and development of the South Plains were shown by W. G. McMillan of Lubbock. Pictures in color of wild flowers and wild game of the section were included.

LUBBOCK, Tex., August --. Season tickets for the 1937 football season at Texas Technological College will be put on sale August 21 at the athletic office, according to Bo Williams, manager. The six home games will cost the season ticket holder \$7.50.

Much interest is developing in the game with the University of Texas at Austin September 25. Williams has ordered 1,000 reserved seat tickets for the use of Tech students and West Texas fans, and it is likely that this number may not supply the demand. A special train to Austin for the event is planned.

The complete schedule follows:

Arizona State, Sept. 18, at Lubbock.

University of Texas, Sept. 25, at Austin.

Montana University, Oct. 2, at Lubbock.

Detroit University, Oct. 9, at Detroit.

Arizona University, Oct. 16, at Lubbock.

New Mexico University, Oct. 23, at Lubbock.

Oklahoma A. & M., Oct. 30, at Stillwater.

Loyola of the South, Nov. 5, at New Orleans.

Duquesne University, Nov. 11, at Lubbock.

Centenary, Nov. 20, at Shreveport.

Creighton University, Nov. 25, at Lubbock.

LUBBOCK, Texas, August --. Applications for National Youth Administration work at Texas Technological College may be made through the Student Employment Bureau of the college. Announcement of appointments will be made at the earliest possible time, said President Bradford Knapp. Applicants must be under 25 years of age to be eligible for this work.

##

LUBBOCK, Texas, August --. Ray Chappelle, head of the department of agricultural education at Texas Technological College, is in Washington on the invitation of the Agricultural Adjustment Administration, to familiarize himself with the program of the organization. The specific purpose of the department in which Chappelle will study is the adjustment of production to consumption. He will return to Tech for the opening of school September 14.

##

LUBBOCK, Tex., August --. The ten-acre orchard used for experimental purposes by the agriculture division of Texas Technological College is producing this season the best fruit crop in years, according to O. B. Howell, associate professor of horticulture. In the orchard are grapes, peaches, plums, pears, apricots, apples, and cherries.

The best bearing grapes are Concord and Niagara, the Concords being more suitable for jelly, grape juice and jams while the Niagaras are better to eat. The Concord, according to Professor Howell, is probably the best all-round grape for West Texas. The yield of the late bearing grapes this season has been cut down by the grape leaf hopper, but it can be controlled by nicotine sulphate sprays.

The McIntosh apple is very heavy bearing and is suitable for eating and cooking. The Greening, a cooking apple, is a very prolific bearer. The Red June, good for eating and cooking, is a moderate bearer. The Jonathan had a fair yield this season. These two latter apples were injured by frost.

The pear yield was so heavy this season that the fruit had to be thinned. Both Bartlett and Klapp's Favorite yielded a very heavy crop. The Elberta peach yield is unusually good and the J. H. Hale peach also yielded heavily this season.

The plum crop was also so prolific that the fruit had to be thinned. The Bradshaw and European Lombard plums are probably the surest crop and the best adapted for West Texas, according to Howell.

The apricot yield was disappointing, due to frost. There was only about a half crop of cherries. Cherries are also often injured by frost and the fruit is seriously menaced by birds.

LUBBOCK, Tex., Sept.--. Hammer and paintbrush have displaced pencil and notebook at Texas Technological College for a week, as painting and repair work makes ready for the largest predicted enrolment in the history of the college. Sixteen hundred gallons of paint and two fifty-gallon barrels of turpentine will be used on inside walls of college buildings before school opens September 14. Main purpose of the general housecleaning is to afford additional classroom and office space, by partitioning some of the larger classrooms.

Open Jones
LUBBOCK, Tex., Sept.--. Creating eleven new faculty and administrative positions, to take care of a growing student body, the Texas Technological College board of directors approved seventeen staff appointments and changes at a meeting held here last week.

New places, according to President Bradford Knapp, include three administrative positions, two teaching positions each in the divisions of engineering and home economics, an instructorship in the division of agriculture, and one each in the departments of French, speech, and chemistry.

All faculty members return September 11, in preparation for registration September 14.

Dr. Harry L. Kent, director of administrative research, is a graduate of Kansas State Teachers College and Kansas State Agricultural College, and was awarded an honorary degree of doctor of laws from the latter in 1931. He was formerly president of New Mexico A & M at Las Cruces.

Acting as dean of men for the coming year is James G. Allen, formerly associate professor of English at the college. A graduate of Southern Methodist University, he holds a master's degree from Harvard University. Calvin Hazlewood, assistant to the dean of men, will be in charge of housing and employment for men students.

Additions to the teaching staff include: Dr. J. O. Ellsworth who returns from a year's leave to become head professor of economics and business administration; Dr. Karl E. Ashburn, professor of economic and business administration; Dr. W. W. Yocum, associate professor of horticulture; T. L. Leach, assistant professor and itinerant teacher trainer in vocational agricultural education; Earl T. Duke, instructor in plant industry.

Dr. Frederick W. Rolf, instructor in chemistry; Dr. Douglas H. Orrok, instructor in French; Richard Flowers, instructor in speech; Cassius M. Stanley Jr., assistant professor of textile engineering; Ewel V. Middleton, instructor in civil engineering; Willard F. Gray, instructor in electrical engineering; Robert P. Vail, instructor in mechanical engineering; Mrs. Edna Anderson Lyles, assistant professor of clothing and textiles; Margaret E. Winkelhake, instructor in home management.

Floydada Plamenau
LUBBOCK, Tex., Sept.--. Rotary clubs from 17 towns are to meet on the campus of Texas Technological College Sept. 22 in the annual inter-city meeting of the Lubbock Rotary club. According to Jas. I. Kilpatrick, president of the Lubbock club, the event will be a stag affair and visitors are to be guests of the local club.

Rotarians invited are from Slaton, Lamesa, Post, Brownfield, Ralls, Lockney, Floydada, Sudan, Spur, Snyder, Levelland, Canyon, Plainview, Littlefield, Tahoka, Amarillo, and Hobbs, N. M.

Eight members of the staff at Texas Tech are Rotarians, as follows: President Bradford Knapp, Dean J. M. Gordon, Dr. W. A. Jackson, W. P. Clement, W. T. Gaston, Dr. R. C. Goodwin, Coach P. W. Cawthon, W. C. Cole, and K. M. Renner.

March 1
LUBBOCK, Tex., Sept.--. Sheep feeding experiments will be resumed at Texas Technological College this year, according to W. L. Stangel, head of the animal husbandry department. Twenty head of sheep will be put on feed in the winter to be finished about March 1, when a field day will be held.

For five years Tech conducted experiments in feeding sheep which attracted general attention among sheep men over the state. Cooperation of the state experiment station and the state extension service is expected in the program for this year.

##

LUBBOCK, Tex., Sept.--. Field investigation in both spring and winter barley will begin at Texas Technological College this fall as a part of the small grain research being instituted by the division of agriculture. Darrell Morley, 1937 graduate of Kansas State Agricultural college, has been given a fellowship at the college to carry out this study.

Dr. Arthur W. Young, head professor of plant industry, who has just returned from a three weeks trip to experiment stations in Wisconsin, Iowa, Illinois, Kansas, and Nebraska to find what results they have obtained in small grain experimentation, will direct the research. Dr. Young also made plans on this trip for a cooperative project with the Federal government for winter hardiness tests on barley varieties.

##

LUBBOCK, Tex., Sept.--. Three hundred fifty officers and men from Fort Logan, Colo., and Fort Warren, Wyo., encamped on the Texas Technological College campus one night this week, en route to Fort Sam Houston, San Antonio, for six weeks training in a new type of army division maneuvers.

Headed by Col. R. C. Moore, Fort Logan, the party is traveling in 53 trucks, escorted by 18 motorcycles. Overnight stops were also made at Trinidad, Colo., Dalhart, San Angelo, and Fredericksburg.

Hamilton news (19)
morahan news
LUBBOCK, Tex., Sept.--. At noon Friday, September 17, Texas Technological College showed 3,068 students had begun registration. This compares with 2,609 on the same day a year ago. The total enrolment for the fall semester of 1936 was 2,703. It is predicted that the enrolment for the fall of 1937 will be very close to 3,100.

Jerry Co. Herald
Judson news
In agriculture, the increase over a year ago is 82 students. Cards have been taken out by 387, against 305 a year ago. In engineering, the increase is 153 students, 679 having taken out cards for registration as compared with 526 a year ago.

In home economics, the increase is 67, 371 students having taken out cards for registration as compared with ~~304~~ a year ago. Arts and sciences has an apparent registration of 1,505, against 1,404 a year ago, an increase of 101. Percentage increase for the whole school is 13.7.

In agriculture, the percentage increase is 26.8, in engineering 29, and in home economics 22. The college is busy checking up the sections, dividing the students up so as to obtain the proper instruction in classrooms and laboratories. On account of the crowded condition of the buildings it has been further necessary to hold quite a number of night classes from seven to nine in the evenings. Many students apparently like this innovation and the plan seems to be working well.

LUBBOCK, Tex., Sept.--. Red Raider fans will have an opportunity to listen in on a half hour broadcast from the Tech gymnasium Thursday evening, September 30, from 6:30 to 7:00 o'clock. The program inaugurating the Coca-Cola College Night series will be broadcast over the Texas Quality Network through WFAA in Dallas.

Coming two days before the Tech-Montana game, the broadcast will take the form of a pep rally. Saddle Tramps and yell leaders will direct the student cheering section, the Matador band under the direction of D. O. Wiley will be present in full force, and President Bradford Knapp, Coach P. W. Cawthon, and others will speak..

#

By Reeves Henly

Longhorns News

LUBBOCK, Tex., Sept.--. The scene is set. The winds that blow across the plains of West Texas sing of it. For once more football is king, and once more the roaring Red Raiders of Texas Tech are on a tear, taking on all comers.

Hampered by the loss of nearly a dozen veterans, the Matadors take the field in their season opener here Saturday afternoon, with the Lumberjacks from Arizona State of Flagstaff assisting in the lid-blasting ceremonies. Only three members of the scrapping team which defeated TCU, 7-0, a year ago, will don the Scarlet and Black for the first '37 tilt in the Border conference loop.

Raider Coaches Pete Cawthon and Dutchy Smith are justly perturbed over a squad from which such men as "Jarring Jim" Neill, Winnie Baze, and J. W. West are missing. Graduation, marriage, and business have taken their toll in the Raider ranks, leaving only a small squad with three tried hands - Captain Hershel "Red" Ramsey, end, and Lou Jones and Pete Owens, guards. So it will be a green sophomore team that counters thrusts with the Arizona Ax-swingers on Saturday.

Up from freshman and reserve ranks are Bostick, end, and "Red" Murphy and Bill Davis, tackles, who with Guzik at center will complete the Raider forward wall. The backfield will be greener, perhaps, than the line. Ed Smith is destined for the field marshal's job, with Alan Plummer and Tarbox backing him at either half. Calhoun, freshman, standout, will hold down the fullback post. These, aided by Bobby Holmes, transfer from Riverside, Calif., will inject plenty of speed into the Notre Dame offensive employed by the Cawthon squad.

While apprehensive of Saturday's conference battle, the Mats nevertheless are looking a week ahead to the date they tangle Dana Bible's Longhorns in the University of Texas' Austin corral. Tech's rowdy Red Raiders are off on a "suicide schedule". And, for the present, Texas tops the list.

Austin Dispatch
LUBBOCK, Tex., Sept.--. The department of clothing and textiles in the Division of Home Economics at Texas Technological College, by way of expansion, has secured Mrs. Edna Anderson Lyles as assistant professor of clothing and textiles. In addition to instructing new sections of regular courses previously offered, Mrs. Lyles brings two new services to this department, the personal and vocational development of young women on the campus.

Primarily she will introduce the foundation work of training for careers connected with retail merchandising or store service. Incidentally, she will act as adviser to the students of the college on any personal problem of clothes and grooming such as hair styling, selection of accessories, ensemble planning, the selection of becoming and appropriate clothes as to line, color and material. She will be glad to give suggestions to girls who might have clothes which need a bit of freshening up by an added note of color, shortening the skirt, new belt, or rearrangement of neckline. Definite office hours are being planned for these private conferences.

Mrs. Lyles is a graduate of Iowa State College and has done post graduate work at the University of Missouri, and at Iowa State college. Starting out in retailing work with Marshall Field and company, Chicago, doing sales work, departmental shopping, and working in promotional style shows; she later became a professional shopper with the parent organization of Sears, Roebuck and company, Chicago. This work included shopping the larger departmental chain stores throughout the Middle West on the type of merchandise carried, making quality comparisons, price comparisons, style trends and store policies.

(More)

add - Tech clothing and textiles.

During the past year Mrs. Lyles was at Christian College, Columbia, Missouri, as girls' adviser and stylist, and head of the textiles and clothing department. The textile merchandising courses, clothing 436 and 437, will include a study of what is on the market today, merchandise comparisons of quality and style as related to consumer interests and demand, technical terms, current fashion trends, standardization of textiles, labeling and textile legislation. The first semester's work will deal primarily with cotton as related to merchandising, and actual sales experience will parallel some part of the course.

Courses in textile merchandising will qualify students for positions leading to assistant buyers, professional shoppers, personal shoppers, stylists, consultants in hard goods sections, or testing work in textile laboratories. Incidentally these courses contribute to careers in journalism, advertising, photography, and work connected with textile promotion, and the educational service of pattern companies and textile manufacturers.

9/23/37
From Texas Technological College Free News Service - Cecil Horne

LUBBOCK, Tex., Sept.---. At least one student at Texas Technological College is sold on the benefits of the annual physical examination required of every registrant. Homer Harold Hanna, freshman engineering student from Breckenridge, reporting for physical examination at the Lubbock sanitarium, explained he had been "hard of hearing" since he was a small child.

Probing by the examining physician disclosed a wad of cotton as large as the end of a fountain pen lodged tightly against the drum of each ear. The youth's hearing was fully restored with the removal of the cotton. A similar obstruction of cotton was found in another boy's ear.

Examination of over three thousand students resulted in the finding of a long black bug in a young lady's ear where it had been lodged for 6 or 8 months, a glass bead in a boy's ear, a piece of crayola from another boy's ear, and a piece of lead from a pencil from still another boy's ear.

In addition to these articles taken from the ears of Tech students an assorted collection of beans, peas, cottonseed, and other particles add to the extensive exhibit. Doctors explained that very often when children have an earache parents may place a piece of cotton in the ear. and forget to take it out.

Lubbock (advance) (rewrite)

LUBBOCK, Tex., Sept.--. Questions and answers have done a right-about-face in an art appreciation class taught by Miss Martye Poindexter, head professor of applied arts at Texas Technological College. Instead of quizzing the students, Miss Poindexter has allowed them to ask her questions on art which they want answered in the course.

Beginning with a study of paintings, they will continue by examining prints and murals, before they start a study of pottery. Next semester they will take up sculpture and architecture, then make a brief survey of crafts other than pottery -- metal, glass, and textiles.

By Reeves Henly

LUBBOCK, Tex., Sept.--. Texas Tech's Red Raiders, their seasonal grid opener successfully if not noteworthily behind them, enter the second lap of their '37 "suicide schedule" Saturday afternoon by giving battle to Dana X. Bible's University of Texas Longhorns in Memorial stadium, Austin.

Victors over Arizona State of Flagstaff last Saturday by a marginal 6-0 win, the Matadors have been drilled hard during the past four days in an effort to smooth the rough edges on blocking and ball-lugging which they displayed in the lid-blaster. Tech mentors Cawthon and Smith hope that by game-time Saturday their squad of sophomores will be sufficiently familiarized with the Notre Dame style to prevent recurrence of the numerous fumbles of the Arizona tilt.

Hand in hand with blocking drills have gone passing workouts.

Against Flagstaff's Lumberjacks the Raiders' aerial attack failed, but the rowdy Men in Red are set to take the air in an effort to drop the Steers. The hand of Gene "Bubbles" Barnett and the shagging ability of Captain Hershel "Red" Ramsey will loom large in Saturday's Austin affray.

With the exception of Alan Plummer, grunt and groan artist from Beaumont, the Mats emerged sound in body from last week's game. Plummer, who sustained a broken rib in the encounter, will probably be replaced in the starting lineup by Barnett at the halfback post. Charlie Calhoun, sophomore ball-toter, will line up at the fullback slot with Tarbox playing wingback opposite Barnett. Ed Smith, at quarter, is destined to go most of the way against the Steers, discounting possible injuries.

The forward wall which starts against the Longhorns will be the same that opened the season. Captain "Red" Ramsey and George Bostick will draw the picket post assignments, while veteran Abe Murphy and big Bill Davis, sophomore, will fill the tackle berths. Old hands at the line game, Co-Captain Lou Jones and Pete Owens are slated for the guard positions. Frank Guzick draws first bid for the pivot place.

Seasoned by the fire of opening game competition, it will be a rejuvenated team that squares off against Texas Saturday. If drills have taught the Raiders how to hold onto the old hog-hide, Texas university's first engagement under its new regime will be a sad occasion for Dana Bible, Blair Cherry, and company.

9/30/37

LUBBOCK, Tex., Oct. 2.--Three annual cash scholarships amounting to \$200 for journalism students of Texas Technological College, offered for the current school year, are announced by Cecil Horne, head of the Journalism department. Awards will be made for high scholastic rating and for excellence in reporting.

The Mrs. J. T. Hutchinson Journalism Scholarship, given by Mrs. J. T. Hutchinson of Lubbock, is a \$100 cash award to the journalism student of sophomore or junior standing who makes the highest scholastic average during the year. The money will be available for college expenses in Tech the ensuing school year. Mrs. Hutchinson received her B. A. degree in history from Texas Technological College in 1934.

Through the interest of Chas. A. Guy and Parker F. Prouty, publisher and manager of the Avalanche-Journal of Lubbock, The Avalanche-Journal Journalism Scholarship of \$50 is offered annually. The award will be made for the best work in reporting during the fall semester. Tech journalism students get part of their training as reporters by working on the Avalanche and Journal.

In memory of the late Wilbur C. Hawk of Amarillo, prominent in business and civic affairs in Amarillo and West Texas, and associated with the News-Globe Publishing Company, Gene Howe, the "Tactless Texan," and publisher of The News-Globe, is offering an annual scholarship to be known as the Wilbur C. Hawk Memorial Scholarship. The award, amounting to \$50, will go to the journalism student who does the best work in reporting during the spring semester.

LUBBOCK, Tex., Oct.--. La Ventana, Texas Technological College yearbook, was awarded all-American honors last week on its "candid camera" edition, by judges of the National Scholastic Press association critical service, which has its headquarters at the University of Minnesota. Only 21 of the 200 annuals entered were given such a rating, which required a scoring of at least 850 points. La Ventana scored 885 points out of a possible 1,000. The Cactus, University of Texas yearbook, was the only other Texas annual placed in the all-American class.

Winston Reeves, editor of the 1937 La Ventana, is now special instructor in news photography at Texas Technological College.

##

LUBBOCK, Tex., Oct.--. Research work in Lloyd's of London and the Bank of England has been assigned to Canon Clements, Texas Technological College graduate, as an extension of his Rhodes scholarship through a third year in Oxford. Clements received a bachelor's degree in business administration at Tech in 1932, and a master's degree in 1933. He received a master's degree from the Harvard School of Business in 1935, before starting to Oxford that fall.

LUBBOCK, Tex., Oct.--. Windmill, lean-to shack, and rail fence in conventionalized design, stencilled in oil on a tablecloth, will carry the spirit of the West from Texas Technological College to Oberlin College, Ohio, this week, as part of an art exhibit in Oberlin's centennial celebration of co-education.

Miss Elizabeth Hawley, instructor in applied arts at the Texas college and a graduate of Oberlin, has been asked to send examples of her work in leather, metal, and textiles to be included in an art display which opens October 8. Included in Miss Hawley's collection are a silver pin, a pewter cream and sugar set, a blue stamped leather portfolio, a red stamped and tooled brief case, and a length of tied and dyed material.

##

TEXAS TECHNOLOGICAL COLLEGE FREE NEWS SERVICE--Cecil Horne

LUBBOCK, Tex. Oct.--Chafing from the 25-12 defeat handed them by Dana X. Bible's University of Texas Longhorns, the roaring Red Raiders of Texas Tech have dusted off their fighting gear and cleaned their aerial guns in an effort to repulse the invasion of Doug Fessenden's University of Montana Grizzlies, Saturday night.

The Raiders, in fine fettle after the Texas scrap, are set to match razzle-dazzle de-luxe against the lumbering power utilized by the northwoods Bruins. Most of the Tech offensive will rest in the tossing arm of "Bubbles" Barnett, Mat halfback who thrilled University fans at Austin last week with his accurate heaves. On the receiving end of Barnett's passes will be Captain "Red" Ramsey and Balfanz.

If, by chance, the Matador aerial plans go for naught, Calhoun, Plummer, Barnard, and Tarbox will open with the line-smashing attack that piled up the first downs on the Steers. Bobby Holmes, fleet-footed transfer from Riverside, Calif., will come in for more than his share of the ball toting honors for the Plainsmen. It is the speed of Holmes that has succeeded in speeding up the Raider offense.

conclude

Sports continued--Page 2

In the Tech line will be the stalwart veterans who have survived the team's two initial tilts. Captain Ramsey and Bostick or Balfanz will hold down the picket slots with Abo Murphy and sophomore Bill Davis at tackles. Co-Captain Lou Jones and Pete Owens side Guzick who straddles the pivot post.

But the Mats meet no setups in the Bears, for it's a beefy speedy crew that hies out of the Northwest on their first trip to Texas. Last week in their opener against the Whitman Missionaries, Milt Popovich, halfback-captain, lugged the mail for a total of 385 yards. Besides returning punts and kickoffs, he tried 34 times from scrimmage for an average of 7 yards per.

The Montana line will tip the scales at close to 210 pounds. Besides aveirdupois, however, the Bruin forwards have an aggressiveness that boosts many of them for All-America recognition.

Leaving Wednesday for Lubbock, the Grizzlies worked out in Denver, Colo., during a nine hour stop in the mile high city. It's a rough, tough battle that's forecast for Saturday night when the powerhouse Bears meet the razzle-dazzle Raiders. And, from all accounts, anything is likely to happen.

