SOUTHWEST COLLEGE
Texas Tech University,
LUBBOCK, TEXAS 79409

Published by Texas Tech Ex-Students Association

Lubbock, Texas

April, 1950

Volume 1 Number 1

THE MUSIC BUILDING, the contract for which was let recently to R. F. Ball Construction company of Houston, is another part of Tech's expansion program. When completed, the structure will provide classrooms and private practice facilities. It will be constructed on the southern part of the campus, facing 19th street.

Coming Events

- Apr. 1—Matrix Table Banquet
- Apr. 3-5—All College Varsity Show
- Apr. 7-10—Easter Vacation
- Apr. 11—Recreation Hall Lecture Series, James Michener, Pulitzer prize winning author.
- Apr. 14—Intra-squad football game
- AWS Spring luncheon
- Apr. 20—Lecture, Occupational Opportunities in Psychology for Women, Evelyn Carrington
- Apr. 21-22—Interscholastic League contests
- Apr. 22—Engineers' Show
- Home Economics Open House
- Apr. 24—Artist Course Series, Isaac Stern, violinist
- Apr. 24-28—WICC Softball Tournament
- May 4—Recreation Hall Series, Ogden Nash, writer of light verse
- May 5-6—Western Days
- May 7—Parents' Day—All College Recognition Day
- May 21—Baccalaureate Sermon
- May 22—Commencement

Contract Let On Five Building Plans; Houston Firm Awarded \$2,159,941 Job

A contract for five new building projects on the Texas Tech campus — Engineering, Science, Music buildings and additions to the Petroleum Engineering and Home Economics buildings, was awarded by the college board of directors March 18 to one firm, R. F. Ball Construction company of Houston, for an all-inclusive bid of \$2,159,941.

Construction To Begin

Construction of the buildings is scheduled to be started in mid-April. Five hundred and forty calendar days were allowed for completion of the Science building; 365 days for the Engineering and Music buildings and 360 days for the Home Economics and Petroleum Engineering units.

Architects for two of the buildings who are former Tech students are James Atcheson '36 and Atmar Atkinson '35, Lubbock, who have coordinated their work with Ralph Davis '34 and John Foster '32 of El Paso, on the Engineering build-

See **CONTRACT LET** Page 2

Exes' Scholarships Face Suspension

Granting of five two-hundred-dollar scholarships by the Texas Tech Ex-Students' association may be suspended this year because of insufficient funds.

The award fund, established as a project of the association, was to be divided annually among five students, each having the highest scholastic average in his division. In order for the student to be eligible for the scholarship, his father or mother must be an ex-student of Texas Tech.

Suspension of the awards comes as a result of a lack of contributions to the 1950 Loyalty Fund through which the award fund was to be financed. (Don't let the association's first project fail. Your contribution may still permit the awarding of the scholarships in September.)

Contract Let —

(Continued from Page 1)

ing. This group is also drawing plans for Tech's proposed Student Union building.

L. H. Kirby '36, is a partner in Haynes and Kirby, Lubbock architectural firm that has charge of the Home Economics building additions. This firm will also handle plans for the new aggie buildings which include an Agriculture Engineering structure, a Veterinary Science building, a group of greenhouses and a stock show arena.

Wyatt C. Hedrick, Fort Worth, is architect for the Science building. Walsh and Hazlewood, Amarillo, will draw plans for the Music hall.

Two wings of the Administration building, which when equipped will cost approximately \$750,000, are now being constructed by W. G. McMillan, with Charles Calhoun '41, Lubbock, as subcontractor for the concrete work. Funds for financing of the buildings came from the sale of bonds issued under the College Building amendment and from surplus local funds.

Former students have been engaged at Tech in other physical plant developments. Recent paving on campus streets has been done by Kerr and Middleton, Lubbock contractors. James C. Kerr '32 and Euel V. Middleton '31, were civil engineers at Tech. Elliott Taylor '31, road contractor, has also done paving on the campus.

New Funds Provide Scholarship Awards

New scholarship funds received by the college have added two student awards to an already growing list.

The Western Company fellowship, established this year by the Western company of Midland, goes to a student a faculty committee selects from the chemical or chemical engineering department.

This fund, a part-time research grant, also provides the equipment and chemicals in work on hydrogen sulfide corrosion and its prevention. The recipient will carry on research under the supervision of the Tech chemical engineering faculty.

The SPEBSQSA award will be offered to Tech students as well as musicians throughout this area who are qualified and selected by a faculty committee.

This scholarship was made available by the Society for the Preservation and Encouragement of Barber Shop Quartet Singing in America.

Career Day To Aid Coed In Her Job Selection

Help for all women college students who have not decided their life work will be the chief aim of Tech's First Annual Career Day on April 20.

Ideas for graduating seniors preparing to begin their own careers will be another.

Such emphasis points are new in the guidance program at Texas Tech, and women students will have the opportunity to hear outstanding professional men and women from throughout the nation.

A Step Forward

"This is definitely a step forward in our guidance program at Tech," explained Miss Virginia Keehan, assistant dean of women. The program will be closely integrated with the regular school program, and special attention will be paid both resident students and those living in Lubbock, regardless of classification.

