LUBBOCK--The staff of Texas Tech University's yearbook, "La Ventana", announced Friday that Regent Clint Formby of Hereford had been named its "Man of the Year" for 1979. His picture will be on the cover of the "Texas Business Magazine" section of the yearbook.

Formby was presented the original art work of the cover at a meeting of the Texas Tech Board of Regents in regular session Friday (May 11). Presentation of the framed art work was made by co-editors Beverly Jones of Dallas and Elizabeth Edwin of El Paso.

Formby is the 21st person to receive the coveted honor bestowed by "La Ventana" and the first regent and non-member of the university faculty or staff to receive the recognition.

Campus student organizations nominate men or women for the distinction, and the honoree is selected by the yearbook staff of approximately 20 persons.

Selection is based on "outstanding contributions to Texas Tech and its students" and the honor is bestowed on a "person who has had unusually good relations with students." Formby was nominated by the Mass Communications Student Advisory Committee.

The 1979 yearbook will be distributed in August, Editor Jones said.

-more-

Serving his second six-year term as a regent, Formby is a past board chairman. He is a 1949 graduate of the university with a major in government and minor in speech-journalism.

He is partner and managing director of radio stations KPAN-AM and-FM, Hereford; KLVT, Levelland; KTEM-AM and KPLE-FM, Temple; and KTBB, Tyler.

He is a member of the boards of directors of the West Texas Chamber of Commerce, National Associated Press and National Broadcast Education Association.

Formby is past chairman of the radio board of directors of the National Association of Broadcasters, past president of the Texas Association of Broadcasters and past member of the National Association of Broadcasting's radio advertising code board.

For four years he was on the board of the National Association of Broadcasters. He was named "Texas Communicator of the Year" by the Texas Baptist General Convention in 1977.

He is a member of the board of directors of Citizens National Bank, Crosbyton, and First State Bank, Petersburg.

LUBBOCK--An education workshop focusing on building a good educational climate through administrative effectiveness, teacher job satisfaction and pupil achievement will be held on June 25-29 in the Texas Tech University Center Coronado Room.

Texas Tech's College of Education and Division of Continuing Education are sponsoring the workshop in cooperation with the Texas Elementary Principals' and Supervisors' Association.

School climate, according to Dr. Charles A. Reavis, professor of administration and supervision at Texas Tech, is dependent on respect, trust, morale, opportunity for input, continuing academic and social growth, cohesiveness, problem-solving and caring. Workshop topics were chosen to help participants improve school climate through leadership, goal-setting and creative problem-solving, evaluation, positive mental attitudes and conflict management.

"Principals in new situations, including administrators who are recently appointed or transferred to a new school with rapidly changing student populations (including integration) or with a number of new faculty, facilities or programs would especially benefit from the course," Reavis said. "Teachers who expect or aspire to becoming principals will find the workshop of interest and value."

-more-

education workshop/add one

Workshop instructors include Dr. Robert H. Anderson, dean of Texas Tech College of Education; Gerald Judd, assistant principal at McWhorter Elementary in Lubbock; Bettye MacPhail, former director of secondary education in the Chesapeake Public Schools of Virginia; Dr. Karolyn Snyder, vice president of Pedamorphosis, a non-profit organization devoted to the study and improvement of school leadership and organization; and Reavis.

There will be nightly entertainment with a western barbecue, social hour, theater and disco dancing. Meals are available at the University Center.

Tuition for the course is \$75. Dormitory rooms will be made available to workshop participants.

Interested persons may register for two hours of graduate credit in course EDAD 5191, "Advanced Education Workshops in Teaching and Administration," at an extra cost of \$40. Persons wishing three semester hours of credit may register for a pre-conference study packet to be completed before the workshop.

For more information contact Dr. Michael Mezack, Director, Continuing Education, 104 Administration Building, Texas Tech University, Lubbock, Texas 79409 or call (806) 742-3797.

LUBBOCK--House lights dim. Center stage spotlight. Enter stage right -- Judy Blue.

She smiles at you, and you feel warm. She carelessly brushes back her hair, and what sounds like a love story begins. Judy Blue, Texas Tech University senior theater arts major, performs where the souls of kings, goddesses, peasants and killers remain alive in the theater-goer's heart.