LUBBOCK, Tex., Oct.--. Miss Doris Buchanan, itinerant teacher trainer for 22 counties in Northwest Texas, arrived this week to establish headquarters in the Division of Home Economics at Texas Technological College. Miss Buchanan is one of several teacher trainers sent out by the State Department of Education to work in centers where teachers are being trained for vocational home economics. Cooperating with the department of home economics education at the college, she will teach some courses on the campus, besides doing extensive field work with home economics teachers in public schools throughout Bailey, Castro, Cochran, Collingsworth, Crosby, Dawson, Dickens, Fisher, Floyd, Garza, Hale, Hockley, Knox, Lamb, Lubbock, Lynn, Nolan, Parmer, Scurry, Swisher, Terry, and Young counties.

Misses Vivian Johnson, head professor of home economics education, at Texas Technological College, and Geraldine Clewell, instructor, will work with Miss Buchanan in public school field work. A resident of Snyder and graduate of Texas University, Miss Buchanan comes to Lubbock from Ames, Iowa, where she was a member of the clothing and textiles faculty of Iowa State University.

LUBBOCK, Tex., Oct.--. Specimen fossils, weighing nearly 900 pounds, have just been received from Scenic, S. D., at the West Texas museum, located on the Texas Technological College campus. Shipment was made by Dr. John Clark, formerly vertebrate paleontologist for the museum, who has spent several months exploring the midwestern badlands before joining the University of Colorado staff as vertebrate paleontologist.

LUBBOCK, Tex., Oct.--. The West Texas Scholastic Press Clinic, organized at Texas Technological College last April, is scheduled to have its first meeting at the college Nov. 5 and 6. It is proposed to have a two-day meeting each fall at Texas Technological College for lectures, discussions, and exhibits. Problems of both printed and mimeographed papers and year-books will be considered.

Mrs. Ross Ayers, sponsor of school publications in the Lubbock high school, is president and Miss Bernie Addison of Wheeler is secretary. More than one hundred sponsors and teachers of high school journalism have been invited to join as charter members of the Clinic. The Journalism department at Tech is sponsoring the new organization.

LUBBOCK, Tex., Oct.--. Appointed teachers in the Indian service last August, Mr. and Mrs. Roy L. Jamison, former students of Texas Technological College, have been stationed at Tundra, in the extreme western part of Alaska near the Bering Sea.

Jamison's duties, besides teaching, will include care of reindeer herds, fostering of agriculture among natives, and organization of community activities. He received a B. A. degree in history in 1934, did graduate work in agriculture here in the summers of 1936 and 1937. His wife has completed requirements for a bachelor's degree at Tech and will receive it next June.

LUBBOCK, Tex., Oct.,---. "Listening in" on a Texas Technological College broadcast recently moved Herbert A. Williams of Gibson Ga., to write the following letter to his former friend, President Bradford Knapp:

"I worked as an extension agent in this state and county under your great father, Dr. Seaman Knapp, and also under you. I am now 62 years of age, am still farming under the teachings of yourself and father, am very active and do lots of my own work, and grow cotton as a surplus, raise cattle and hogs and enjoy life. . .

" And this is what I wanted to say to you most. My wife and I were 'listening in' to your college program last night and we enjoyed it all so much. Joy came into my heart on hearing you talk, and I am so glad that God has spared you to carry on for the good of humanity around you. Texas is very fortunate in having you with them. Your father was such a grand and good man and did so much for the farmers of the U. S. . . . Wishing you and Texas all that is good."

From Texas Technological College Free News Service--Cecil Horne

LUBBOCK, Tex., Oct.--. The Red Raiders from Texas Tech are all dated up to ride in shiny new automobiles in Fort Worth and Detroit on the portages of the trip by air for the game with the Detroit University Titans in the automobile city Oct. 9. In Fort Worth the Sanford-Webb Motor Co. will meet them at the train with ten new Buicks to transport the boys in red to the airport. While in Detroit Henry Ford will have at their constant disposal all the new Lincoln automobiles their whims demand.

In Detroit Henry Ford will be presented with one of the famous Tech-made Techshire all-wool suits by Captain Herschel (Red) Ramsey. The wool for the suit was grown on the Tech campus and the wool was scoured, carded, and spun in the textile laboratories of the college and the cloth was woven by hand by Tech students.

Stops will be made at St. Louis and Chicago on the going leg of the trip. Advance inquiries indicate that the flying Red Raiders will be very much photographed at each stop. In fact, the boys are expecting swell treatment and entertainment during the entire trip with the possible exception of the fun that is to be provided for them on the football field by the Titans.

##

Summit Reporter
LUBBOCK, Tex., Oct.--. Eccentric in more ways than one is the thief who has been robbing Texas Technological College apiaries lately. Scorning the usual beehive loot, this fellow left the honey and stole the bees. Suspicion points to a marauding skunk, who left unmistakable evidence of his stealthy visits, and whose tribe is known to crave this piece de resistance.

##

LUBBOCK, Tex., For the second time in history a football team literally takes the air this week when Texas Tech's flying Red Raiders leave by plane Friday morning for Detroit where they seek revenge Saturday against Gus Dorais' University of Detroit Titans for last season's 12-7 defeat on Tech field.

To a group of 30 Matadors and coaches goes the distinction of making the longest flight of the sort on record, the only other like journey being the Florida to Cuba flight of Villanova gridgers in seasons past.

Going from Lubbock to Ft. Worth Thursday night by train, the Tech players take off from the "Capital of West Texas" Friday morning on their eight-hour ether tour to the Motor City. Two planes will be used by the squad in making the trip, one regular commercial airliner and one chartered ship. One of the planes is scheduled to arrive in Detroit Friday afternoon, while the second is slated to reach the Michigan city early the same night.

But riding sky-ships is only one of the ways the Raiders will take the air this week. Aching from the 13-6 defeat they received at the hands of the University of Montana last Saturday, the Mats are set to uncork a razzle-dazzle passing attack for Detroit fans in an effort to win over the Titans via the aerial route. "Bubbles" Barnett, Tech's hoghide-heaving halfback, will open the sky circus in an effort to connect with Captain Ramsey at end.

Line Coach Dutchy Smith's forward wall will be much the same as that which has been seasoned by three early season tilts. Captain Ramsey and Bostick are slated for the terminal slots, with Sophomore Bill Davis and Abe Murphy at tackles. Davis was slightly injured in the Montana fray but should be ready to go against the Titans. Co-Captain Lou Jones and Pete Owens occupy the posts on either side of Frankie Guzik, Mat center.

In the backfield, Coach Pete Cawthon will probably start the quartet that has brought him best results in this year's games with Arizona State of Flagstaff, University of Texas, and Montana U. Ed Smith or Curfman will draw the field marshal duties, while crashing Charlie Calhoun, sophomore standout, will get the fullback assignment. Passing "Bubbles" Barnett will hold down one halfback berth with Tarbox opposite him.

Writing football history by their mode of travel, the ramblin' Raiders will be out to gain further laurels Saturday by defeating the Titans, one of the toughest teams on Tech's high, wide and handsome "suicide schedule".

Spun
LUBBOCK, Tex., Oct.--. Just because a few have accused the Red Raiders of Texas Tech of being a little rough the College News Bureau feels justified in sending out two letters recently received by Coach Pete Cawthon following the freshman game at Greenville with the Wesley College team and the varsity game with the University of Texas.

The letter from Head Coach Dana X. Bible reads:

"I want to congratulate you on a splendid team. I have heard on all sides words of praise in regard to the way your boys performed. Your machinery is better oiled than ours. We have some rough spots but it is just hard in breaking in new machinery to get everything working smoothly at first."

The letter from President J. Garland Roach of Wesley College reads:

"We wish to congratulate you on the excellent deportment of your freshman squad. They were housed in the dormitory and the matron told me today she had never seen a quieter or more genteel group of boys. They did not disturb the other occupants of the dormitory.

"Without a doubt, your boys were the best disciplined group we have ever had any experience with. Their fine conduct is a credit to your institution and to their coaches, but on the football field they were just as rough, rugged, and tough as they were genteel on the campus.

"Again may we congratulate you on having the finest group of gentlemen that we have ever observed and the toughest and cleanest football team that we have met in several years."

##

Letter to Ford
LUBBOCK, Tex., Oct.--. Henry Ford was presented with suiting material of worsted "Techshire" by Texas Technological College coaches, who flew to his home city this weekend (Oct. 9) for the Detroit university Tech game.

Other notables who have received a suit or suiting from the textile looms at Tech are President Franklin D. Roosevelt, Vice-President John Nance Garner, Governor James V. Allred, and Edward Duke of Windsor.

Sudan News

LUBBOCK, Tex., Oct.--. With their "suicide schedule" percentage down to .250 after succumbing to Gus Dorais' Titan tide in Detroit last week, Texas Tech's flying Red Raiders have descended to earth and are preparing for their most difficult Border conference assignment -- the University of Arizona's Blue Brigade.

The gridders in blue, featuring their famous "Oliver Twist" formations, invade Matador land Saturday night for the tilt that may determine whether Coach Tex Oliver's crew is destined to repeat as conference champs. Successful against Tempe, Ariz., and the Oklahoma Aggies, the Arizona outfit bids fair to retain its crown unless the thus-far erratic Red Raiders can rout the battling Brigade.

The Texans learned about more than air travel on their jaunt to the Motor City. With their own passing attack entirely ineffectual against the Titans, the Mats were perforce content to watch the Dorais squad hurl its way to a 34-0 win. In Elmer Tarbox, however, the Red Raiders found a dependable ground-gaining back. So it is likely that power may supplant passes in the Tech offense against Arizona Saturday.

Charlie Calhoun, fullback, and Bob Holmes, halfback star of the Tech-University of Texas affray, are slated to assist Tarbox in setting off the running charge against Saturday's invaders. Ed Smith will manage the attack from his quarter slot, while Gene Barnett will be on hand with his heaving arm should the ground advance bog down.

The Matador line will line up as it has in previous engagements, though Williams may come in for more than his usual share of the pivot post duties after his brilliant defensive play against the Titans.

It was this substitute center who drew critics' praise for his gallant efforts to stem the Titan attack.

Surrounded by a team of veterans, Bronko Smilanich, All-American prospect, will lead the Arizona assault. Nielsen, all-conference full-back, and Tom Greenfield, center, look best to show their strength for the Brigade in Saturday's conference tilt.

Both squads will be fighting with power and razzle-dazzle to offset last fall's 7-7 tie. But they will be fighting for more than that, for in the balance may hang the Border conference crown.

LUBBOCK, Tex., Oct.,---. A Tech journalism student sleuthing on the Texas Tech campus for a feature discovered that Robert Taylor, Bob Burns, Gary Cooper, and Clark Gable have visited the college recently if signatures on the museum register mean anything. Noting the signature of S. H. Kress, 114 Fifth Ave., N. Y., on the register the inquisitive reporter inquired at the local Kress store only to find that the celebrity had not been here.

Further investigation of the register revealed the signature of George Washington, "Bull" Durham, bootlegger, and an unseasonal visit by Santa Claus. Addresses given included Spanky Flat, Africa, Mars, and others with Podunk given frequently.

LUBBOCK, Tex., Oct.,--Faced by the prospect of a soggy turf, the rambling Red Raiders of Texas Tech have revamped their attack and are set to turn on the power here Saturday night in an effort to repulse the incursion of their strongest Border conference foe, Arizona university's battling Blue Brigade. (Henry)

The Raiders, their passing game frustrated last week by Detroit's Titans, will shift the burden of ground-gaining activity to the shoulders of Charlie Calhoun, whose driving power presages trouble for Coach Tex Oliver's Arizona crew on a muddy field. Calhoun, running from the fullback slot, will be aided in the ground attack by Halfback Elmer Tarbox, most consistent ground gainer last week against the Titans.

Line Coach Dutchy Smith will start his strongest forward wall against the invading Brigade, for the battle promises to be a rencounter of lines. The Tech stalwarts will tip the beam 15 pounds per man more than the Blues, who weigh in at 185. Coach Pete Cawthon's backfield, however, is a good six pounds per back lighter than its opponent. The Mat secondary averages 162 pounds.

Leading the attack for the invaders who are out to recapture their conference crown, will be Bronko Smilanich, Arizona back touted for All-America fame this season. Keeping Bronko a close second will be Walt Nielsen, beefy Blue fullback, who may draw most of the mud-slushing duties. Standout in the Arizona line is Tom Greenfield, seasoned veteran center, whose job it will be to halt the Matador power thrusts.

Strictly speaking, Saturday night's skirmish will look largely to charging lines and powerful backs. But behind the running Smilanich and the line-bucks of Calhoun will lie dormant Tech's razzle-dazzle and Arizona's "Oliver Twist" attack. If power fails, anything can happen--mud or no mud.

74. Worth Star-Telegram
mohams news
LUBBOCK, Tex., Oct.--. A big percentage of the 3,155

students and 165 faculty members of Texas Technological College attended ground-breaking ceremonies this week of the new library building made possible by a \$275,000 grant by the last Texas legislature..

"We're beginning a great library," said President Bradford Knapp as he threw the first spadeful of dirt which ended the school's twelve-year campaign for the structure.. With seating room for less than 200 of the more than 3,000 students in the present space used for a library, the new building answers one of the college's pressing needs..

Construction is to be completed in 250 calendar days after Nov. 1, making it possible for the new building to be in use by the opening of the fall semester in 1938.. It will be in the Spanish renaissance style, three stories, of steel and reinforced concrete, brick walls, limestone trim, tile roof, terrazzo, tile, wood, and cement floors, ornamental iron railings, and cement foundation..

Nathan Wohlfeld of Dallas was awarded the general contract for construction of the building on a bid of \$219,496.. Other contracts went to Young and Pratt of Austin, heating and plumbing, \$39,477; and to Empire Electric company of Fort Worth, wiring, \$6,796.

##

LUBBOCK, Tex., Oct.--. Cutting classes, favorite pastime on college campuses, will make no difference in a newly organized speech class at Texas Technological College, for which students do not enroll and where attendance is voluntary..

This informal dramatic class will discuss principles of the stage, correction in diction, dialects of various sections, word meanings, pronunciation and enunciation.

LUBBOCK, Tex., Oct.--. First chapter of Phi Upsilon Omicron, national professional fraternity to be granted to a Texas school has been given Double Key, home economics honorary society at Texas Technological College, Margaret W. Weeks, dean of home economics, announces.

Double Key has been working to fulfill prerequisites for the national association since 1935, and after a personal inspection by Professor Mary C. Whitlock of the University of Illinois, final requirements were met last April. Date for installation has not been announced.

This association, founded in 1909 at the University of Minnesota, has 23 active chapters in the United States. Purposes are to promote home economics, to establish and strengthen bonds of friendship, and to promote the moral and intellectual development of its members. Eligibility for membership includes leadership and scholastic ability of the upper two-thirds of second semester sophomores, juniors, and seniors.

Dean Weeks, sponsor of Double Key, Miss Jonnie McCreery, head professor of foods and nutrition, Miss Mabel D. Erwin, head professor of clothing and textiles, and Miss Geraldine Clewell, instructor in home economics education, are faculty members who have been instrumental in getting the national chapter at Tech.

LUBBOCK, Tex., Oct.-- A Brownfield man saw a large goitre removed from his neck Monday night at Texas Technological College.

He looked as the incision was made, he watched the surgeon cut the abnormal growth from around his windpipe, and he felt no pain even though no anesthetic was administered. He did not flinch while the muscles and skin were sutured at the end of the operation.

The operation took place June 12 in a local sanitarium; but the patient saw the whole process four and one-half months later in a motion picture shown to 57 pre-med club members and visitors at the Men's dormitory by Dr. J. T. Krueger, operating surgeon.

LUBBOCK, Tex., Oct.--. School of instruction for directors of bands and orchestras in northern and western Texas will meet in Lubbock November 4-6, according to A. F. Schaeffer, Abilene, chairman of arrangements for the Texas School Band orchestra association.

D. O. Wiley, director of the Texas Technological College band, is general chairman of the program; H. A. Anderson, band director in public schools, is chairman of local arrangements, and Miss Beulah Dunn, orchestra director in public schools, is chairman of women's activities.

Dr. Bradford Knapp, president of Texas Tech, and W. B. Irvin superintendent of Lubbock public schools, will welcome visitors. The state department of education is sponsoring the school here and a similar one at the University of Texas, Nov. 1-3.

##

LUBBOCK, Tex., Oct.--. Twelve to sixteen tiny tots will enroll at Texas Technological College next semester -- but in a day nursery school to be erected soon for use as a child development laboratory.

Contract for the one-story frame nursery school building has been let this week. The building will contain an office, kitchen, dining room, play room, and small cloak room.

The nursery school project aims to give home economics students a practical background in child development, and to train and develop children between the ages of 2 and 4.

"Cooperation of parents in this project is absolutely necessary to its success," says Miss Sannie Callan, head professor of child development and family relations, "and will be a determining factor in selection of the children."

Assisting Miss Callan in directing the nursery school, Flora Lena Lovelace of Arlington, graduate, and Gladys Pierce of San Saba, home economics senior, have both had experience in pre-school work.

Students in foods and nutrition will plan the noon meal and direct the feeding of nursery children.

##

LUBBOCK, Tex., Oct.--. Prosperity is a reality, Dean A. H. Leidigh of the Texas Tech agriculture division believes, when the college farm has to advertise for cottonpickers. Only students are employed.

"It used to be a different story," Dean Leidigh says. "Students were looking for work."

LUBBOCK, Tex., Oct.--. All-round, all-Southwestern Jerry Mann will speak at a chuck wagon dinner November 11, high spot in the annual Homecoming celebration sponsored by the Texas Tech Alumni and Ex-Students association. Mann, now a Dallas attorney, has served as secretary of state and as a member of the state planning board.

Other features of the Homecoming program are an alumni dance Wednesday evening, Nov. 10; a breakfast Thursday morning for home economics graduates, breakfasts, dances, luncheon, teas, and smokers on Thursday by various campus organizations, and the Duquesne-Red Raider football game Saturday afternoon.

About 2,000 letters will be mailed this week-end to members of the Alumni and Ex-Students association by Calvin Hazlewood, administrative secretary, and Mrs. Mamie W. Jackson, executive secretary. Members of the executive committee of the alumni association are Jason Gordon, president, Fred Fairly, vice-president, Ellis Foreman, W. E. Street, all of Lubbock; Holmes Webb of Abilene; L. C. Riethmayer of Lamesa.

##

LUBBOCK, Tex., Oct.--. E. N. Comfort, dean of religion at the University of Oklahoma, was brought to the Texas Technological College campus Thursday and Friday by the Tech Y organization to conduct a series of lectures and conferences on practical campus religious problems.

Comfort is the first of five major off-the-campus speakers who will be brought to Tech by the Y this year.

Dr. A. J. Bahm, assistant professor of philosophy and sociology, is sponsor of the Tech organization.

LUBBOCK, Tex., Nov.---, President Bradford Knapp of Texas Technological College is leaving for Washington Nov. 9 to make an earnest plea for action on a Works Progress administration loan and grant for \$700,000 for two much needed student dormitories at the college. It is hoped that approval may be secured so that work can start on the two new buildings soon after the first of the year, making it possible for them to be ready for use by the opening of the fall semester in 1938.

On Nov. 17 President Knapp will attend dedication ceremonies of the Knapp Memorial arch, named in honor of his father, the late Dr. Seaman A. Knapp, founder of extension work in the United States. The arch is one of two arches to the new U. S. department of agriculture building.

Miss Virginia Knapp, daughter of Tech's president, now a junior student in Texas Tech, has been invited to unveil a bronze tablet in the arch named in honor of her grandfather. Mrs. Knapp will also make the trip to Washington.

While in Washington Doctor Knapp will confer with war department officials in an effort to secure a full artillery unit of the Reserve Officers Training corps at Tech. He will make an address at an observance of the 75th anniversary of the founding of the U. S. department of agriculture and land grant colleges. He will also attend a meeting of Land Grant Colleges and Universities in Washington Nov. 15-16.

Cecil Horne
LUBBOCK, Tex., Nov.--. Revival of the bonfire tradition at Texas Technological College adds both warmth and color to Homecoming plans for November 10-11.

Once the high spot in campus activity on Armistice eve, this homecoming pep rally classic was discontinued in 1933 when over-enthusiastic freshmen surreptitiously collected signs, telephone poles, fences, outhouses, and even a front porch, adding them to this annual offering made to the victory gods.irate Lubbock citizens were only partially placated by college payment of \$110.70 reparations.

Administrative council of the college last week approved this year's pre-game bonfire as a result of a three-year drive by student council members to legalize the event.

Continuation of the custom, officials say, is dependent on successful staging of Wednesday night's celebration.

For Anglin
LUBBOCK, Tex., Nov.--. One hundred twenty-four grade Rambouillet feeder lambs, received last week at Texas Technological College, are being placed on experimental feeding, W. L. Stangel, head professor of animal husbandry, announces. The lambs came from the W. G. Murray ranch near Abernathy, and will be fed under the direction of Merrill Poulson, graduate assistant.

##

LUBBOCK, Tex., Nov.--. Back home after a road trip that carried them into two states and broke their two-year old "road jinx", Texas Tech's roaming Red Raiders have begun mending their battered bulwarks in preparation for the Armistice Day invasion of Duquesne university's mighty Dukes. The Pennsylvanian gridgers meet the Mats on Tech field Thursday afternoon in the Maroon Maruaders' Homecoming classic for 1937.

After downing Oklahoma's Aggies, 14-6, two weeks ago, the Raiders came back to Lubbock, grabbed a bite to eat, and dashed off again -- this time to New Orleans where they tangled Loyola of the South's Wolfpack Friday night. The Crimson Clads, after a slow start, warmed up in conference play and emerged Border conference champs for '37. They maintained their stride against Oklahoma to take their first road trip battle since 1935.

But even if they can hold their pace, the Mats are in for rough sailing when they meet the Dukes on Thursday. Rated by some as the nation's number 2 grid aggregation, Duquesne will bring to Texas one of the strongest teams ever to grace the Matador gridiron. However, the Raiders, playing before alumni and seeking to keep their season record as clean as possible, are primed to loose every barrage in the arsenal to take the lads from the Quaker state.

Most of the Tech offense will depend on the Cawthon Men's new found running attack. This offshoot of the old "army game", run from the Notre Dame formation, will supplement the Raiders' vaunted razzle-dazzle. Holmes, Tarbox, and Calhoun will lead the running attack. But in the background will still be Barnett and his famous aerals, ready to

pull the Mats through if their ground push bogs down.

