Lieut. Gen. Omar Bradley—"The Doughboy's General"—pictured as he is today and as a player at West Point.

By Joe Cahill

FOOTBALL PAYS DIVIDENDS IN BATTLE

"HIS most promising characteristic is getting there and if he keeps up the clip he's started, some of us will some day be bragging to our grandchildren that 'Sure, General Bradley was a classmate of mine.' This is the way his classmates, in the 1915 cadet year-book, foresaw the future of Lieutenant General Omar Nelson Bradley and how right they were!

Today the tall, slender, gray, straightforward and rather reserved hero of Bizerte is recognized by fellow officers as a great tactician who is at the top in his knowledge of the science of warfare. In fact, his present important command as leader of all United States ground forces in the piercing of Fortress Europe, emphasizes the brilliance of the famous three-star soldier who is so sparing of the lives of his men but who feels Germans should be exterminated.

If history repeats itself, the European side of this greatest and most destructive of all wars must be ready to bow out. No one will ever forget the great drive on the Rhine in 1918 when the Allied Armies fed the Germans into complete surrender. That thorough rout of the enemy was led by General John Pershing, a native of Laclede, Missouri. If the Allies had listened to General Pershing twenty-six years ago, maybe we would not have had to call on "Omar the Tent Maker" from Moberly, Mo., to do the job again.

Bradley was born in Clark, Missouri on February 12, 1893, and entered the United States Military Academy in 1911. The first two years of his colorful career as a West Pointer Omar was held down to the "B" squad football team. His youth, inexperience and slight stature were not of the type to cope with the bull-necked men in the game those days. But above all Cadet Bradley had the guts and determination to master the rugged game and set as his goal the varsity end position. He made the team in his third and final years and played some great football. His tackling and offensive play were definitely of the highest caliber. For his outstanding play he was awarded the coveted "A" and a souvenir football. Omar loved football but the grid game was not his only forte. He possessed a powerful throwing arm that received the deepest respect throughout the collegiate baseball world. And could he hit that ball! His three year batting average

on the Army varsity was a neat .333—a commendable record in any league.

To make even the cadet varsity in those days you had to be good. A quick glimpse of the roster uncovers some of our greatest fighting men: General Eisenhower, Supreme Commander; Major General Hubert Harmon, Commanding Thirtieth Air Force; Leland S. Hobbs, now in an important overseas assignment; Thomas Larkin, in the North African Theater; Vernon E. Prichard, commanding the 14th Armored Division, and Roscoe Woodruff, commanding the 84th Infantry Division. All great warriors and likewise former outstanding athletes and classmates of Omar Bradley in 1915.

At fifty-one General Bradley keeps himself in A-1 condition and on several occasions has excelled many young enlisted men in physical endurance. As an example, associates tell of his running through obstacle courses, swinging across ravines and streams on dangling ropes, while enlisted men dropped out.

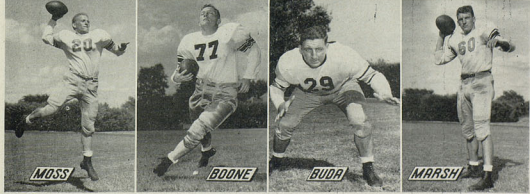

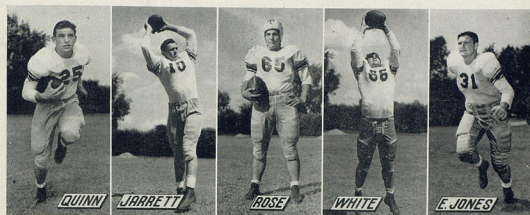

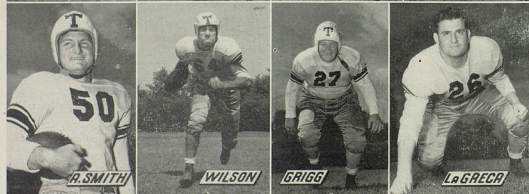

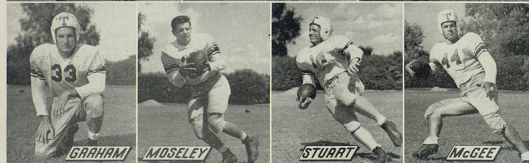

Bradley's first call to fame in the present war was in Tunisia when he captured the French naval base of Bizerte in May, 1943, with thousands of Germans giving up their arms, while in command of the American Second Corps. His troops surrounded, cut up and forced the German Divisional Commander to surrender unconditionally and to his terms immediately.

