

JOYFULL NEWES
Out of the New-found
World.

Wherein are declared, the rare and
singular vertues of diuers Herbs, Trees,
Plantes, Oyles & Stones, with their ap-
plications, as well to the vse of Physicke, as of
Chirurgery: which being well applyed, bring
such present remedie for all diseases, as many
seeme altogether incredible: notwithstanding
standing by practice found out
to be true. *1637*
Edwards

Also the portraiture of the said Herbs,
varie aptly described:

Engliffhed by *John Frampton* Merchant.
As truly corrected as by conference with
the olde copies may appeare, (but her
unto are added those other bookes
treating of the Bezaar Stone, the Syevu
Libericonera, the properties of Iron
and Steele in speeie medicine, and the be-
nefit of canthar).

LONDON.
Printed by *E. Alsop*, by the assignee of
Bonham Norton.
1596.

*Of the Tabaco, and of his
great vertues.*

This Hearbe which commonly is called *Tabaco*, is an Hearbe of much antiquitie, and knowen amongst the Indians, and especially among them of the newe Spaine, and after that those Countries were gotten by our Spaniards, being taught of the Indians, they did profite them selues with those thinges, in the woundes which they received in their warres, healing themselves therewith to their great benefite.

Within these few yeeres there hath bene brought into Spayne of it, more to adorne Gardens with the fairenesse thereof, and too give a pleasant sight, than that it was thought to haue the meruelous medicinable vertues which it hath, but now we doe vse it more for his vertues, than for his fairenesse. For surely they are such which doe bring admiration.

It is growing in many partes of the Indias, but ordinarily in moist and shadowie places, and it is needefull that the ground where it is sown, be well tilled, and that it be a fruitfull ground and at all times it is sown, in the hot Countries. But in the colde Countries it must be sown in the shadowe of a Parke, for that it may defende it selfe from the frost.

*How it is
sowne and
how it groweth.*

The

are brought from the West Indias. Fol. 34.

The proper name of it amongst the Indians is *Piccoli*. The name For the name of *Tabaco* is given to it by our Spaniards, by reason of an Island that is named *Tabaco*.

It is an hearbe that dooth growe and come to bee very greate: many times too bee greater then a Lemmon tree. It casteth forth one steame from the roote which groweth by it, without declining to any parte, it sendeth forth