A sell-out crowd of 15,000 fans is expected for the homecoming tilt, according to Tech athletic officials. Tickets were placed on sale November 1, and reports state that most center section seats have already been sold.

##

Sweetwater Reporter
LUBBOCK, Tex., Nov.--. Tickets for the Texas Tech - Duquesne Armistice Day homecoming game are selling rapidly, according to Hugh Williams, Tech athletic business manager. Ducats were placed on sale November 1. Williams states a majority of center section seats have already been sold, and indications are that a sell-out crowd of 15,000 will be on hand when the Raiders meet the Dukes, Thursday.

Reserved seat tickets sell for \$2.20, while hundreds of stadium seats will be placed on sale at lower general admission prices.

LUBBOCK, Tex., Nov.-- Globetrotting Dr. Ogden King, freshman enrollee at Texas Technological College on its opening day October 1, 1925, and a member of the first four-year graduating class in 1928, paused at the college this week to visit with his 59-year-old father, now a business administration student at the college. He and his wife were en route to California, completing a three-and-a-half year trip around the world.

Dr. King has been student, teacher, amateur photographer, and traveler since his graduation from Tech. He completed work for the doctor's degree at Cornell university last year, after teaching in Connecticut State college, Washington State college, and at the University of Nanking in China. Kodak pictures made in China he has sold to commercial agencies.

King and his wife have also spent three years visiting in ten different European countries.

LUBBOCK, Tex., Nov.-- Winter sports camp for women students will be sponsored by the Texas Technological College department of physical education during the Christmas holidays at Santa Fe, N. M. Lessons in skiing, tobogganing, and ice-skating will be given.

Only twenty students may participate in the one-week camp, directed by Miss Zella E. Riegel, assistant professor of physical education for women.

LUBBOCK, Tex., Nov.--. Threaded with a partly-woven navajo rug, a real Indian loom belonging to Dr. and Mrs. Charles J. Wagner of Lubbock has been lent to the Texas Technological College department of clothing and textiles. The loom was formerly in the Museum of Natural History, New York city.

Warp of the navajo is wool, the yarn homespun, and the weaving hand done, says Miss Mabel D. Erwin, department head.

Other items in the Wagner collection, lent to the college, are a hand-blocked Persian print wall hanging, a Parisian silk shawl, a Cashmere scarf, and a Paisley shawl. The latter, made in Paisley, Scotland, between 1820 and 1870, was woven on hand looms requiring at least two weavers, and is an imitation of real cashmere shawls.

##

LUBBOCK, Tex., Nov.--. Oil and water may not mix, but geology and languages blend well, according to Dr. Leroy T. Patton, head professor of geology at Texas Technological College, who is conducting a geology seminar, centered around studies of continental drifts.

William F. Tanner of Brownsville, graduate student, last week reported on "Die Klimate der Geologischen Vorzeit", published in Germany. Raymond Libby, senior student reared in Puerto Rico, reported the same day on a Spanish book describing certain geologic aspects of Cuba.

##

LUBBOCK, Tex., Nov.---Use of this fiber in manufacture of high grade paper may result from tumbleweeds blowing across Texas Tech campus, under observation of a speculative college president and an experimental chemistry professor.

Noticing this natural phenomenon one day this fall, President Bradford Knapp called Dr. W. M. Craig of the chemistry department, and together they theorized on commercial possibilities of the weed.

Crushing a bowlful of Russian thistle twigs, Dr. Craig boiled them for several hours, then treated the mass with sodium sulfide and sodium hydroxide, and washed it, obtaining a straw-colored fiber of unusual strength.

"I make no predictions about this experiment," Dr. Craig says. "My methods were too crude; but I see no reason why high-grade paper cannot be manufactured from tumbleweed fibers."

The weeds are composed of lignin, cellulose, and other woody materials, Dr. Craig says, with possible by-products of resin, fats, and carbohydrates.

Dr. R. C. Goodwin, head professor of chemistry, may continue experimentation with the tumbleweed in a general study of native fibrous materials, such as cotton burrs and hulls, for commercial utilization.

LUBBOCK, Tex., Nov.---Dug from a cliff near Calgary, pelvic girdle of a dinosaur of the upper Triassic age has just been placed on exhibit in West Texas museum, on Texas Technological College campus.

Dr. John Clark, former curator of vertebrate fossils at the museum, and W. C. Watt, chemistry instructor at Lubbock high school, found the specimen.

Age of the fossil is definitely established as Triassic by its peculiar, rusty bronze color.

LUBBOCK, Tex., Nov.--Miss Elizabeth Howard West, librarian at Texas Technological College and one of the founders of the library section of the Texas State Teachers' Association, will not attend the state meet in Houston Nov. 25, but says "the organization is such a great one, it no longer needs my services."

Begun in 1915, the library section gained momentum slowly at first, Miss West states, but has now become an important part of the state association.

"The library section in its early years," Miss West says, "seemed as futile as the English Parliament under the Tudors. At least twice the chairman did not take her duties seriously enough to write the secretary she would not be present. At one meeting, the two present organized for the next year by electing each other respectively chairman and secretary."

##

LUBBOCK, Tex., Nov.--Five states and 68 towns have at least one representative in the 135-piece Matador band of Texas Technological College. Lubbock leads with 22, Amarillo is second with 10, and Slaton third, with 6. Pampa and Wink have 5 students each, and Borger, Fort Stockton, and Midland, 4 each. From one to three students come from the 60 remaining towns.

LUBBOCK, Tex., Nov.---.Color blindness among women is very rare, but a young woman who is color blind has been found at Texas Technological College. She is Miss Mary White, freshman journalism student from Tahoka.

Biologists say that color blindness is determined by genes, and they are the inheritance carriers in the human body. All possibilities of inheritable traits are dependent upon genes. There are dominant genes and recessive genes. A dominant gene shows up by itself, but a recessive gene cannot of itself transmit a trait, but requires the cooperation of a dominant gene.

Color blindness is dominant in men and recessive in women. A man can transmit color blindness to his son but in order for his daughter to be color blind her grandfather on her mother's side must also have been color blind. This is a very rare combination, but that is exactly what happened in Miss White's case. Her father is color blind and her mother's father was color blind. However, all such cases do not result in color blindness.

Thus nature favors women who delight in colors by ordaining that few be color blind. And for the same reason very few women are bald. Baldness, according to biologists, is regulated by genes just as is color blindness, and so baldness among women is just as rare as color blindness.

LUBBOCK, Tex., Nov.--. Five suitable plots of soil for testing winter barley varieties have been selected within a 50-mile radius of Lubbock by Dr. Arthur W. Young, head professor of plant industry at Texas Technological College. Three bushels of four barley species will be planted on each of these plots, and malting tests will be made on a portion of the yield.

Clay and sandy loams were selected, in order to perform the most comprehensive tests possible with regard to cold resistance and brewing qualities, Young says. Seeds were treated with ceresan, a product developed for control of covered smut, before planting.

As a part of the same project, 50 winter barley varieties from 12 states have been planted on the college farm. Various species of wheat, rye, and oats will be used as control crops, to compare hardihood with that of the barley.

Big Spots
LUBBOCK, Tex., Nov.--Texas Tech's roving Red Raiders don their traveling togs for the last time this season when they journey to Shreveport, La., Saturday to give battle to those gridgers whose name belies their actions, the Centenary Gentlemen.

Always a formidable foe of Southwestern grid squads, the Gent have proved themselves tougher than ever this fall by dropping such touted aggregations as the Horned Frogs of Texas Christian university. Add to this the fact that the Scarlet Scrappers from the plains district have taken only two games out of their own backyard in the last two years, and Mat fans have a pretty gloomy picture of what will happen Saturday. However, their 25-6 victory over Loyola of the South in New Orleans a few weeks past proves the Cawthon Charges capable of meeting a given situation -- whether it be on home sod or no.

The Matador crew that invades Shreveport is far from the same group of rowdy Raiders that defeated the Gents 12-6 last fall. Big Jim Neill and rangy J. W. West are gone. And it was these two who passed the way to a Tech win in '36. But instead of Jim Neill, the Mats now have "Bubbles" Barnett, another hoghide-heaving halfback whom sports scribes term another Sam Baugh; and to shag these heaves they have Captain "Red" Ramsey, holding down the wrong side picket post. On the passing count, the Gents may find themselves beset with more trouble than they met here last autumn.

Only in a pinch, however, will the razzle-dazzle Raiders shoot their aerial works. Most of the punch will come from "Calamity Cal" Calhoun, known as Charles until he scored two touchdowns against Oklahoma's Aggies and Loyola's Wolfpack. The plunging fullback coasted along through half the season then suddenly grew discontent with picking up spare yards and pushed over six tallies in order. Aiding the leather lugging fullback will be Holmes and Tarbox, shifty wingbacks who come in for most of the quick thrusts. Either Smith or Curfman will guess the game from the quarter slot.

Unscathed, and rarely unmoved, by nine seasonal encounters, the Mat forward wall will line up the same as it did in the '37 opener. Ramsey and Bostick fill the terminal thrones. Sophomore Bill Davis, 225-pounder from Grapevine, draws the left key position with veteran Abe Murphy serving as running mate. Pete Owens and Co-captain Lou Jones, both seasoned by years of varsity play, flank Frank Guzik, Yiddish center.

LUBBOCK, Tex., Nov.---History of the film industry in America told by means of motion pictures produced since 1895, constitutes the main feature of Texas Technological College Art Institute's program this fall.

Other plans for the year include lectures on music and art appreciation, exhibits of prints, water colors and paintings by American artists. Dr. Loto M. Spell, member of University of Texas music department, initiates the year's program with a lecture Nov. 21 on "Tyranny of Terms in Appreciation."

First of the motion picture showings, dealing with the development of the narrative, is set for Nov. 24, with films dated from 1895 to 1911. "The Execution of Mary Queen of Scots", produced in 1895, "The Great Train Robbery", 1903, and "Faust," 1911, are included in this group.

Other dates and phases of the industry are "The Rise of the American Film", December 1; "D. W. Griffith", December 8; "The German Influence", December 15; "The Talkies", January 5; "The End of the Silent Era", January 12.

Membership in the institute, open to all residents of the plains area, is \$2.50. Prof. F. A. Kleinschmidt, head professor of architecture and allied arts at Tech, is director and Miss Martye Poindexter, head professor of applied arts, is secretary.

Dallas
Lubbock, Tex., Nov.--- Coed preference in room furnishings is changing, an applied arts project at Texas Technological College reveals. Pastelles, satins, and ruffles have been superseded by gay colors, sturdy materials, and simple furnishings. Bedroom accessories now include plain table lamps and waste baskets, simple vases, wooden fruit bowls, and desk blotters instead of the once popular Dresden figurines, pintrays, lacy pillows, and satin-frocked dolls.

The survey, conducted under direction of Miss Martye Poin-dexter, head professor of applied arts, shows that two girls can decorate a dormitory room attractively for less than \$5 each.

By Bill Wood

LUBBOCK, Tex., Nov. 18.--Texas Tech's rugged Red Raiders arrive in Shreveport, La. Friday afternoon for their crucial clash with the highly-touted Centenary Gentlemen.

Their squad, riddled with injuries sustained at the muzzles of Duquesne's big guns, the Scarlet Scrappers, take the field Saturday decided underdogs at the hands of the Gents, who dropped a hard played 14-7 tilt to Loyola of the West in Los Angeles Armistice Day.

Physicians believe the ankle injury of Calamity Calhoun, stellar line-bending fullback with the Crimson Clads, will be sufficiently healed for the 185-pounder to don his moleskins Saturday. If Calhoun takes the field against Centenary, he will undoubtedly be the spear-head of Pete Cawthon's running attack.

Blasting Bobby Holmes, 150-pound Indian from Riverside, Calif. is on tap for the majority of the Red Raiders' off tackle slashes and wide end runs. The slippery-hipped bullet razzle-dazzled Duquesne's Night Raiders for three quarters in Tech's 13-0 upset of the Eastern grid power.

If their running attack is blocked by Centenary's "outlaws in full dress attire", the Matadors will raise their sights and take to the air. Bubbles Barnett is the man at the trigger for Tech's aerial bombardment, with Captain Red Ramsey, Thurman Bostick, and fleet-footed Elmer Tarbox the targets.

"Centenary will be the toughest game on our schedule," stated the Matador mentor last night. "They've licked TCU, SMU, and tied Mississippi State."

M O R E

From Texas Technological College Free News Service - Cecil Horne

Cawthon plans to start Red Ramsey, Texas Tech's bid for All-American honors, at left end, with Thurman Bostick, husky terminal from Dallas, at the other picket post. Crimson-thatched Abe Murphy, 210-pound giant from Beaumont, will mount one tackle, and Bill Davis, massive sophomore from Grapevine, is down for the other. Guards for the Tech outfit will be Line Captain Lou Jones, and veteran Pete Owens. Frank Guzick, defensive standout in the Duquesne fray, is down for the center slot.

Charley Calhoun will line up at fullback; Bobby Holmes at right half, and Elmer Tarbox, Higgins, back, will canter from the left half. Ed Smith, Del Rio standout, will occupy the signal chanting role from quarterback.

##

LUBBOCK, Tex., Nov.-- Pinch-hitting for the Matador band at the Centenary-Tech tilt Saturday, Alfred Riley's 70-piece Gaston school unit will travel by bus from Joinerville, Tex., to Shreveport, La. Riley, first band major to graduate from Tech, was president of the Matador band in 1936 and took his degree last June. He is now director of the Gaston school band.

Director D. O. Wiley has mailed scores of the Matador song and copies of Tech yells to Riley, whose band will do double duty as musicians and cheering unit.

##

LUBBOCK, Tex., Nov.---. Alumni and ex-students of Texas Technological College will meet in Houston Friday evening, November 26, at a Tech dinner held annually in connection with the State Teachers Association meeting. Hon. William M. McCraw, attorney general, is speaker.

Officers of the Houston branch of the alumni and ex-students association are in charge of local arrangements for the dinner, in the Bridge lounge of the Lamar Hotel at 6:00 o'clock. B. C. Shulkey, assistant superintendent of Fort Worth city schools, will act as toastmaster, and President Bradford Knapp will report on college activities.

Alumni in charge of reservations in their vicinities are:

Abilene, Holmes Webb; Amarillo, Supt. C. M. Rogers; Austin, L. C. Riethmeyer; Big Spring, Miss Freddis Adkins; Brownfield, Supt. M. L. H. Baze; Corpus Christi, Miss Mary Scott; Dallas, Miss Mildred Chappell; El Paso, Riley Alexander, Fort Worth, Mrs. H. B. Boyle; Galveston, R. C. LUBBOCK, Tex., Nov.--. Anticipating lean years for live-stock, Texas Technological College division of agriculture is constructing an oval feed barn, in which roughage and heads may be stored and preserved indefinitely. The barn will also be used for storing implements.

"I never expect to live through another 1934," W. L. Stangel, animal husbandry department head, said, "when there were live-stock to be fed, but no feed."

Five storage bins, each containing from 500 to 1000 bushels of grain, are already in use.

The \$1750 building, 40 by 100 feet, is of superior construction, having a heavy ridgepole through the center of the sloped roof, instead of being of the usual two-semicircular type. It is constructed of hoop rafters with sheet iron covering.

LUBBOCK, Tex., Nov.--. Three draft mares, two perfectly matched Belgian grays and a gray Percheron, have just been purchased by the animal husbandry department at Texas Technological College. They will be used in class instruction and for general farm work, according to W. L. Stangel, head professor.

##

LUBBOCK, Tex., Nov.--. Ninety prints of works by American artists are on display in the home economics building until Dec. 4.

Included in the collection, owned by the American Artists Group, a New York firm, are colored stencils, lithographs, woodcuts, and etchings, representing the work of George Biddle, Rockwell Kent, Jean Charlot, Frank Mechau, Kenneth Hayes Miller, Paul Landacre, Arnold Ronnebeck, and about 30 other well-known American men and women.

The exhibition includes examples of conservative and modern art, both realistic and surrealistic. Landscapes, humorous and genre pictures, animals, nudes, industrial scenes, and still-life represent the subject matter.

San Angelo Times (rewritten Ashburn lead)
LUBBOCK, Tex., Nov.--. Three members of the economics and business administration department at Texas Technological College are on the program of the fourth annual conference on business and government in New Mexico which meets at the University of New Mexico, Albuquerque, Dec. 3 and 4.

Dr. Karl E. Ashburn will read a paper on "Fair Trade Practices," Prof. T. C. Root will discuss "Regulation of Transportation" and Dr. E. H. Plank will discuss "Taxation of Business."

##

LUBBOCK, Tex., Nov.--. Three-day installation of Omega chapter of Phi Upsilon Omicron, honorary home economics society, at Texas Technological College begins Friday, Nov. 26. Twenty-one members will be initiated into the new chapter, the first granted in a Texas college.

The fraternity was founded in 1909 at the University of Minnesota and now includes 23 active chapters throughout the United States.

Visiting officials include Miss Mable V. Campbell, dean of home economics at the University of Missouri and councillor for the district which includes Tech; Miss Lois Keller, Ohio State College, Columbus; and two active members each from Eta chapter, Kansas State College, Pittsburg; and Rho chapter, University of Missouri, Columbia.

Petitioning organization was Double Key, local honorary home economics society. Mary Thomas, senior student of Lubbock, is president.

##

LUBBOCK, Tex., Nov.--. Dame fashion decrees corduroys and prints for Texas Technological College students attending the Hodge Podge, annual sophomore ball, Dec. 4. Freshmen are to be honorary guests.

Class officers are Harold Gierhart, Shamrock, president; Tom B. Coker, Jr., Fort Worth, vice-president; Priscilla Davis, Fort Worth, secretary-treasurer.

##

LUBBOCK, Tex., Nov.--. Twenty-six civil engineering and R. O. T. C. students at Texas Technological College made an inspection trip to the \$14,000,000 Conchas dam and reservoir project last week.

Situated a quarter of a mile below the confluence of the Conchas and Canadian rivers, between Tucumcari and Las Vegas, N. M., the concrete gravity dam, a WPA project, is being constructed for flood control, irrigation, and municipal water supply benefits. Work, which is being done by U. S. army engineers, is under the direction of Capt. Hans Kramer, district engineer.

Accompanying the Tech group to Conchas were J. H. Murdough, head professor of civil engineering at the college; Capt. Frank A. Pettit, head of military science; and E. V. Middleton, civil engineering instructor.

Purpose of the trip was to familiarize civil engineering and ROTC students with the organization of a stupendous engineering project; with modern equipment used; and with the direction and care of a large corps of workers.

##

LUBBOCK, Tex., Nov.--. Three hundred fifty male students will make up a fashion jury next week at Texas Technological College, when questionnaires are sent out by costume design classes under direction of Miss Helen Troy Allen, instructor in applied arts.

Do you like red fingernail polish? Slinky or frilled evening dresses? Tweeds and oxfords, or fur-trimmed suits and high-heeled slippers for school wear? These and other questions on women's wear will be posited in an effort to get a cross section of masculine opinion.

From Texas Technological College Free News Service - Cecil Horne

LUBBOCK, Tex., Nov.---. A battered old bugle, found recently under the floor of a Fort Stockton house which was being renovated by Judge W. C. Jackson, has been loaned to the West Texas museum, situated on Texas Technological College campus.

Lost about 70 years ago when Fort Stockton was a refuge for settling whites against marauding Yaqui and Apache Indians, the bugle is of regulation army size and shape. Bent and corroded, it has lost about half its original weight.

##

LUBBOCK, Tex., Nov.---. Gay peasant scarfs, now worn by most Texas Technological College coeds, not only give a note of color to the winter campus scene, but protect dainty ears from the chill north winds of the West Texas steppes.

Whether this style is copied from rebozos of Mexican Indians in a neighboring state or from the Lithuanian "namitka" is not known, but the reds, bright greens, yellows, blues, and violets, favorite colors of both "namitkas" and robozos, are also favored by Tech coeds.

LUBBOCK, T. X., Dec. ---. Relics from the early days of Spur Ranch, a photograph of the first director's meeting at Texas Technological College, and an original time table of the first regular train into Lubbock were added last week to exhibits at West Texas museum on Tech campus.

Included in the ranch exhibit, presented by Clifford B. Jones, ranch manager and president of the Tech board of directors, are an English style saddle, a stamp for wax seals bearing imprint of a spur, a powder pouch for muzzle loading guns, and a pair of rusty handcuffs.

Ex-governors Pat M. Neff and W. P. Hobby, Amon G. Carter, and Jones were photographed among first board members at Texas Technological College.

First train trip to Lubbock was made October 25, 1909, according to information sent by John A. Fox of Fort Worth with the original time table, the train averaging 13.4 miles an hour from Plainview to Lubbock, making the 52-mile trip in three and one-half hours.

FROM TEXAS TECHNOLOGICAL DEPARTMENT FOR THE

Custom Dispatch

LUBBOCK, Tex., Nov.--. President Bradford Knapp of Texas Technological College has just returned from Washington where he made an exhaustive inquiry into the status of the application made by Texas Technological College to P. W. A. for two dormitories. With the aid of Representative Mahon, Senator Connally, Senator Sheppard, and other members of the Texas Delegation, he found that the commitments on P. W. A. had been absolutely closed by the President, and that no amount of influence or effort could possibly re-open any application on P. W. A. There were hundreds of P. W. A. applications with just as much political backing and just as meritorious need on the part of the applicants as the application of Texas Technological College. It was apparent that the President felt that he could not open one such case without giving equal consideration to others. This the Administration was unwilling to do. President Knapp was prompt to say that he felt that the Administration was in the right and that it was impossible for them to open consideration of P. W. A. projects any further.

President Knapp with the help of Representative Mahon spent considerable time in investigating methods of application and possibility of securing a loan through the Reconstruction Finance Corporation. R. F. C. loans do not carry grants. Repayments have to be one hundred per cent of the amount borrowed. The application must carry a regular legal offer to issue bonds payable from the revenue of the institution, backed by legislative authority, with security of such character as will be approved by the Loan Committee, under conditions similar to the regular bank loans. President Knapp found that in other cases where similar loans had been made from R. F. C. the institution has been able to pledge, not only the revenue from the dormitories to be constructed

M O R E

from the money borrowed from R. F. C., but also additional revenue from producing property belonging to the institution.

Texas Technological College has been forced to use its income producing property for the support of the institution itself in its regular running expenses, and for the purchase of such equipment and materials as have been necessary to supply its various departments. The income of the present dormitories is pledged, of course, to the payment of the principal and interest on the bonds issued to repay the loan to P. W. A. for these dormitories, and, therefore, probably would not be accepted by R. F. C. as any part of the security for any new loan.