Noted Speaker To Appear

Miss Evelyn Carrington, lecturer on "Occupational Opportunities for Women in the Field of Psychology," is one of several speakers invited to attend. Others will be chosen in their outstanding fields of business, fashion and design, teaching and social work.

Association of Women Students council will act as sponsor of the Career Day programs. It is hoped that in succeeding years high schools will be invited to send outstanding delegates to Career Day.

Grads Will Hear Baylor Head Speak

Dr. W. R. White, president of Baylor university, will be baccalaureate speaker for the spring graduating class at Texas Tech on May 21.

Dr. White is former pastor of Lubbock First Baptist church and served as president of Hardin-Simmons university before going to Baylor.

The baccalaureate service will be held at 8 p.m., May 21, in Jones Stadium. Commencement will be staged the following night at the same time. Russell B. Brown, prominent Washington, D. C., lawyer and general counsel for the Independent Petroleum Association of America, will be principal speaker.

Michie, Thompson Retire From Math Professorships

James N. Michie and Earl L. Thompson, professors of mathematics, resigned from the faculty effective February 1 upon reaching the age of retirement.

Professor Michie, who has completed 25 years as a member of the faculty, came to Tech in 1925 as head of the department of math, a post which he held until 1948. From that date until his retirement, Michie devoted his full time to teaching. In 1947 he had published a textbook entitled, "Differential and Integral Calculus."

Dr. Thompson, who has completed 22 years on the staff, began as assistant professor of mathematics in 1928 and became professor in 1939.

Both professors were honored for long and faithful service rendered the college at a farewell dinner recently.

Senior Personnel Sheets Aid Job Seeking Tech Students

Personnel sheets which "tell all" about seniors who graduate in 1950 are made available to the students through the college Placement service.

The printed sheets, accessible in individual orders, contain complete personnel data on the student. In this way students are able to present data in an orderly manner and may also use the sheets for making personnel applications for jobs.

The sheets are useful for including in letters of application and may be referred to by the faculty or Placement service. Any desired photograph of the student is reproduced on the sheets for the benefit of prospective employers and identification purposes.

"Who's Who" Pays Tribute To Secretarial Instructor

Miss Leone Orner, instructor in secretarial administration, has been selected to be among those listed in "Who's Who in the South and Southwest."

A biographical sketch of her will appear in the publication which is a sectionalized edition of "Who's Who in America." Miss Orner was assistant professor of secretarial training at Texas State College for Women, Denton, and at Northwestern State College in Louisiana.

Prior to the war she was executive secretary to superintendent of schools and Board of Education in Oklahoma City. Miss Orner has attended colleges in California, Indiana, New York and Oklahoma.

Museum Program Includes Review Of Biblical Portraits

Approximately 5,000 persons viewed 16 original paintings from the Biblical book, "In Our Image," which were on display at the Tech Museum last month.

Second in a display of paintings at the Museum, the pieces were painted by artist Guy Rowe and depict the men and women of the Old Testament as living, breathing people. The portraits illustrated narratives selected as dramatic and significant by Houston Harte Sr., San Angelo author.

Some permanent exhibits of the recently completed Museum include "The Story of West Texas," an exhibit emphasizing historical and economical development; historical rooms and collections; archaeology, ethnology, and palaeontology of this region; paintings and objects of art.

Special programs call for annual lectures and tours for children from public schools and special groups; field trips, junior and adult Museum classes; hobby clubs and scientific sections. Special lectures, sketching and a twilight music hour are held weekly.

Teachers May Earn Master's Degrees In Classes At Tech

There's something special in education at Tech for persons now teaching school who haven't time to spend several semesters doing college work in order to receive master's degrees.

For several years regular college credit has been given for work done during the long semesters to teachers whose days were occupied in classrooms. They simply attend weekly classes held each Saturday.

Three such courses pursued largely by teachers in this area are being offered this semester. They are not extension courses, but rather are regular college courses which give resident credit. Classes are held in Education 5311, problems of research; Education 533, activity program for elementary schools; and Education 336, educational and vocational guidance.

Eighty persons are enrolled in the weekly courses which are enabling several graduate students to receive master's degrees with only one summer's work.

Chapter Chatter

Washington, D.C., exes were treated to an old fashioned chili supper recently, and many found that other Tech exes are now living and working in the capital.

Food for the event was sent by Furr Food stores, Lubbock, who wanted the "northern" Techsians to indulge in a real West Texas dinner.

Officers of the Texas Tech Washington Alumni and Ex-Students organization include John R. Cummings '41, president; Burnis Walker '37, vice president; and Miss Dorothy Rylander '31, secretary.

* * *

Women who are graduates or have attended Texas Tech in the Home Economics division are eligible for membership in the HE Exes, newly organized alumnae group.

Officers elected to head the organization are Mrs. W. K. Hicks '35, president; Mrs. W. H. Tinney, vice president; Mrs. Carrie Lee Bishop '41, secretary; Miss Verna Crump '37, treasurer; and Mrs. Joe Harter '40 reporter.

Engineers Observe Drilling; Operate Well On Campus

Petroleum engineering students at Tech have an on-the-spot chance to see oil drilling activities since a rotary drilling unit was set to work on the campus recently.

A jack-knife derrick has been erected on the drillsite and the unit will be used to drill 2,000 feet with no attempt made to find oil. Students will observe for practical purposes the problems and oil field techniques not acquired in classroom study.

