INSTRUCTIONS FOR THE USE OF THE DIAL TELEPHONE

Top Secret, Secret, and Confidential matter will not be disclosed in telephone conversations at any time. Restricted Matter may be discussed over telephone lines that are wholly within the confines of the reservation. Calls disclosing Restricted information will be kept to an absolute minimum.

1. Remove receiver and listen for a steady buzz, this is the "DIAL TONE" Due to the heavy usage of the telephone system you will not always hear dial tone immediately because there may be no idle talking paths. It may be necessary to hold instrument for approximately half a minute before dial tone is heard.
2. When the "DIAL TONE" is heard, dial number desired, bringing finger to dial-stop for each digit and letting dial return freely under its own tension in each case.
3. If an intermittent buzz known as the "BUSY TONE" is heard after the number is dialed, the line you called is busy. Hang up for a few seconds before attempting to dial another number.
4. If an error is made in dialing, hang up for a few seconds, then redial the complete number
5. After finishing a call, hang up for a few seconds before using the telephone again.
6. Do not move receiver hook up or down during dialing as this will result in a wrong number.
7. Never leave receiver off hook when the dial telephone is not in use. It will result in disconnecting your telephone.
8. DIRECTORY: Necessary changes or errors noticed in Telephone Directory listing should be reported promptly to the Chief Operator, telephone 200. For numbers not listed in this directory, dial 666 Information.
