LUBBOCK--Lisa Gallion of Crane has been presented the 1979 Earl D. Camp Award as the most outstanding graduating senior in the Department of Biological Sciences at Texas Tech University.

Gallion is the daughter of Mr. and Mrs. E.A. Gallion, 1111 Frances, Crane. She is a zoology major who will receive the bachelor's degree in May and expects to enroll this fall in the Physician's Assistant School of The University of Texas Medical Branch at Galveston.

Dr. Jerry D. Berlin, chairperson of the selection committee, said that a \$100 stipend accompanies the award established by the faculty to honor a former chairperson of the department.

Dr. Camp, a botanist who has been a member of the Texas Tech faculty since 1945, attended the presentation ceremony.

LUBBOCK--Paul R. Ellsworth, founder of the Texas Tech University Symphony Orchestra, will direct his final concert with the orchestra on Saturday (April 28). Ellsworth is leaving his post after 25 years as director of the organization.

The director founded the orchestra in 1954 when he was the sole string instructor on the Texas Tech faculty. He found only two violinists in the Music Department--one was a vocal major, and the other a flutist in the band.

Today the Texas Tech string faculty includes eight instructors, including two teachers of violin, and professors of viola, cello, bass, harp and guitar. The string program also includes Suzuki instruction for children and a preparatory division for junior and senior high school students.

The orchestra has twice been invited to serve as the official orchestra at the National Music Educators Convention and served once as the official orchestra at the annual Texas Music Educators Convention. The orchestra has toured Mexico three times by invitation.

Ellsworth will remain as professor of music at Texas Tech and will assume new responsibilities next year as an associate chairperson of the Music Department.

Dr. Harold T. Luce, chairperson, said Ellsworth's administrative assignments would include supervision of publicity and coordination of public performances.

ellsworth/add one

Ellsworth's last night as the orchestra's conductor will come on Saturday when the orchestra performs in the Lubbock Fine Arts Festival. The 8:15 p.m. recital in the Civic Center Theater will feature outstanding senior soloists representing every area of applied music. Admission is free.

LUBBOCK--Dr. Jerry Parham, associate director of the Research and Training Center in Mental Retardation at Texas Tech University, will be a featured speaker at a Canadian workshop in April.

Parham will address a workshop which is designed for persons who work directly with mentally retarded and other developmentally disabled persons and will be held at Fanshawe College, London, Ontario, Canada, on April 26-28. Fanshawe College Community Services is sponsoring the event.

The workshop, "Personalizing Program Strategies with Developmentally Disabled Persons," will help workers to understand effective treatment strategies, methods of individual program planning, and agency and community planning processes. The program will include a mixture of lecture, discussion and small group sessions.

Parham will demonstrate two instructor-free training packages for agencies working with mentally retarded and other developmentally disabled persons. These publications, produced by the Tech Research and Training Center, have received wide attention in the United States.

Approximately 75 persons from agencies serving the developmentally disabled throughout Ontario will attend the workshop.

LUBBOCK--Coming to grips with the energy shortage in West Texas and the resultant conflict of rampant inflation is the topic of a symposium for government executives at Texas Tech University on May 1-2.

Conference co-sponsors are the Texas Tech Center for Public Service and the Division of Continuing Education.

"Taxpayers are hostile to the present level of taxation and demand less inflation-caused increases," Dr. Frank L. Baird, symposium director, said, "and yet the public still wants the present level of governmental services continued. Meanwhile the more accessible local units of government have to bear the brunt of these conflicting demands."

The conference is designed to provide assistance to officials, administrators and employees of local governments in coping with the many aspects of the energy problem and its inflationary effects on tax rates. Topics will include energy as it touches daily operations of local governments, municipalities, counties, school districts, and water and other special districts.

Goal for the symposium, according to Baird, is to "help participants achieve the ability to make more informed and realistic decisions concerning energy as it affects West Texas.

"This region is one of the most important producers of oil and gas," Baird said, "but we do not get any of the financial benefits from them."

-more-

Speakers for the first day's morning sessions on the national energy policy and Texas' response to it include: Chuck Royston, U.S. Department of Energy; Pete Baldwin, program coordinator for the Governor's Office of Energy Resources; Milton Holloway, Texas Energy Advisory Council; and Drs. James E. Jonish and Lewis E. Hill, Texas Tech's Department of Economics.

