Cowboys' Wants a Specialty

## To my Friends and Customers:

Fifty years ago the writer left the ranch to learn the Western saddle making trade. After four years work as an apprentice in the best known saddle shop of the West, he drifted westward and into the range country, where he made saddles for the REAL Cowboy and Western riders; and there formed the association of the GREAT characters of the West, some of whom have become national immortals. He touched elbows with and knew the pioneers, the buffalo hunters, the ranchmen and the cowboys—all sons of the plains. These men were his customers and his friends—all great hearted characters, and what an opportunity has been his to have such men as friends and to have learned their slant on life, the way they viewed things, and the way they did things. From these great men we learned much and especially about the requirements of the riders, and with the mechanical knowledge gathered by years of training, we have applied the things learned from **THOSE WHO KNOW**.

The catalogue which we send to you shows some of the things in saddles which were developed under the conditions mentioned—the knowledge derived from our years of experience is now given to you for inspection. What we have done speaks for itself—we leave it to you to judge.

When we can serve you, it will always give us pleasure. May the best always be yours. **BE HAPPY—RIDE A MYRES SADDLE.**

Yours most truly,

## Trees

The tree is *the important* part of any saddle. With everything else good, but with a bad tree, the inevitable result is a poor saddle—one that will give trouble and be unsatisfactory.

Our trees are specially made for us by the most skilled experts, men who have spent a lifetime in studying the rider's wants. The very latest styles and designs are used. We keep strictly up-to-date on everything; in fact, lead the procession. Our trees come as near meeting all the requirements of the riders as is possible until all *ride alike and all horses' backs are shaped alike*.

Our trees are regularly made for medium sized horses. If ponies or large horses are used a narrower or wider tree should be made accordingly. The trees are guaranteed against breakage for a period of two years. Should any of the trees hurt, we will gladly fix the same free of charge, when it is the fault of the tree. Several things could cause the saddle to hurt other than the tree:

FIRS  
a wrinkl  
sweaty l

FIRST. Bad blankets, or carelessness in blanketing, often causing a wrinkle or fold in the blanket; but especially the continued use of wet, sweaty blankets for days without having them washed or cleaned. This causes the back to become soft and tender. This is notably true in hot months. Give good attention to the blankets, and many troubles will disappear.

SECOND. Sometimes the hurting is due to the peculiar condition or shape of the horse's back. This is especially true if the horse is thin or in poor condition.

THIRD. Possibly what causes more trouble than any one thing is the manner in which one rides. Some riders never hurt with any saddle, while others hurt with every saddle. The skill of being able to properly balance in the saddle will go far to cure most of the hurts. So watch your balancing in the saddle and note the results. Our seats are shaped to assist in overcoming the condition brought about by loose or careless riding.

FOURTH. BE CAREFUL NOT TO PUT YOUR SADDLE ON THE HOT RADIATOR OF A CAR. We have seen the trees warped, the linings and the skirts burned out from this cause and the saddle made to hurt—when otherwise it would not. Watch this and you will get around some other troubles.

Sterling, brass or bell metal horns will be used on any saddle not showing the same, when desired, but for heavy work we recommend the regular iron horn tree, covered with leather or rawhide, as we consider it stronger than either the brass or the bell metal. When brass, bell metal, or sterling horns are wanted, add \$3.00 to catalogue price.

*The Extra Swell Fork* will be used on any saddle, not showing the same, at the following prices: 12-inch fork being taken as a base, add \$1.50 an inch up to 16 inches. On all swells over 16 inches, add \$2.50 for each additional inch.

For saddles with larger trees than described in catalogue, add \$3.00 per inch for each additional inch for cost of material.

## **Buckskin Seats**

This is something that we have specialized on for years and the favor with which these seats have been received by the actual riders, and the service which they have given, enables us, in the strongest manner, to recommend the same to you. These seats are inlaid on the regular leather seat in such a manner that in case they wear out or are not wanted, they can be removed at any time and a good seat would be maintained in the saddle. It is our experience that nine out of every ten who use this seat once will order the same again. This is conclusive proof of their efficiency and satisfaction. These seats will be used on any saddle not

showing the same at from \$7.50 to \$10.00 extra, depending on the size and style of saddle.