Pipe and additional equipment for the venture have been donated by interested petroleum firms.

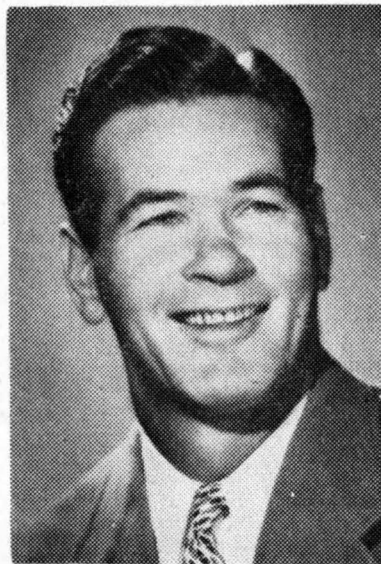

Record Album Will Feature Silver Anniversary Emblem

A scarlet covered album of school song recordings bearing Tech's Silver Anniversary seal will be offered for sale in April.

It is to be a pictorial album, "Texas Tech On Parade," recorded by the Texas Tech concert band, the Tech glee club and mixed chorus. Two ten-inch unbreakable records will spin the "Matador Song," "Fight, Raiders, Fight," "Tech Fight Song" (by Fred Waring), "Texas Tech on Parade" and "O College Mother Beautiful."

The albums will sell for \$3.50 each, plus 25 cents to cover shipping charges, and may be ordered from School Songs, Tech Box 44.

Part of the benefits from the sale of these recordings will go into an award fund to be set up for outstanding Tech band students.

CARL MULLENEAUX

* * * * *

Mulleneaux Named Frosh Grid Coach

Carl "Moose" Mulleneaux, newest member of Tech's coaching staff, began official duties as freshman football coach when the Raiders opened spring training in March.

"Moose" is a veteran of three years of high school football, three years of college and seven years with the Green Bay Packers, playing end. He came to Tech from the University of Arizona where he was line coach.

Except for three years in the Navy, Moose played with the Packers until 1946 when he became line coach at the University of St. Louis, a position he held until he joined Arizona. He stands 6'3" and weighs 220, is married and has a three-year-old daughter.

Mulleneaux replaces Allie White, who resigned to take a coaching position at Texas Christian university, as freshman coach and line coach.

Intra-Squad Grid Tilt

Two football teams, composed of regular members of the Raider squad are scheduled to play their second intra-squad game April 14.

Responsible sports mentors and local businessmen are putting their heads together in an effort to make the game an annual post spring training affair.

Proceeds from the game would be used to cover "unforeseen" expenses in the sports field. Side attractions and halftime entertainment plus a tentative name of "Red Raider Roundup" are part of the plans for such an event.

Campus Capers

Dr. D. D. Feder, dean of students and professor of psychology at the University of Denver, spent three days early in March conducting a student-faculty personnel program on the campus. Dr. Feder visited Tech through a special arrangement with the Advisory Service on Student Personnel Work of the American Council of Education.

The Willson lecture series was held on the campus recently with Dr. E. G. Homrighausen, professor of Christian education at Princeton Theological seminary, Princeton, N. J., as special lecturer.

Campus engineers will stage their annual Engineers' Show April 21-22, with exhibits under the supervision of student officials from each department. Held in conjunction with the Home Economics Open House, the two events annually bring hundreds of visitors to the campus.

Ex-students will be glad to learn that Tech has continued its good will program with the granting of 12 foreign student scholarships to Techsans from possessions of the United States, Latin America and other foreign countries.

Back to the Texas Plains to live forever as a monument to sincerity and greatest human simplicity comes Will Rogers and his mount, "Soapsuds." A lifesize, bronze statue of the two, presented to Tech by Amon G. Carter, Fort Worth publisher, was erected on the campus and dedicated in mid-February.

Seniors who graduate in May, at the end of the current long session, will be exempted from final examinations, a decision made recently in a joint meeting of deans of divisions and heads of departments.

Texas Tech will be host in 1951 to the regional meeting of the Collegiate Schools of Architecture, featuring as its program the curricula and studies for the education of an architect.

Gillis Authors Poetry On Texans

"Sunrise in Texas," a book of poems about the men who made Texas famous, written by Dr. Everett A. Gillis, has been published by a San Antonio firm.

Doctor Gillis, associate professor of English, dedicated the new book to his mother, Mrs. Earle A. Gillis of Fort Worth, who was selected as the "Texas Mother of the Year" and "National Mother of the Year" in 1949.

Poems in the booklet include "Parson John," "Sam Houston," "Bigfoot Wallace" and "Davy Crockett."

Two earlier books of poetry also written by Doctor Gillis are "Hello the House!" (1944) and a collection of war poems, "Who Can Retreat?" (1944).

Students in commercial art classes at Tech are taking part in the completion of the Museum by contributing individual exhibits and layout of the ground floor's east gallery, all under the supervision of architecture instructors.

Graduate Courses Listed In 1950 Summer Catalogs

Catalogs for the 1950 summer session have been published and may be obtained through the Registrar's office. These bulletins are available to anyone who may wish to consider summer school work toward a degree.

Exes will be glad to know that the graduate division at Tech has been enlarged, with more graduate level courses offered and thesis work available in nearly every department offering the advanced degree.