The afternoon topic will be future energy sources, including aerial infrared photography, petroleum, solar, wind, beneficiation (removal of non-combustible materials) of coal and development of gasahol. Speakers include Kenneth G. Leggett and Tim C. Hogsett, South Plains Association of Governments; Drs. Harry W. Parker and Steven R. Beck, Texas Tech's Department of Chemical Engineering; William H. Marcy, Tech's Engineering Systems; Drs. Ernst W. Kiesling and John D. Reichert, Tech's Department of Civil Engineering; and Ralph Blodgett, mayor of Spearman.

During the second day morning sessions, speakers for energy conservation in local government functions will be Dr. Rich Kerbel, Center for Urban Programs at Texas A&M University; Tom Wright, Governor's Energy Resources; Ted Waldrop, Texas Industrial Commission; David Baker, KVB Co., Houston; Dr. Frank F. Skillern, Texas Tech School of Law; and Wright and Baldwin of the Governor's Office of Energy Resources.

The last session's topic will be energy supplies and regulations, with emphasis on the outlook from the perspectives of energy regulators, suppliers and producers. Speakers will be John Poerner, Railroad Commission of Texas; Ed Weber, Southwestern Public Service; Robert (Bob) Mills, Pioneer Natural Gas; Ed Thompson, vice president of the Permian Basin Petroleum Association, Midland; W.I. (Butch) Parker, Exxon Co., U.S.A.; Dr. Cora F. McKown and Susan Mason, Texas Tech's Department of Home Economics; and Jane Cohen, Texas Energy Extension Service, Lubbock.

Advanced registration is \$25 before April 27 and \$30 after that date. Fees for two or more individuals from the same organization are \$20 each if received by the April 27 deadline. Single day registration is \$15. Fees will be refunded less \$5 upon written request prior to April 27.

All sessions will be held in the Senate Room of the University Center at Texas Tech. Registration will be at 8 a.m.

Registration and inquiries should be directed to Energy Conference, Division of Continuing Education, Texas Tech University, Box 4110, Lubbock, Texas, 79409, (806) 742-2354.

LUBBOCK--With the approach of summer and vacation travel, Texas Tech University is offering a popular 35mm photography short course open to photographers on the South Plains.

The course in "Beginning Photography" will meet on Monday nights for six weeks beginning May 14. Drill in operation of 35mm cameras will be given before emphasis is placed on composition and taking good pictures, according to Mass Communications faculty member John McKinney, teacher of the course.

Tech University surveys show that amateurs shoot a large number of their pictures on vacation travel, McKinney said. In addition to photography at home, the coming session of "Beginning Photography" will present ideas and suggestions on shooting better pictures while traveling.

Tuition is \$30 per person. Additional information and registration instructions may be obtained by mail from the Mass Communications Department, Texas Tech, or by telephone (806) 742-3385.

LUBBOCK--Approximately 150 area educators will converge on Texas Tech University for the annual School Board Workshop from 12:30-5 p.m., Friday (April 27).

The workshop is a combined effort of Texas School Boards Association and Texas Tech for board members and administrators.

Coordinated by Dr. Paul E. Zintgraff, chairperson of educational administration and supervision at Texas Tech, the association will present a two-hour general program on "Hearings in the Public Schools." Dr. Tom Doyle of the School Board Association will preside.

Small group sessions will follow the general meeting. Dr. Charles A. Reavis, Texas Tech education professor, will lead a discussion on guidelines for teacher evaluation. Dr. Woodie Coleman and Travis Brown from Education Service Center Region XVII will speak on energy conservation. Ted Hayes, director of public services for the School Board Association, will discuss "Problems of a New Board Member." Dr. Stephen B. Thomas, Texas Tech assistant professor of education, will discuss "The Fine Line Between Church and State" and Orby Holden, School Board Association executive director, will conclude the workshop with a legislative update.

LUBBOCK--Late delivery of an exhibit of 125 Currier & Ives lithographic prints will cause a delay in the opening of the show at The Museum of Texas Tech University.

Scheduled to open Wednesday (April 25), the first showing now is set for Saturday (April 28), museum officials said. The Museum is open from 10 a.m. to 5 p.m. on Saturday.

The prints from the Esmark Collection, produced between 1835 and 1890, will remain on display through May 30.