## Material

The leather which we use in our saddles is the very highest grade from the famous Eberhard Tanning Company at Santa Clara, California. These tanners have made our leather for the last forty years and the quality of their product is unequaled. We use not only their leather, but wool skins, chap leather and lace leather.

## Workmanship

Three things are necessary in making any good saddle:—

First the *tree*, second the *material* and third the *workmanship*. Appreciating the importance of the workmanship, all of our mechanics have had years of training in our place and are familiar with all details and have the best practical knowledge of Western saddle making—only the BEST work for us.

It may not be amiss here to state that our saddles, except the cheaper, are all laced with buckskin laces, instead of being put together with rivets and where tree fastenings are necessary, we use screws instead of tacks or nails and the superiority of our workmanship is one of the *marked features* of our saddles. Examine our saddles and you will find their supremacy.

## Stamping

Stamping is an art and it comes down to us from the earliest times. History advises us that the old Moors who over-ran Spain left traces of their handicraft in that country. The Spaniards carried it to Mexico and we got the same from that country. Hand-carving in the hands of an artist on the *right kind of leather* will increase the wearing power of the leather at least 50%. We speak from forty years of experience and observation when we make this statement; hence we can recommend the hand-carved work in the strongest way, as a wearing element to say nothing of the beauty which it adds to the finished product.

Please note our leather products and their high class. Our carvers are past masters in the art and our designs are new, distinctive and original; hence the supremacy of our work.

## Oiling

All saddles are carefully and skilfully oiled with Neatsfoot oil, unless otherwise ordered. *Oil is the life of leather.*

## Terms

All saddles in this catalogue are strictly *net*, no discount, as it has always been our policy to give in quality instead of discount. Our prices are strictly cash; no credit.

In ordering, just give number as described in the catalogue. It is not necessary to destroy or mutilate the book in order to send picture.

Write your name, postoffice, and State plainly; also give your nearest express office.

All orders will have strict and careful attention, and will be filled as promptly as possible.

Special orders will have our best attention, and we will make you *exactly* what you order.

At least 25 per cent of catalogue price should accompany order. This saves time, as it is not then necessary to look up financial references. The goods will be sent C. O. D. for balance. This is especially necessary where special orders are made.

*In view of the uncertainty of the leather market, all prices are subject to change without notice.*

---

## SPECIAL NOTICE

We give special attention to the repairing, relining, restringing and fixing of old saddles, regardless of their condition or the maker. Also we will place new trees in old saddles or use the old trees in new ones. Special work will have our best attention and we will go our limit at all times to please in every respect, both as to workmanship and price.

## SPECIAL ATTENTION

Many inquiries come to us, asking if we will use old saddles on new ones. We are pleased to state that we will use your old saddle at the very best market price. We also have inquiries asking if we have old saddles for sale. We always try to keep a fair stock of old saddles and sell them at the most reasonable prices.

### The Queen of the West

This distinctive and attractive saddle is an artistic production—a creation of beauty. The carving is done in the most masterly style—the animals are so life-like—that they appear real. The workmanship is that of a master artisan.

The Sterling Silver is all hand made and engraved. Please note the Silver Cheyenne roll cantle—this is the only one of its kind so far made—Gold monogram on horn, on fork, and stirrups.

To see this saddle is to love it—all admire it—it pleases the eyes and gladdens the heart. Made on Special tree with Special Mexican horn. (Note—this Special Saddle was made for the famous Western Movie actor—Jack Hoxie.)

# S. D. MYRES SADDLE COMPANY

Special Saddle Price \$1,500.00

This saddle shows some very original and distinctive ideas in saddle making, partaking in part of both the American and Mexican style. It is trimmed in gold and silver, with defaced silver support. The carving was very artistically and beautifully executed in original designs. We specialize on original orders. If you want something distinctive and different from anyone else, we can make it for you—this is where we are strong. We give this class of work our very best effort and attention.