Largest in the history of the college, the catalog contains lists of courses to be taught during both six-week terms and names instructors for each.

This summer session will stress discussion type classes and workshops, a practical addition to the summer school curriculum. Among these are planned a school administrator's conference for July 18-19, a field trip to Mexico, summer band school and a short course in cotton classing.

The Panhandle section of the United Business Teachers' association will convene on the campus in October.

The Tech Ex-Students Association Is Your Association!

Won't you investigate the sentences below for your excuse as a delinquent contributor, and whatever your excuse may be, make it right?

1. "I ought to contribute to the 1950 Loyalty Fund and believe I will in a few days." "In a few days" never comes—Send your gift in now—post date your check if you wish, but send it in before you forget.

2. "I'm not going to send in anything until they do something about that ? department." The association's program is not a "hiring and firing" one, but one of support and constructive suggestions, which depends on strength in numbers.

3. "I'd like to know how the Loyalty Fund money is used before I contribute." Your association office has three full time employees trying to give you the type office you want. Your contribution will pay for postage, supplies, equipment, maintenance of records, and more Homecomings. It will bring to you "The Texas Techsan," our new magazine full of Tech stories and pictures. Part of your gift will also go toward furnishing of the new Student Union building which is now on the architect's drawing board.

POSTMASTER: If undelivered, notify sender stating reason on Form 3547, postage for which is guaranteed.

TEX TALKS

July, 1950

Dear Ex,

I guess you're wondering what happened to the Ex-Student News, four page tabloid which used to be the publication of Tech's Ex-Students. Well, this little information sheet is its successor and its chief aim is to serve as a sort of news letter and let you and all the other exes know what is happening here on the campus. We're a grown up association now and we have another publication we can well be proud of, the Texas Techsan, a magazine which comes out nine months of the year. I bet you would surely enjoy it . . . for it not only tells you all about the college . . . with features, and news stories and pictures but keeps you up with the exes . . . where they are, who is marrying whom, who has a new dependent as well as giving the success stories of all multi-millionaires who went to Tech. You'd like to have it? Well, just drop in a contribution to the Loyalty Fund and here it comes. Three dollars of every contribution is considered a subscription. It's really super. Better hurry and send for it before the big Silver Anniversary edition is published in September.

Your pal,
Tex.

Mrs. Johnnye Langford Resigns As Head Of Tech Physical Education Dept.

Mrs. Johnnye Langford, one of the twenty-five year members of Tech's faculty, is retiring from her position as head of girls' physical education August 31. Mrs. Langford started her long career at Tech in 1925 when the college was established. At that time she was the only teacher in the department. Another instructor was added the next year, but Mrs. Langford remained as head.

She continued in this capacity

Dub Rushing Nominated As Next Association President

W. B. (Dub) Rushing, '32, was nominated for president of the Ex-Students' Association during 1950-51 in a recent meeting of the nomination committee in Lubbock.

Men were also nominated for the offices of first and second vice-president and director. All officers for the Association will be elected in the annual meeting of the Association Council Homecoming, November 11. Although only one man was nominated for each office by the committee, council members are free to nominate other exes from the floor.

Others nominated for office include Olaf Lodol, '32, for first vice-president; Bob Dowell, '40, second vice-president; and Hart Shoemaker, '41, director.

The presidential nominee is the owner of Varsity Book Store in Lubbock and has long been an active backer in all college affairs. A former student majoring in architecture and business administration, he is a Tech Loyalty Fund trustee.

Lodal, an electrical engineering graduate, is the owner of Lodol and associates in San Antonio. A retiring Association director, he has been active in ex-student affairs in the San Antonio chapter and is a Loyalty Fund trustee. While in Tech he was a member of AIE and the Engineering society.

Dowell, BBA graduate, is the

owner of Dowell's cafe in Amarillo where he was recently named vice-president of the local chapter of the Association. In school he was a member of Wranglers and the Tech Accounting Society.

until 1946, when she was made Dean of Women following Mrs. Doak's retirement. In 1949 Mrs. Langford again became head of the physical education department and Mrs. Margarette Wibble Walker was made Dean of Women.

No successor to Mrs. Langford has been named as yet. A portrait of her was recently presented to the Tech museum.

Pictures of 1949 and 1950 graduates of agriculture are on display in the hall of the Aggie building on the campus.

Shoemaker, former president of the Abilene chapter of the Association, is a BBA graduate. In Tech he was a member of Who's Who On the Campus, president of both his senior class and College Club and a member of Alpha Chi and the accounting society. He is in the auto finance and insurance business in Abilene and is married to the former Dorothy Dell Stovall, who also attended Tech, and is secretary to the Abilene chapter.

Outgoing officers include Ed McCullough, '32 of Midland, president; Shoemaker, first vice-president; and retiring director Lodol. The two remaining directors, one of which is elected each year for a three-year term, are Forrest Weimhold, '36 of Levelland who has two more years to serve and O. R. (Chick) McElya '34 of Dallas, who has one. George Langford, '32 of Lubbock, has another year to serve as representative to the Athletic Council.

R. N. Watson of Midland was chairman of the nominating committee appointed by President McCullough. Other members included Hugh McCullough, Fort Worth; Ross Ayers, Lubbock; Ralph Blodgett, Spearman and John Ruhmann, Wichita Falls.

