LUBBOCK -- More than 2,000 Texas Tech University students qualified for the academic honors lists at the end of the 1990 spring semester.

Students on the President's Honor List earned a perfect 4.0 (A) grade-point-average while enrolled in 12 or more semester hours of class work. Students finishing 12 or more hours with a grade-point-average of 3.5 to 3.9 qualified for the Dean's Honor List.

LUBBOCK -- Representatives of the Panhandle-South Plains Fair Association on Thursday (June 14) presented a \$10,000 scholarship donation to the Texas Tech University College of Agricultural Sciences.

The Panhandle-South Plains Fair, a non-profit organization, was started in 1914 and was chartered by the state in 1920. Its purpose is to promote agriculture and livestock production, to support youth education and to provide an entertainment medium for the people of West Texas.

Since 1972, the Fair Association has made contributions of \$226,100 for agricultural scholarships and in support of education. These funds have been distributed to 4-H and FFA students and to five colleges and universities in the West Texas area.

Contributions to Texas Tech have gone toward two endowment funds. The Panhandle-South Plains Fair Association Endowment, now totalling \$34,000, awards five \$400-\$600 scholarships per year to agricultural sciences majors. The Leach/Hargrave Endowment Fund provides scholarships for students majoring in agricultural education. The Fair Association has contributed \$26,000 of the total \$51,212 to the Leach/Hargrave Endowment.

Association President Don Hufstedler, Association Vice President Frank Anderson and General Manager Steve Lewis presented the funds during a luncheon to university representatives.

The 73rd Annual Panhandle-South Plains Fair is scheduled for Sept. 22-29.

LUBBOCK -- The Texas Tech University chapter of Alpha Lambda Delta, the national academic honor society for freshman college students, has initiated 150 new members selected for superior classroom performance during the 1989-90 school year.

There have been 212 Alpha Lambda Delta chapters established in the United States since the honor society was established in 1924. The Texas Tech chapter was established in 1949.

Chosen from Texas Tech's freshman class of more than 6,000 full-time students, the new freshman honorary initiates included:

PEESH HOW THE

Jennifer L. Aarni, business major, daughter of Mike & Beth Aarni of Aledo;

TYC to advector young children

Michelle R. Alldredge, nursing major, daughter of Dr. & Mrs. Bud E. Alldredge Jr., D.V.M. of Sweetwater;

Cathleen N. Anderson, daughter of Danny R. Anderson of El Paso;

Jennifer A. Armes, restaurant & hotel management major, daughter of Patti & Jerry/Armes of Dallas;

Christal Add Aycock, advertising major, daughter of Rex & Bonnie of Lubbock;

Amy L. Bass, theatre arts major, daughter of Dallas & Ann Bass of Fort Worth;

Sarah L. Boswell, TYC major, daughter of John & Anne Boswell of San Antonio;

Mary E. Bourn, of Brownfield;

Carol J." Brittin, music major, daughter of Mr. Anthony & Dr. Helen Brittin of Lubbock;

Christy D." Brown, finance major, daughter of "Randy & Diane Brown of Gruver;

Kristen E? Brown, psychology major, daughter of Robert W. & Nancy Lee Brown of Lewisville;

Marilyn P. Brown, of Lubbock;

Jennifer J. Canseler, agriculture major, daughter of Allen Canseler of Canyon;

Julie A Capps, political science major, daughter of Arthur & Violet Capps of Mesquite;

M. Kathy Caraway, education major, daughter of Tom & Kay Caraway of Crowley;

Melode J. Chance, agricultural communications major, daughter of Kenny & De Chance of Ralls;

Elaine I. Cogburn, accounting major, daughter of Lana Narey & Larry Walker of Richland Hills;

Cathryn J. Cordova-Garbers, nursing major of Lubbock;

Sheri P. Covington, daughter of Sam & Carol Covington of Lubbock;

Michelle Y. Crocheron, psychology major, daughter of Wesly & Joy Crocheron of Fort Worth; Holli A. Crouch, accounting major, daughter of James F. & Gladys Crouch of Kilgore;

FOR IMMEDIATE RELEASE REF: 5-6-11-90 CONTACT: Preston Lewis

LUBBOCK -- A program to help encourage minority high school students to pursue careers in biomedical research or the health professions has led to summer jobs for six Lubbock students at the Texas Tech Health Sciences Center.