Blue remembers with pride her recent performance with senior Matt Posey which won for her a \$250 scholarship as "Best Supporting Actor" in the national American College Theater Festival's Irene Ryan Scholarship Competition at the Kennedy Center in Washington, D.C.

Posey and Blue performed a scene from "A Cry of Players" by William Gibson, a play about the love affair between William Shakespeare and Anne Hathaway. The performers portrayed a man and a woman breaking ties while still feeling love for each other.

The actors, first from Texas Tech ever to reach nationals, waited a full month after the regional contest in Fort Worth before preparing for the three-minute Washington performance. They explained that a scene is never performed the same way twice.

-more-

"When you act, you constantly change," Blue said. "We are performing a real situation where actors share some feelings, some points or some insight with an audience. If an audience can see that insight -- not to say we're teaching -- and see the progression and make a discovery, then they share the true experience of acting."

Blue felt the magic of the theater at an early age. When she was a high school freshman in Fort Worth with the lead in "South Pacific," she realized, "It's just me out there."

She added, "If theater's magic doesn't affect you in the very beginning, it probably never will. The magic grows on you and I felt that then and have remained entranced by it."

Blue has performed in Texas Tech productions "Curse of the Starving Class," "Equestrian Assassination of Billy the Kid," "Panhandle" and "Kaspar." She has also appeared at the Country Squire Dinner Theater at Lubbock and in the Cedar Point amusement park in Ohio and will perform in Oklahoma this summer in "Oklahoma!" and "Dust on Her Petticoats."

After Texas Tech, Blue will go to New York.

"So often you don't really know why other people aspire to the Presidency or exert an influence on the world. You wonder what drove them to achieve those goals," Blue said. "I love the feeling of things getting done, people changing and things happening in New York. The experience forces you to grow, to identify yourself and to prove some things about yourself. And when you feel important enough to find out why things happen, then you find the place where you become a force, and that's where life is a challenge."

Meeting challenges and proving yourself have always been part of the theater, she said.

"You can't always get the role. You must respect the other people who are just as skilled and still have enough respect for yourself to go for parts and realize you've got something to say."

"In college auditioning for a time you drop dear friends who are competing and vie for the part on an actor level...and when it's over, you can be friends again. The competition keeps you striving, and you wouldn't be competing with these friends if you didn't think they were good."

Blue said auditions are often the truest expressions by the actors.

"You combine everything you are and give them yourself because you must have the human element, and the only thing you have human is yourself. You've got to believe and know yourself as you give your soul an outlet to live the part."

The magic of the theater: Once it's got you, it's got you. And then you are among the chosen.

"The stage is crazy. Surprising things happen all the time. Mostly you remember the bad, but the moments when you really do say something, you treasure. They prove you are an actor."

EDITOR'S NOTE: Students within your circulation area are noted in this release.

LUBBOCK--Rich Calvird of El Paso has been elected president of the Texas Tech University chapter of Kappa Mu Epsilon (KME), national honor society for students of mathematics.

Calvird is the son of Mr. and Mrs. Rich Calvird, 8339 Lait Drive, El Paso.

Members must have at least junior standing and a 3.0 grade average of a possible 4.0.

Other new officers are Vice President Beverly Sue Winters, daughter of Mr. and Mrs. Richard W. Winters, Box 85, Wildorado; Secretary Suzanne Bates, daughter of Mrs. Dorothy Bates, 1501 W. Chestnut, Denison; and Treasurer Debbie Reddick, daughter of Mr. and Mrs. E.E. Reddick, 1301 Cole Drive, Denison.

Calvird, recipient of a \$500 Achievement Reward for College Scientists, and Winters are mathematics majors. Bates is studying industrial engineering and Reddick accounting.

Rhonda Luxton, daughter of Mr. and Mrs. C.R. Luxton, 2611 Judy St., Odessa, has been named outstanding Texas Tech senior student of mathematics. Dwayne Fryar, who teaches at Sundown, was honored by the department for outstanding teaching. Texas Tech faculty based the award on the quality of students who have come to the university from Fryar's classes.