LUBBOCK--Seven students and one faculty member in the Texas Tech University Department of Agricultural Engineering have been recognized for outstanding achievement.

Students honored include: Byron B. Hannabas, Lubbock, James L. Cromer, San Saba, J. Scott Eudy, Turkey, Kary Scott Smith, Houston, Suzanna Ruth McCurry, Cypress, Phillip J. Bednarz, Wilson, and James H. Waller, Albany.

The Texas Tech Student Branch of the American Society of Agricultural Engineers (ASAE) named Dr. Otto B. Schacht to receive the Outstanding Professor Award for dedicated and outstanding service to the branch.

Hannabas, son of Mr. and Mrs. T.H. Hannabas, 1314 42nd St., Lubbock, was the 1978-79 ASAE vice president, and he received the branch award for having made the greatest contribution to the organization. He was cited for leadership, participation and support of the Texas Tech branch.

The ASAE Student Honor Award went to Cromer, son of Mr. and Mrs. James R. Cromer of San Saba. This award is made available to the student branch by the national organization. Its presentation recognizes campus and miscellaneous activities. Cromer also received the faculty's Scholastic Achievement Award in Agricultural Engineering. Earlier he was named outstanding scholar of the Texas Tech College of Agricultural Sciences for having achieved the highest grade point average of any student in the college.

The faculty's Scholastic Achievement Award in Mechanized Agriculture was presented to Smith, son of Mr. and Mrs. Glenn L. Smith, 7251 Neff, Houston.

Eudy, branch secretary and son of Mr. and Mrs. J.L. Eudy of Turkey, was awarded the Jack Wiggins Memorial Scholarship. The endowed scholarship was established by Mrs. Jack Wiggins, friends and relatives to perpetuate the memory of a former Texas Tech agricultural engineering student. The recipient must be a junior or senior agricultural engineering major with special qualities of scholarship, leadership, character and sincerity of purpose.

The Texas Tech Chapter of Alpha Epsilon, national agricultural engineering honorary, recognized three students for academic achievement. They were freshman McCurry, daughter of Mr. and Mrs. Gerald R. McCurry, 13618 Maxwell Road, Cypress, sophomore Bednarz, son of Mr. and Mrs. Tommy Bednarz of Wilson, and junior Waller, son of Mr. and Mrs. Clarence W. Waller of Albany.

LUBBOCK--Texas Tech University has adopted a new returned check policy that can result in students losing check-cashing privileges for the remainder of their enrollment and employees until termination of their employment or five years, whichever occurs first.

Policy implementation will begin during this summer and be in full operation by the fall semester, according to Max C. Tomlinson, director of Accounting and Finance.

The policy will change those procedures which have been in effect after a returned check has been re-deposited and returned a second time because of insufficient funds.

After a check has been returned the second time, new policy collection procedures are begun through an automated system. Individuals are notified by a first notice that their check has been returned and that they have 20 days to clear up the matter with the Collections Office to avoid losing campus check-cashing privileges permanently. The usual \$5 penalty is increased to \$10 if the check is not redeemed within that 20-day period.

If the check has not been redeemed within 10 days after the first notice, a second notice goes to the person who issued the bad check to remind him or her the matter must be resolved within 10 days.

-more-

If the 20-day period expires without redemption of the check by the person issuing it, he or she is given the third and final notice which informs the payor that check-cashing privileges have been permanently suspended. It also warns that to avoid pending legal action to collect the check, the payor must contact the Collections Office and make payment by cash, cashier's check or money order.

Tomlinson also pointed out that the policy of permanently terminating check-cashing privileges will result from three insufficient checks given during a fiscal year, Sept. 1 through Aug. 31.

Tomlinson said an increase in the number of returned checks had forced the tighter check-cashing policy. He said the Book Store, University Center, Cashier's Office and other check-cashing offices on campus would be kept informed of students and employees of the university whose privileges had been permanently terminated.

ATTENTION: General News Editors

LUBBOCK--Everybody's invited to the farm, anytime from 1 to 5 p.m., Tuesday, May 15.

The farm is the 980-acre field laboratory used by the Texas Tech University College of Agricultural Sciences. The Lubbock County Laboratory, located 15 miles east of New Deal on Farm Road 1729, is fully operational this year for the first time.