Chapter Chatter

Presentation of the first scholarship to be awarded by an Ex-Students chapter was made recently by Houston Exes. The Houston chapter awarded a scholarship for 1950-51 to Miss Mary Margaret King, a graduate of Jeff Davis High School in Houston.

In announcing the award, the Houston chapter said, "Miss King not only had a fine scholastic record, but was outstanding in extra-curricular activities, including National Honor Society, Student Council, runner-up for school beauty, sweetheart of an R.O.T.C. Corps, captain of Drum & Bugle Corps, and others."

* * *

With forty members in attendance, the Houston chapter met June 6 at Bill Williams' Chicken Shack for dinner and a business meeting. The following officers for 1950-51 were elected at the meeting:

Gilbert W. Knox, '43—President
Fred Yelton, '41—Vice President
Mrs. G. W. Knox (Evelyn McLaughlin) '44—Secretary
Mrs. James Huffman (Betty Lindsay)—Treasurer
James Etheridge, '36—Reporter
Mrs. Paul Nail (Frances Clark) '47—Assistant Reporter
Harold Pilcher, '47—Assistant Reporter

Retiring president of the Houston Chapter is Kenneth W. Robins, '43.

* * *

Shangri-La Guest Ranch was the scene of an afternoon and evening meeting of Fort Worth Exes Saturday, June 24. An attendance record for the Fort Worth chapter was broken when, out of 125 reservations made, 116 were present.

Exes enjoyed swimming, riding, and a hay ride before dinner. Immediately following dinner, a business meeting was held. Short talks were made by Coach Dell Morgan, Coach Carl Mulleneaux, and Executive Secretary D. M. McElroy, all visitors from Tech.

Election of officers was held, with W. C. "Brigham" Young being named president, Ted Hubbard, vice president, and Lallah Wright, secretary. Retiring president is Carl Fuson. Five directors, one for each five-year period since the college began, were chosen by the exes of these respective periods.

Following the business meeting, "Cowboy" Weaver, Fort Worth radio entertainer, sang folk songs, and Coach Morgan called square dances.

Fund At Half-Way Mark Reaches \$7,000 And Has Greater Percentage Of Donors

NOTE—This report was compiled on June 24. Since that time other contributions have come in.

District	No. Contributors	Percentage
1—(Dallam, Sherman, Hartley, Moore, Oldham, Potter counties.)	39	13%
2—(Hansford, Ochiltree, Lipscomb, Hutchinson, Roberts, Hemphill, Carson, Gray, Wheeler counties.)	48	18%

1,278 Techsans Give To Loyalty Fund By June 24

Contributions to the Texas Tech Loyalty Fund had reached a new high of \$7,000 by July 1, when Tex Talks went to press. The number of contributors which is shown on this page, have not been totaled, however, since June 24, when there was a total of 1,278.

With 13.6 percent of all exes contributing by June 24, this year's fund is already ahead of last year's in which only 12 percent contributed. Also, the report on these pages is only a six months' report, while the totals given for last year, represents twelve months.

Once more APO numbers lead in percentage contributing, as 28 percent of all exes receiving their mail by APO have contributed. Averaged in with the other out of the country exes, the percentage goes down to 19 percent.

Second in percentages is District 15 with 26 percent while District 18 pulls in a 22.6. In the out of Texas districts District 29 leads with 19 percent.

At the end of last year the fund had received \$10,173 from 1200 contributions. This year's fund is already near that total at only mid-way of the year. The average gift last year was \$10.25. So far this year the average gift has been approximately \$5.39. District 31, including the Southeastern States was first in percentage of exes contributing last year.

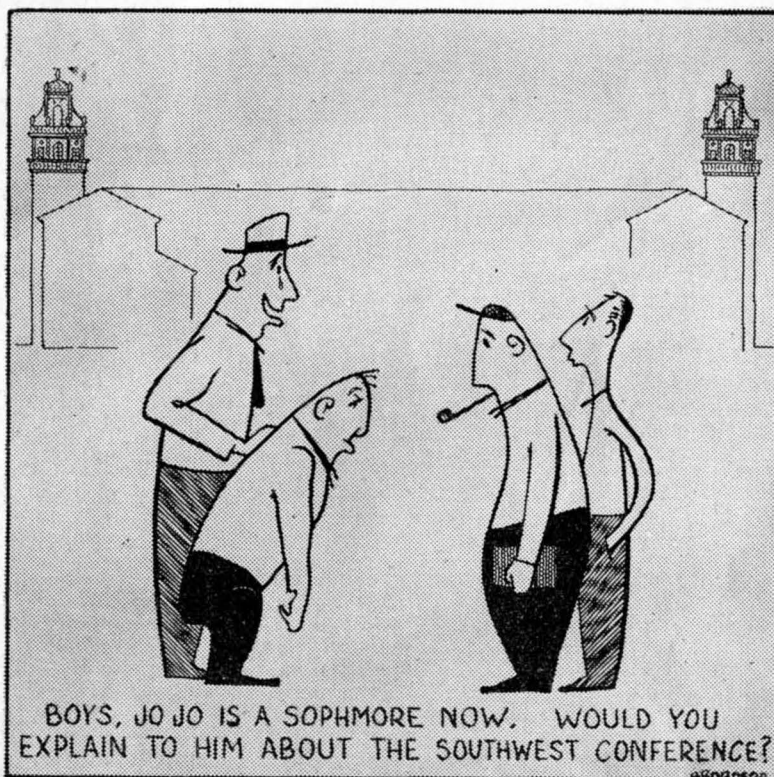

Glena Winston, '50 graduate, who has been head girl cheer leader the past two years, will teach English at Meadow schools next fall. Glenna was also a Tech beauty and member of Who's Who on the Campus.