President Knapp thought it would be necessary to analyze rather carefully the financial resources of Texas Tech, to secure the approval of the Board of Directors of an application based upon a new and somewhat difficult set-up and make a full showing to R. F. C. Whether Texas Tech can make a showing sufficient to get this loan is a matter of some doubt in the opinion of President Knapp, for the reason that the College is growing so rapidly as to exhaust its financial abilities.

Other colleges which have made applications to R. F. C. are much older than Texas Tech. Through the years the state has given these colleges money for the erection of dormitory buildings. Some of them, also, own residences erected on the campus which they rent to members of the faculty and staff. Both these gift dormitories and residence property are income bearing property readily accepted by R. F. C. for loans. Unfortunately Texas Tech has no gift dormitories and no other rent bearing property, save and except the possibility of the new Cooperative house which will be a very small matter indeed compared with the need for the present loan.

M O R E

- 3 -

In this connection President Knapp pointed out that Texas Technological College is today at the 'forks of the road'. He says, "It will be impossible to increase materially the attendance at the College without additional dormitories, and particularly and emphatically, without the erection of an Agricultural building, and without the addition of space for Home Economics work twice as great as the present space, and likewise, without an adequate gymnasium-auditorium building. The College has a crying need greater than any other college in Texas for an appropriation of approximately \$800,000.00, in addition to any amount which might be spent for dormitories."

"Propaganda has gone out over Texas that the College had magnificent buildings and a large number of them. The permanent buildings on the campus are excellent buildings. But on the basis of student needs and student attendance, Texas Technological College is the most under-built institution supported by the State of Texas, considering the breadth and scope of its work, and the fast growing demand of the young people of the State of Texas for the type and character of work at Texas Technological College."

Sweetwater Reporter

LUBBOCK, Tex., Dec.--. A 19-game schedule is in order for Texas Tech's red clad cagers who began official 1937-38 workouts Monday afternoon in the Double T gym. Basketball Coach Berl Huffman, in releasing the schedule, stated the opening games slated for the local hardwood December 10-11 against T. C. U. were only tentative, but other games listed had been definitely carded.

Only one man, Paul Morris, 2-letter guard from Athens who captain the current Raider quintet, is available from last year's five. All others were lost by graduation. Elmer Tarbox, one of the varsity football mainstays the past season, lettered in basketball last year; Tarbox and John Henderson, Linden, who lettered in 1935 will bolster the new club's potential strength greatly.

Ten games are carded for the home court, including three Border conference affairs. The annual road trip will take the Techsters into El Paso, Tucson and Flagstaff, Arizona; Socorro and Albuquerque, N. M. for about ten days beginning January 31. Should something happen making it impossible for T. C. U. to open the Tech season here December 1 the Raiders will open against some other top notch squad on or about same date, Huffman announced. Following the opening games here the Raiders five will rest until December 27-30 when they will enter the All-College tournament at Oklahoma City.

The schedule follows:

Dec. 10-11 - Texas Christian university here (tentative).
Dec. 27-30 - All-College tournament at Oklahoma City.
Jan. 8-9 - Abilene Christian college here.
Jan. 14-15 - University of New Mexico here.
Jan. 31-Feb. 1 - Texas School of Mines at El Paso.
Feb. 2-3 - University of Arizona at Tucson.
Feb. 5-7 - Arizona State at Flagstaff.
Feb. 8 - New Mexico School of Mines at Socorro.
Feb. 8-10 - University of New Mexico at Albuquerque.
Feb. 17-18 - New Mexico Aggies here.
Feb. 21-22 - Arizona State of Flagstaff here.

12/1/37
LUBBOCK, Tex., Dec.--. Red Raider princess at the El Paso Sun Carnival New Year's Day will be Maxine Fry, senior journalism student and first woman president of Tech's student association.

Presented with princesses from other colleges at the coronation the night of December 30, she will ride on the queen's float in the Sun Carnival parade, be a guest at the queen's breakfast, stand in the receiving line at the coronation ball, and sit in the queen's court box at the Sun Bowl game.

Seventy-five Matador bandmen and several hundred Raider fans will probably go by special train from Lubbock to El Paso to witness the Tech-West Virginia classic. President and Mrs. Bradford Knapp expect to attend.

Tech alumni in El Paso, headed by Carl Smith, have invited ex-students from all parts of the state to participate in alumni and Sun Carnival activities.

##

LUBBOCK, Tex., Dec.--. Report on educational progress within the state by Dr. A. W. Evans, head professor of education at Texas Technological College, will be off the press in bulletin form next week. Evans, chairman of the committee, made the report at a Houston meeting of Texas State Teachers association in November.

Progress within the state is attributed to curriculum revision, teachers' retirement system, uniform salary schedule, special forms of education including music and radio, growth of TSTA in regional auxiliaries, and generally better financial conditions.

##

LUBBOCK, Tex., Dec.--. Recommendation for filling the office of dean of the graduate division and head of the government department, will be made by President Bradford Knapp at a meeting of the Texas Technological College board of directors here Dec. 15.

Application to the RFC for a dormitory loan will be considered, and a gift from the La Verne Noyes Foundation to the college will be accepted.

##

LUBBOCK, Tex., Dec.--. Request for literature about Texas Technological College came from five states and the Phillipine Islands, in a single mail last week, to W. P. Clement, registrar. Included in this number were letters and postcards from Atlanta, ^{Ga.} Bristol, Colo., Buffalo, N. Y., Walnut Hill, Fla., Mendota, Calif., and Manila, P. I.

Same three-day period brought inquiries from Alton, Ill., Marshfield, Mo., Clarington, O., and Clovis, N. M.

##

LUBBOCK, Tex., Dec.--. Letters for 26 varsity gridlers and 25 freshman squadmen were approved this week at a meeting of Texas Technological College's Athletic council, according to announcement by W. L. Stangel, chairman of the council. Awards will be subject to the fulfillment of scholastic requirements for the current semester, Stangel said.

Varsity awards were approved for: Elmer Tarbox, Higgins; A. B. Murphy, Caro; Herschel Ramsey, Chillicothe; Floyd "Pete" Owens, Littlefield; Charles Calhoun, Lubbock; Thurman Bostick, Millersview; Frank Guzick, Sherman; Lewis Jones, Cleburne; Raymond Curfman, Electra; William Davis, Grapevine; Dixie White, Lubbock; Edwin Smith, Del Rio; Gene Barnett, Melvin; Leonard Latch, Cisco; G. L. Webb, Jr., Hillsboro; Rex Williams, Sherman; Lloyd Taliaferro, Abernathy; Bobby Holmes, Miami, Okla.; Ralph Balfanz, Abilene; Miles Chapman, Dallas; Holt Waldrep, Slaton; George Philbrick, Dallas; Wilmer Green, Gainesville; G. B. Wimberley, Lubbock; Henry Moseley, Slaton; and Charles Barnard, Tulsa, Okla.

The council also approved letters for Harris Cheek, varsity manager of Hobbs, N. M., and James Forbis, Whitesboro, head yell leader.

Freshmen football players selected by the council to receive awards are: Rafe Nabors, Lubbock; Wayne Hildreth, Fairview, Okla., Tom McQuillan, San Antonio; Lonnie McCurry, Lubbock; Charles Mathis, Lefors; Jack Shanks, Monahans; Durward Herring, Mineral Wells; Robert Bryant, Olton; Gordon Miller, McAdoo; Hall Rowe, Littlefield; E. J. McKnight, Mexia; Prince Scott, Grapevine; Raymond Griffin, Sylvester;

LUBBOCK, Tex., Dec.--. Bent on whipping themselves into shape after a ten-day layoff, Pete Cawthon's rambling Red Raiders donned their moleskins again this week in preparation for their Sun Bowl battle at El Paso on New Year's day against the University of West Virginia's Mountaineers.

The seven Matador blocks of granite that compose Dutchy Smith's forward wall are directing their efforts toward a defense system that will stop the slashing off-tackle thrusts of Kelly Moan, the Mountaineers' Merchant of Menace.

Four Raider veterans of the '37 season failed to answer the Sun Bowl call. Tarbox, Williams, and Webb have exchanged their blocking pads for rubber-soled shoes and knee pads and are prepping for the imminent cage wars. Chernosky, Matador halfback, sustained a broken collar bone in the Turkey day fracas against Creighton university and is temporarily unsuited for action.

With the remainder of the squad intact, Matador coaches are set to put a team on the field at El Paso that matches the eleven which turned in seven victories and earned the right to represent the Border conference January 1.

LUBBOCK, Tex., Dec.---. Twelve exhibits, covering a variety of subjects, lectures on astronomy and seasonal bird life, and a motion picture of Plains wild flowers make up a series of programs sponsored by the West Texas Museum association from December through June, 1938. All programs and special exhibits, open to the public, will be located in the Museum building on Texas Technological College campus.

An exhibit of household objects, on display Dec. 11-20, includes a 100-year-old trunk, lined with an 1837 edition of The Hartford (Conn.) Times reporting the legislative session at which Texas independence was recognized. The trunk is owned by Miss Vivian Johnson, head professor of home economics education at Tech.

Other exhibits are scheduled as follows: imported dolls, Jan 8-17; metal work, Jan 22-31; leather work and hobbies, Feb. 5-14; puzzles, Feb. 19-28; books and maps, March 5-14; paintings and portraits by Young-Hunter, Apr. 15-29; local wild flowers, Apr. 30-May 9; shearing, spinning, and weaving, May 3; soap carvings, May 16-30; plants poisonous to livestock, May 14-23.

Dr. R. S. Underwood, professor of mathematics at Tech, will lecture on "Beyond the Moon", March 20. "Seasonal Aspects of Bird Life" will be the subject of a lecture April 3 by Dr. Donald W. Douglass, zoology instructor.

Motion pictures of Plains wild flowers will be shown March 27 by W. G. McMillan, Lubbock contractor and amateur photographer.

LUBBOCK, Tex., Dec.--. Final statistics of the eleven-game schedule of Texas Tech's Matadors the past season shows a decided advantage in nearly all phases of the game for the Red Raiders. Tech lost in three games to Montana, University of Texas, and Detroit, but won eight games from Arizona State, University of Arizona, University of New Mexico, Oklahoma A. & M., Loyola, Duquesne, Centenary, and Creighton, with the Border conference flag thrown in.

Tech made 161 first downs to 84 for all opponents. By games first downs made were as follows: Tech 16, Arizona State 5; Tech 19, Texas 11; Tech 20, Montana 6; Tech 9, Detroit 8; Tech 7, Arizona 5; Tech 15, New Mexico 5; Tech 9, Oklahoma A. & M. 12; Tech 27, Loyola 7; Tech 13, Duquesne 5; Tech 12, Centenary 13; Tech 14, Creighton 7. Only two teams made more first downs than the Red Raiders, Oklahoma A. & M. and Centenary, and the Red Raiders took both of those games.

Other figures show: yards gained running, Tech 2555, opponents 1325; passes attempted, Tech 170, opponents 173; passes completed, Tech 61, opponents 41; yards gained passing, Tech 643, opponents 667; yards lost, Tech 276, opponents 362; total yards gained, Tech 3191, opponents 2108.

ence, a letter representing

LUBBOCK, Tex., Dec.--. Following the adverse decision on

"Texas Technological College sincerely and deeply appreciates consideration given its application for membership by the officials Southwest Conference, at the meeting held on December 11, 1937.

"In view of the fact that application has been made by Texas Agricultural College on four different occasions, and that such actions have not been favorably acted upon, it appears that no formal application should be made by this institution for membership in the said conference, which we recognize as one of the conferences of the nation.

"We express the hope, however, that the time is not distant when the Southwest Conference will be responsible for the destinies of the Southwest Conference and that the members of the Southwest Conference may feel that this institution merits its inclusion.

"We further desire to express to that large number of our including ex-students of the present member colleges of the t Conference who have urged our inclusion in such conference, gratitude for their interest and constructive support."

1/6/37
LUBBOCK, Tex., Jan.--. Plans for cooperating with the National Youth Administration in two major projects are under consideration at Texas Technological College, following the visit of J. C. Kellam, state NYA director, last week. Of the four new NYA plans announced by Kellam: operation of a resident vocational agriculture training course at Texas Technological College, and operation of a cotton industrial survey to determine occupational opportunities in that industry may concern the college.

Dallas News Messenger (UP) pattern
Marshall Messenger
Sharp
The former would give 50 farm boys sub-college courses in agriculture for a period of four months at the expense of NYA. Final decision depends on ability of the college to provide adequate housing facilities, and to finance material for construction of barracks type dormitories. Labor of the 50 boys would be put into erection of these dormitories, which would eventually become the property of the college, to house 4-H, Boy Scout, FFA, and other groups meeting on the campus. Last year, similar training courses were held at A. & M., North Texas Agricultural College, and John Tarleton.

President Bradford Knapp has appointed a committee to work with NYA officials in a survey of opportunities of employment in all phases of the cotton industry, from agriculture through ginning, marketing, processing, shipping, manufacturing, etc.

Members of the committee are: A. H. Leidigh, dean of agriculture; E. L. McBride, head and M. B. Harrison, assistant professor of agricultural economics; J. O. Ellsworth, head, and Karl E. Ashburn, professor of economics and business administration; M. E. Heard, head professor of textile engineering.

Results of the survey will be published in bulletin form.

##

LUBBOCK, Tex., Jan.--. Approximately 350 invitations to the first rural electrification conference at Texas Technological College Jan. 14 and 15 are being sent this week from the division of agriculture. Henry P. Clay, assistant professor of agricultural engineering, is in charge of program arrangements.

Attending are vocational agriculture teachers in this area, Lubbock county farmers who have signed contracts for electric service from the South Plains Rural Electric Cooperative, Inc., and local electrical contractors and dealers.

History and present status of rural electrification, purpose of South Plains Electric Cooperative, and the various uses of electricity in the farm house and field will be discussed at the conference. Addresses, motion pictures, and demonstrations comprise the program.

Among the speakers are P. T. Montfort, rural electrification specialist and research associate, A. & M. college; Miss Clara E. Pratt, Lubbock county home demonstration agent; and President Bradford Knapp of Texas Technological College. The latter will speak on the "Sociological Aspect of Rural Electrification".

LUBBOCK, Tex., Jan. 1. A bronze head of Vice-President John Nance Garner, presented recently to Texas Technological College by Mr. and Mrs. Amen G. Carter of Fort Worth, will be sent to Lubbock within 60 days, according to President Bradford Knapp. Mrs. Electra Waggoner Bowman, New York sculptress and a former Texan, is the artist. The head will be placed on exhibit in the West Texas museum, situated on Tech campus, pending completion of the new library building.

By Reeves Henly

LUBBOCK, Tex., Jan.--. Coach Berl Huffman's Red Raider basketballers resume their cage warfare Tues. and Wed. in the Matador gymnasium here by taking on the Abilene Christian college quintet in a two-game series.

The series, originally scheduled for January 10 and 11, was shoved forward a day due to the Lubbock Golden Gloves preliminaries carded for Monday night. Both cage contests begin promptly at 8 o'clock.

The Raiders have been working with vigor the past few days following their disastrous invasion of Oklahoma City where they salvaged only one victory from the Oklahoma Collegiate Invitation tournament. Handicapped by lack of sufficient reserves, Huffman's hardwood treaders found the Sooner city to be the "horse latitudes", despite the fact that a freshman recruit, F. M. Sachse, broke the tournament's high-scoring record by chalking up 27 points in a single match.

With the return of Elmer Tarbox, Rex Williams, G. L. Webb, and Truman Neal to practice following their participation in the Sun Bowl tilt at El Paso New Year's day, hopes of the Raider cage mentors have again hit the uptrail.

The gridders listed above were not available for action in the Oklahoma play, and their absence necessarily weakened Matador chances for victory. However, with the squad intact for workouts during the last week, the Raider hoop-hunters will have a good chance to make a good showing against the Christians Tues. and Wed. nights.

Following the two games here next week the Raiders take on the Lobos of New Mexico university Fri. and Sat. With the New Mexico tilts behind them, the Matadors then take the road for a 12-day tour that pits them against Texas Mines, University of Arizona, Flagstaff, Ariz., Teachers, New Mexico School of Mines, and the University of New Mexico.

The Raider squad returns home after the 12-day trek to play host to New Mexico's Aggies, Feb. 17 and 18, and Flagstaff, Feb. 21 and 22, to complete the 1938 schedule.

LUBBOCK, Tex., Jan.--. The third biennial welding conference will be held at Texas Technological College Feb. 3 and 4 under direction of the mechanical engineering department, according to H. F. Godeke, head. The last conference in 1936 drew an attendance of over 300 from Texas, New Mexico, and Oklahoma.

Very latest developments in welding machinery and methods of various types of welding will be demonstrated in addition to motion pictures, lectures, and round table discussions, according to J. C. Hardgrave, assistant professor of mechanical engineering, director of the conference.

No enrolment fee will be charged and welders who are interested are invited to attend. Engineering shops and laboratories of the college will afford facilities for demonstrations and exhibits.

LUBBOCK, Tex., Jan.--. Nursery school for twelve children opens Monday at Texas Technological College, in the newly constructed one-story, frame building east of the Administration building. The school for children between the ages of two and one-half and four and one-half years will be conducted the year round, as laboratory work for students in child development and family relations.

Welfare of the children will be given first consideration, with emphasis placed on teaching them independence, good food and play habits.

Work is under the supervision of Miss Sannie Callan, head professor of child development and family relations. Assisting her are Mrs. Flora Lena Lovelace, graduate student, and Miss Gladys Pierce, home economics senior.

LUBBOCK, Tex., Jan.--. Naturalization papers to the Republic of Texas, dated June 6, 1837, and signed by Robert Kleburg, have been offered for sale to Texas Technological College by Robert Harwell of Odessa, grandson of the original holder. Harwell's need for money to finance an operation motivated the offer.

Innumerable articles having real or supposed historical value have been offered West Texas Museum, located on Tech campus, for a price, according to Dr. W. C. Holden, curator. Probably one of the most amusing was a dead eagle which a New Mexico man brought to Lubbock in a truck and offered to sell for \$3. Reason for the sale, he explained, was to raise money for a much-needed set of false teeth, price \$5. The remaining \$2 he hoped to raise from another source.

Another was a rusty corn knife, offered by a Santa Anna man who found his \$6 monthly pension for Confederate service insufficient to cover cost of an operation. The corn knife he believed to be an early adaptation of the dagger.

LUBBOCK, Tex., Jan.--. Experimental feeding of 120 Rambouillet weather lambs at Texas Technological College, shows costs per head per hundred pounds gain in weight ranged from \$5.39 to \$9.49 during the second thirty-day period, which closed Jan. 11.

Costs the first thirty days of the experiment, W. L. Stangel, head professor of animal husbandry, said ranged from \$4.42 to \$6.06. Divided into six groups of twenty each, each group of animals is receiving a different variety of feed for a minimum period of ninety days. At the end of that time, cost of feeding each group and weight gained will be computed. Whole milo, alfalfa hay, cottonseed meal, kaffir silage, cottonseed hulls, milo chops, and pulverized oyster shell are the feeds being used.

The experiment is being used by Merrill Polson, graduate student, as basis for a master's thesis, in an effort to determine ideal feeding rations for lambs in this section.

This is the sixth experiment of the kind undertaken at Tech.

LUBBOCK, Tex., Jan.--. The 1938 summer session at Texas Technological College will open with the first term June 8 to July 13 and the second term from July 19 to August 25. Regular courses of graduate and undergraduate rank will be offered in all divisions, agriculture, engineering, home economics, and arts and sciences.

Features of the summer session include outstanding visiting lecturers in education, a band school under direction of D. O. Wiley and visiting band directors, field trips in at least five departments, and a recreation and entertainment program.

Tech's new dormitories will be open to men, women, and married couples. The summer catalog which will be issued about March 1 may be had by writing the registrar.

LUBBOCK, Tex., Jan.---. With reservations at Red Horse Inn at Stratford-upon-Avon, Shakespeare's home, a group from Texas Technological College this summer will study the great poet and dramatist surrounded on all sides by Shakespeareana. The study will be a college field course in English carrying six hours credit, under the direction of Dr. Allan L. Carter, head of the department.

The Red Horse Inn was the temporary home of Washington Irving while he was writing the Sketch Book, familiar to all American school children. The Memorial library containing 10,000 volumes on Shakespeare will be open to members of the party.

Another feature of the stay at Stratford will be the opportunity of the group to attend 12 performances of Shakespeare's plays during the month's stay, three each week, in the Shakespeare Memorial theatre built by private subscription in England and America. The plays will be put on by the best professional talent.

The ocean trip will be made by U. S. Lines, the group sailing July 27 from New York on the Washington and returning on the Manhattan. The cost of the trip, including room and board at the famous English hostelry, will be \$350 from New York.

LUBBOCK, Tex., Jan.--. When U. S. Pilot Lee Moore, just before the Christmas holidays, flew to Tundra Village, across the Alaskan wastes of ice and snow, to carry Mrs. Roy L. Jameson, a former student of Texas Technological College, to a hospital for a serious operation, he found the dread meningitis plague had broken out in the village. A mercy plane bearing Dr. E. W. Werbel and flown by Pilot Gordon Mackenzie was hurried to the stricken village with serum and assistance.

Mr. and Mrs. Roy L. Jameson, both former students at Texas Technological College, are teachers in the U. S. Indian service and stationed at Tundra Village, Bethel, Alaska. Jameson's duties, besides teaching, include care of reindeer herds, training the natives in agriculture, and social work. He received his B. A. degree in history at Tech in 1934, and did graduate work here in agriculture in the summers of 1936 and 1937. His wife completed requirements for a bachelor's degree also at Tech and will receive it next June, probably in absentia.

The village in which the Jamesons are located is in the extreme western portion of Alaska near the Bering sea. Dean J. M. Gordon of the Tech Arts and Science Division, only recently received a letter from Jameson dated October 24, 1937, describing the long trip he and his wife made to get to their far-away post. Bethel has weekly mail service by plane, weather permitting, during the winter months, but Tundra Village is a long distance from Bethel and the mail service, Jamison says, is very irregular. Weeks pass sometimes, he says, with no opportunity even to mail a letter.

M O R E

Jameson - 2

Note: If too long, this story may be cut here.