In the belief that everybody in West Texas is involved, at least indirectly, in agriculture, the Livestock Industry Committee of the Lubbock Chamber of Commerce is arranging the open house in cooperation with the Texas Tech University College of Agricultural Sciences.

The committee pointed out that farmers in the United States in the mid-1970s were producing 21 million fed cattle per year, 10 million lambs, 71 million swine, 124 million turkeys, 219 billion broilers and eggs from 276 million hens.

The feeding industry is so vast that a change of only 1 percent in feed efficiency carries a price tag of about \$130 million.

All of these figures are important to consumers checking prices at the meat counter, according to Dr. A. Max Lennon, chairman of the Chamber of Commerce committee.

"Because the production of meats, grains and fresh produce are reflected in the budget of every household," he said, "we have arranged this open house so that the public can see how agricultural scientists go about their job of producing the best in the most economical way."

-more-

In addition to faculty and students on hand to explain the experiments in crop production, visitors will be able to see and ask questions of those working at the horse center, with the beef cattle breeding herd and at the feedlot, sheep center, swine center and in dairy operations.

At Texas Tech's unique feedmill visitors can learn something about the intricacies of livestock diets and the importance of research in producing the kind of meat consumers want for the dinner table.

"We think the swine barns will be of special interest to visitors," Lennon said, "because few outside the swine industry realize how much care goes into producing the pork they eat. The lowly swineherd has turned into a highly skilled and knowledgeable producer."

Bob Etheredge, manager of the Agriculture Department of the Chamber of Commerce, said that the urbanization of West Texas has added distance between the city dweller and the agricultural producer.

"This open house will be of interest to farmers and ranchers," he said, "but it should be equally interesting to city dwellers, giving them the opportunity to see new techniques in all phases of agriculture."

Farm Road 1729, leading to the field laboratory, intersects U.S. Highway 87 at New Deal, which is located between Abernathy and Lubbock.

LUBBOCK--Texas Tech University will award diplomas to approximately 2,000 graduates May 11-12 during commencement exercises. An address by U.S. Sen. Lloyd Bentsen will highlight the ceremonies.

Ceremonies begin at 7:30 p.m., Friday, May 11, in the Municipal Coliseum with President Cecil Mackey presiding. After musical selections by the Texas Tech Band, under direction of Dean M. Killion, and a welcome by Robert L. Pfluger, Board of Regents chairman, Sen. Bentsen will address graduates. Sen. Bentsen has been named Alcoa Foundation Distinguished Lecturer for 1979.

The Reverend Jo Carr, associate pastor, Saint John's United Methodist church, will give the invocation and benediction, and Tom Craddick, president of the Ex-Students Association, will congratulate the Class of 1979.

Degrees will be conferred by Dr. Mackey, assisted by Dr. Charles S. Hardwick, vice president for Academic Affairs; Dr. J. Knox Jones Jr., vice president for Research and Graduate Studies; Dr. Robert H. Anderson, dean of the College of Education; Dr. William F. Bennett, interim dean of the College of Agricultural Sciences; Dr. Frank W. Elliott, dean of the Law School; Dr. Lawrence L. Graves, dean of the College of Arts and Sciences; Dr. John R. Bradford, dean of the College of Engineering; Dr. Donald S. Longworth, dean of the College of Home Economics; and Dr. Carl H. Stem, dean of the College of Business Administration.

Students will receive diplomas during individual college ceremonies on Saturday, May 12, with Arts and Sciences at 8:30 a.m. in the Municipal Coliseum; Engineering, 8 a.m., Municipal Auditorium; Business Administration, 9:30 a.m., Municipal Auditorium; Education, 11 a.m., Municipal Auditorium; Agricultural Sciences, 8:30 a.m., University Center Theatre; Home Economics, 10:30 a.m., UC Theatre; and Law School, 4 p.m., UC Theatre.

Two faculty members from each college will serve as marshals to align students for the procession on Friday. Marshals should report to the south end of the Coliseum concourse no later than 6:45 p.m., according to Dr. Floyd E. Eddleman, chairperson of the University Convocations Committee.

LUBBOCK--Film-writing techniques will be taught from June 4-29 in a course offered through the Texas Tech University Mass Communications Department.

Entitled "The Cinematic Approach," the course is designed to provide a general overview of film-writing techniques from the collection of ideas and material for the story to the marketing of a script.