Like General Eisenhower, his rise was slow at first but rapid in recent years. He was a Colonel as recently as February, 1941, but had climbed to a lieutenant general by June, 1943.

Thrifty of his men's blood but a thorough master of tactics, Bradley is known as "the Doughboy's General."

He is described by friends as a non-smoker, an infrequent drinker and a shrewd and enthusiastic poker player.

When General Bradley was appointed to lead the Yank Army in the greatest invasion the world has ever known, his wife remarked: "He has always done the best he can and it has always been enough. He will do the best he can and I'm sure it will be enough."

1944 Hurricane Thumbail Sketches

Players Returning From 1943

CARL BUDA, 214-pound guard from Omaha, Neb., started about half the Tulsa games last season. His defensive play was outstanding throughout. His play on offense improved so much that he was ranked among the three first choices on the squad. Standing five feet, eleven in height, Buda is one of those barrel-type guards who yet develop enough speed for their position. Carl played 137 minutes in seven games last year. He is a junior in the College of Arts and Sciences.

CLYN BURGESS, 222-pound tackle, started all eight games last year for the Hurricane. Converted from guard, which he played as a starter throughout the 1942 season, Burgess was an important factor in Tulsa line play last fall. He made up most of the time for the Hurricane. He is a work-horse, playing 239 minutes last season and clinching the year's performance in his second Sugar Bowl game. He lives in Tulsa, where he played for Central High School, and is a junior in the College of Arts and Sciences.

ERIC FIELD is "tree-top" among the Hurricane players. One of the two tallest men on the squad, he stretches to six feet, five. Eric is an accomplished pass-catcher, but had the misfortune last year to be playing behind four top-ranking flank-men. In 75 minutes of participation, however, he caught five passes for 99 yards and two touchdowns. He's an arts and science sophomore from Stratford, Conn.

CLYDE COOKINGHT, one of last year's starting ends, is a senior arts and science student, who was on both the 1943 and 1944 Sugar Bowl lineups. "Nip" is fast enough to use his 185 pounds effectively in downfield blocking, and tall enough at six feet, one, to be a good target for the passers. He caught nine tosses last season for a total gain of 125 yards, and his defensive play has been solid. He played 211 minutes last season to rank among the first 10 on the participation record. Clyde was called into the army through the AEC in the spring of 1943, but was released with a medical discharge during the summer. He is the holder of the Doctor Perry pre-medical scholarship.

SAM GRAY, 196-pound end, was both spectacular and versatile in his play for the Hurricane last season. Having played both guard and tackle, after working out early in the season on end and blocking back Gray reached his peak in line play in the Oklahoma and Southwestern games. In fact three times in the latter play, Gray shot through blockers to drop the ball-carrier for losses of from six to eight yards. Each time his tackle stopped a Southwestern drive already underway. Gray is six feet tall and stands out on the field as the lightning type of player. He played 175 minutes last season, alternating with Glen Burgess at left tackle for the most part. He's an arts and science senior and lives in Tulsa.

BOR HELLINGHAUSEN, 187-pound, five-11 halfback and center, played his first year of varsity football last year. He had to give way most of the time to Capt. Dell Taylor, Camp Wilson and Allen Smith at his position, but in his 25 minutes of play, he carried five times for 25 yards. On his first offensive play for Tulsa, he went over for a touchdown from the three-yard line against the Oklahoma Aggies. In the Arkansas game he took a short pass and went 30 yards for another score. He's a sophomore engineer.

DICK JONES was one of the prize freshmen on Henry Frank's 1943 eleven. Weighing 226 pounds and standing six feet, one, this blond young giant from Paris, Texas, stepped right into a starting guard position in his first freshmen game. And although he later showed his berth more equally with the experienced Buda, he played 248 minutes of varsity football in the seven games last year. Fast and football-wise for his 19 years, Dick has become a college veteran in short order. He's enrolled in the college of arts and sciences.