"We sailed from Seattle Aug. 17," Jameson writes, and continues: "We sailed to Juneau by way of the inside passage. The scenery is indeed beautiful. The water is very calm. There are countless islands densely covered with evergreen trees. The passage is so narrow that at times we were within throwing distance of the shore. On both sides were high snow capped mountains, waterfalls, and glaciers.

"We were delayed at Seymour Narrows because here the passage is so narrow the water at tidal change rushed in so fast that all ships must wait for slack tide before passing through. Grenville Channel is so narrow for 45 miles we could see every tree on both sides of the high forest covered shores. Many animals swim from one side to the other across this channel.

"We were in sight of several villages on the Canadian coast. Ketchikan is the first Alaskan town on this voyage. It is located on a narrow channel and has a good harbor. The harbor was filled with fishing boats. The city has fine schools, a modern hospital, and a radio station. Almost every village along the southeastern coast has one or more totem poles in view.

"The Boxer docked at Juneau Aug. 23. Juneau is located on the Gastineau Channel at the foot of Mt. Juneau which rises 5,000 feet almost perpendicular. Streams fed by rain and snow rush down the steep mountain slopes. Juneau is the largest and perhaps the most modern city in Alaska with a population of 4500. It has several public buildings, including a new Federal and Territorial building which houses a very interesting museum. The largest gold quartz mine in the world is near this city."

He left Juneau Aug. 24 for Valdez and reached Seward Aug. 29. From Seward the route was along the Alaskan Peninsula and Aleutian islands as far as Unalaska, a "barren area and the birthplace of storms". From here the ship sailed north to the Kuskokwim river, and up that river to Bethel, arriving there Sept. 15. Tundra Village is ten hours from Bethel by motor boat or dog team.

LUBBOCK, Tex., Jan.--. Fourth annual coaching school and all-star football game of the Texas High School Football association will be held in 1938 on the campus of Texas Technological College, opening Monday, August 1, and ending with the football game Saturday night. The meeting last year was held at Baylor University and drew an attendance of 250.

Lubbock was picked by the board of directors of the association at a recent meeting in Dallas with Tech and the Lubbock chamber of commerce meeting all requirements for the school, including a \$1200 guarantee for expenses and proper athletic and housing facilities. The cool summer climate in Lubbock and Tech's reputation as host to big football coaching schools were factors in bringing the meet here.

The all-star football game is between picked high school gridsters of the northern and southern districts of the Texas Interscholastic league. Lynn Waldorf, head coach at Northwestern University, and Harry Stuhldreher, University of Wisconsin head coach, instructors in the school, will coach the 44 picked high school football players who will be selected by special committees to represent their sections. Coaches at the school will observe the training of these players.

Previous schools have been conducted at Dallas, Fort Worth, and Waco. This summer's session is expected to attract at least 400 students and coaches. Decision had already been reached by Tech athletic authorities not to resume the Tech coaching school for this summer.

LUBBOCK, Tex., Jan.--. To beautify the campus of Texas Technological College campus and to make the Plains Region tree conscious is the double object of a special Arbor Day program Feb. 22 at the college. From five to ten thousand young trees will be planted on the campus by faculty and students with nearly a thousand persons actively participating.

A half holiday has been declared for the afternoon, coffee and doughnuts will be served the workers, President Bradford Knapp, Chas. A. Guy, editor of the Lubbock Avalanche-Journal, Sen. G. H. Nelson, a tree enthusiast, and several others will be mounted and will ride across the broad acres of the Tech campus, directing the work and encouraging workers.

O. B. Howell, professor of horticulture and director of the campus beautification program, has made plans for the mammoth tree planting. The area to be planted has been divided into five main units with a trained foreman and workers assigned to each, and every detail has been blueprinted.

Tech nursery has in stock probably a million young trees and shrubs with about 50,000 large enough to transplant. Stock is being furnished from this nursery for public forestry projects and for campus use. Trees already planted at Tech have made phenomenal progress and the aim is to have the most beautiful campus in Texas. With little money to do this work Tech faculty and students are gladly volunteering their services. It is hoped that Arbor Day here will be an annual tradition.

LUBBOCK, Tex., Jan.--. From New Mexico an old fashioned blacksmith shop in its entirety will be brought and set up on the campus of Texas Technological College for the third welding conference to be held by the mechanical engineering department Feb. 3 and 4. The history and progress of welding from the old blacksmith shop to the present will be demonstrated during the conference.

Twelve of the largest industrial concerns will have exhibits and stage demonstrations during the two-day meet. Following is a partial list of demonstrations that will be given: electric welding of cast iron, hard surfacing oil well bits, electric welding of aluminum, welding oil well casings, bronze welding, pipe cutting and beveling machines, and shape cutting machines.

Three hundred men interested in the various phases of welding are expected from Texas, New Mexico, and Oklahoma. There is no admission or registration fee for the course and all who are interested are invited to attend. Types of welding equipment never before shown on the South Plains will be demonstrated.

A number of awards are to be made at the close of the conference, including regulators, goggles, welding torches, welding gloves, helmets, head shields, electrode holders, welding flux, and various other supplies.

Professor H. F. Godeke, head of the mechanical engineering department, and Professor J. C. Hardgrave, superintendent of the departmental shops, are in charge of the conference program.

LUBBOCK, Tex., Jan.--. Twenty-four tiny tots from two and one-half to four and one-half years play, rest, and eat in Texas Tech's new nursery school while their mothers go about their morning work assured the welfare of their children is receiving first consideration. Each child was given a physical examination before entering the school.

The new nursery school is located on Tech campus and serves as a laboratory for home economics students taking child development and family relations.

Miss Sannie Callan, professor of child development and family relations, is in charge of the school. She is assisted by Mrs. Flora Lena Lovelace, graduate student, and Miss Gladys Pierce, senior.

A trained nurse examines the children upon their arrival at 9 o'clock each morning. They are allowed to play with a variety of toys provided by the school until 10 o'clock, when they are given fruit and made to rest until lunch. The parents call for their children after lunch and take them home with the understanding that the children be given an afternoon nap.

Although the nursery school is to be used mainly as a laboratory, the most important element is the development of self-reliance, freedom in play, and social contacts with children their own age.

LUBBOCK, Tex., Jan.--. The old and new West clasp hands on the Texas Technological College campus Feb. 22, Arbor Day, when horse-back overseers will supervise the planting of 5,000 trees and shrubs, beginning the greatest beautification program probably ever attempted in West Texas.

The plan to make the Tech campus and Lubbock an oasis of the Plains country has been brewing for many years, but lack of funds has prolonged the program, said O. B. Howell, professor of the plant industry department and director of beautification at Tech. Trees and shrubs are to be selected from the college nursery where careful planting has produced over one million plants, 50,000 of which are from one to four years old and are ready for transplanting.

Five hundred and fifty persons, including students and faculty, will take part in the Arbor Day fiesta for which a half holiday will be given. Saga of the Old West rides again as coffee and doughnuts will be served to workers from an old stage coach stationed by a campfire on the campus.

President Bradford Knapp, W. T. Gaston, college business manager, Senator G. H. Nelson, Howell, Ray L. Chappelle, head of the vocational agriculture department, Chas. A. Guy, editor of the Lubbock Avalanche-Journal, and J. H. Grimsley, superintendent of buildings and grounds, aboard college horses, are to supervise the program planned in five units. Expedition of the work will be furthered by deans who are to act as straw bosses. Blueprint instructions as to what kind of tree to plant and where to plant it will be distributed. A bulletin will be

M O R E

Arbor Day - page 2

furnished every worker. It will give exact instructions as to planting a tree, said Howell.

Most popular kinds of trees to be planted are: Russian olive, Chinese elm, American elm, Russian mulberry, green ash, red bud, Carolina poplar, Lombardy poplar, Arizona cypress, Siberian pea tree, honey locust, Spanish locust, and ailanthus. Included in the shrubs are: mugho pine, desert willow, spiraea, vitex, and privet.

"Most people are blind when planting a tree," said Howell in explaining the process. "There is quite a bit of science in landscaping as well as planting. The hole should be dug large enough to hold the roots, and after carefully clipping all dead, injured, and old roots the tree should be placed in the center so as to give the roots room to breathe. Cultivation of the ground around the tree will aid in retaining the moisture. If carefully looked after the trees will begin to show beauty within two or three years."

"One of the main purposes," he continued, "in planting the trees is to get people of this and other states interested in development of our college. Beautification of the campus is the proper place to start. Students will learn how to plant shrubs, they will see how much better it will make a place look, and perhaps they can be an influence in their own homes in planning beautification."

In order to show they are looking to the future, Texas Tech officials have planned to make this Arbor Day a tradition. Not yet far removed from the Jack rabbit ridden days as far as landscaping goes, the campus will be a thing of ideal beauty when seniors of '33 return for home-coming in 1945, say ardent tree supporters. Returning grads will circle the campus drive shaded by gorgeous trees, rich in October brown, and bid farewell to the fast-fading West around Texas Tech, because officials loudly declare this is only the beginning.

LUBBOCK, Tex., Feb.--. Promoting minor sports on Texas Technological College campus, the college athletic council has voted larger budgets for both tennis and golf this season. Plans for both sports include trips for intercollegiate play.

Financing and construction of three concrete tennis courts at Tech has been authorized by the board of directors through the athletic council, work to begin immediately. Plans for the courts also include windbreaks.

The council has also made steps toward designating certain sections of physical education classes for professional instruction in golf this spring.

Texas Technological College won Border Conference championship in both tennis and golf last year.

LUBBOCK, Tex., Feb.--. First annual Lamb Feeders' Day will be held at Texas Technological College Feb. 19. Approximately 500 invitations will be mailed to county agents and vocational teachers of Texas, and to sheep feeders and producers, according to W. L. Stangel, head professor of animal husbandry.

Program will include discussion of experimental lamb feeding work at Tech in cooperation with Texas A. & M. college during the last five years.

The fifth experiment, now in progress, is being made by Merrill Polson, graduate student in animal husbandry. Results of the test will be used in his thesis on "Cottonseed Products as Feeds for Fattening Lambs."

"About 300,000 lambs are being fed on the plains, many of them on rations that have proved satisfactory in one of the experiments here at the college," Stangel said; "the number that are placed on feed is increasing each year."

J. M. Jones, chief of the range animal division of Texas agricultural experiment station, and several other practical feeders, will be on the program.

##

LUBBOCK, Tex., Feb.--. Miss Sammie Tate, graduate of Texas State College for Women, has joined the applied arts faculty of Texas Technological College as instructor in craft courses. Miss Tate has been employed as designer for Arthur A. Everts company, Dallas.

She replaces Miss Elizabeth Hawley on leave of absence to study at Columbia university and the American School of Design in New York. She returns to Tech for the summer session.

##

LUBBOCK, Tex., Feb.--. Sixteen bird skins, duplicates of Smithsonian exhibits, have just been presented to West Texas Museum, located on Texas Technological College campus, by the United States National Museum, Washington, D. C. The collection was sent by Dr. Herbert Friedman, curator of birds at the Smithsonian Institution, to aid in original investigation in ornithology. Sent at request of Congressman George Mahon, the exhibit includes some annual migratory visitors to the South Plains.

LUBBOCK, Tex., Feb.--. Miss Marie White, federal agent in home economics education, arrives at Texas Technological College Feb. 15 to aid in a cooperative study of teacher preparation for family living and homemaking education. She will also visit University of Texas at Austin and Texas State College for Women, Denton, to make similar investigations.

Representatives of each college, the State Department of Education, and the Office of Education at Washington D. C., will participate in the study, which is being conducted in all state colleges offering home economics courses and receiving federal aid. By conference with instructors, Miss White will learn view points and typical materials used in planning and teaching each course.

LUBBOCK, Tex., Feb.--. Variety is the keynote of employment at Texas Technological College, where 40 per cent of the 3,154 students enrolled during the fall semester were engaged in more than 200 different types of jobs.

Part time barber, cheesemaker, dancing instructor, floor sander, glass worker, minister, nightwatchman, optometrist, radio technician, piano salesman, hospital orderly, Turkish bath employe, and wrestling match assistant are some of the varied trades and professions by which men students help pay their college expenses.

One boy acts as basket ball referee for surrounding schools; another counts cars in a local park as part of a federal project. Two paint signs, two work in funeral homes, one at the local airport, one in a cotton exchange, and one in a Lubbock gin. Four bakers, four butchers, eight bus drivers, five carpenters, three cooks, two engravers and six orchestra members add color to the list.

For women students, designing neon signs, demonstrating food products, interior decorating, and running a hotel elevator are perhaps the most diverse. Others are employed as stenographers, store clerks, dietitians, teachers, newspaper reporters, beauty operators, solicitors, librarians, bookkeepers, nurses, and switchboard operators.

Most usual employment is that of waiting tables, by which 99 men and 32 women students earn part of their room and board. Housework is second, with 35 men and 50 women thus employed. Departmental assistants, stenographers, filing clerks, and manual laborers comprise the group of 236 students employed at the college. Of this number, 40 are women.

Average monthly salary for the 875 men students regularly employed is \$29.32, at the rate of 29 cents an hour. An additional 140 men students earn \$15 a month for 2 hours work daily, under the National Youth Administration act. One hundred ninety-six women students earn a part of their college expenses, besides 66 who are employed by the NYA. Average working hours for men students is 3.85 per day.

LUBBOCK, Tex., Feb.--. Date of the West Texas Teachers' association meeting in Big Spring has been changed to March 11-12, according to Dr. R. E. Garlin, education professor at Texas Technological College and association president. Theme of the meeting, originally scheduled for March 4-5, will be "Teachers and Their Relationship to the New Curriculum." The earlier date conflicted with a national education meeting.

Dr. A. W. Evans, head professor of education at Tech, will lead a symposium on the new curriculum in prospect and retrospect, at the Big Spring meeting. Assisting him are Superintendents W. B. Irvin, Lubbock; W. C. Blankenship, Big Spring; J. E. Watson, Colorado; and County Superintendent J. E. Griggs, Lubbock.

Two of the main speakers at the session are Dr. J. Paul Leonard of Stanford university, and Dean V. F. Pittenger of Texas university.

##

LUBBOCK, Tex., Feb.--. Exhibit of the process of cross breeding corn has been added to collections at the West Texas Museum, located on Texas Technological College campus.

Obtained from the Iowa State College experiment station by Earl T. Duke, instructor in agronomy at Tech, the display shows development of a new variety of corn having a 14 per cent higher yield than pure line varieties over a five-year testing period.

It is adapted to climatic and soil conditions in eastern and southern parts of Texas, according to Dr. A. W. Young, head professor of plant industry, but not to West Texas planting.

LUBBOCK, Tex., Feb.--. Itinerary of the second European tour sponsored by Dr. W. C. Holden, head professor of history and anthropology at Texas Technological College, includes visits to eight countries.

Sailing from New York on the Queen Mary July 20, the party will make a motor bus tour of Scotland and England. With Edinburg as headquarters, they will go on an excursion through the Trossachs, returning to London down the eastern coast. Visits in England include trips to Stratford-on-Avon and through the lake districts.

Sightseeing trips through Holland and Belgium will be followed by a boat trip up the Rhine to Heidelberg; through Switzerland to Italy thence through southern France to Paris. The return trip is from Cherbourg on the Berengaria, arriving in New York Sept. 2.

Total cost of the trip, from New York, is \$595. This includes third class boat transportation, food and other travelling expenses for the entire European visit.

##

LUBBOCK, Tex., Feb.--. W. L. Stangel, head professor of animal husbandry at Texas Technological College, will attend the annual meeting of Texas Horse, Jack and Mule Breeder's association in College Station Feb. 11-12. A director of the association representing this section of Texas, Stangel will preside at the annual banquet Feb. 11.

Principal banquet speaker is Wayne Dinsmore of Chicago, secretary of the Horse and Mule Association of America.

LUBBOCK, Tex., Feb.--. "The Lamb Market Situation" will be

subject of an address by M. B. Harrison, assistant professor of agricultural economics, on Lamb Feeders' day at Texas Technological College Feb. 19. J. M. Jones, chief of range animal husbandry at Texas A. & M. will talk on "Sorghum Roughages in Fattening Lamb Rations," and W. L. Stangel, head of the Tech animal husbandry department, will speak on "Sorghum Silage in Lamb Fattening Rations."

Stangel's talk will be based on lamb feeding experiments at Tech and at the Texas A. & M. agricultural experiment station at Spur, now in its sixth year. Merrill Polson, graduate student in animal husbandry at Tech, will explain the procedure used in experiments carried on this year. Results of the feeding this year will be announced by Professor Stangel.

All those attending the program will be served a noon luncheon and at 1 p. m. there will be a grand parade of college livestock. The luncheon and parade will be in charge of members of the Block and Bridle club.

LUBBOCK, Tex., Feb.--. Two Mescalero Apache Indian jackets, the older one dating from Abraham Lincoln's administration, are on display at West Texas museum, located on Texas Technological College campus. They were loaned by Porter Montgomery of Dalhart.

The older jacket was worn by a scout in Civil War days, who guided a party of white men from New Mexico into the northwestern region of United States territory. It is sewed entirely with sinew, including attachment of ornaments.

The other, made by the same tribe at a later date, is a single rectangular piece of leather with a hole in the center for the wearer's head. Its four corners are decorated with deer's feet, and its long leather fringes serve as sleeves. Both jackets are decorated with metal bells and seed beads.

LUBBOCK, Tex., Feb.--. Why students fail, scholarship, and other matters relating to student progress has been the object of intensive study and research at Texas Technological College during the past two years, according to President Bradford Knapp. This is part of the administrative research program of the college.

At the end of the fall semester 1936-37, 1,040 students out of 2,703 had either failed one or more subjects or had conditions or incompletes. This year, 1043 out of 3,154 students have failed in one or more subjects or had incompletes or conditions.

During the past semester only 975 students out of a total of 3,154 had any sort of failure. This is excluding incompletes and conditions which are generally the result of illness or other untoward circumstances and can be converted into passing grades by following rules of the institution. Only 495 students during the past semester, or 15.6 per cent, were failing in one subject only. Two hundred thirey-seven, or seven and one-half per cent, failed in two subjects. Two hundred forth-three, or seven and seven-tenths per cent failed in more than two subjects.

"The situation so far as failures are concerned at Texas Technological College, in spite of the great increase in enrolment, is slightly better than it was a year ago," says President Knapp. His report continues:

"The reasons for failure may be catalogued as follows:(1) lack of thorough high school preparation; (2) necessity of spending too much time in work to earn their way through college; (3) cutting classes, being indifferent to requirements, too great attention to social functions,

M O R E

Page 2 - Failures

attending moving pictures too often; or too much wasting of time. A fourth reason may be the attitude of the student toward his college course. We have too many students who are indifferent to their college work and do not feel that they want to come to college except for a 'whale of a good time'."

"Every effort is being made through every division and in every department to improve the quality of teaching. It is the ambition of Texas Technological College to turn out young men and young women who are thoroughly trained in the subject matter of the course they have selected as a life work; and the remarkable success of Texas Technological College in obtaining positions for its graduates is the best evidence that, after all is said and done, the work of the college is of a very high order. The administration of the college is intensifying its study of everything relating to its educational program in the endeavor to make Texas Technological College the best college of its character there is in this part of the United States."

LUBBOCK, Tex., Feb.---. Division managers have been selected by eight engineering departments at Texas Technological College, to direct work for the tenth annual Engineer's show April 8-9. The show is conducted during the district Interscholastic League meet on the campus. Last year 7,000 visitors attended.

New additions to the show include a stroboscope, now under construction by mechanical engineering students, an apparatus making possible inspection of machinery for flaws while it is in motion. Electrical engineers will install a short wave transmitter with receivers in each building. All phases of art will be exhibited by students in architecture and allied arts.

Popular features from last year's show to be repeated this year are the "talking light beam", glass-walled furnace, five-ton refrigeration plant, and moving picture of the Big Bend natural product.

Henry Meredith of Cleburne is general manager. Division managers are: mechanical laboratory, Max Nuttall of Borger; mechanical shop, C. N. Wilson of Clovis, N. M.; chemical, John W. Sheehan of Hermleigh; geological, Dosh T. McCreary of Santa Anna; textile, Dwight Epperson of Cleburne; civil, John C. Emmett of Roswell, N.M.; architectural, Ross Wayne Dowdy of Carey; electrical laboratory, Lloyd Heggen of Abernathy; lighting, Phillip S. Sterrett of Abernathy; industrial, Ray R. Eldridge of Pampa.

LUBBOCK, Tex., Feb.---. Ground was broken Feb. 11 for the new NYA cottage on Texas Technological College campus, to house 50 boys receiving special instruction in West Texas farming and ranching. The building will be completed early in March, and the boys will assist in finishing the interior, constructing a dining hall, kitchen, recreation rooms, and offices.

Students will be selected from families of the Panhandle and South Plains who are approved for NYA aid, most of them sons of tenant farmers; they will not be regularly enrolled in the college. They will receive about three hours instruction daily and will work 70 hours a month, in exchange for room and board, and \$5 a month.

Eligible West Texas youths desiring assignment to the project may communicate with NYA district representatives at Amarillo, San Angelo, or Lubbock.

LUBBOCK, Tex., Mar.--. Waterbound in Los Angeles, Texas Technological College debaters have been forced by flood conditions to postpone meets with Occidental college, University of Southern California, and University of Redlands, scheduled for March 2 and 4.

First leg of their 16-day tour netted favorable decisions for both Tech teams against University of Arizona, Tucson, Feb. 28. Girls' team, composed of Betty Dale West, Memphis, and Johnnie Birdwell, Ralls, won a unanimous decision for affirmative presentation of the subject, "Resolved: That the national labor relations board should be empowered to enforce arbitration of all industrial disputes." Boys, debating the negative side, won a two to one decision. Junius Carter, Childress, Warlick and Waggoner Carr, Lubbock, compose this team.

Next scheduled debate is against University of San Francisco March 7. Other schools to be contested are College of the Pacific, Stockton, March 8; University of California, Berkeley, March 9; Stanford university, Palo Alto, March 10.

Postponed meets may be re-scheduled on the return trip, according to telegraphis information received here from Miss Annah Jo Pendleton, debate coach.

LUBBOCK, Tex., Mar.--. Conference for school superintendents, principals, teachers, and school workers of Texas is to be held at Texas Technological College March 31, April 1 and 2. Coming near the close of the four-year curriculum revision movement in Texas, the meeting is known as an Articulation Conference.

Leading educators in Texas and many from other states will discuss final issues in curriculum revision. At least 2,000 school executives and teachers are expected to attend. Dr. A. W. Evans, head of the Tech education department, is general chairman. Complete programs of the three-day meet are being mailed.