Ruth Cowart, BA in '48 and MA in '49, will teach in the Lubbock schools next year.

Frances Evans, January graduate in English, is an employee of the library on the campus.

Betty Vaughan, '50 graduate in home economics, is employed by Hemphill Wells company in Lubbock.

It is estimated that Tech will have an enrollment of 12,000 students within the next ten years.

Holcomb First Tech Ex To Become Division Head At Texas Tech College

For the first time in its history Texas Tech will have one of its own graduates serving as a divisional dean. Dr. Dysart Edgar Holcomb will take over the duties of engineering head, August 1.

Holcomb is a chemical engineering graduate of '37 and at the age of 33 is the youngest department head the college has had.

Renown for his scientific publications, the new dean took both a M.S. and Ph.D. degree from the University of Michigan after finishing Tech.

Following his days as a Techsan, Holcomb was employed as a junior engineer with Humble Oil and Refinery. From '38 to '41 when he took his Ph.D., he was a graduate assistant at the University of Michigan. He was a research engineer with Universal Oil and at the present time is a senior research technologist with the Sinclair Refining company at Harvey, Ill. For three years he was an associate professor of chemical engineering at Purdue university.

Holcomb holds membership in Tau Beta Pi, Sigma Xi, Phi Kappa Phi, Phi Lambda Upsilon, Iota Alpha, Omega Chi Epsilon and is active in the American Institute of Chemical Engineers and the American Society for Engineering Education.

The former Techsan is writing a textbook on the field of distillation, has had ten works published and has four more in the preparation process.

He is married and has two children, Dysart, jr. and Margaret Ann. O. A. St. Clair, professor of engineering, has been acting dean since the resignation of O. V. Adams, last spring.

Looking For The T? Familiar Land Mark Moved

Exes traveling back to the campus will find the familiar red amblem, ye olde Double T has been moved from its traditional spot between the library and chemistry buildings.

The Big T will stand east of Jones Stadium where it can be seen for several blocks north and south.

Moving of the T was necessary to make room for the new science building, part of which will cover the area on which the red neon sign had stood since it was presented to the college as the gift of the 1938 seniors.

Around The Campus

A recent report from O. A. St. Clair, acting dean of engineering, shows that 50 percent of the engineering graduates of 1950 have been employed. Civil and textile and industrial engineers showed the highest percentage of placements which continue to come in each day.

In the field of home economics, the demand for trained dietitians far exceeds the supply, says Dean Margaret Weeks. She reported that her office could not fill all the requests from hospitals and industries.

West and Sneed Halls are receiving a new face this summer as some \$17,000 is spent in repairing the boys, dorms. The work includes replastering and repainting Sneed and new plumbing fixtures in both buildings.

Nine young women from Bavaria will enter Tech's division of home economics next fall. The division was recently notified by the U.S. State Department that the girls would be sent here to study next fall as a part of the government program for the reorganization and education of German youth. Under the plan young men and women who can meet specified qualifications will be sent to this country to complete their education.

The future Techsans have varied backgrounds. Some have had education in colleges and universities while others have done professional work. Under the government plan they will attend the college, study home economics and return to Germany.

Four Tech girls were recently chosen to serve on the Neiman-Marcus Board of College Consultants on College Fashions. Picked from a group of twelve, the four included Mary Ann Kelley, Colorado City; DeRose Wittenburg, Eden; Dotsy Stephenson, Fort

Exes Are Nominated As Representatives Of State Districts

On page eight you will find a ballot listing exes who have been nominated as representatives to the Association Council from each of the thirty-one senatorial districts in the state of Texas.

These exes were picked by the nominating committee appointed by Ed McCullough, association president. Three exes in each district were written by the committee and were asked to submit the name of another ex within that particular district for nomination. From the three names submitted the committee made its nominations.

You are asked to vote for your district representative. If you do not choose to vote for the ex listed you are free to write in the name of another ex provided he or she lives within that district. Please be certain to sign your ballot or your vote will be void. All ballots must be in the Ex-Students' office on the campus by August 1.

District representatives along with representatives of each local chapter, members of the Association executive board, immediate past president of the Association and officers of Tech's senior class and the president of the junior class serve as members of the Council, which is the governing body of the Association and meets Homecoming to elect officers for the Association and transact other business for the organization.

EX ENTERS MEN'S FIELD

In 1948 the first woman graduated from Tech's departments of both electrical engineering and industrial engineering. In 1950 the first femme to graduate from the department of civil engineering, Doris Pitzinger received her diploma.

Doris is a gal who grew up with engineering as Papa owns an engineering firm in Dallas. So, she dug in and has now entered a man's field, working for her Dad as a junior engineer.

Stockton; and Jane Wier, Brownfield. The Techsans will act in an advisory capacity along with coeds from Texas' eight major co-educational colleges in the states and will participate in a college fashion show given by Neiman-Marcus in Dallas, August 1.