The format includes classroom sessions, evening assignments and discussion groups covering such topics as censorship, budgets, film-writing trends and industry requirements.

Vera Culwell, former director of the story department of Universal Studios, will conduct sessions. During her 30-year career she has worked with writers, employment agreements, purchase contracts, story analysis and editing. She has been employed by Regal Films, Desilu, Monogram and Republic pictures, and is now a freelance writer.

Course enrollment is limited to 25. Participants must be able to type, have completed all undergraduate English requirements and be able to develop a thematic idea. Fiction or creative writing experience should be helpful, according to Dr. Dennis A. Harp, academic coordinator for the course.

Participants will be awarded six semester hours of undergraduate credit or 12 continuing education units.

-more-

Dormitory-style rooms have been reserved at Lubbock's College Inn for participants. Although other accommodations are available in the Lubbock area, participants are urged to stay at College Inn to promote discussion and development of ideas.

Single occupancy rooms are \$55 per week or \$220 for the session. Double rooms are \$43 per week or \$172 for the session. Prices include 10 meals per week.

Registration deadline is May 15, and course tuition is \$125. Additional tuition will be charged for persons desiring graduate or undergraduate credit.

Texas Tech students desiring credit should pick up complete registration materials at the Registrar's Office by April 27 and submit the completed materials to the Division of Continuing Education, Building X-14, no later than June 1.

Other persons desiring academic credit should request and complete a Texas Tech admission application. The completed application should be submitted in advance of the course to the Texas Tech Registrar's Office along with a transcript from all colleges the participant has attended.

Additional information may be obtained from Dr. Harp at (806) 742-3382. Written inquiries should be addressed to "The Cinematic Approach," Division of Continuing Education, Texas Tech University, Lubbock, Texas 79409.

LUBBOCK--Presentations of their most prestigious honors will highlight the annual National Awards Ceremony for Army and Air Force ROTC cadets at Texas Tech at 1:30 p.m., Thursday (April 26), in the University Theater.

The Professor of Aerospace Studies Senior Leadership Award will go to Gary C. Cox of the Air Force ROTC and the Professor of Military Science Proficiency Award to Steven W. Long of the Army ROTC in the join exercises. Texas Tech President's awards will be presented to Dorothy A. Fulmer of the Army ROTC and Edward M. Rogers III of the Air Force ROTC.

More than 50 awards will be presented. Lt. Col. Clayton S. Roberson, professor of Military Sceince, and Col. Fred D. Barnes, professor of Aerospace Studies, will present the most prestigious awards in their respective areas. Special guests will include Arts and Sciences Dean Lawrence L. Graves, Clyde J. Morganti, assistant to the president of Texas Tech, and Brig. Gen. A. R. Brownfield, past commander-in-chief of the Military Order of World Wars.

The public is invited to the awards program.

LUBBOCK--Eleven Texas Tech "outstanding graduate student teachers" have been selected for special recognition and receipt of \$100 cash awards from the Office of the Vice President for Research and Graduate Studies.

They were chosen from departments and programs in which the doctoral degree is offered and in which a number of teaching assistants and part-time instructors are employed.

This year's recipients are Mary Louise Ettel of the Department of Chemistry, Gary K. Froehlich, College of Engineering, Robert S. Hamrin, Business Administration, Lynda Ann Haynes, Home and Family Life, Stephen C. Head, History, Rodney L. Honeycutt, Biological Sciences, Charles H. Neil, Mathematics, Susan E. Pickett, Music, William Doyle Smith, Economics, Douglas F. Watson, English, and Patrick S. Williams, Psychology.

Texas Tech President Cecil Mackey's message to the recipients expressed "deep appreciation" for their contribution to the educational goals of Texas Tech.

This is the sixth year that the office of Vice President J. Knox Jones Jr. has sponsored the selection of outstanding graduate student teachers. It has "engendered enthusiastic support because it helps to improve the overall teaching efforts of graduate students through friendly competition for the award and provides recipients with a well-deserved presidential citation to include in their vitae," he said.

LUBBOCK--Many who retire look for opportunities to pursue personal projects put off during career years; not so Dr. Clark Harvey, internationally recognized agronomist.