LUBBOCK--Applications are available for the 23rd Annual Texas Tech University Summer Orchestra Camp for string students in grades seven through 12.

The camp will be held June 17-29 on the Lubbock campus.

String students who have had at least one year of training are invited and will be required to participate in an orchestra and section rehearsal in addition to several electives. Students are placed in one of the orchestras by audition.

Classes, from 8 a.m.-4 p.m., include technique, solfeggio, theory, conducting, chamber music, body movement and sight reading. Swimming also will be taught. The 1979 camp is also sponsoring a special master class for string basses and an orchestra director's seminar.

Guest conductors are Curtis Peacock, conductor of the Casper Symphony and Casper Youth Symphony in Wyoming, and Herbert Karpicke, conductor of the Louisville Youth Chamber Orchestra in Kentucky.

Peacock has worked with state festivals in Wyoming, Montana, Idaho, Colorado and was guest conductor for the 1979 Arizona All State Symphony. The professor of strings at Casper College was one of nine young conductors chosen to participate in the 1978 American Symphony Orchestra League's conductor workshop with Dr. Richard Lert.

-more-

Karpicke is assistant principal violist with the Louisville Orchestra and principal violist of the Louisville Chamber Orchestra and Kentucky Opera Association. He is a former conducting student of Rudolph Kempe in Munich, Germany, where he played with the Munich Bach Orchestra and Munich State Opera. He was conductor of the Flint Civic Symphony in Michigan and the Munich Gabrieli Chorus and Orchestra.

Applications and information regarding tuition, housing and recreation are available from Richard C. Meek, Director, Texas Tech Orchestra Camp, Department of Music, Texas Tech University, Box 4239, Lubbock, Tex., 79409.

LUBBOCK--Ask a journalism major what he wants to achieve by the year 2,000, and he'll probably answer, "I want to be a reporter for 'The New York Times.'" Ask Texas Tech University senior Rebecca G. Patterson the same question, and she smiles because she is going to New York this summer to intern with the "Times" or with one of the network radio or television stations.

Patterson is one of 10 American students chosen for this particular internship. During the finals in December she sent a five-page paper on "Changes in Mass Communications by the Year 2,000," a resume, biography and faculty recommendations for competition to attend the International Radio and Television Society Faculty-Industry Seminar in Glen Cove, N.Y.

Twenty-five students were chosen in February for the New York trip. Jerry C. Hudson, assistant professor in telecommunications, also attended the conference, along with faculty from throughout the country. Entries were judged by executives from the Columbia Broadcasting System and American Broadcasting Co. and by Dr. Robert Stanley, chairperson of the Communications Department of Hunter College in New York.

After competing with the 25, Patterson was chosen for the July and August internship. She is the only representative of print media.

-more-

"Print journalists always have been against the broadcasters," Patterson said. "I went to New York ready to have my animosity reinforced. But everybody up there cared so much about the radio-TV industry. One of my instructors told me when I came back, 'Becky, we didn't send you up there to defect to the other side.' I didn't defect. My eyes are opened just a little wider."

The industry officials Patterson met in her 5-day stay loved their work, and, according to Patterson, were dedicated to the future of mass communications.

Unlike many of her peers, who knew in the fourth grade they wanted to report and uncover governmental scandals, Patterson changed her field from art to journalism two years ago.

"I walked out of the Art Building one day after working for three nights on art projects," she said. "And like a bolt out of the blue, I knew it was time to change to journalism. I know it sounds crazy, but I've never regretted the change."

Patterson considers herself a follower, not a leader, and an observer, not a participator -- but most importantly a learner. "The more I learn, the more I realize I don't know," she said.

"Today you find students interested in having fun and doing their own thing. Not that finding what's important to you hasn't helped, but you need to reach a balance between what you want to do and what you've got to do. You must channel your energy in the right direction."

At the conference, Patterson said, network officials were frank about chances of going to work in the industry. Each year 255,000 persons apply for jobs with each network. One-sixth of one percent of these are hired.

"They told us to try for it if that's what we really wanted. They didn't tell us it would be easy," Patterson said.