##

LUBBOCK, Tex., Mar.--. Graduate students at Texas Technological College led in scholastic average for the fall semester, the registrar's report shows, with a grade-point average of 5.01, or A minus. Other classes rated as follows: seniors, 3.49 or B minus; juniors, 2.76 or C plus; sophomores, 2.39 or C; freshman, 1.78 or C minus.

Women residing in the college dormitory, with an average of 3.08, excelled all women in the college, who averaged 2.95. Dormitory men averaged 2.37 as compared with all men's average of 2.01.

All-college average was 2.37.

##

LUBBOCK, Tex., Mar.--. Alert pioneer families coming to the new empire of Texas in the early days, said Gov. James V. Allred at the cornerstone laying of the new \$275,000 library building at Texas Technological College Tuesday, March 8, "were the bloom of the civilization, institutions, traditions, character, genius of the West." Approximately 3,000 persons heard his address and watched the ceremony.

Tracing the growth of the library movement in Texas, the governor began with the first \$10,000 library appropriation for the state at the Third Texas Congress in 1839, and quoted Mirabeau B. Lamar, "father of education in Texas", who said "A cultivated mind is the only guardian genius of democracy. It is the only dictator that freemen acknowledge, and the only security that freemen desire."

Official ritual of the laying of the cornerstone was under direction of the Masonic Grand Lodge of Texas with Grand Master John Temple Rice of El Paso officiating. Same trowel used in laying of the cornerstone of the Grand Lodge building in Waco 35 years ago was used.

##

LUBBOCK, Tex., Mar.--. Approximately 75 representatives from schools within a 100-mile radius are expected to attend the second annual Older Girls' Conference at Texas Technological College March 18, 19, and 20. The meeting, sponsored by YM-YW organizations, has as its aim organization of girl reserve clubs in high schools.

##

March 1938

LUBBOCK, Tex., Mar.--. Golfers at Texas Technological College are warming up for intercollegiate play, with the third annual intramural tournament sponsored by The Toreador, college newspaper. Qualifying rounds will begin March 20, according to J. W. Jackson, golf coach, and will continue until March 25.

This year's team is fortified with four lettermen from former squads. Lindsay Telford was winner of the 1937 Border Conference championship. Manson Allen, 1936 letterman, was forced out of competition last year by illness, but is ready for work this spring. Jack Carlson, last year's number one man, was runner-up in the 1937 Border Conference meet. John Bell lettered in 1935.

Other squadmen are Don Doherty, winner of the 1937 Toreador tournament, David Keithley, Bill McGowan, Rufus Ryan, Ford Sturdivant, and Eldon Rawlings.

Tentative plans for the season's competition were released as follows: West Texas State college, here, April 10, Canyon, May 22; T. C. U., Fort Worth, April 21; Texas Wesleyan college, Fort Worth, April 22; Texas A. & M., College Station, April 25.

Tech golfers will journey to Tempe, Arizona, May 13-14 for the Border Conference meet.

##

LUBBOCK, Tex., Mar.--. Track aspirants at Texas Tech make their first bid against squads of the entire Southwest March 18-19.

Following this the Scarlet colors will be carried to Austin for the Texas relays, to Des Moines, Iowa, for the Drake relays, and to Tempe, Arizona for the Border Conference meet in May.

##

3/17/38
LUBBOCK, Tex., Mar.--. Matador band at Texas Technological College has been awarded the thirty-third chapter of Kappa Kappa Psi, honorary national band fraternity, first chapter granted in Texas. Seventeen members and D. O. Wiley, director, were initiated.

Officers of the new organization are: Norman Heath, president; Carrol McMath, vice-president; Paul Coe, secretary, all of Lubbock; Jim Nevins, Abilene, treasurer.

The musical fraternity was organized in 1919 at Oklahoma A. & M. college to promote leadership, scholarship, musicianship, and fellowship among band members. Other member schools are universities of Wyoming, Washington, Oklahoma, Arkansas, North Dakota, Michigan, West Virginia, Montana, Ohio, Indiana, Arizona, and Florida; Stetson, Montana State, Mississippi A. & M., Pennsylvania State, Ohio State, Oregon State, Georgia Tech, Colorado A. & M., Colorado School of Mines, Alabama Polytechnic Institute, Tulane, Ohio Northern, Cincinnati, Butler, Duke, Temple, Colorado State Teachers, George Washington, and North Dakota A. & M.

LUBBOCK, Tex., Mar.--. A grand parade of boys, members of FFA and 4-H clubs, from 36 West Texas and three Eastern New Mexico counties will be held April 6, the last day of the Fat Stock show in Lubbock. Each club represented will carry a banner and each county will have the privilege of having a band. Some counties are preparing floats.

Clubs of both organizations represent a total membership of 5,000 boys in the 39 counties. O. T. Ryan, assistant professor of agricultural education at Tech, will sponsor FFA students participating and C. C. Jobson, Lubbock county agent, will sponsor 4-H club boys. Prizes are to be awarded in both groups.

##

LUBBOCK, Tex., Mar.--. "West Texas Museum should be a laboratory, as well as a storehouse for articles which people have used," said Dr. W. C. Holden, dean of archeological and historical research at Texas Technological College, at a museum association meeting March 18.

Double purpose of the museum, he said, is to display exhibits pertaining to the past life of this region, showing the nature of industrial development, and to make possible research in cultural and industrial progress of the area.

##

Dallas from 7/20/50

LUBBOCK, Tex., Mar.--. Competing in the first inter-collegiate dairy products judging contest in Texas, Texas Technological College team won the trophy and took first places in butter, cheese, and ice cream divisions at the Fort Worth Fat Stock show last week.

Meat judging team, under direction of F. G. Harbaugh, associate professor of animal husbandry, placed fourth; livestock and sheep judging teams, coached by Ray C. Mowery, professor of animal husbandry, placed seventh and second, respectively; and dairy cattle judging team, supervised by Casey Fine, assistant professor of animal husbandry, placed sixth. M. G. Pederson, assistant professor of dairy manufacturing, was sponsor of the dairy products judging team.

Vestel Askew, Del Rio, was second high individual in livestock judging with 75 competing, winning third in hogs, seventh in cattle and horses, and tenth in sheep. Charles Gillham, Hughes Springs, won high individual honors in dairy products judging and in the ice cream division.

Other individuals placing were Clayburn Harrell, Spur, second in dairy products, high in butter; Van Scheid, Whitesboro, tenth in dairy products; Russel Cook, Littlefield, sixth, and Eldon Lawrence, Peacock, tenth in sheep judging; J. H. Baumgardner, Wellington, tied for fifth place in meat judging.

LUBBOCK, Tex., Mar.--. In competition with Durocs, Polan Chinas, Berkshires, and Hampshires at the Southwestern Exposition and Fat Stock show at Fort Worth, Texas Technological College prize Hampshire barrow was awarded grand championship over the entire lot exhibited.

He was also chosen grand champion in middle **weight** class, and in the light and heavy weight class of Hampshires.

LUBBOCK, Tex., Mar.--. Fifty agricultural students at Texas Technological College are studying vegetable crops and are planting individual gardens in plots 17x18 feet in the college orchard.

"French artichokes to black radishes may be expected," says O. B. Howell, professor of horticulture and teacher of the course. Vegetables chosen are fennel, chives, dill, kohli-rabi, endives, chicory, broccoli, cauliflower, eggplant, cucumbers, beans, sunflowers, squash, lettuce, chard, celery, pop corn, and cabbage.

Aim of the project is to produce on each plot enough vegetables for a family of two for each day in the year.

##

LUBBOCK, Tex., Mar.--. Following a warm-up tilt with varsity netmen at West Texas State Teachers College in Canyon March 26, Tech's tennis squad leaves April 9 on a ten-day tour which will include dual meets with seven Texas schools and competition in the Southwest Tennis tournament at Austin April 13. Three Southwest Conference squads are included in the schedule.

Three Lettermen, Wilson Chapman of Los Angeles, Harry Jordan of Big Spring, and W. A. McCarty of Lubbock are back in harness this season. Sidney Moore of Fort Worth has been recruited from last year's freshman ranks.

Chapman, number one singles, won Border Conference singles championship last spring and will defend that title at Tempe in May. Jordan, member of the winning doubles team at the 1937 Border Conference, and Moore play number one doubles.

Schedule for the ten-day trip includes: April 9, Abilene Christian college, Abilene; April 10, Southern Methodist university, Dallas; April 11, North Texas State Teachers college, Denton; April 13, Southwest Tennis Tournament, Austin; April 14, University of Texas, Austin; April 15, Southwest Texas State Teachers college, San Marcos (tentative); April 16, Baylor university, Waco; April 18, Hardin-Simmons university, Abilene.

##

LUBBOCK, Tex., Mar.--. Nine Tech cagers were named this week to receive basketball awards for the 1938 season, at a college athletic council meeting. Awards will be made in June, at the close of the spring semester, to those making the required scholastic average.

List of the men approved for letters follows: Rex Williams, captain, Sherman; John Henderson, Linden; Elmer Tarbox, Higgins; G. L. Webb, Itasca; Dudley Akin, Hillsboro; Coleman Williams, Cisco; F. M. Sachse, Quitaque; Woodrow Powell, Kirkland; T. F. Bain, Glen Rose.

5/24/58

LUBBOCK, Tex., Mar.--. Inscribed by Fernando do los Rios, Spanish ambassador to the United States, copy of "De Virginitate Beatae Mariae", a seventh-century Latin work edited by Vincente Blanco Garcia, will be placed in the new Texas Technological College library.

The book was presented to H. R. Southworth, "to be placed in the library at Texas Technological College", as a token of gratitude for Southworth's work in connection with the Washington Friends of Spanish Democracy.

Southworth, who received his master's degree from Tech in 1934, is now editing a semi-monthly bulletin for the Spanish Information bureau in New York city.

LUBBOCK, Tex., Mar.---. Pictograph drawings on stone escarpments in western Ector county will be examined by Dr. W. C. Holden, dean and director of archeological research at Texas Technological College, and a party which left Lubbock March 23.

A recently discovered rock shelter near "Blue Mountain", on the southern edge of Llano Estacado, shows signs of ancient occupation to a depth of about three feet, according to report by R. H. Shuffler of Odessa. Excavation may determine relation of its occupants to those of Murrah cave, located near the mouth of the Pecos River, which was explored by a Tech party last March.

*Amirals Globe
H. Worth Press*

LUBBOCK, Tex., Mar.---. Sixty students and directors from nine colleges will attend the Texas Intercollegiate Dramatic tournament at Texas Technological College March 28-30. Schools competing for awards in play presentation are Hardin-Simmons university, College of Mines, Daniel Baker Junior college, University of Houston, Abilene Christian college, Mary Hardin-Baylor college, Southwestern university, Trinity university, and Baylor university.

Cups become the property of a college after they have been won three successive years. First place cup, donated by College of Mines in 1937, is now at Baylor; second place cup, given by Red Masque players of University of Houston in 1936, is in possession of Mary Hardin-Baylor college. Trinity university now holds third place cup, which was also presented by Red Masque players, and fourth award, presented by the same group, is at the University of Houston.

Tech will donate awards for outstanding actor, actress, and director, all three being permanent trophies. The French Little Theatre award for outstanding character performance, and the diction cup, donated by Players Guild and Mary Hardin-Baylor, are also permanent. Tech won the cup for diction last spring at the tournament held in El Paso.

LUBBOCK, Tex., April--. Plumber's chains, cabinet hinges, harness buckles, and paper clips, ingeniously combined with brightly colored raffia, felt, yarn, and grosgrain ribbon, are the materials used in women's belts, to be displayed by a costume design class at the annual Texas Technological College home economics open house, April 8-9. Tying cord, colored rubber bands, cocktail picks, cork, and golf tees are also used in various combinations.

Cutting and polishing of native stone, gathered from Tech campus and used in handmade costume jewelry, will be demonstrated. Students in applied arts will show the processes of block printing and stencilling. A textile design exhibit will explain simple tests for identifying fibers.

Other aspects of the show are diet charts for fevers, diabetics, and hyper-acidity. Experimental animals will show effects of different diets. Low and high calorie diets will also be outlined by means of charts. Feature of the demonstration cookery is a children's Easter party, the making of hors d'oeuvres and decorating cakes.

Tech nursery school and home management house will also be open for inspection during the show.

Students in clothing and textiles will exhibit footstools in different stages of construction, furniture refinishing, kitchen ensembles, household linens, and upholstering. They will also demonstrate freehand dressmaking, draping costumes on dress forms and cutting garments without patterns.

LUBBOCK, Tex., April.--. Third Yaqui expedition from Texas Technological College, led by Dr. W. C. Holden, dean of historical and sociological research, will arrive at Nogales, Arizona, Saturday, April 9, and will reach Yaqui territory Wednesday, April 13.

Chief purpose of the expedition, Dr. Holden says, is to compare the sequence of the "Fiesta de Gloria" celebration in its latest form with the ceremony observed four years ago. Party members will work in shifts throughout the four-day ceremony, taking notes and photographs of the proceedings.

The party includes Dr. C. J. Wagner, surgeon; Dr. G. C. Turner, dentist; Dr. J. C. Anderson, optometrist; Winston Reeves, photographer; Reeves Henly, editor-elect of Treador, college newspaper; and Lewis Jones and Winford Baze, student truck drivers and cooks.

Leaving Yaqui country Easter Sunday after final rituals of the ceremony, the group expects to arrive in Lubbock April 19 or 20.

##

LUBBOCK, Tex., April.--. Mary Leidigh, home economics head at Panhandle A. & M., Goodwell, Okla., is the first woman elected to honorary membership in 4-H and FFA clubs in Oklahoma. Election took place at a recent meeting in Goodwell.

Miss Leidigh was graduated from Texas Technological College in 1934.

##

LUBBOCK, Tex., April.--. Student biologists from Texas Technological College will observe common forms of plant and animal life, in a six-week summer field course conducted in Gallinas canyon, June 9 to July 16. Dr. R. A. Studhalter, head professor of biology, will direct classes and field work. Freshman credit will be given.

Camp Cina del Mundo in Santa Fe National forest will be used as headquarters. Former trips have included visits to Santa Fe, Taos, Holman Hill, Angostura canyon near Tres Ritos, Fall Creek, climbs to Johnson's Mesa, El Cielo, and Hermit's peak.

LUBBOCK, Tex., April.--. Ralph M. Brown of Denison, senior student in business administration at Texas Technological College, has been appointed graduate assistant in accounting at Northwestern university for 1938-39. Brown receives a scholarship of \$700 plus school tuition and fees. He will specialize in income tax procedure.

He graduates from Tech in August as one of the highest ranking students from the department of economics and business administration. Brown was student assistant in business administration here last year, and is now part time instructor in accounting laboratory. He attended Texas Christian University one year before entering Tech.

Plant management, recording methods, and different types of plant equipment and arrangement will be observed. Students will study milk, butter condensed milk and powdered milk plants and will visit at least one cheese factory. Special emphasis will be placed on the sweet cream and butter industry in South Texas.

Students will appear on a Rotary program at Marshall April 14. Other cities to be visited are: Abilene, San Angelo, San Antonio, Kingsville, Corpus Christi, Houston, Denison, Sulphur Springs, Sherman, Dallas, and Fort Worth.

Members of the inspecting group are James Alexander, Breckenridge; Foy Boone, Tulia; Morris Hill, Waco; Jack Huber, Lubbock; Jack Jacobs, Lubbock; J. P. Kilgore, Brownwood; Lawrence Sides, Lubbock; and Bill Tinney, Bowie.

##

LUBBOCK, Tex., April.--. A rural religious short course will be offered in the Texas Technological College division of agriculture the first or second week in July, announces Dean A. H. Leidigh. The course, first offered last summer, is being repeated at request of Lubbock pastors.

LUBBOCK, Tex., April.--. Seven chemistry teachers and 15 students from Texas Technological College will attend the first national meeting of the American Chemical society ever held in Texas, the ninety-fifth semi-annual meeting at Dallas April 18-21. Dr. W. M. Craig, professor, will present two papers.

Other faculty members to attend are; Dean R. C. Goodwin, head professor; Valerie Schneider and W. M. Slagle, associate professors; Aaron G. Oberg, Mrs. J. M. Marshall, and F. W. Rolf, instructors.

Tech student affiliate members are petitioning for a local affiliate chapter.

##

LUBBOCK, Tex., April.--. Playing by ear, Texas Technological College profs screeched and blared through a hilarious rendition of "Peruna" at the Red Raider show Wednesday evening, April 6. The impromptu orchestra specialized in wind instruments, using clarinet, saxophone, trombone, trumpet, and bass horn borrowed from Matador band members.

Berl Huffman, Picador coach and master of ceremonies, who summoned surprised professors from the audience, announced the number as the "hidden talent" act.

LUBBOCK, Tex., April.--. Donald Henry, graduate assistant in government at Texas Technological College, has been appointed intern in the 1938-39 training program of the Federal government in Washington, D. C. Henry is one of 50 college seniors and graduates in the United States selected by the National Institute of Public Affairs for this work. Henry's home is in Lorenzo.

Purpose of the program is to increase interest of American youth in public affairs, to help in development of career opportunities in government administration, and to add to academic preparation for public service the experience of working with government officials.

High scholastic standing, exceptional qualities of character, ability and aptitude for leadership are essential to appointment. Government supervisors of interns include executive officers, administrative assistants, bureau chiefs, budget, personnel, and research directors in the Federal government.

LUBBOCK, Tex., April.--. President and Mrs. Bradford Knapp left Texas Technological College last week for Temple, San Antonio, and Galveston where Dr. Knapp will rest and receive medical treatment for several weeks.

An executive committee composed of Dean J. M. Gordon, Dr. Harry L. Kent, director of administrative research, and W. T. Gaston, business manager, will conduct college affairs in President Knapp's absence.

##

LUBBOCK, Tex., April.--. Solar system on a miniature scale has been set up on Texas Technological College campus. Arranged for the tenth annual engineering show, the model is mounted on pedestals placed at scaled distances of one foot per million miles.

Earth and moon system on this scale is 93 feet south of the sun. Other planets range from a distance of 36 feet for Mercury to 886 feet for ringed Saturn. Modeled from clay, the planets vary in size from .04 -inch diameter to 1.1 inches.

Dr. R. S. Underwood, professor of mathematics, worked out scales for diameters and distances on the modeled exhibit.

Students assisting in the project were L. V. Assiter, Floyd-ada; Roy Sanders, Hobbs, N. M.; Roy Hamilton, Paducah; and Charley Daviss, Lubbock.

LUBBOCK, Tex., April.--. Sweepstake honors in the vocational agricultural contest at Texas Technological College last week went to Tulia, as did the Santa Fe award for the best livestock judging team. The Tulia team also placed first in poultry judging, and third in plant production and cotton judging.

Friona, second in sweepstakes, carried off first place in both farm shop and meat identification contests. Lorenzo placed third in sweepstakes.

Honors in farm shop contest went to Friona, with the Meadow team taking second place and Post third. Friona also won first place in meat identification, New Deal second, and New Home third. Dairy products winner was Clarendon, second place going to Lorenzo, and third to Seminole.

Other placing teams were as follows: livestock judging - second, Ropesville, third, New Deal; plant production - Lubbock, first, and Spur, second; cotton judging - Quail first, Littlefield second; poultry - Lorenzo second, Crosbyton third.

Ropesville won first place in dairy cattle judging, Cotton Center second, and Crosbyton third.

Approximately 250 teams participated in the eight contests. Dairy cattle was the largest with 61 teams competing, and livestock next with 57. Entrants in other contests were: poultry, 50; dairy products, 29; plant production, 17; farm shop, 13; cotton, 12; meat identification, 11.

LUBBOCK, Tex., April.--. Fifty prize in the dressed carcass contest and first prize in its class, at the Southwestern Exposition and Fat Stock show March 11-20, was won by the Texas Technological College steer, according to notice received this week. Notification of dressed carcass yields came from John B. Davis, secretary-manager of the exposition, to W. L. Stangel, head professor of animal husbandry.

Records made by Tech steers in dressed carcass contests are as follows: 1936, third, seventh, and tenth places; 1935, first, sixth, ninth; 1934, first, second, third, tie for fourth; 1933, first, second, fifth; 1932, first, fourth. In 1935 it tied the all-time record in the exposition's contests of 71.49 per cent yield.

##

LUBBOCK, Tex., April.--. A. J. Hewett, Texas Technological College graduate, will represent the Texas school at the 100th anniversary celebration of the chartering of Greensboro college, Greensboro, N. C., May 20 and 21.

One of the first students to register at Tech in 1925, Hewett was graduated in architectural engineering in 1929. Since graduation he has been employed by Truscon Steel company at Greensboro.

##

LUBBOCK, Tex., April.-- Gradual adoption of civilization's products by Yaqui Indians of Sonora, Mexico, ^{was} proved to be the most distinctive "find" of Texas Technological College's third Yaqui expedition which returned here this week.

Dr. William Curry Holden, head professor of history and anthropology at Tech and leader of the expedition, explained upon his return that many of the Indian women and children have begun wearing modern slippers besides discarding many of the petticoats they customarily use. Also several of the Yaqui men have abandoned traditional sandals for modern oxfords. However, the use of sandals is still predominant.

The expedition set up headquarters at Torin, Sonora, where for five days it observed "La Fiesta de Gloria", Easter festival of the Yaqui Indians. Motion pictures as well as still photographs were made of the ceremonies. These pictures will serve as complementary material for the Yaqui studies begun by the first Tech group in 1934.

In addition to gathering material on the Easter festival, the expedition continued studies of health and customs of the Yaquis. Three Lubbock physicians, members of the party, worked among the Indians, giving them the benefit of modern medicine besides studying the general conditions.

Another expedition to the Yaqui territory which is located approximately 70 miles southeast of Guaymas, Sonora, will probably be made within the next three or four years, Dr. Holden said.

Members of the party included Dr. Holden; Dr. C. J. Wagner, chief of surgical staff at West Texas Hospital, Lubbock; Dr. G. C. Turner, Lubbock dentist; Dr. J. C. Anderson, Lubbock optometrist; Winston Reeves, college instructor in news photography; Reeves Henly, editor-elect of The Toreador, college newspaper; and Winford Baze and Lewis Jones, Tech letter men, cooks and drivers of the expedition supply truck.