Harvey retired from the Texas Tech University faculty this year after 31 years of teaching and research, 25 of those at Texas Tech. Now he is looking toward new horizons allowing him to continue contributions to agriculture here and abroad. He is considering job offers which could take him to Asia or Africa to carry out work similar to that he left in Niger last December.

There he concluded what he considers a highlight in the first 60 years of his life, an assignment as a plant breeder to a cereal production project.

Texas Tech is the lead institution in the Niger program established by the federal Agency for International Development through the seven-university Consortium for International Development. Texas Tech's activities were organized through its International Center for Arid and Semi-Arid Land Studies. The dean of the university's College of Agricultural Sciences has had primary responsibility for the technical quality of the continuing program.

-more-

Goals were to help the Sahelian nation acquire technical skill, develop land practices and train manpower to become self-sufficient in cereal cultivation and distribution. Harvey screened and selected seed varieties adapted to the Nigerien climate, soils and production practices.

Dr. William F. Bennett, interim dean of the college, said there is "every reason to believe the foundation work Dr. Harvey accomplished will serve his successors well in advancing cereal production in Niger.

"The project is indebted to him for contributions toward increasing food production in the the Niger area."

Bennett added that Harvey "is to be commended also for his involvement with the people of Niger."

Contributing to Harvey's pleasure in cross-cultural exchanges is the fact that his wife, Carol, also enjoys the excitement, challenges and rewards of working and living in a foreign environment.

"The seed of my strong interest in international work," Harvey said, "may have been planted during World War II when I was a Navy pilot in Asia and South America."

When Harvey left Niger, he left three natives to take over the work he had initiated.

"It will take many years for us to know the real value of our work in Niger," he said. "Results do not come immediately in agriculture."

Harvey's background suited him for the north central African task. He has investigated such diverse subjects as water conservation through waste water treatment, soil fertility, cultivation of new crops in the West Texas area, and the proper use of herbicides and chemical growth regulators.

South Plains farming benefited from his research on development of soy beans as a cash crop and on use of Propazine as a herbicide for grain sorghums. His publications and contributions to professional organizations began in 1950 when he reported on his experiments with guar in Texas.

For about 10 years Harvey held a joint appointment on the Texas Tech and the Texas A&M University faculties and, among the new courses he introduced at Texas Tech, he is noted for establishing the first course in the state on weed control.

His memberships include the American Society of Agronomy and the Weed Science Society. He is former president of the Texas Tech Society of Sigma Xi and held all major offices in that organization. Former president also of the Lubbock Downtown Kiwanis Club, Harvey served in all major offices in that club. He was active, too, on the Benefits Committee while at the university.

Harvey, a native of Ennis, was reared at Muleshoe. He holds the bachelor's degree from West Texas State University and Texas A&M. He earned master's and Ph.D. degrees at Iowa State University.

EDITOR'S NOTE: Media are invited to cover any portion of this workshop

LUBBOCK--Approximately 130 South Plains educators will attend the Desegregation Mini-Workshop of the Cultural Awareness and Recognition in Education-Curricular Opportunities for Personalizing Education (CARE-COPE) Institute on Saturday (April 28) at the Villa Inn.

Sponsored by the Texas Tech University College of Education, the workshop will run from 8:30 a.m.-4 p.m. Dr. Ignacio R. Cordova, director of the Multicultural Educational Center at the University of New Mexico, will deliver the keynote address on "Multiethnic-Multicultural Education" at 9 a.m.

Concurrent workshops will continue at 10:45 a.m. Dr. Duane Christian, education professor at Texas Tech, will speak on "Coping with Teacher Stress in a Desegregated School;" Dr. Cherry Gooden, Texas Southern University, "Interfacing Multicultural Education in the Content Areas;" Dr. John Hollomon, associate professor at The University of Texas at San Antonio, "Ethnographic/Ethnotherapeutic Issues Parenting Across Cultures;" and Dr. Alice Denham, Texas Tech education professor, on "Identifying Racism in Children and Adolescent Literature."

A buffet luncheon will be followed by concurrent workshops in the afternoon. The workshop will conclude with an address by Hollomon on "Dealing With Conflicts Between Cultures, School, Social Norms and Children's Needs."

The workshop is part of the CARE/COPE Institute, which began in November under the direction of Tech faculty members Drs. Hazel S. Taylor, Ralph M. Carter and Leona M. Foerster with Gloria F. Dansby, paraprofessional workshop coordinator.