Will the 22-year-old daughter of Mr. and Mrs. Neill Patterson of Lamesa leave the West Texas she's known all of her life and go for the Big Apple?

"Right now I'm dedicated to be the best that I can be," she said. I have no visions of myself going to New York to shake up the industry. I'm simply going there to learn. I don't know where I'll go from New York, but I would like eventually to work for a magazine...So many things can happen along the way."

Patterson said she thought Texas Tech has prepared her for that future, whether it's New York or Colorado, where she eventually wants to settle.

"Generally, the education has been very good," she said, "although I'd like to see the courses tougher. I criticize my own worth so much and strive to improve. I want to see the department grow...Maybe after a year, I can come back and really make some useful comments."

16 May 1979

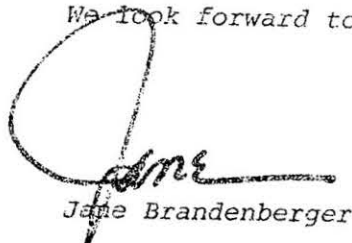

NOTE TO ALL EDITORS & NEWS DIRECTORS:

Attached is information on Nancy Teeters, first woman to be appointed to the Board of Governors of the Federal Reserve System and keynote speaker for the opening session of the Sixth Annual School of Banking at Texas Tech.

Ms. Teeters will be available for your interview at a news conference on Monday, May 21, 7:45 a.m.-8:30 a.m., on the first floor of the Rotunda of the College of Business Administration Building.

Please notify University News & Publications, 742-2136, if you wish to attend the conference.

We look forward to seeing you and/or your representative on Monday.

Jane Brandenberger

NANCY HAYS TEETERS

Date of Birth: July 29, 1930
Place of Birth: Marion, Indiana

Married: Robert D. Teeters,
June 7, 1952

Children: Ann, 19
James, 17
John, 14

EDUCATIONAL BACKGROUND

Marion, Indiana, public schools	1936 - 1948
Oberlin College, AB (economics)	1952
University of Michigan, MA (economics)	1954
University of Michigan, (additional graduate work)	1956 - 1957

CURRENT POSITION

September 18, 1978 - present
Member of the Board, Board of Governors of the Federal Reserve System

PREVIOUS POSITIONS

December 1974 - September 15, 1978 -- Assistant Staff Director and Chief Economist for the Committee on the Budget of the House of Representatives of the U.S. Congress
September 1973 - December 1974 -- Senior Specialist with the Congressional Research Service of the Library of Congress

LUBBOCK--The deadline for nominations for the 1979 National Golden Spur Award has been extended to June 15, according to Jim Humphreys, who heads the selection committee.

The award annually honors and recognizes one person who has brought particular distinction to the livestock and ranching industry. The first recipient was Albert K. Mitchell of the Tequesquite Ranch at Albert, N.M., who was presented the Steuben-created presentation piece last September. Close to 2,000 attended the event.

The recipient must have made significant contributions of at least national significance to the livestock and ranching industry.

Nominations may be made by any individual through any of the sponsoring organizations. Supporting evidence of the nominee's achievements should accompany each nomination.

Uniting in 1978 to make the award were the American Quarter Horse, the National Cattlemen's, National Wool Growers, Ranching Heritage, Texas and Southwestern Cattle Raisers and the Texas Sheep and Goat Raisers associations and the American National CowBelles.

Nominations may be forwarded directly to Humphreys, Pitchfork Ranch, Guthrie, Texas 79236. Humphreys is manager of the Pitchfork Ranch and chairman of the Board of Overseers of the Ranching Heritage Association.

The 1979 National Golden Spur Award and Prairie Party will take place at the Lubbock Memorial Civic Center Sept. 21. It will be preceded, as last year, by a Livestock and Money Symposium, also Sept. 21. Ranch Day will follow Sept. 22 on the Ranching Heritage Center site at The Museum of Texas Tech University.

A highlight of the 1979 Prairie Party will be a special sampler from the Ft. Griffin Fandangle, which annually draws 10,000 visitors for weekend performances in June in Albany, Texas.

The theme of the 1979 Golden Spur Livestock and Money Symposium will be the "Impact of Inflation -- Regulations."