San Angelo Standard

LUBBOCK, Tex., April.--. Program for the regional meeting of Texas Academy of Science at Texas Technological College May 6 and 7 has been mailed to 18 colleges in west and northwest Texas. Headquarters for the conference are in West Texas museum.

Interest centers in the general sessions Friday morning and evening. F. B. Isley, Trinity university, president of the West Texas region, will discuss the Texas academy at the morning meeting. Other morning topics are "Value of Movie Camera for Educational Teachings", W. G. McMillan of Lubbock; "Aerial Photography and Aerial Mapping", Capt. Frank A. Pettit, Texas Tech; "The Press Under Dictatorships", Cecil Horne, Texas Tech.

President D. M. Wiggins of the College of Mines and Metallurgy at El Paso will address the evening session on science and modern social institutions. Recent development in surgery of the sympathetic nervous system will be discussed by O. W. English, Lubbock physician, and the means of using present-day X-radiation therapy by Dr. C. C. Mansell of Lubbock.

Meeting simultaneously Friday afternoon and Saturday morning are the following sections of social and physical sciences: engineering, chemistry and geology; astronomy, mathematics, and physics; agriculture, botanical and zoological sciences; archeology, history, government and economics; education, philosophy, psychology, and sociology; and the philological and social sciences.

Dr. E. F. George, head professor of physics at Tech, is chairman of the 1938 regional session.

30-1-10-11-12-13-14-15-16-17-18-19-20-21-22-23-24-25-26-27-28-29-30-31-32-33-34-35-36-37-38-39-40-41-42-43-44-45-46-47-48-49-50-51-52-53-54-55-56-57-58-59-60-61-62-63-64-65-66-67-68-69-70-71-72-73-74-75-76-77-78-79-80-81-82-83-84-85-86-87-88-89-90-91-92-93-94-95-96-97-98-99-100

LUBBOCK, Tex., April.--. More than 2,700 seniors, athletes, and faculty members from 26 West Texas high schools have made reservations for the Texas Technological College third annual athletic fiesta Saturday, April 30. The list is not yet complete, according to T. H. "Bo" Williams, graduate manager of athletics, who anticipates 6,000 guests from 80 high schools will attend.

Activities begin Saturday afternoon at 2 o'clock, when the Tech recqueteers play West Texas State Teachers college squaddmen on campus courts.

Harry Faulkner, business manager of the Lubbock baseball team, has invited fiesta visitors to the first professional baseball game in West Texas for many years, between Lubbock and Clovis, N. M., at 3 p. m.

Evening events include a spring football game between Red Raiders and Sul Ross Loboes, demonstrations of men's intramural sports, women's gymnastics, review of Tech's ROTC unit, and drill by Matador band.

Tickets to all fiesta events are complimentary to high school visitors.

##

LUBBOCK, Tex., April.--. Little Jack Little and his 14-piece orchestra will play on Texas Technological College artist course program Tuesday evening, May 10, at Lubbock High school auditorium. Concert begins at 8 o'clock. R. A. Mills, professor of English, is chairman of artist course committee.

##

LUBBOCK, Tex., April.--. Texas Tech's travelling golfers journey into College Station, Texas, Monday, April 25, for match play against the varsity linkmen of Texas A. & M.

The following Thursday, April 28, the Red Raiders are scheduled to meet Texas university's Longhorns. Squads from T. W. C. and T. C. U. were met in Fort Worth last week end. Return from Austin will be made Friday, with no contest listed definitely.

Making the trip are Manson Allen, Tech's number one player and consistent medalist; Lindsay Telford, Border Conference champion and recent winner of the local college golf crown; Donald Doherty, winner of the 1937 tourney; and Ford Sturdivant.

A group of Texas Tech and Lubbock golfers split even in both doubles and singles matches with a team of Clovis, New Mexico Country club linkmen last Sunday.

LUBBOCK, Tex., April.--. Six ancient, muzzle loading guns and many pounds of Indian artifacts from North, Central, and South America, old jewelry and other historical pieces are included in a gift to West Texas museum, situated on Texas Technological College campus, from Frank A. Runkles of Levelland. The donation is the largest single collection of material ever presented to the museum.

LUBBOCK, Tex., April.--. M. E. Ogdon, associate professor of government at Texas Technological College, is in Washington, D. C., where he will read a paper April 28 before the American Society of International Law. Subject of his address is "Teaching of International Law in Secondary Colleges".

Ogdon was awarded the degree of doctor of philosophy from Columbia university in 1935. He attended University of California on a Carnegie fellowship in 1933-34. He has been a member of Tech faculty since 1929.

##

LUBBOCK, Tex., April.--. Miss Louise Weil of Hale county, sophomore home economics student in Texas Technological College, was the winner of the 1936 Texas home demonstration college scholarship. A picture of Miss Weil as a happy Tech student has just been published in a bulletin of the Girls' 4-H Club Work in Texas.

##

LUBBOCK, Tex., April.--. An x-ray machine valued at \$10,000 has been donated to the Physics department of Texas Technological College by the General Electric X-Ray corporation, according to Dr. E. F. George, head of the Physics department. The machine will be used for instructional and research work.

##

LUBBOCK, Tex., April.--. Texas Technological College was named host for the 1941 meeting of the southwestern division of the American Association for the Advancement of Science at Albuquerque, N. M., April 28. The 1940 meeting convenes in Tucson, Ariz., and the 1939 meeting in Alpine.

Industrial future of the southwestern United States was stressed in a paper presented by Dr. W. M. Craig, chemistry professor, at the four-day session in Albuquerque. Other Tech faculty members participating in the program were: Dr. R. A. Studhalter, head professor of biology; Miss Martha E. Cox, graduate fellow in biology; Dr. R. S. Underwood, mathematics professor; Dr. E. F. George, head professor of physics; and Dr. F. W. Sparks, mathematics professor, member of the executive committee.

##

LUBBOCK, Tex., April.--. Invitation to Texas Technological College to submit examples of craft work, for display at the American Home Economics Association convention in Pittsburgh next June, has been received by Miss Margaret W. Weeks, dean of home economics. Ten plates will be selected for the central section exhibit, made up of Nebraska, Iowa, Kansas, Oklahoma, and Texas.

Request for material came from the related art committee of the textiles and clothing division. Purpose is to show the type of work done in different sections of the United States.

LUBBOCK, Tex., April.--. Second of two milk sanitation short courses in Texas will meet at Texas Technological College May 9-11.

The first one was held at Texas A. & M., April 25-27. Sponsors of the short courses, besides Tech and A. & M., are the committee on milk of the Texas Public Health Association and the State Department of Health.

"Purpose of the short courses," says K. M. Renner, head professor of dairy manufacturing at Tech who is in charge of the program, "is to raise qualifications of milk inspectors."

Milk inspectors for the state, districts, counties and cities, and public health officials are invited to attend. The two short courses inaugurate certification of milk inspectors in Texas.

Principal speakers at the Tech short course are W. E. Roberts, milk sanitarian of the State Health Department; F. D. Brock, chief of the Bureau of Foods and Drugs, State Department of Health; F. A. Clark, associate milk specialist of the United States Public Health Service.

Members of Tech faculty who will speak and their subjects are: M. G. Pederson, assistant professor of dairy manufacturing, "Dairy Bacteriology and Plant Operation"; Laurence G. Harmon, instructor in dairy manufacturing and creamery superintendent, "Sanitation and Quality Production of Frozen Desserts"; W. L. Stangel, head professor of animal husbandry, "Economical Feeding of the Dairy Cow"; G. W. Parkhill, assistant professor of civil engineering, "Disposal of Dairy Waste"; K. M. Renner, "Food Value of Dairy Products", and "Advantages and Disadvantages of the Standard Milk Ordinance."; F. G. Harbaugh, associate professor of animal husbandry and veterinarian, "Present Knowledge of Mastitis in Bang's Disease in Dairy Herds."

LUBBOCK, Tex., April.--. W. L. Stangel, head of the animal husbandry department at Texas Technological College, recently made a trip to San Angelo where he purchased two Aberdeen-Angus calves from W. H. Hill, whose ranch is located in Crockett county. These calves will be used for class instruction at Tech.

Stangel also assisted in the purchase of 23 other Aberdeen-Angus calves for vocational boys of Wolfforth, Claude, Moody, and Eddy. He is superintendent of the Aberdeen-Angus division of the Fort Worth Fat Stock show, and is anxious to build up the work of the vocational boys in the baby beef division.

The college owns two herds of beef cattle, Herefords and Aberdeen-Angus, but the herds are not sufficiently large to produce enough calves for class instruction in the animal husbandry department, making it necessary to purchase calves from outside herds.

LUBBOCK, Tex., May.--. Courses in traffic safety and automobile operation will be offered in the Texas Technological College summer sessions, conducted by the department of civil engineering cooperating with the department of education and psychology.

"The question of safety on our highways has become a national problem which can best be solved through the education of our youth to drive safely," says F. L. McRee, professor of civil engineering and instructor in traffic safety, in urging representative teachers from high schools to enrol.

Civil Engineering 435 or Education 4310, to be given the first term, is a course designed to present to teachers the materials and methods used in teaching traffic safety and automobile operation to students in junior and senior high schools. A prerequisite course will include intensive study of traffic laws, the law of negligence as applied to traffic accidents, and the theory of the working mechanism of the automobile.

Both courses have been approved by the State Department of Education as advanced methods courses and carry both graduate and undergraduate credit.

National recognition was given the traffic safety course at Tech last summer by traffic boards and many national societies. Only a few colleges in the United States offered a similar course last year.

2-1-36 Journal*

LUBBOCK, Tex., May.--. Wild flowers of many varieties, gathered from 19 plains counties by the State Highway department, were shown at West Texas Museum, situated on Texas Technological College campus, Sunday, May 8. W. B. Holden, jr., division planting foreman and 1934 graduate in agriculture, directed the display.

Purpose of the wild flower show is to acquaint the public with varieties native to the plains section, and to encourage preservation of wild flowers along county roads and state highways. This is the third annual exhibit.

Botanical families represented were evening primrose, aster, verbena, mint, pea, wild mustard, crow foot, pentstemon, and Indian blanket. Flowers were cut and separated by varieties by foremen in the different counties.

Counties from which flowers were collected are Swisher, Castro, Briscoe, Floyd, Hale, Lamb, Bailey, Cochran, Hockley, Lubbock, Crosby, Lynn, Dawson, Gaines, Andrews, Terry, Garza, Yoakum, and Parmer.

LUBBOCK, Tex., May.--. Approximately 135 women students at Texas Technological College will be honored in the seventh annual women's recognition service May 17. Women students recognized will wear the traditional white and will be presented with arm bouquets of larkspur and roses by pages, also dressed in white. Ceremony takes place on the green south of the Administration building.

Points that will serve as basis for recognizing outstanding women are as follows: high scholastic average; winners of Double Key and Pan-Hellenic awards for 1937; members of Phi Upsilon Omicron, national honorary home economics organization; members of Women's Press Club, honorary scholarship organization; members of Alpha Chi, national scholarship organization; members of Alpha Psi Omega, national honorary dramatic organization; members of Forum, honorary citizenship organization.

One or more outstanding students on staffs of La Ventana, college yearbook, and Toreador, college newspaper, will also receive recognition. Representatives of Association of Women Students, Las Leales, service club, Women's Athletic association, Young Women's Christian association, and women officers of Student Council are also included in the honored list.

The event is sponsored by the Association of Women Students and Quarterly Club, an organization of faculty women.

"Lamb in His Bosom", by Caroline Miller, was desired by a studious ed. The title slipped his memory, but the idea remained. He got the book even though he asked for "Sheep in His Chest."

A student admitted filling out a blue slip for a book entitled "Ma Peasant", which his roommate had suggested as diverting reading. After a slight delay, the library assistant handed him the book by Maupassant, containing stories of French life.

A freshman wanted Werner's "Every College Student's Problems" but he asked instead for "Troubles of Every College Boy."

"The book is about this long, and about this wide, and about this thick," he said measuring the dimensions with his hands. "It has a red back and is about education."

"Imagine my embarrassment," a young lady declared, "when I found an overdue book on the bottom shelf of the bookcase at home, after I had told the library assistant in rather strong language that I had turned it in three days before."

LUBBOCK, Tex., May.--. One hundred student livestock judges will participate in sophomore-junior and freshman contests at Texas Technological College May 21. The contests are held annually, this being the eighth for the upper class group and the twelfth for freshmen. Contests are sponsored by the department of animal husbandry and conducted by members of Block and Bridle club.

Forty boys will enter the upper class contest, which compares with the American Royal and International contest in number and classes of animals judged. Beef and dairy cattle, horses, hogs, and sheep will be judged in 12 classes with 8 sets of oral reasons, making possible a score of 1,000 points for each individual.

Professor Fred H. Leinbach, coach of Colorado Agricultural college livestock team, is to be feature judge of this contest. High individual will receive a national Block and Bridle club medal. High man in each division will receive a book on the particular kind of stock which he judged.

Sixty freshmen, representing the upper 40 per cent of the livestock judging classes, are eligible for the freshman contest. Two classes of beef and dairy cattle, horses, hogs, and sheep will be judged. Winner in the entire contest will be presented with a gold medal, and high entrant in each class will have his name placed on the honor plaque in the livestock judging pavilion.

Principal judge of this contest is Rufus R. Peeples, superintendent of collegiate contest at Fort Worth, and livestock farmer of Mexia.

LUBBOCK, Tex., May.--. Miss Elizabeth H. West, Texas Technological College librarian, is attending a three-day session of the Texas Library association meeting at Waco.

As a former president of the association, Miss West will sit on the speaker's platform with other former presidents. She was present at the library association's organization in 1902 and served as president from 1914 to 1916.

Program for the meeting will center around the recent People's Library movement for extension and improvement of Texas libraries.

LUBBOCK, Tex., May.--. Plow point of the Georgia stock type, estimated to be 75 years old, has been added to the collection of pioneer articles at West Texas museum, situated on Texas Technological College campus, this week. Workmanship shows the piece, which was found near Packsaddle mountain in Llano county, was made in a blacksmith shop, and its cutting edge was heat-welded to the mold board.

Laboratory staff of the museum is restoring a turtle fossil donated by Dr. M. A. Stainbrook, professor of geology, who found it in the South Dakota badlands. Resembling the prairie tortoise, it dates from the Eocene age and is about three times as large as its West Texas relatives. Also in process of restoration is a backbone section of the crocodile-like animal phytosaur of the Dockum age, which was found by Dr. Stainbrook and excavated by a student near Kalgary.

LUBBOCK, Tex., May.--. Ten visiting faculty members have been announced for the 1938 summer session at Texas Technological College. First summer term begins June 9 and closes July 16. Dates for second term are July 19 to August 25.

Lecturers in education are Lewis B. Cooper, director of research for Texas State Teachers association, Fort Worth; W. B. Irvin, superintendent of Lubbock city schools; and L. H. Moore, associate professor of philosophy and education at Texas State College for Women, Denton. Miss Clara Secrest, teacher of penmanship and drawing in Big Spring public schools, has been appointed special instructor in penmanship in the education department.

Misses Mina Marie Wolf of Columbia university and Helen Dunlap of McKinney, Texas, will act as instructors in foods and nutrition. Miss Wolf received a master's degree from Tech in 1937 and is working toward a doctor of philosophy in foods and nutrition, on a two-year scholarship at Columbia university. Miss Dunlap is home demonstration agent for Collin county.

Visiting instructors in foreign languages are Mrs Mary Frances Bengé and Gabriel Engerrand. Both are former members of the Tech foreign language department. Engerrand holds a scholarship for advanced work at University of Iowa this year.

Mrs. Floy F. Hooper of Portland, Oregon, will instruct in architecture and allied arts, and Miss Leonore K. Alway, instructor in physical education at University of Nebraska, has been appointed to the women's physical education staff for the summer session.

nological College journalism students have recently b
accepted for publication by magazines.

John W. (Buddy) Wilson, junior journalism

LUBBOCK, Tex., May.-- Articles of several Texas Technological College journalism students have recently been published or accepted for publication by magazines.

John W. (Buddy) Wilson, junior journalism major from Wink,
has received notification from the Commercial Car Journal of Philadel-
phia that a 2500-word article had been accepted for which he would be
paid \$25. The subject of the story was on the controversy of Texas
weight and speed limit for trucks or "Why Truck Drivers Hate the Cops".
Young Wilson has driven trucks in the oil fields for his father.

Travis Foster, senior journalism student from Rising Star, was author of the leading article in the last issue of the Texas Press Messenger, entitled "Journalism Takes First Rank in West Texas Colleges." Foster earns his way through college as an employee of the Tech Press.

Paul White, senior journalism student from Hamlin, is author of an article on work of the Tech agricultural division, for which he received \$10. The article will appear in Farm and Ranch. White has had a number of articles published during his work in college.

Betty Bizzell, senior journalism student from Lubbock, was author of an article, "Ready-Made Mistresses of the Home," which appeared in the January issue of West Texas Today.

A check for \$85 from the Forum magazine is exhibited by Ruby Ellison, senior speech major, from Lubbock. Subject of her article is "Fair Weather Friends."

##

LUBBOCK, Tex., May.--. With four titles to defend, 13 Texas Tech athletes departed this week for Tempe, Arizona, and the Border Conference track and field meet. A five man golf squad, tutored by Coach J. W. Jackson, and mentor Jimmie Allen's quartet of netters left Wednesday for the meet. Coach Berl Huffman and five track stars embarked Thursday for the Border loop competition on the cinder paths.

Titles the Techsters defend Saturday include championships in tennis singles and doubles, and individual and team trophies in golf.

Lindsay Telford, 1937 individual links champ, Captain Manson Allen, Ford Sturdivant, and Donald Doherty comprise the golf squad who are favorites to retain the titles annexed last year.

Coach Jimmie Allen has last year's singles champion, Wilson Chapman; Harry Jordan, who teamed with Chapman to win the doubles in 1937; Sidney Moore; and Aubrey McCarty carrying the colors in the Border competition.

Marsh Farmer, ace hurdler, Elmer Tarbox and Bobby Holmes, sprinters, James Foster and Wallace Fields, middle-distance men, make up the track aggregation under Huffman.

LUBBOCK, Tex., May.---. Wearing a replica of King Edward's crown, Elray Lewis of Brownfield will reign as queen of the sixth annual Texas Technological College Cotton Carnival May 20. She was elected by popular vote of the student body from among five candidates.

Marching across cotton bales to a cotton throne at the Lubbock High School auditorium, she will be crowned by Harold Cocanougher of Lubbock as King Cotton. The queen and her attendants will be dressed in cotton frocks.

Style show entrants, who will pass in review before the king and queen, will display sport, street, afternoon, and evening dresses of cotton materials.

This is a part of National Cotton Week, a movement to help popularize cotton fabrics.

Officers and committee heads in charge of arranging the Cotton Carnival are members of Phi Psi, national honorary textile fraternity, the sponsoring organization: Charles Wilson of Tulia, general manager; Harry Patterson of Athens, assistant manager; Darrell Branton of Ralls, sales manager; Kendall Onstott of Lubbock, queen election and models; J. R. Earnest of Lamesa, publicity; and Milton Hallmark of Loraine, accountant.

From Texas Technological College Free News Service - Cecil Horne

LUBBOCK, Tex., May.--Forty-five and five tenths per cent of men students enrolled at Texas Technological College are employed, according to figures compiled in the office of J. G. Allen, acting dean of men.

Of the 1861 men students enrolled, 847 have employment with 138 employed by the National Youth Administration.

Average salary per month is \$29.38 or 32.4¢ per hour, an increase of 50¢ a month for every man employed, or an increase of 7.1 per hour over the average in 1937. These figures are based on estimates of \$25 per month for room and board, \$7.50 for room only, and \$18 for meals only.

Men students work an average of 3.5 hours per day for a 26 day month. These figures are based on students' statements and estimates in cases where no hours were stated at 5 hours per day for room and board. Records show that in 1937 only 906 students made applications for work while 1257 applied this year. Of the number applying for work, there are 150 still unemployed as compared to 119 who remained without work during the spring semester of 1937.

This year the college employs regularly 260 students, an increase of 77 over last year's number.

Comparison by divisions shows employment of 172 agricultural students, 414 arts and sciences students, and 261 engineering students.

*Investigator Reports
Answer Enterprise (Edin)*

LUBBOCK, Tex., May.--. The brief, urging location of the proposed Federal cotton laboratory in Texas, which will be presented in Washington, D. C., May 31, has the full support of authorities at Texas Technological College. A committee from the college, working with the state-wide committee, includes Dean O. V. Adams of the engineering division, Dean A. H. Leidigh of the agricultural division, Dean R. C. Goodwin of the graduate division, and M. E. Heard, head of the textile department.

Heard, with others from this section, will make the trip to Washington with the Texas delegation. The first endeavor of every Texas group, it is explained, is to secure the laboratory for Texas, the world's largest cotton producing area. Other cotton producing areas in the South are also making an effort to secure location of the laboratory.

Admission*

LUBBOCK, Tex., May.--. Awards of the West Texas Scholastic Press Clinic, high school newspaper association, have been announced through the journalism department at Texas Technological College. Entries included printed papers, school pages in the local newspaper, and mimeographed papers. Award in the annual division will be announced later.

The Westerner World, Lubbock High school newspaper, was given first place among the printed papers. Prize is a Royal portable typewriter donated by Hester's Office Supply Company of Lubbock. The next three places in order were given to The Broadcaster, Iraan; The Odessan, Odessa; The Cardinal, Hermleigh. Out of a possible 1,000 points there was a variation of only 30 points between the four papers.

The Eagle's Tale, page in local paper of the Canyon High school, was awarded first place. Prize is \$5 worth of office supplies donated by the Baker Printing Company of Lubbock. The next three places in order went to The Corral, Wheeler; The Broncho Range, Clarendon; El Sombrero, Perryton.

First place in mimeograph papers went to The Cowboy World, Lubbock Junior High school. Award for the winner is \$20 worth of mimeograph supplies donated by the following A. B. Dick dealers: Abilene Printing and Stationery Co., Abilene; Russell Stationery Co., Amarillo; Field-Parker Co., Inc., El Paso; The Lubbock Printing Co., Lubbock.

Other three places in order were given to The Avalanche, George M. Hunt school, Lubbock; The Lariat, K. Carter school, Lubbock; The Wolverine, Spring Lake.

LUBBOCK, Tex., May. 4. - A freshman student at Texas Technological College wondered if his examination papers were read after all, so he wrote at the end of a paper:

"Twinkle, twinkle, little star

How I wonder if these are

Ever read."