The 1990 Minority High School Student Research Apprentices Program funded by the National Institutes of Health has awarded the Texas Tech School of Medicine \$10,500. The funds are the highest amount yet awarded Texas Tech in the program directed the last six years by pharmacology department Chairman Alexander D. Kenny, Ph.D.

Summer apprentices, each to receive an award of \$1,500, are juniors Angela M. Arredondo and Gregory Solis of Monterey High School, seniors Kim N. Bozeman and Yolanda P. Moore of Estacado High School and seniors Van T. Ha and Kendall D. Lawrence of Coronado High School.

Each apprentice will be assigned for eight weeks this summer to a faculty member in the School of Medicine and will assist with research projects or special programs.

Kenny said the program has been highly successful with several past participants going into biomedical or sciences curriculums in college, many at Texas Tech. Some previous participants have even maintained their associations with the projects they were associated with as apprentices. The six apprentices this year were selected from 24 applicants, including nine blacks, eight hispanics and seven Pacific Islander/Asians.

Arredondo, daughter of Dr. and Mrs. Rudy Arredondo of 3212 40th, will work with the Youth Exchanging with Seniors Program administered by Sheryl H. Boyd, Ph.D., of internal medicine.

Bozeman, granddaughter of Mrs. Jessie Dewhart of 1509 E. Auburn, and Ha, daughter of Thai and Khanh Ha of 5501 First Place, will work in the laboratory of Kathryn K. McMahon, Ph.D., of the pharmacology faculty.

Lawrence, son of Larry and Carolyn Lawrence of 5214 88th St., will assist in the laboratory of Thomas E. Tenner, Ph.D., in the pharmacology department.

Moore, granddaughter of Gladys and Herman Moore of 1802 E. Auburn, will work with Dr. Kenny on his pharmacological research, and Solis, son of Ruben and Vicky Solis of 8107 Toledo, will assist in the laboratory of Peter A. Doris, Ph.D., of the cell biology and anatomy faculty.

[EDITOR'S NOTE: The media are invited Saturday (June 16) to attend the TTHSC department of ophthalmology and visual sciences Annual Research Symposium at the McInturff Conference Center of University Medical Center, located at 602 Indiana Ave.]

LUBBOCK -- The Texas Tech Health Sciences Center (TTHSC) on Saturday (June 16) will host the Annual Research Symposium of the department of ophthalmology and visual sciences. The day-long symposium will take place in the McInturff Conference Center of University Medical Center, located at 602 Indiana Ave.

The symposium, which targets health care professionals in the field of ophthalmology, will focus on new concepts in the management of ocular tumors in children and other concepts in ocular cell growth acceleration and inhibition. Ophthalmologists from across Texas, Louisiana and California will discuss numerous other areas of clinical and basic science research pertaining to the eyes.

Registration for the symposium is \$75. For more information about the symposium or to register, contact the TTHSC Office of Continuing Medical Education at (806) 743-2929.

(EDITOR'S NOTE: The media are invited to attend the West Texas Symposium for Gynecologic Cancer and Breast Disease June 15-16 in the McInturff Conference Center of University Medical Center, located at 602 Indiana Ave.)

LUBBOCK -- The Texas Tech Health Sciences Center (TTHSC) June 15-16 will host the West Texas Symposium for Gynecologic Cancer and Breast Disease at University Medical Center, located at 602 Indiana Ave.

The two-day symposium, targeted at primary care physicians, will focus on screening, detection and treatment or referral of breast and gynecologic cancer. Guest lecturers from Michigan, Washington, D.C., El Paso and Lubbock will discuss progress in the treatment of cancers involving the breast, vulva, vagina, uterus and ovary.