ELLIS JONES is probably the most widely known player on the Tulsa squad, at least as widely known as his nearest competitor: Red Wade, Camp Wilson and Phil Frewitt. This 185-pound one-drum guard, whose play throughout the past two seasons and in the 1943 and 1944 Sugar Bowl games brought him national acclaim, has been columned and carried in all the stories and editorials. He also played in the 1944 college all-star game at Chicago. A fast player for the line, Jones is a sure-fire blocker and can handle himself well enough when the ball-carrier comes along. Having lost his arm at the age of 11, following a broken arm from a tree-fall

and subsequent poisoning and amputation, Ellis has learned

to do things with one arm and body that most people think impossible. He's a senior in arts and sciences, wants more than anything to enter the business world after he graduates. AL KOWALSKI is the "hard luck guy" of the Tulsa squad. This big 200-pound blocking back, who played center at Georgetown university year before last, received a knee injury as he was reaching peak playing form in the Oklahoma game last year, and didn't compete again until Thanksgiving—and then only for five minutes against Arkansas. When Al showed up on the Tulsa team last fall, Frank asked him why he came to Tulsa. Al said that Tulsa had aeronautical engineering, which was what he wanted to take, but he said he really came so he could play in the Sugar Bowl. Henry laughed then, but Al got his wish and did play in the Sugar Bowl against Georgia Tech on last New Year's day.

SAM LAGRECCA is a sophomore guard who played his high school football at Cretation Prep in Omaha, Neb., and would have gone on to Creighton University if it had continued football. He weighs 210 pounds, stands six, one, and has been a dependable reserve. A good team player, Sam promises to be a varsity caliber this year. He is enrolled in the college of engineering.

NOLAN LURN, Jocky Texas lad who to playing his second season for Tulsa, would have started Hurricane games last year if Goodnight and Herriman had not been available, and this year has his big chance. He 165-pound frame lowers to six feet, four, making him an excellent target for passes. He caught 11 for 115 yards in 145 minutes of play in seven games last fall. One of them was for a touchdown. Nolan came to Tulsa from the Kilgore, Texas, junior college, and played on the Hurricane basketball team the following spring. He's an arts and science senior.

CHARLES MITCHELL is a 165-pound back whose speed has been used to advantage at both wingback and blocking back. Most of his 104 minutes of play last year was at the former post. He is nipped, as well as fast, and played basketball and football at the Springfield, Mo., Teachers college before entering Tulsa. He is a senior in the college of arts and sciences.

BOB NABORS, a 165-pound reserve center, is from Fort Worth, Texas. A rugged youngster, Nabors was a starter on the reserve team which helped the varsity develop against anticipated opponent's formations. He's a student in the college of arts and sciences.

FELTO PREWITT, 195-pound center from Carrollton, Texas, was one of the best football players on campus last year. He was rated among the best in the nation by writers and coaches who saw him play. His games against Oklahoma (56 minutes) played and against the Marine Corps Southwestern (Texas) eleven (60 minutes) were masterpieces of gridiron performance. He is a senior in Tulsa, and played the line on defense, and his diagnosis of opponents' play was as quick and decisive as his follow-through. Not to Taylor, he played more than any other member of the squad, 307 minutes in seven games. He is expected to continue the same magnificent performance this season. He's an arts and science sophomore.

ED SHEDLOSKEY was the wingback of the best last season at Tulsa. Having recovered from an ankle injury, he became one of the Hurricane's most effective runners and best pass catchers. Playing 250 minutes, Fast Ed made 127 net yards from rush in 21 tries and caught 11 passes for 221 yards and five touchdowns. He rushed over another column to become Tulsa's second highest scorer. Shedloskey weighs 167 pounds and is five feet, 11 inches tall. He is a senior pre-medical student.

ALLEN SMITH is a 204-pound full-back, who has both speed and shrewdness. Once through the line, he runs a fullback but he can rapped around an ankle blocker in a fullback last fall. He carried 23 times from scrimmage, gaining 128 yards and scoring three touchdowns. His participation record for 1943 was 115 minutes. He played one season on the Baylor freshman team, and this is his second varsity year for Tulsa. Allen is a sophomore in the college of business administration.

C. B. STANLEY earned AP All-American mention for his service play at tackle throughout last season. A blond giant at 207 pounds, Stanley stands six feet, three, He is a doubling type of player, who never lets an opposing passer or kicker rest. In the 1943 Oklahoma game he played as a punter and one quick-kick. On the latter play, the bounding ball was

TULSA'S DOMINANT DEPARTMENT STORE • FOURTH & MAIN • DIAL 2-7101

Both are Phillips Research Laboratories

IN TIME OF PEACE hundreds of Phillips chemists and engineers devoted themselves, in the glass-bricked laboratory pictured above, to search for product betterment.