Let's Go, Red Raiders!

Ex-Student Application for 1950
Football Tickets

FOOTBALL TICKET POLICY

1. Application for season tickets will be accepted by the Athletic Department beginning on date of this announcement, and closing August 10, 1950.
2. 1949 Season ticket holders will have until August 10, 1950, to reserve the same seats held last season.
3. 1949 Season tickets not claimed for 1950 by August 10, will be reissued to the earliest applicants.
4. Do not send checks with this application. This form is for reservations only. Checks covering the requested reservations should be mailed after August 15, and your tickets will in turn be
5. mailed to you approximately September 1. Checks covering season tickets must be received by September 13, and checks covering tickets to individual games must be received 10 days prior to that particular game.

SILVER ANNIVERSARY HOMECOMING
UNIVERSITY OF TULSA, NOV. 11

6. Application by former students for the Homecoming game must be made not later than October 28, 1950. Sections D, E & M, as well as all seats in other sections not sold as season tickets, will be held until October 28 for the ex-students.
7. To assure the best seats available, place your orders early.
8. Indicate the number of tickets desired for each game in the space provided. Ex-Students using this form will receive priority.

Clip at line above and use this application now!

Silver Anniversary Plans To Include Giving Of Silver Service To College

Come September, 1950 and Texas Tech will be beginning its twenty-fifth year of existence. To celebrate, the college is sponsoring a Silver Anniversary celebration. Homecoming will come in the middle of this celebration and a committee of exes appointed by Ed McCullough, president of the Ex-Students' Association, is working with the college in plans for that event.

O. B. Ratliff, of Lubbock and former college board member, is chairman of the committee. Other members include: Bruce Zorns, Brownfield; and Dub Rushing, Homer Maxey, and Dutch Wiginton, all of Lubbock.

One of the chief plans of the committee is to purchase a silver service for use in the Student Union building to commemorate the anniversary. The committee has had talks with silversmiths and plans a huge, 18-inch bowl which will hold eight gallons of punch and to quote the silversmiths, "will have nothing to equal it in the whole United States."

Another feature of the bowl will be the selling of four hundred matching cups. These cups which will be placed in the Student Union building with the service, will each bear the engraved name of its purchaser along with his or her class year on its side. The price of the cups has not yet been determined, but it will be approximately \$20 or \$25. The service will be used chiefly in college receptions and teas.

For more information on the silver punch cups and other plans of the Silver Anniversary Homecoming, be sure to read the Silver Anniversary issue of the Texas Techsan, which will be published in September.

Civil Engineering Reports 34 Of 40 Grads Working

As of June 19, the Civil Engineering department had been notified of the placement of 34 of 40 May Civil Engineering graduates, said J. H. Murdough, head of the department. Others, he said, are placed but have not reported to his office.

One graduate will go into construction work as a partner with his brother. Two have delayed taking places, one of them returning to his native Costa Rica, the other going with him for a visit. Of those in salaried positions, the

Graduates Flood Education Dept.

With the education department overflowing with students, the summer session of Texas Tech has again set a record. The largest number of graduate students ever enrolled in a single semester is attending classes.

The largest percentage of these advanced students are school teachers seeking work toward master's degrees or making an effort to meet the requirements of the new Gilmer-Aiken bill. Some 378 of them are enrolled in the department of education which has an overflowing total of 1100 for the summer. The agricultural education department has 54 graduates and the English department is third with 25.

In spite of the increase in graduate enrollment, the overall attendance of summer school dropped the first semester when compared to last summer's. The present enrollment is 2,723 as compared to 2,839 of last year.

One of the unusual features of this year's summer school, however, is the large number of family groups attending. Confident that they hold the record is the L. H. Welch family of Post. Papa, Mama, three daughters and one son-in-law are all enrolled. Mr. and Mrs. Welch are both school teachers, and daughter Jill is a freshman, daughter Twila, a senior and daughter Jane and husband, A. J. Sales, are also attending. Then there is the grandmother-granddaughter angle. Mrs. Percy Spencer of Lubbock and granddaughter Anne Caroline Lingle are both students this summer. Anything can happen nowadays.

average starting salary is \$265.73 per month. Among the fields of work represented are State Highway Department, City Engineers' Office, Soil Conservation Service, Bureau of Reclamation, Pipeline Construction, General Contracting, Architects' offices, Steel Fabricating and Sales Co. and Railroad Engineering Departments.

Two '50 journalism graduates, James Smith and Diana McElroy, are both employees of the Brownfield News, Brownfield, Tex.

New Scholarships Offered This Fall

Two \$200 scholarships will be offered for the first time this fall to Tech pre-medical students, Dr. Ernest Wallace, chairman of Tech committee on scholarships and awards, announced. They were established by the Lubbock-Crosby County Medical society and will go to deserving pre-medical students of junior and senior rank.

These grants were made possible through the efforts of Alpha Epsilon Delta, pre-medical honor fraternity and the medical society. Robert Salen, Sudan, and Brent Blomkvist, Pampa, Tech students, and Drs. A. G. Barsch, F. B. Malone, and E. L. Hunt, all of Lubbock, headed the two committees working on the plan.