Registration for the conference is \$60 for physicians and \$25 for other health care professionals. For more information about the symposium, or to register, contact the TTHSC Office of Continuing Medical Education at (806) 743-2929.

(MEDIA ADVISORY: Media representatives are invited to cover the 60-minute speech that begins at 3:30 p.m. June 19. Hans Mark will be available for interviews during the reception which immediately follows the speech. Media representatives are asked to set up equipment between 3 and 3:30 p.m.)

LUBBOCK -- Hans Mark, Ph.D., chancellor of the University of Texas System will speak on "The Superconducting Supercollider" at 3:30 p.m. June 19 (Tuesday) in Room 212 (old room number 238) of the Science Building at Texas Tech University.

Mark will discuss technical and economical aspects of the supercollider. A question-and-answer session will follow the speech. A reception is planned for Mark in the physics faculty Conference Room 103 at the conclusion of the presentation.

Before becoming chancellor of UT System, Mark served as deputy administrator of the National Aeronautics and Space Administration, a position he was appointed to by then-President Ronald Reagan in 1981. He also has held a variety of academic posts in both physics and nuclear engineering.

The lecture is sponsored by the physics department at Texas Tech.

FOR IMMEDIATE RELEASE REF: 9-6-11-90 CONTACT: Jennifer LeNoir

LUBBOCK -- Kishor Mehta, Texas Tech University professor of civil engineering and director of the Wind Engineering Research Center, recently was selected as a member of the newly established national advisory panel for the Hazard Reduction and Recovery Center (HRRC) in the College of Architecture at Texas A&M University, College Station.

The HRRC is involved in the study of a variety of natural and technological hazards. The natural phenomena include floods, hurricanes, earthquakes, tornadoes and droughts. Technological hazards include chemical and nuclear plant accidents, transportation accidents and pipeline explosions.

The purpose of the newly formed panel is to offer advice and consultation to the HRRC's director and faculty fellows. Panel members also will be required to offer their opinions regarding current and future research projects and activities of the center.

Mehta, who is the only professional engineer on the panel, will attend the group's first conference and meeting, which will focus on issues in the "International Decade for Natural Disaster Reduction," June 13-16 at Texas A&M University.

He also will present a 30-minute discussion of his disaster reduction goals for the coming decade. The HRRC was established at Texas A&M in 1988. The center engages in research on hazard mitigation, disaster preparedness, response and recovery.

The HRRC's interdisciplinary staff includes architects, planners, sociologists, policy analysts and engineers.

FOR IMMEDIATE RELEASE REF: 10-6-11-90 CONTACT: Jennifer LeNoir

LUBBOCK -- Texas Tech University's Water Resources Center recently began developing improved water management strategies that could result in a savings of \$2.5 to \$3 million annually for Texas municipalities.

The three-part research project is titled "Management Strategies for Energy Efficient Operations of a Municipal Water Supply." Results of the project could save cities as much as 5 to 15 percent of their annual pumping costs for municipal water supplies.

The Texas Higher Education Coordinating Board recently gave the project \$90,000 through the Advanced Technology Program.

Lloyd V. Urban, Ph.D., director of the Water Resources Center at Texas Tech, and Billy J. Claborn, Ph.D., professor of civil engineering at Texas Tech, are investigating ways to reduce the power used in producing and delivering water to the public.

A 1987 study of the Midland water system demonstrates 5 to 25 percent of the energy employed to pump groundwater can be saved using the new cost-saving strategies, Urban said.

When the most energy-efficient wells are selected for use to produce a given amount of water, savings are achieved, he said.

"If only half the cities in the state, which totally or partially rely on groundwater, were to adopt the improved management program, they could easily result in a savings of \$2.5 to \$3 million dollars annually based on the amount of yearly groundwater pumped for municipal use and an average improvement of 15 percent," Urban said.

The project first seeks to determine the viability of developing a step-by-step procedure for well selection.

"Because each well may differ in size, depth of water and ability to produce water, each well and pump will have a different operating efficiency, dependent on various circumstances," Urban said. "As a result, engineers must analyze a well's efficiency according to various circumstances, like a city's changing demand for water during various seasons, precipitation levels and water table changes."