Car-owners reap the benefit in improved gasolines and lubricants, at prices which represented ever-increasing value for the money.

IN TIME OF WAR, Phillips research activities are sharply focused on the requirements for story, and the U. S. Armed Forces... and you, not as a car-owner but as citizen and taxpayer... reap the benefit in improved products, at prices which represent ever-increasing value for the money.

The Phillips airplane pictured above, with its unique test and measuring devices, is also a labora-

tory... a flying laboratory for a Phillips pioneering research project. Phillips recently was first to conduct a flight test program to determine the anti-knock performance of aviation gasolines... not in earth-bound test motors... but in combat-type engines under actual flying conditions.

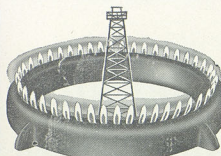

PHILLIPS HIGH PLACE in the war production of butadiene for synthetic rubber, 100-octane aviation gasoline, and other petroleum chemicals, is the result of Phillips long years of peacetime research to extend the frontiers of knowledge concerning hydro-carbon chemistry.

Who can predict what great new benefits will flow to motorists after victory, as the result of Phillips wartime exploration of the limitless possibilities of the chemical production of new and better things from petroleum gases as well as from petroleum!

This much can be predicted with confidence: With the coming of peace, car-owners will be offered a vastly improved postwar Phillips 66 Gasoline. In the meantime, whenever you see the Phillips 66 Shield, let it remind you that Phillips great refineries are gigantic chemical plants pouring out weapons for victory.

There's More Behind Your Gas Service Than Just a Well!

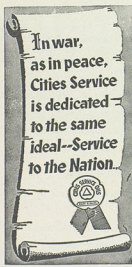

• Good gas service demands careful thought and planning. It means coordinating the efforts of over 1,000 people—each with a separate task to do. It takes men to produce the gas, ... others to purify it and transmit it from hundreds of widely scattered wells to growing cities, ... and still others to see that it reaches the burner tips in huge war plants, army and navy camps, commercial establishments, and in your home.

Thumbnail Sketches—continued.

(Continued from page 12)

caused by Jim Stegman, then playing the other tackle, and carried 50 yards for what proved to be the winning touchdown. Stanley's durability is attested by his 261 minutes of play in seven games. He is playing his third varsity season for Tulsa, although he was not a member of the 1942 team. He is enrolled in the college of arts and sciences.

BOONER STUBBS, 170-pound sophomore guard from Corsicana, Texas, is one of the toughest little books in the Tulsa reserve line. On offense or defense against the varsity teams last year, he was a terror. On a number of occasions, he shot through the big starting line to break up consecutive plays. He has been playing at center and guard in practice sessions this fall, and may become one of the strong center reserves. Stubbs is enrolled in arts and sciences.

JACK THOMAS, tall 200-pound reserve lineman, was played at both center and tackle last year. And at both positions on defense against the varsity, he was a tough customer for the veteran blockers and ball-carriers to handle. Nineteen years of age, Thomas has developed well and looks to be one of the most potent reserve linemen. He's a business administration student, and his home is in Lufkin, Texas.

MAURICE (RED) WADE, who gained national fame as a sophomore on the 1941 Maroon University Sugar Bowl team, played in his second New Orleans classic on New Year's day—this time for the Golden Hurricane—with the same No. 11 on his jersey. Having withdrawn from his freshman year in 1942 because of an aggravated injury, Wade underwent an operation last mid-year and entered Tulsa in the fall. Returning to form slowly, the 175-pound redhead rose to stardom in several games. In 125 minutes of play, he returned five kicks for 77 yards, completed 15 of 35 passes (45% average) for 273 yards and five touchdowns, and rushed 33 times for a net gain of 162 yards. AP selectors recognized his play with All-American mention. His assignment this year will be to fill the fullback spot left vacant by Clyde Leflore, and try to duplicate his passing feat. Although hampered by recurring injuries, Wade has shown in practice that he is deadly on short, bullet passes. It remains to be seen whether he will prove to be the threat that Leflore was last year. Red is an arts and science junior.