That one was.

Modern dances have their influence on the thinking of the college youth. One wrote that the Spanish Armada was a "dance somewhat like the rhumba, which originated during the time of Queen Elizabeth." Other answers found in freshman history exam papers indicate resourcefulness:

"Mohammedanism is an island in the Mediterranean sea on which a monastery was built."

"The Boston Tea Party was the first social gathering of women in Boston at which tea was served, and the custom of serving tea has come down to the present day."

"The Pilgrim Fathers settled at Plymouth Rock because the winters were very cold, and the rock was big enough to give protection from the icy north wind."

"Martin Luther started drinking a lot in order to forget his troubles, which was mostly a sickly, nagging wife."

"The navigation laws were passed to forbid people raising certain crops which navigated to the government."

"When Louise XIV invaded Holland the Dutch cut the dikes and erfdom flooded the country."

LUBBOCK, Tex., May.--. For the first time in Texas a summer course for "Public Health Workers and Sanitation Officers" is to be offered by Texas Technological College during the coming summer session, starting June 9 and closing August 25. The course is jointly sponsored by the Texas State Department of Education, and Texas Technological College. The program has the endorsement and support of the League of Texas Municipalities and the Texas State Planning Board.

Heretofore such officers have had to go to Vanderbilt University or Harvard for their training. Thirty have gone from Texas to Vanderbilt during the last two years. The course will consist of lectures, laboratory exercises and demonstrations, and field inspection work. Instructors will be members of the teaching staff of Texas Technological College, visiting lecturers from the United States Public Health Service, the Texas State Department of Health, and other lecturers and specialists who are engaged in public health work.

Persons successfully completing the entire course and the subsequent examinations will be awarded a certificate which will be recognized by the Texas State Health Department. No tuition is to be charged but registration fees will amount to approximately \$25. Regular facilities of the college will be available to those taking this course.

The course will be of interest to the following: city and county health officers, directors of city and county health units, food and drug inspectors, sanitary inspectors, dairy inspectors, water works superintendents and operators, sewerage system superintendents and operators, city managers, superintendents of garbage collection and disposal systems, swimming pool operators and owners, sanitary engineers, plumbing inspectors, building inspectors, laboratory technicians, city engineers, and architects.

LUBBOCK, Tex., May.--. Carrying out the idea of a technological institution a course will be offered this summer at Texas Technological College for public health workers and sanitation officers in Texas. It is stated that there are 3,000 persons in the state who are eligible for this work.

This is the first time such work has been offered in Texas and Texas Tech is the only institution approved for teaching the course. It is sponsored by the Texas State Department of Health and the Vocational Division of the Texas State Department of Education, and approved by League of Texas Municipalities and the Texas State Planning Board.

During the last two years 30 individuals from Texas have gone to Vanderbilt University in order to obtain the work that is to be offered at Tech. The course requires about three months, opening June 9 and closing August 25. Registration fees amount to about \$25, with all laboratory and other facilities of the college available to those who enrol.

Subject matter of the course will consist of lectures and laboratory exercises and will cover such things as plumbing, water-works and sewerage problems, garbage disposal, rodent control, mosquito control, swimming pool operation, proper handling of milk for distribution, and general sanitary problems.

LUBBOCK, Tex., June.--. Speakers for the three-week soil conservation course at Texas Technological College July 19 to August 2 have been announced by Dr. Arthur W. Young, acting head professor of plant industry and director of the course. Instruction in both the fundamental and practical aspects of soil erosion and conservation will be given with special emphasis on wind erosion and control.

Class work in the mornings, under the supervision of Dr. Young, will be supplemented by special afternoon lectures from members of the soil conservation service staff of the U. S. Department of Agriculture, Region 6, at Amarillo:

H. H. Finnell, regional director; Cyril Luker, associate regional conservator; Dr. Claude L. Fly and Dave Cawlfeld, associate soil technologists; D. A. Dobkins, in charge of research publications; Fred Sykes, regional agronomist; R. R. Hinde and Roy Watson, associate agronomists; Philip Allen, regional biologist; R. C. Nelson, regional engineer; Eugene C. Buie and James C. Wilcox, association agricultural engineers; H. D. Petheram, regional forester; James E. Smith, regional nurseryman; and B. H. Hopkins, head of erosion control practice.

A four-day field trip to three or four soil conservation project and camp areas in region 6 will supplement class work.

LUBBOCK, Tex., June.--. Academic cap and gown, bought and worn at Baylor university in 1907 by Crate Dalton, author of "Out of the Ground", a story of the Breckenridge oil field, makes its valedictory appearance at August commencement exercises at Texas Technological College.

Owned by Lowell A. Dalton of Lubbock, civil engineering student who expects to wear it at that time, this academic regalia makes its thirty-third appearance next week when Douglass W. Ross, Jr., civil engineering student from Berkeley, Calif., completes his work at Tech.

"The cap and gown got out of the family in 1910," Dalton says, "but were regained in 1921."

Lena Fae Dalton, daughter of the original wearer, was graduated in them at Baylor university in 1933.

Well-known men who have worn them are J. D. Hill, president of a state teachers college in Wisconsin; Jake Wooters, baby specialist of Houston; W. J. Boswell, pastor of North Waco Baptist church, Waco; George P. Isbell, Jr., vice-president of the Southern Prison company.

LUBBOCK, Tex., June.--. K. M. Renner, head professor of dairy manufacturing at Texas Technological College, will address the American Dairy Science meet at Ohio State university, Columbus, O., June 14-17. Renner is one of four speakers at the general session of the educational conference on "A Service Course in Dairying for Home Economics Students."

While there he will also attend the sectional sessions on manufacturing.

facturing
following

The expedition which was scheduled to leave June 8 and return July 14, will make excursions into eight Mexican towns and villages in central and southern portions of the nation. New dates have been tentatively set as July 19 to August 23.

##

LUBBOCK, Tex., June.--. Six June graduates in dairy manufacturing at Texas Technological College have received employment following graduation, announces K. M. Renner, head professor.

Jack Jacobs has been appointed general manager of a new creamery at Quemado. He will also supervise purchase of equipment for the plant, now in process of construction.

Lawrence Sides will assist in the new cheese department of the Swisher county creamery at Tulia, and Jack Huber will be associated with a cotton brokerage firm in Harlingen. . Jacobs, Sides, and Huber reside in Lubbock.

Bill Tinney of Bowie will do graduate work at Texas A. & M. college, and John P. Kilgore of Brownwood will do plant and field work for the Colvert dairies, Ardmore, Okla.

Morris Hill of Waco will accept an offer from a nationally known cheese manufacturing concern or a scholarship for graduate work in an agricultural college.

6/6/38

LUBBOCK, Tex., June 6.--. Three hundred and twenty-five seniors were given degrees at the twelfth annual commencement exercises of Texas Technological College today, making a total of 3,180 to graduate in 12 years. Graduates at the end of the summer term will make the total for the year more than 500.

Dr. Alfred Atkinson, president of the University of Arizona, delivered the address to the class. He drew three lanes along life's mythical pathway, and charged the graduating class to follow them in their adjustment to current-day conditions.

"The conditioning of an oncoming generation for the problems to be met is a relatively simple process in eras of routine and stability where there is definite prospect that sons will have opportunities to continue in the pursuits which their fathers follow," Dr. Atkinson said, but declared that "the task is much more difficult in periods of adjustment where the outlook ahead is far from clear." The speaker continued:

"The oncoming generation will have to be much more fully informed about the control of the forces of nature than was necessary for their grandparents; they will have to gain much more complete knowledge of world conditions and world forces than has ever been the case in previous history; and they must take more account of the social effects of business procedures than past generations have done!

Dr. Atkinson took an optimistic viewpoint about the future. "There are those who appear to believe that the outlook ahead is dark!" he said. "I would not choose to belong to the group which places this interpretation on present-day conditions. Civilizations have survived

Atkinson - page 2

many adjustment periods in the past, and I believe that the present-day civilization will solve its problems and make its adjustments in this adjusting era."

Reviewing past eras of stability and disturbance, Dr. Atkinson said:

"The record of history shows a succession of eras of routine and stability alternating with eras of adjustment and disturbance. We are disposed to refer to eras of stability as the normal eras, but it would seem as though the periods of adjustment are quite as frequent as those of stability; so we may just as well recognize that there are recurring eras which belong in the cycle of history.

"There are many factors which have brought about the present conditions. Frequent reference is made to the World War as the cause of the present instability; but if we accept this statement as sufficient explanation, we are overlooking the influence of many causes much more fundamental.

"One of the fundamental causes of the present-day adjustment comes out of that fact that during the past half century the advance in the technical and scientific areas has been much more rapid than has been the adjustment in the social, religious and other areas of human response. It is a fair statement that there has been much more technological progress during the past 50 years than occurred during all of the centuries prior to the beginning of that period. Most of our problems are now in the social field, and come out of the need of the readjustment of social processes to technical and scientific procedures.

M O R E

"Another important influence in bringing about present-day conditions comes out of the disappearance of physical frontiers in the United States. This country has now ceased to be a pioneer nation; and such problems as unemployment which were formerly dealt with by keeping the unemployed moving must now be reckoned with in the communities where the unemployment occurs. The opportunity to go west and take up new farms, build new towns, extend railroad lines, and develop new business institutions has disappeared during the last 10 years. The stabilities of an old nation have their compensations, but they also inject problems with which nations flounder badly when they are first set up."

##

LUBBOCK, Tex., June 6.-- The following scholarships and awards were announced at the twelfth annual commencement exercises of Texas Technological College held today:

Standefor-Canon award to the student among the football lettermen making the highest grades to A. B. Murphy, Caro, whose name is to be inscribed on the silver football plaque in the athletic office.

Avalanche-Journal Publications Journalism Scholarship of \$50 cash for the best work in reporting in the fall semester to Reeves Henly of Lubbock.

Wilbur C. Hawk Memorial Journalism Scholarship of \$50 cash given by the Amarillo News-Globe to the student doing the best work in reporting for the spring semester to Glenna Fae Sadler, Vigo Park.

Mrs. J. T. Hutchinson Journalism Scholarship of \$100 cash to be given to sophomore or junior student majoring in Journalism who has the best scholastic average for the year 1937-38; name of student to receive award cannot be announced until all grades are in.

Beginning with the year 1937-38 Mr. W. B. Rushing and Mr. Newton Walton are giving an annual award to the student on the campus who contributes most to tennis both in quality of individual playing and the fine sportsmanship and spirit in relation to the sport awarded to Harry Jordan of Big Spring.

Pan Hellenic Award of \$50 to the freshman student in the Division of Home Economics making the highest grades in all her work for the year; to be announced later when grades are out.

Mary Overton Craig Prize in Chemistry given by Dr. and Mrs. William M. Craig in memory of Mary Overton Craig to the young man of the sophomore class who shows the greatest promise as a future chemist

LUBBOCK, Texas., June.--. Several scholarships for Texas Technological College students for the year 1938-39 have been announced. President Bradford Knapp has just received notice from the Dean of the Law School of Tulane University at New Orleans that he has been authorized by Tulane University to offer a scholarship covering the payment of tuition in Tulane University to a graduate of Texas Technological College who receives his bachelor's degree and ranked among the first three in the graduating class. This scholarship at the present rate of tuition in Tulane is worth \$600.

The Cotton Research Foundation in cooperation with the Mellon Institute of Industrial Research, Pittsburg, Pa., is offering a \$250 scholarship for next year for the investigation of cotton by-products. William E. Richards, Dalhart, who received his degree in chemical engineering June 6, has been awarded this scholarship, according to announcement of Dean R. C. Goodwin of the Graduate Division.

Dean A. H. Leidigh of the Agriculture Division announces that Sears Roebuck will continue the awards to agriculture students for 1938-39, one sophomore selected from the freshman scholarship holders this year to receive a \$200 scholarship, and nine entering freshmen will receive scholarships of \$100 each. These scholars are selected on the basis of scholarship, citizenship, and personality. The same company also offers a \$600 fellowship in agricultural education, the appointment to be made later.

By legislative appropriation there is a \$450 graduate fellowship for barley research. Work of this fellowship will be done under direction of Dr. A. W. Young, acting head of the Plant Industry department. Appointment will be announced later.

LUBBOCK, Tex., June.--. The building program set up by the board of directors of Texas Technological College at a meeting June 6 includes requests for seven new buildings on the campus to take care of the rapidly increasing enrolment of the institution. An agriculture building, a combined gymnasium-auditorium, a new home economics building, a chemical and petroleum engineering building, and equipment for these buildings will be asked of the next legislature, and the P. W. A. request for two new dormitories will be pushed.

The board approved the following appointments:

D. N. Probasco, a graduate of Texas Technological College, as mechanic in the textile engineering department; Dr. William D. Alden of Brown University as instructor in French; Carroll P. Brady, who will take his doctor's degree at the University of Chicago this summer, as instructor in mathematics.

President Bradford Knapp announced the resignations of V. L. Doughtie, professor of mechanical engineering, who has accepted a professorship in the engineering school of the University of Texas, and also that of E. G. Shelton who has been, since the opening of the college, a professor in the department of architecture. Weldon Leroy Bradshaw of Lubbock was appointed in his place at Tech. Bradshaw is a graduate of Texas A. & M. and taught in the department of architecture there for two years.

Dr. A. W. Young who has been acting head of the department of plant industry was named head, and James G. Allen was named dean of men, he having been acting dean of men during the present year.

LUBBOCK, Texas, June--. A tour of four cleaners and dyers short courses in Texas will be made by M. E. Heard, head professor of textile engineering, and John A. Stinson, first vice president of the Texas State Association of Dyers and Cleaners who left early this week for the first of the series in Dallas.

Climaxing event of the tour is the fourth course in Lubbock June 23 and 24. Stinson said that registrations already received for the event here insured its being the largest ever held in the state.

Heard is to be director of all of the courses and Stinson a principal speaker. "Modern Fabrics and Their Treatment in the Cleaning Plant" will be the subject which Heard will discuss at the meetings. Stinson will speak on "Practical Dying and Fur Cleaning".

The remaining two courses are to be in Houston June 16 and 17 and in San Antonio June 20 and 21.

LUBBOCK, Texas, June ---. Two cinder treaders are the Red Raiders' Scarlet-and-Black banners into the National Intercollegiate Track meet in Minneapolis, Minn. Accompanied by Coach Berl Huffman, Marsh Farmer and John Case left Lubbock Tuesday by automobile.

Farmer, junior agriculture student from Fort Worth last semester, will compete in low and high hurdles. Case, senior engineer from Petersburg, will run distance races. Huffman said he would decide distances Case would run after they arrived in Minneapolis. Case will enter the national AAU competition meeting in Buffalo, N. Y., July 3 and 4.

###

LUBBOCK, Texas., June.--. Carl W. Bechtold, June graduate in industrial engineering, will teach industrial arts in the public schools at Van Horn next year.

He is the first to receive a degree in industrial engineering since the course first was offered in 1934-35.

##

LUBBOCK, Texas., June.--. First annual summer course for health workers and sanitation officers offered by any college or university in Texas is now in progress on the campus of Texas Technological college.

Several prominent state and local health authorities are appearing before the daily classes which list a total registration of 23 from various parts of the state.

The purpose of the course--to train sanitation employes in the different municipalities of Texas in the number of problems that apply to public health work--has received widespread approval and commendation.

Cooperating with the college in presenting the course is the Vocational Division of the Board of Education of Texas and the State Health department. Approval and endorsement of the League of Texas Municipalities and the Texas State Planning board have also been given. Such training has been successful in northern and eastern states and state officials are pleased that the way has been opened for similar work here at Tech, said officials.

Among those who have already appeared on the program are Dr. W. L. Baugh, member of the State Board of Health, Mr. V. M. Ehlers, chief engineer of the Bureau of Sanitary Engineering of the State department of health, and Major E. A. Wood, of the State Planning Board

LUBBOCK, Texas, June.---. A new men's dormitory for Texas Technological College to cost \$350,909 is assured in dispatches just received from Washington notifying college authorities of the approval of application made in 1935 to the Public Works Administration. Of the total amount \$157,909 is in the form of a grant and \$193,000 loan

A similar application is pending for funds to construct a dormitory for women, according to W. T. Gaston, college business manager, who is under authorization by the board of trustees to direct procedure with the P. W. A. authorities.

The dormitory for men will house approximately 320 and will be of similar construction and materials as the present dormitories. An added feature of the new building will be a dining room lounge which is needed to avoid congestion in the halls just before meal time. Also the front elevation will be somewhat higher and more decorative.

The new structure will be located just east of the present men's dormitory and will face College avenue. When the Tech board met June 6 complete plans for this building were approved so that it will be possible to start construction as soon as the contract has been let. Six to seven months will probably be required for actual construction work.

LUBBOCK, Texas, July.--. Approval of a visual education program to begin at Texas Technological College in September, was given this week by the board of directors upon recommendation by the executive committee.

The program allows the establishment of a film library, containing both sound and silent educational motion pictures which will be rented to public schools of this section. Visual education is gaining popularity over the country, and schools of this area are acquiring projectors, said J. F. McDonald, director of extension.

"Educational motion pictures appropriate for grades and high schools will be obtained for the film library", McDonald said.

A course in the use of visual aid instruction is being taught this summer by W. B. Irvin, superintendent of Lubbock public schools. Teacher training is one of the big problems in setting up visual aid instruction, according to McDonald.

LUBBOCK, Texas, July.--. Dr. L. B. Ezell, special instructor in extension education at Texas Technological College, will direct an extension center to be established by the college at Childress in September.

Courses will be offered in Childress and towns in adjoining counties, including Wellington, Memphis, Paducah, and Quanah. The center will be established because of the distance of that area from Tech and the number of requests for extension courses from towns in that vicinity, said J. F. McDonald, director of extension.

Dr. Ezell served on the division of extension staff at Tech last summer and this summer, offering correspondence courses in education. Formerly head of the education department at Bethany college at Lindsborg, Kan., he received bachelor of arts and master of arts degrees at Elon college, Elon College, N. C., did graduate study at the University of North Carolina, and received a second master of arts degree and a doctor of education degree at the University of Texas.

##

LUBBOCK, Texas, July.--. Registration for the second semester of summer school at Texas Technological College/917 Thursday afternoon, said W. P. Clement, registrar. Of this number 236 are new students.

As yet incomplete, this year's total indicates a substantial increase over that for last summer, which was 1695.

Summer school commencement and graduation exercises are scheduled for August 24, and summer school will close August 25. Registration for 1938-39 will begin September 19.

LUBBOCK, Texas, July.--. Eleven persons have registered for the second annual soil erosion and conservation short course at Texas Technological College, according to A. W. Young, head professor of plant industry, and director of the course.

Given in cooperation with the soil conservation service of Amarillo, the course is designed to give instruction in both fundamentals and practical aspects of soil erosion and conservation, with special emphasis on wind erosion and control.

Class and field instruction is given each morning, and an outstanding speaker discusses a phase of the work in this region each afternoon. A four-day field tour will be conducted August 3 to August 6, and the course will close August 9.

Speakers for next week include R. R. Hinde, associate agronomist, region 6; Fred Sykes, regional agronomist; Ray Watson, associate range examiner, region 6; Ralph Caird, assistant range examiner, region 6; James C. Wilcox, assistant agricultural engineer, region 6; Eugene C. Buie, associate agricultural engineer, region 6; and R. C. Nelson, regional engineer.

LUBBOCK, Texas, July.--. Directors of Texas Technological College named Mrs. J. A. Haley of Midland as acting president of the college, succeeding the late President Bradford Knapp in so far as diploma signing is needed, at a called meeting in Fort Worth recently.

Clifford B. Jones, chairman of the board of directors, said the three-member committee now serving as actual president of the college will continue in effect until a new president is chosen. Members of that committee are Dean J. M. Gordon of arts and sciences, chairman; H. L. Kent, director of administrative research; and W. T. Gaston, business manager and secretary to the board of directors.

LUBBOCK, Texas, July.--. National Youth Administration jobs for graduates as well as undergraduates will be available for students at Texas Technological College next scholastic year, according to J. M. Gordon, dean of arts and sciences.

J. C. Kellam, state NYA director, has notified the college that he has received information from Aubrey Williams, executive director, that jobs will be available, but since the Texas program has not yet been set up, it is not known how many college jobs there will be.

A student must have reached his 16th birthday and not have passed his 25th to be eligible for one of the jobs. He must be of "good character and show his ability of performing good scholastic work", and must be a regular student enrolled for at least three-fourths of the normal number of hours of college work.

Maximum to be paid to any undergraduate student will be \$20 and the average will be \$15 a month. Under the new program set up for graduate students, the average will be \$30 a month, and the maximum will be \$40. Heretofore, jobs for graduate students have paid the same as those for undergraduates.

Need, scholarship, citizenship, and character have been considered in selection of NYA employees in former years, and only a small per cent of jobs were available in comparison to the number of applicants. It is not known when the college may learn how many jobs are available so that appointments may be made, but officials hope this will be possible by August 15.

HUBBOK, Texas. Aug.--. Commencement address for summer graduates of Texas Technological College will be delivered by Dr. John W. Calhoun, president ad interim of the University of Texas, August 24, according to Dean James M. Gordon, chairman of the executive committee.

Dr. Calhoun has been acting president of the university in Austin since May 31, 1937, when he was appointed to fill the vacancy caused by the death of the late President H. Y. Benedict. He has been on the university staff since 1905.

Clifford B. Jones of Spur, chairman of the board of directors, will confer degrees. Tentative figures from the office of Dean James M. Gordon show 183 candidates for bachelors and 36 candidates for masters degrees.

Mrs. John A. Haley of Midland, treasurer of the administrative board, was chosen in a recent meeting of the board of directors to sign the diplomas as honorary acting president, but it was suggested that Jones confer the degrees because in many colleges and universities the chairman of directors or regents performs this duty.

Custom here has been that the president of the college should sign diplomas and confer degrees.

LUBBOCK, Texas, Aug.--. First advertisements for bids on construction of the new men's dormitory at Texas Technological College appeared in newspapers of the state Wednesday morning.

Bids will be for general construction, plumbing, heating, ventilating, and electrical work. Bids will be received in the Fort Worth offices of Wyatt C. Hedrick, architect, who drew plans for the projected structure, until 10 a. m. August 25. After that time, the board of directors will meet there to open the bids and award contracts, and construction likely will begin in September. Bids are being addressed to Clifford B. Jones, chairman of the board of directors.