"The physicians of the Lubbock-Crosby County Medical society recognize the need for more medical personnel and the high standards Texas Technological college maintains in the training of pre-medical students, therefore we are happy to support worthy, needy students to attain their goals," said Dr. Barsch in announcing the award.

Dr. Joe Dennis, pre-medical advisor, will receive applications for '50-'51 scholarships from Sept. 15 until Oct. 7. Winners will be announced by Oct. 21. Only those having made application will be eligible.

Qualifications include financial need, a 2.0 grade average, which must be maintained, and other traits or personal characteristics which indicate a successful medical career.

If there is no qualified applicant the money will accrue, and additional scholarships may be granted in subsequent years. The scholarship will be available to no student for more than one year.

WILLIFORD WINS DESIGN

Dimple S. Williford, Marlin junior, won first prize of \$10 in a contest of drawing and design of a proposed labor day parade float. The contest, sponsored by I.B.E.W. auxiliary, was open to Tech commercial art students. June Latham, Lubbock graduate student, won second prize of \$5. Patricia Allgood, Lubbock senior, and Walter Wagon, Olney senior, won third and fourth prizes of \$2.

Loy Anderson, business ad graduate of June, recently was awarded the Neiman Marcus scholarship to attend the Tobe-Coburn School For Fashion Careers in New York City. Loy was a marketing major.

September Brings Changes In Faculty Scene As New Heads Take Over Several Tech Departments

Several changes will be found in Texas Tech's faculty next September as new faces appear with the opening of the fall term.

In addition to a new dean of engineering about which there is another story on page two, mentors will take over in the departments of journalism, speech, chemistry and the division of graduate studies. As for other changes, psychology will rate a department all its own and the business administration division's present three departments will develop into five. Along the higher education line, English and history departments will offer the doctor degree and a new position, dean of student life, has been created.

J. Russell Heitman, formerly a member of the faculty of University of Alabama where he has headed the news bureau, will take the reins of the journalism department which has been directed since its founding in 1934 by associate professor Cecil Horne. Horne will remain on the faculty as a full professor until he reaches retirement age.

Dr. Joe Dennis is the new head of the department of chemistry and chemical engineering. He has been a member of the Tech staff since 1938. His degrees include a BA from Austin college and a MA and PhD from the University of Texas. Dennis replaces Dr. R. C. Goodwin, who is resigning to devote full time to being dean of arts and sciences.

Larson Heads Speech

Dr. P. Merville Larson, professor at the University of Denver, is the new director for the speech department. He replaces Miss Anna Jo Pendleton who asked to be relieved of her duties as department head but will remain as professor of speech. Joining the staff in 1937, Miss Pendleton became director of the department in 1942. Larson received his first two degrees from Kansas State college; his doctor of philosophy degree from Northwestern. He has held teaching positions in Kansas, Illinois, Colorado and Texas.

Dr. W. B. Gates, English professor and formerly chairman of the committee in charge of that department, will direct the division of graduate studies beginning this fall. Gates has been a member of the faculty since 1925 with exception of a few years on the TCU faculty as head of the English department.

J. R. HEITMAN

* * *

Dr. Lehman C. Hutchins, associate professor, will head the new department of pure psychology which will emphasize counseling and guidance, industrial and clinical psychology and general theoretical psychology. The department of education which was formerly joined with psychology has added many courses, especially in the field of elementary education.

The reorganization of the business administration division will set up the departments of accounting and finance, business education and secretarial administration, economics, management and marketing. Such a setup will permit a closer coordination of the work done in the classroom and the laboratory with the actualities of business and industry.

Ph D Degrees

Work may now be taken toward one's doctor degree in English and history and in 1951-52, the college will extend the graduate program so that the departments of chemistry and geology may offer the same degree.

James G. Allen, who has long served as dean of men, will take over the new position of Dean of Student Life next September. This office will combine the duties of guiding and counseling students.

President D. M. Wiggins praised

both Horne and Miss Pendleton for the fine work they have done in their respective departments. Since he organized the department, Horne has had his enrollment to more than double and has set up one of the most modern printing shops in Texas. Under his administration, the department built its present building, which was partially paid for by departmental funds.

Only two years ago Miss Pendleton saw her department move to a building all its own. Prior to that time it had officed in the ad building and had had a workshop in the former "jail," a small building which once occupied the south side of the Circle at the Broadway entrance. The department has added many courses, especially in the field of radio.

Another change in the department of journalism is the appointment of Harold M. Nelson, of the University of Minnesota faculty, to replace Clark Schooley, who has handled sports publicity and been a member of the faculty since 1942.

Seed Laboratory Reopened At Tech

Establishment of a State Seed laboratory on the Tech campus has been announced by Dr. A. W. Young, head of the department of plant industry.

The laboratory, in charge of Robbie L. Gill, Tech graduate, will serve West Texas farmers and seed dealers in testing seed samples, including those from the West Texas area used as a basis for enforcement of the Texas Seed Act.

Tech and the state division of agriculture will cooperate in operation of the laboratory in Room 116 of the agriculture building. J. E. McDonald, state commissioner of agriculture, has advised Dr. Young that reopening of the Lubbock setup will result in better operation and service in testing and in law enforcement.

Dr. Young said the most modern equipment has been installed and officials are hopeful farmers and dealers will use facilities to the fullest extent.