LEO WALKER is a 182-pound wingback who came to Tulsa last year from the Kilgore, Texas, junior college. The blond young speedster alternated with Sheddock and Haddock, played 113 minutes for the season and scored two touchdowns. He has proved to be one of the best punters on 1943 squad, and can run well enough to be considered a threat in the backfield. He is a junior engineering student.

BARNY WHITE is a little and nimble-hipped end who led the corps of Hurricane post-coaches last season. Short of stature and weighing 180 pounds, he is one of the best linemen the line that he is. In only 107 minutes of play last year, the graceful young freshman from Paris, Texas, caught 16 passes for 188 yards and five touchdowns. A leg injury restricted his play in one game to two minutes. A possible starter on this year's squad, White will be pulled back from his end position to do some of the punting, for he is one of the longest punters on the Hurricane. He is a student in the college of arts and sciences.

CAMP WILSON, a 200-pound fullback, was the fifth ground guard in the nation two seasons ago as a freshman at Hardin-Simmons. Having spent most of the summer in a California army hospital, he was given a medical discharge in the fall and enrolled at Tulsa. His ailment is a knee injury, resulting from a thrasher-severed achilles tendon some years ago. He wears an especially-constructed shoe. With his late start, Camp missed Tulsa's first game and was later hampered by a severe leg bruise. But when he returned to form, he tore opposing lines to shreds. Playing 157 minutes he carried 100 yards for 285 net yards (an average of 5.9) and four touchdowns. He is up to his old form again this fall and is a definite starter. Camp's home is El Paso, Texas, where he saw Henry Franks' first Tulsa team defeat Texas Tech, 6-0, in the 1942 Sun Bowl game. When he was released by the army, and Hardin-Simmons had discontinued football, he decided to continue under the Hurricane coach.

New Players of 1944

NATHAN ARMSTRONG, 195-pound fullback from Hennessey, is beginning his first year on the Tulsa squad. Pleased with fullback material this year, Franks decided that Armstrong could be used more profitably at tackle—and the big

six-foot, two, former high school back is playing off in practice with his eager reserves and willingness to work. Armstrong was captain of his team and was a member of the conference championship eleven when he attended Gary High school. He is enrolled in the college of engineering.

J. R. ASHCRAFT, hard-charging freshman tackle from Altus, uses his 190-pound, sinewy frame from time to time to good advantage in the line. He has a facility for breaking through to null the ball carrier in the practice sessions which is bringing him to the attention of the coaches. He is inclined to become one of the reserve assets of the 1944 Hurricane. He is a student in the college of engineering.

BILL BLOOM, a clean-cut youngster from Hobart, is a freshman guard on the current edition of the Golden Hurricane, but he can play equally well at tackle. Weighing 160 pounds and standing five feet, eleven, Bloom was captain of the 1943 team of Hobart, and won honorable mention on the all-state squad. He is an engineering student.

J. R. BOONE, freshman back from Sand Springs, was an all-star two years ago. Only five feet, seven and one-half inches in height, Boone is certain to become one of the most valuable reserve speedsters on the Tulsa squad. Showing up late for practice after writing all summer in a right hand in California, he quickly showed that he had the physical equipment to become an important contender for the second wing back position. His love for football is expressed in his desire for a coaching career after graduation.

BOB BRINDLEY, 215-pound tackle from Oklahoma City Christian, was an all-state selection last season, and was outstanding in the all-star high school game last August. Rugged and fast, Brindley is expected to become one of the most important reserves on the Tulsa squad this season, and will probably be called upon to play in the line in the early part of the season. He's a business administration freshman.

TOM BURNS, 185-pound freshman fullback from Gary, Indiana, has lost little chance to prove his ability. He missed much of the early season conditioning, and is behind the other players in handling the assignments. His ability to learn the plays quickly will determine his future worth to the squad. He is a graduate of Emerson high school.

J. W. JUSIS, freshman engineering student from Tulsa Will Rogers, is a 185-pound back on the Hurricane squad. With a record of veteran looks on the field, Bush has lost no sight, hard for recognition during practice. He is only 16 years of age, and looks to be promising material for the years ahead. **TONY CUDAL**, another Gary, Indiana product, is a tackle, brother of Burns, also missed most of the early necessary practices when he accompanied Burns home on a necessary trip. A 200-pounder, and standing at six, one, Cudal has the markings of a good end. He works hard and loves football. He may become an important reserve wingback during first year.