This saddle is made on a 13-inch tree with 14½-inch fork — the fork has a beautiful leg hold and is ideal for rough riding and in mountain country.  
Full round skirts lined with woolskin, special shaped fenders with 3-inch stirrup leathers, extended seat, finely basket—Border stamped. Made regularly with 4-inch cantle but 5-inch cantle can be used when ordered. 1¾-inch long and 2¼-inch short latigos, Angora front cinch and No. 21 flank cinch with metal covered stirrups.  
For years we have used this tree and with the most satisfactory results and it is a pleasure to recommend this saddle to you for quality and for service. With iron horn \$2.50 less.

## "Special Little Wonder" Iron Horn Tree

This saddle is made on a 13½-inch tree with 14-inch fork—owing to the shape of the tree the greatest seat room is given. Full round skirts lined with bark tanned woolskin, extended seat, 3-inch stirrup leathers doubled at points, 1¾-inch long and 2¼-inch short latigoes, No. 21 flank cinch, angora front cinch, rawhide covered stirrups. Solid set stamp with edge and border black which gives a beautiful effect. Without the colored effect on the border, \$2.00 less.

This is an ideal saddle, is an easy rider, and specially adapted for roping, it is a great saddle for Ladies use. We have had old time cowboys to report it is the greatest saddle they had ever used. The price of this saddle is unusually attractive—the quality is the best and the riding value is not surpassed. You cannot go wrong when you use this saddle.

### "Myres Little Roper" — Mexican Iron Horn Tree

This saddle is made on a 14 inch tree with 12 inch fork, with round skirts and lined with bark tanned woolskin, 3 inch stirrup leathers doubled at points, extended seat and jockies, Cheyenne cantle roll, with one-piece Arizona style fenders, 1 $\frac{1}{2}$ -inch long and 2-inch short latigos, No. 7 stirrups, soft front cinch, No. 21 flank cinch. This saddle is finely carved, and most attractive in appearance.

This saddle is a companion to the heavier roping saddles, but made on a lighter heft tree and of lighter stock. It is a wonderful saddle and an easy rider and for light roping it is without equal. The demand for the Mexican style horn on this "Myres Little Roper" tree is the basis of its creation, and the heavy demand for them has been extremely gratifying.

A larger or shorter tree can be used. This saddle made with Border Stamp \$72.50.

### "Myres Little Roper" Iron Horn Tree

This saddle is made on a 14-inch tree with 12-inch fork, with skirts 26½-inch x 13½-inch rounded at corners and lined with bark tanned woolskin, 3-inch stirrup leathers doubled at points, extended seat and jockies, Cheyenne cantle roll, 1¾-inch long and 2¼-inch short latigoes, metal covered stirrups, Angora front cinch, No. 21 flank cinch. The saddle is finely hand carved in artistic design—and most attractive in appearance.

This saddle is a companion to the No. 55 Myres Roper Saddle but made on a lighter heft tree and of lighter stock. The saddle was created to meet a demand for lighter saddles than the regular Roper—it is a wonderful saddle and as an easy rider and for light roping it is without an equal. This saddle has been thoroughly tested and has MADE GOOD and we give it our strongest recommendation for the work indicated.

## Improved "All-Around" — Iron Horn Tree

This saddle is made on a 13-inch tree with 14-fork—owing to the shape of the tree it gives greater seat room than the average, hence a shorter tree can be used. This saddle is designed with special shaped skirts which are lined with woolskin—this style of skirts is indorsed by some of the best riders in the West. The saddle is made with single cinch, however, the same can be made with the double at \$4.50 extra.

The quality of the material and the workmanship is the best and it gives us pleasure to recommend this style of saddle and specially the tree to the most exacting riders.

The saddle is finished with No. 7 stirrups 1¾-inch long latigo, 2½-inch short latigo and Angora cinches. When a double rig is requested a No. 21 cinch is included.

This is a practical saddle and one that will give excellent service—we recommend it.

### CHAPS

Possibly there is nothing which the Western rider uses that requires more attention or more skill in making than a well fitted chap. It is as important to have a well fitted chap as it is that of trousers. On the average but little attention is given to the fitting of a chap or the quality of material. With too many, the price is a controlling factor; consequently, a large percent of the chaps are poorly fitted and unsatisfactory in other respects.