Ranch Day is a family affair, and activities at the center help visitors experience the history which developed the ranching industry in the American West.

LUBBOCK--The 10 final recipients of the prestigious Helen DeVitt Jones Leadership Fellows Doctoral Program awards at Texas Tech University have been announced by the dean of the College of Education, Dr. Robert H. Anderson.

The recipients come from five states and among them are five Texans. They are: Patricia Barrows, Warrensburg, Mo.; Connie Bibus, Chesapeake, Va.; Kathleen Browner, Tempe, Ariz.; Maria Handis, Philadelphia, Pa.;
(cq)
Deborrah Smithy-Willis, Charleston, W. Va., and Lubbock; Daniel DeGuire, San Antonio; Shirley Lubianski, El Paso; Betty MacPhail, Lubbock; David Miller, Fort Stockton; and Jerilyn Pfeifer, Abilene.

Awarded annually on an internationally competitive basis for the past five years, the \$7,000 fellowships represent high achievement in scholarship, leadership and a variety of educational endeavors. They enable full-time doctoral studies in education at Texas Tech.

They were made possible by Mrs. Helen DeVitt Jones of Lubbock and originally were intended to attract outstanding doctoral students over a one- to three-year period.

"With Mrs. Jones' help and investment of her gift, the fellowships have been extended over a period of five years," Anderson said, "and they have accomplished much, both for our College of Education and the future of education wherever the fellows are employed.

-more-

"Forty-five outstanding scholars have benefited and their careers have been significantly enhanced through her assistance," he said. "The college also has been able to attract other generous funding because of the quality of our graduate students. Our critical mass of outstanding doctoral students has led the college to a healthy situation."

Of the 45 students perviously named fellows, nine already have earned doctoral degrees and six more are expected to complete their work in 1979. Most have elected to remain in Texas although some graduates are in other states.

LUBBOCK--Approximately 70 international experts will gather in Lubbock May 21-23 for a symposium on microelectronics, a field that covers integrated circuits and a vast world of miniaturization that has been growing since the early 1960s.

Texas Tech University is host for the third biennial university-industry-government Microelectronics Symposium sponsored by the National Science Foundation (NSF), various organizations of the Institute of Electrical and Electronics Engineers (IEEE) and the International Society for Hybrid Microelectronics.

Discussions will center on university research and educational programs in microelectronics and the role of government and industry in regard to the philosophy, content and support of those programs. Dr. William M. Portnoy of the electrical engineering faculty at Texas Tech is the symposium chairperson.

U.S. universities represented among the speakers include the Massachusetts Institute of Technology and Massachusetts, North Carolina State, Virginia, Oregon State, Oakland, California and Southern California, New Mexico, Lehigh, Colorado and Colorado State, Miami, South Florida, Wayne State, Minnesota, Stanford, Cornell, Clemson, Mississippi State, Toledo, Pennsylvania, Texas and Texas Tech. Other U.S. institutions are the Rennselaer Polytechnic Institute and Clarkson College.

-more-

Foreign universities to be represented include the University of Warwick and Middlesex Polytechnic, United Kingdom, the University of Tokyo and Sophia University, Japan.

Industrial participants include Westinghouse Research and Development Center, Hughes Research Laboratories, Texas Instruments Inc., IBM Thomas J. Watson Research Center, Litton Systems Canada Limited, United Technologies Research Center, Bell Telephone Laboratories, IBM System Products Division, Control Data Corp., Intel Corp., Hewlett Packard Co., Lockheed Missiles and Space Co. and Motorola Inc.

From the government there will be representation from the NSF, the Naval Research Laboratory, Office of Naval Research, the Department of State and Department of Defense and the National Bureau of Standards.

Subjects for discussion will include electronic properties and devices in compound semiconductors; interface properties and devices; the role of agency funding in determining university research and education programs in microelectronics; noise and modeling; microlithography; exportation of U.S. microelectronics technology through the technical education of foreign students; foreign programs -- interaction between foreign universities, their governments and their microelectronics industry; innovative microelectronics instructional programs; microelectronics laboratory programs; and general aspects of microelectronics education.