WILDER (TORY) COLLINS, second largest man on the Hurricane squad at 240 pounds, and standing six feet, three inches tall, is looking for a strong bid for a starting berth at right tackle. He has shared the position with veteran C. B. Stanley in practice, and is certain to see plenty of action this fall. Toby never played high school football, but had two years of experience on the College Park junior college team. He entered the army in 1942, and in 16 months became staff sergeant, before receiving a medical discharge in November, 1943. He entered the University of Tulsa in January, 1944, and is now a junior in the college of engineering.

JOHN DOWELL, heavy, 165-pound freshman red-head from Tulsa, entered at a slashing type of player who is a fullback. Possessor of an aggressive spirit, Dowell uses his assets in a good advantage in action. He was captain of the 1943 Central high school team.

LAWRENCE FELDS, 191-pound freshman end, was co-captain on the Cherryville, Kansas, high school team as an all-state last season. His team was champion of Kansas for two consecutive years. Towering six feet, eleven, he has been used at end and tackle in the Hurricane practice sessions.

DEAN GEORGE, high-stepping 175-pound fullback from Monticello, Missouri, may become one of the offensive stars of the season as the season advances. "Red Dog," as he is known to his teammates, excels in broken field action, and has attended Western Michigan college as a Marine reserve. He is a senior in the college of arts and sciences.

BILL GILMORE, 210-pound tackle from Tulsa Central, is starting his first year as a member of the Hurricane squad. He spent one semester at Texas Tech, and is now enrolled as a freshman at Tulsa. His play in the line of the field has been commendable, and he may develop into a competitor to watch later on when he gains more experience.

A TIP FROM A TANK

Fighting tanks need fighting lubricants—lubricants that will fight heat—keep motor and gears working smoothly despite tough battle conditions. So the U. S. Army uses Sinclair lubricants for many of its tanks, jeeps and other mechanized equipment.

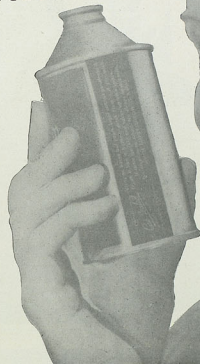

To give your car the same, sure protection, get Sinclair lubricants from your Sinclair Dealer. To protect your engine, for example, he offers Sinclair Opaline Motor Oil. This famous oil stands up longer and lubricates better because it is both de-waxed and de-jellied. Use Sinclair Opaline to keep your car rolling.

The can that kept 12 men alive 44 days
may serve you
better beer!

• They had no water, no food. Yet they drifted 44 days in a lifeboat and lived to tell this story.

One thing saved them—a little can. What was in it?

An old friend of yours—beer! There were 960 cans of beer in the boat. It slaked their thirst and kept them alive.

You'll find American beer wherever you find U.S. troops overseas, from the Arctic to the jungle. Much of it's packed in cans that protect it from light and breakage. That's why you can't get beer in cans.

But, someday, you'll get your fa-

vorite beer with true brewery flavor in your favorite container—the easy-to-open Cap Sealed Can. And it may be even better than today's fine brews. Don't think the brewing industry is standing still, either.

To do our war job, we've developed new ideas and new skills, too. That's why as we look ahead, we see new and better things in Continental cans.

POST-WAR PLANNING: We'll be glad to discuss future use or improvement of your product or package and help in your post-war planning. Write Post-War Planning Dept., 100 E. 42nd Street, N.Y.C., or Continental Can Company of Canada, Limited, Montreal.

UNIVERSITY OF TULSA DOWNTOWN COLLEGE AND LAW SCHOOL

Fifty Years of Hurricane Football

Fifty years ago, in 1895, football began at the University of Tulsa. The University at that time was known as Henry Kendall College, and was situated at Muskogee, Indian Territory. The first three Kendall teams are described in the college catalogue as champions of the Territory. Since 1912, beginning date of the "modern era" for Tulsa, the Golden Hurricane has won 184 games, lost 81 and tied 18. Tulsa produced its greatest teams in 1915, '16, '19, '20, '22, '33, '41, '42, and '43.

Head coach of the '14, '15, and '16 teams was the late Sam McBirney, Tulsa banker, who did more than any predecessor to bring Tulsa into the football spotlight. The '16 team was undefeated and untied, scoring 566 points to its opponents' 33 in 10 games. Francis Schmidt became head coach that year, although McBirney continued for several years to give active assistance in developing the Tulsa elevens.