We specialize on chaps and also the material which goes into the same. Our chaps are distinctive for quality and fitting value.

Your order will have our very best attention. Be sure to give the correct waist measure, inseam, and measurement around the hips. State if flesh or grain side of the chap out.

No. 44

No. 44 CHAP Price \$50.00

# S. D. MYRES SADDLE COMPANY

There are many grades of chap leather, also heft or weight of chap leather. In certain localities the heaviest grade is required, in other territories we use a medium weight which is 5 ozs. stock, this is well suited for any work that is done on the ranch and can be furnished in cream color, black color, or brown color. The highest grade of chap naturally the better—the selection, however, on the cheaper grade a good tannage is used.

We give special attention to ladies chaps and for which we use a lighter grade leather of excellent selection. Boy chaps are made in light heft. On cheaper grade, we use a chrome which has good wearing value and will give excellent service and enable us to produce a chap at a less price.

**No. 40 CHAP Price \$27.50**

Made of select Elk skin, belt and pockets buck laced, made of either black or yellow stock. A most wonderful chap for looks and wear.

No. 38 CHAP—(Not illustrated) this is a companion chap to No. 40 with the exception that it has three snap fasteners, made of either black or yellow elkskin and 8-inch wings at the bottom.

### INDIAN NAVAJO SADDLE BLANKETS

A large and well selected stock always on hand

The Navajo Blankets are a characteristic production of the Navajo Indian, who raise their own sheep, the wool from which is woven into blankets. They extract from nature the secret of its coloring and have incorporated these colors into the production of their blankets. The beauty of these blankets is unsurpassed, and the wearing value has never been equalled, and their rich and natural color is a secret of the Indian Navajo Blanket maker.

They weave these Navajo Blankets into most beautiful rugs, and each character is expressive in Indian language of some ideal. These characters are artistically blended in a blanket which is beautified in their own peculiar art.

We carry these blankets and rugs which vary in size, and also in design—the price ranges from \$15.00 to \$75.00.

The double Saddle Blankets have by far the greatest wearing value of any blanket of which we know, range in price from \$10.00 to \$15.00 according to pattern, quality or size.

The single Navajo Blankets range in price from \$7.50 to \$10.00 according to pattern, quality or size.

Commercial single Navajo Blankets range in price from \$5.00 to \$7.50. There is no blanket that equals a "Navajo" for wearing value.

# S. D. MYRES SADDLE COMPANY

DO NOT FAIL TO WATCH YOUR BLANKETS — MUCH OF THE HURTING IS DUE TO DIRTY, WET SWEATY BLANKETS — USE GOOD BLANKETS AND KEEP THEM CLEAN, AND YOU HAVE GONE A LONG WAY TO CURE HURTING TROUBLES.

No. 5 HOLSTER

Patented Pat. No. 2,092,222.

No. 6 HOLSTER

No. 5 (Patented)

Price \$5.00

MYRES SPECIAL SAM BROWNE  
BELT HOLSTER

This holster was designed for those who use the Sam Browne Belt—its merits are attested by all who have used the same—it enables the fastest draw and is so constructed that it fits the contour of the body and always has the gun in the right place and at the right angle for quick draw when fast work is required—made for any size or make arm—in Tan, Cordovan, or Black color. The belt is either made with loops or glove fasteners on reverse.

## OFFICERS' BELTS

This style of belt has proven to be the most satisfactory for the support of guns. The manner in which the loop interlocks at the buckle gives a most rigid and permanent effect and there is no sagging from weight of pistol. It has no equal for this purpose.

Spur  
Straps

# S. D. MYRES SADDLE COMPANY

Our bits and spurs are made of the finest material and by the most skilled workmen and especially for us.

For heavy service, we recommend the steel products. In a damp country, the stainless steel is well suited as it does not rust, but we seriously doubt if it will stand the heaviest service as well as the other.

We can use stainless steel on any bit or spur at 50c extra per pair, except on the cheaper grade of bits or spurs.

- No. 81 Bit—Fancy bit, silver rosettes, 7½" overall. Price.....\$8.50  
 No. 83 Bit—Extra fancy with silver rosettes 9" overall. Price.....\$8.75