WATER RESOURCES/PAGE 2

Second, the project attempts to derive a method for choosing the best set of booster pumps, which may be located throughout a city, in order to help meet the current water demand. Booster pumps are utilized to maintain desirable water pressures and to meet water demand throughout a city.

Finally, the research project is aimed at validating the feasibility of lower overhead storage tank water levels during winter months, which result in lower energy costs, Urban said.

Lowering the operating level in a tank by 10 feet during the months of low demand could mean a significant reduction in energy use, he said.

The research project, which began in January, is scheduled for completion by Dec. 15, 1991.

FOR IMMEDIATE RELEASE REF: 11-6-12-90

TEXAS TECH GRADUATE WINS FELLOWSHIP AWARD By Myrna Whitehead

LUBBOCK -- On the surface, Charles Britton III could be easily mistaken for the well-known television character who portrays a medical school student, "Doogie Howser." Britton's young, boyish features make it hard to believe that this Lubbockite recently earned a bachelor's degree in biochemistry at Texas Tech University -- with a 4.0 grade-point-average.

Britton and "Doogie" share a deeper similarity -- Britton beginning Aug. 1 will be attending the University of Texas Southwestern Medical Center in Dallas where he will pursue a joint M.D./Ph.D. program.

He recently was awarded a \$7,000 graduate fellowship by the Honor Society of Phi Kappa Phi, a national award that supports the first year of graduate or professional study. The award, established in 1932, has been won by two other Texas Tech students. Fifty awards are presented yearly.

Britton said that by no means should he be considered a "genius." Everything he has accomplished has come from hard work and studying.

As a senior at Texas Tech, Britton served as an ambassador for the College of Arts and Sciences and as a member of the Golden Key National Honor Society, Alpha Epsilon Delta and Phi Kappa Phi. He received the Barry M. Goldwater Scholarship; the Achievement Rewards for College Scientists Foundation Scholarship; the Dow Chemical Scholarship; the Robert Cabaniss Goodwin Premedical Scholarship; the Texas Tech University Scholarship; and the Dads and Moms Association Academic/Citizenship Award for the College of Arts and Sciences.

Britton, a dean's scholar, also was named to the President's Honor List.

His interest in medicine was sparked by his own health problems. Since childhood, Britton has suffered from portal hypertension which caused esophageal varices. Britton's spleen was removed at age 7 because of the condition, a blockage in the portal vein (a large vein between the liver and the stomach) disrupts the normal blood flow causing the blood to be re-routed through the lower esophagus and the spleen. The increased blood flow causes the veins to become enlarged, similar to varicose veins in the legs. As a result, internal bleeding from the veins occasionally occurs.

-more-

MEDICAL SCHOOL/PAGE 2

"I feel that my experiences with this problem have given me insight and may make me a more compassionate doctor," he said.

Britton is setting his sights on viewing the hospital from the other side of the bed. He will enroll in graduate school beginning June 1 to conduct research concerning diabetes. In August, he will begin his first year of medical school.

Britton is no stranger to the medical world. After high school, he attended the 1986 Summer Program in Biomedical Sciences at the University of Texas System Cancer Center, M.D. Anderson Hospital and Tumor Institute at Houston. The following year, he returned to M.D. Anderson Hospital to participate in the University of Texas System Cancer Center Summer Program for College Students and Freshmen Medical Students.

In 1988, Britton worked with Dr. Michael E. DeBakey as a participant in his Summer Surgery Program at the Baylor College of Medicine in Houston. DeBakey, the chancellor of Baylor College of Medicine and chairman of its department of surgery, is recognized for his trailblazing efforts in the treatment of cardiovascular diseases.

Last year, Britton complete NASA's Space Life Sciences Training Program at the Kennedy Space Center in Florida.

Britton said the dual M.D./Ph.D. program should take seven years to complete -- two years of medical school interrupted by two to three years of biomedical research and the return to complete the third and fourth years of medical school. Upon graduation, Britton will spend five years as a surgical resident and two more years specializing in his chosen field -- possibly pediatric surgery.