After the war, the entire 1916 team returned, and in 1919 was undefeated, although once tied, scoring 592 points to its opponents' 27 in nine games. This feat was duplicated in 1920 when the team that year won 10 games and tied one, scoring 622 points to its opponents' 21.

Schmidt went to the University of Arkansas in 1922, and later to T. C. U. and Ohio State, and Howard Acher took over the coaching reins at Tulsa. He had an undefeated team his first year, winning from such teams as T. C. U., Arkansas and Texas A. & M. The last-named team was con-

sidered champions of the southwest at that time. It was during Acher's regime that the team earned the title, "Golden Hurricane," which it has kept ever since.

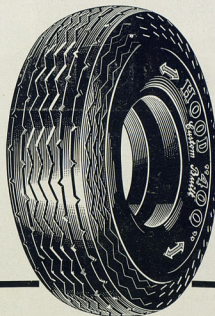

Elmer C. "Gloomy Gus" Henderson followed Acher in 1925. This wily cricketer strategist had many good teams, but the best was the 1933 aggregation, which lost one of seven games, defeating Oklahoma, Kansas and Arkansas. His 11-year Tulsa record was 70 games won, 25 lost and 5 tied.

Vic Hurt became head coach after Henderson left in 1936. Over a three-year period his Golden Hurricane won 15 games, tied 5 and lost 9 against the toughest competition in the Missouri Valley conference and in the southwest.

Chet Benefiel, Tulsa graduate and former assistant coach, succeeded Hurt in 1939 when the latter accepted a position on the University of Kansas coach staff. During the 1939 and 1940 seasons Benefiel's teams won 11, lost 8 and tied 1.

Henry Frnka succeeded Benefiel in the spring of 1941 when the latter entered the navy. In the past three years, Frnka's teams have won 24, lost 4 and tied 1. In addition, they have participated in three consecutive bowl games. They won from Texas Tech in the Sun Bowl at El Paso in 1942 by a 6-0 score; were defeated by Tennessee in the Sugar Bowl at New Orleans in 1943 by 14 to 7; and lost 18-20, to Georgia Tech in the Sugar Bowl in 1944.

Do you NEED tires?

If you do . . . TAKE A HOOD LOOK! Quality HOOD TIRES are available to those needing and qualified to buy them. HOOD TUBES are available to all. If you have a Tire Certificate . . . take it to your neighborhood Skelly Service Station . . . HOOD TIRE Headquarters. Your Skellyman will take care of your tire needs.

Frequent tire inspections are more important than ever. You must get the most out of your tires. Make a habit of stopping at your neighborhood Skelly Station regularly for careful tire inspections.

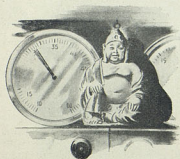

Gasoline Powers the attack-DON'T WASTE A DROP

SKELLY OIL COMPANY

TULSA OKLAHOMA

They wouldn't fly
without them...

A pilot on the India-China run has an ancient fat Euddha attached to his control panel to help him "over the Hump."

A bright chiffon scarf is part of the flying equipment of a certain fighter pilot. It belonged to his best girl—but now it's his "insurance."

A navigator always carried with him a captured Jap diary. He believed it contained telephone numbers and addresses of Tokio belles—until he discovered it was a field ration list.

Ethyl antiknock fluid goes along with fighting planes powered by U.S.-made gasoline. *It goes into practically every gallon of fighting grade aviation fuel*—which is one reason why our fliers not only have the best gasoline but plenty of it.

(Continued from page 25.)

that year. He later entered service and became a technical sergeant in the AAF, on assignment with cargo-carrying planes to Alaska. After a year, he received a medical discharge.

JAMES QUINN is a 178-pound freshman back from Chicago, who played high school football at Loyola Academy. He is being used mostly at blocking back in practice, but is equally adept at fullback. Quinn has shown that he is able to hold his own with the other reserve backs, and looks promising. He is an engineering student.

JOE REXROAT, freshman back, from Guyton, packs 175 pounds on his sturdy six-foot, one-inch frame. Although he has not been used much in fall practice, Joe has many of admirable traits. Chief among these is his willingness to work and his attitude. He was captain of his team at Guyton.

