

THE STRIPED BAT*.

THE nose of this bat is very small. The ears are short, broad, and pointing forward. The hair of the front, top of the head, neck, shoulders, back, and rump, is of a whitish yellow colour; and that of the under jaw, breast, and belly, is blueish, with a tincture of yellow. The colour of the membrane of the wings and tail is a mixture of yellow and brown.

* Pennant's Synopf. of Quad. p. 368. This bat is a native of Ceylon, where it is called Kiriwoula; *Pallas, Mifed.* p. 42.