Britton credits his parents, Mr. and Mrs. Charles H. Britton Jr. of Lubbock, for his success in the classroom. He said they never pressured him to do well; it was something he wanted for himself.

LUBBOCK -- Texas Tech University President Robert W. Lawless has been elected 1990-91 chairman of the board for the Boulder, Colo.-based College Football Association (CFA).

Lawless will serve a one-year term as chairman and as the board's Southwest Conference representative.

The College Football Association was formed in 1976 as an organizational forum for discussion of issues unique to college football. The association, with 66 full and associate members, meets annually to establish policies and develop legislative recommendations for the National College Athletic Association.

The board of directors includes one representative from the Big Eight, Western Athletic, Southwest, Southeast and Atlantic Coast conferences as well as two representatives from independent universities and several CFA committee heads.

Lawless became president of Texas Tech University and Texas Tech Health Sciences Center in July 1989. He was executive vice president and chief operations officer at Southwest Airlines in 1985-89 and vice president and chief financial officer in 1982-85.

Prior to joining the Dallas-based airline, Lawless served in faculty and administrative positions at the University of Houston. He became senior vice chancellor of the university in 1980. Lawless also served as associate chancellor for planning and resource allocation, as acting dean of the College of Business Administration and as chairman of the department of quantitative management science after joining the College of Business faculty in 1969.

FOR IMMEDIATE RELEASE REF: 13-6-14-90 CONTACT: Myrna Whitehead

LUBBOCK -- Gail Barber, professor of harp and music theory at Texas Tech University, will perform the opening recital for the American Harp Society National Conference at 8 p.m. Wednesday (June 20) at Parker Chapel on the campus of Trinity University in San Antonio.

Barber's program will include 16th through 20th century compositions and seven original pieces from "Songs of Destiny," a song cycle composed by Barber and making its world premiere at the conference. Vocalist Cynthia Vonn Preid and narrator Linda Stogner will join Barber on the "Songs of Destiny."

Barber also will perform three jazz selections with Larry Hammett, jazz guitarist and recording artist; Spanky Jones, drummer; and Dave Heath, electric bassist.

At Texas Tech, Barber teaches and conducts the Texas Tech Harp Ensemble. She also performs in the Lubbock Symphony Orchestra.

A graduate of the Eastman School of Music in Rochester, N.Y., Barber has toured as a harp soloist with the Chicago Little Symphony. She has performed throughout the United States, Canada, Mexico, Europe and the Middle East.

The artist has been featured at several American Harp Society national conferences and the World Harp Congress in the Netherlands and in Austria. Barber has been the guest of honor at numerous International Harp Contests in Jerusalem. In 1985, Barber premiered her original composition, "A Turkish Fantasy," at the International Istanbul Festival.

She has recorded with Countdown Productions, Contemporary Recording Society, Dorian Systems and Opus One Records.

LUBBOCK -- Texas Tech University Professor of Business Administration Paul H. Randolph, Ph.D., has received a Fulbright grant to lecture and research during the 1990-91 academic year at Middle East Technical University in Ankara, Turkey. He was a visiting professor at the Turkish university in 1970.

Randolph joined the College of Business Administration area of information systems and quantitative sciences in 1981. A faculty development leave from Texas Tech has been granted in conjunction with the grant awarded by the Board of Foreign Scholarships and the United States Information Agency.

Before coming to Texas Tech, Randolph held positions at Mobil Research and Development Corporation and Chase Manhattan Bank. He has been on the faculty of Iowa State University, Purdue University, New Mexico State University and Illinois Institute of Technology.

Randolph has been a visiting professor at the University of Heidelberg in West Germany and the University of Oslo in Norway.

Under the Fulbright program, approximately 1,500 U.S. grantees will travel abroad during the 1990-91 academic year. Recipients are chosen on the basis of academic and professional qualifications and their ability to share ideas with people of diverse cultures. The program was established in 1946 through congressional legislation introduced by former Sen. J. William Fulbright of Arkansas.