PAUL ROSE is another Chicago lad who decided to matriculate at the University of Tulsa. He weighs 205 pounds and has been used a great deal at fullback on the reserve team during practice. He runs hard and shows signs of unmitigated promise. Freshman in the college of arts and sciences.

WALTER SCHMIDT, who won all-state honors while playing guard at Miami high school last year, may become the under study to Felo Prewitt at the center position on the Hurricane first string this fall. "Schmoe" takes his football seriously, as was evidenced by the fact that he was co-captain with Perry Moss of the north team in the recent state all-star game. He was versatile enough in high school to play five positions on his football team—center, guard, end, tackle and fullback—and play them all well. He is an engineering student.

CHARLES SCHWENDEMAN showed up late for practice from his home town of St. Louis, Mo., and has had little chance to prove his worth. He is five feet, eleven, weighs 143, and runs at guard. He was captain of the McBride high school team in St. Louis last year. Schwendeman is enrolled as a freshman in the college of engineering.

CHARLES M. SMITH comes to Tulsa from Magnolia, Ark., high school, where he lettered two years in football. The six-foot, two-inch and weighs 170 pounds, and his height should be an advantage. He is a freshman in petroleum engineering.

WALLACE GUCKY SPENCER, 180-pound back from Mission, Texas, is the latest player on the squad. Only five feet, six, he is fast and shifty, and will break into the line-up many times this fall. Spencer was a star high school player at Corsicana, and later spent a Kilgore Junior College. He entered the navy after one semester at Tulsa in 1942. He recently received his discharge.

BOBBY JACK STUART, 170-pound freshman fullback, can probably be called the unluckiest member of the squad to date. With a brilliant record as a back at Tulsa's Will Rogers high school, Stuart was declared first and wide on the swiftest high school back in Oklahoma last year. He then averaged the 100 in the remarkable time of 9.6 on a track star, and won 11 letters in high school football, basketball and track. He was all-Oklahoma in football last year, and was in the starting line-up for the north in the annual all-star game.

After entering the university, he practiced only two weeks before an ankle injury sent him to the sidelines for most of the practice. He will be the champion at fullback position.

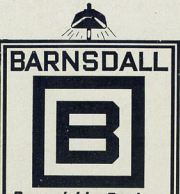

HAROLD SWANEY, 160-pound, six foot, one-inch freshman end, comes from Sand Springs, where he was one of the team stars and earned all-Oklahoma ranking. He is one of the reserve wingmen who usually plays in practice, and will play his share of the game before he's through.

FRANK TENNANT, who stands six, five, is the only Hurricane freshman who matches the height of the veteran, Eric Field. A tackle, Tennant weighs 180, and comes from Webb City, Missouri. He now ranks well among the reserves. He is a petroleum major in the college of engineering.

BOB TOLZ, 185-pound back from Wentworth Military Academy, lives in Shawnee. He was withheld from most of the pre-game practice fall because of a leg injury. Tole will probably earn a place among the reserves this year.

BOB VERKINS is a 185-pound wingback who played at Wentworth Military Academy and lives at Monticello, Wis. Bob plays his reverses well and punts with the best on the squad. He was captain of his Wentworth team in 1943.

DON WHITLOCK, 160-pound state wrestling champion from Tulsa Central high, is a freshman wingback who is developing into a capable reserve at his position. He is a student in the college of engineering.

DE LUXE CHAMPION TIRES

STAY SAFER LONGER

BECAUSE OF THESE

Extra Values

WHEN you get a rationing certificate to buy new tires, be sure to buy Firestone DeLuxe Champions, the only tires built with these patented and exclusive construction features:

Self-Last Cord—A Firestone Extra Value—tightly woven, stronger cords are built loaded together to form an extra strength body, thus adding extra miles.

Gum-Shedding—A Firestone Extra Value—each cord in the tire body is insulated against friction and internal heat, providing extra protection against blowouts.

Tread-Resistor—A Firestone Extra Value—Vulcanite, the Firestone tread, is built into a unit of tremendous strength, for extra durability and extra safety.

Self-Sealing Construction—A Firestone Extra Value—wells the tread into the tire body into a unit of tremendous strength, for extra durability and extra safety.

Duplex Gear-Grasp Tread—A Firestone Extra Value—adds extra protection against skidding and assures longer mileage.

Kevlar-Hay—A Firestone Extra Value—year after year of experience—building tires and over 20 years with winning—offer extra extra performance.