LUBBOCK--Although he is half-deaf, Ron Carter hears things most people never hear, feels an intensity most people won't accept and expresses emotions most people refuse to acknowledge.

The 23-year-old Texas Tech University senior was chosen from a 200-person audition as one of 15 to attend a top American music institute, Manhattan School of Music in New York.

He takes with him fond memories of Texas Tech, credits in several operas and a love of life as he accepts scholarships totaling more than \$6,000 in tuition and living expenses.

Carter will live on the corner of New York's famous Broadway, but he's not scared -- at least not as much as he was in the third grade when he was first exposed to music.

"I remember when I was in elementary school in Amarillo," Carter said, "I walked into the choir room and there were so many people I walked out and didn't go back for a year. I had a terrible case of nerves that bothered me for a long, long time."

Nervousness was only the first obstacle to overcome. Carter is deaf in his left ear.

"Although I don't experience any problems in singing because of my hearing, I had trouble learning how to sing," he said. "It took me a long time to understand the acoustics of sound, and I sometimes have trouble deciding where the sound is coming from."

-more-

But sound is not the objective in Carter's music. He searches for freedom. Carter admits that few people reach an effortless attitude, "kind of like the saying 'don't push the river.'

"Art exists as a natural expression of a personality. If an artist is trapped inside his own self-consciousness, the art cannot be expressed."

Carter considers music an extension of the personalities of the writer of the music and the performer. "And the professional artist as a performer must cement those bonds...but when the art is complete, you must be able to come home, sit down, have your rum and coke and relax."

For example, last summer when Carter sang for the Lake George Opera Company in New York, he asked his professor before a performance, "Where's my beer? I'm not going out there without my beer." Carter said the performance was one of his best because he was relaxed and able to enjoy his music. But he didn't get the beer.

Carter's credits include first place in vocal competition in the Youth in Vienna Contest and second place in the National Association of Teachers of Singing Competition. He has performed in "Marriage of Figaro," "The Barber of Seville" and "Trial By Jury," to name but a few. Through his music Carter has become fluent in French and Italian and will take a course in German in the fall.

Singing professionally is his ultimate goal. By shooting at a career that is firmly rooted and by constantly performing, he plans to reach the top.

"I want a career in opera. Of course I don't know if the Metropolitan Opera will have me...but who knows?"

President Cecil Mackey of the Texas Tech University School of Medicine has received formal notice from the Liaison Committee on Medical Education (LCME) that an increase in medical school enrollment from 60 to 80 has been approved for the entering class of September 1979.

In addition, continued full accreditation for a two-year period has been conferred.

Action of this official accrediting body for American medical education followed recommendations of a survey team which visited the medical school January 29-February 1. Purpose of the visit was to assess progress of the medical school and its readiness to increase student enrollment.

A supplemental report will be submitted to the LCME in Washington, D.C., no later than January of 1980, according to medical school Dean George S. Tyner. The report will provide information on the school's ability to increase enrollment beyond 80 students in September of 1980 and 1981. This ability will depend on assimilation of resources available to the medical school to educate students at the junior level.

LUBBOCK--The Texas Tech President's Awards and the top awards from the professors of Military Science and Aerospace Studies were presented to graduating cadets of the two Reserve Officers Training Corps in joint ceremonies this week in the University Theater.

The President's Awards went to Dorothy A. Fulmer, Army ROTC, and Edward M. Rogers III, Air Force ROTC. Clyde J. Morganti, assistant to the President, presented awards in the absence of President Cecil Mackey.

The Professor of Aerospace Studies Senior Leadership Award was presented by Col. Fred D. Barnes to Gary C. Cox, and Military Science Proficiency Award by Lt. Col. Clayton S. Roberson to Steven W. Long, senior.

Long also received the American Legion Army ROTC Award for Military Excellence, American Logistics Association Award, Department of the Army Superior Cadet Award and the National Defense Transportation Award. Rogers also received the Daughters of the American Revolution Award and Fulmer the American Legion ROTC Award for Scholastic Excellence.

More than 50 awards were presented cadets from the two corps during the ceremonies.

Recipients and awards in Army ROTC included:

Michael P. Beights, junior, Texas Tech University Army ROTC Plaque and Major General Richard Cavazos Award;
