SUITABLE FOR TIME COPY

LUBBOCK --A blueprint for the long-range improvement of Texas State Parks has been prepared by the Texas Research League after a years' study of the State Parks System.

The study was made at the request of the State Parks Board. It comes at a strategic time since Texas, like many other states, has undertaken a government-sponsored program to attract out-of-state visitors.

The TRL report points out that increased leisure time, greater mobility, and higher average incomes are multiplying popular demands for recreation outlets.

Attendance in Texas State Parks has more than doubled in the last 10 years, jumping from three million in 1950 to about six million in 1960. It is anticipated this will increase to 12 million by 1970 if present trends continue.

Recreation and tourism are economically important to the state. The Travel and Information Division of the Texas Highway Department estimates that in 1960 some 8.6 million tourists spent \$457 million in Texas. This was a decline from 1957 when 10.2 million visitors spent an estimated \$531 million.

The report emphasizes that the park system is a big influence in attracting out-of-state visitors, as well as Texas' own vacationers--and that the State Parks System, as a whole, is a questionable asset in its present condition.

(More)

Parks -- add 1

It states that the lack of basic standards, general deterioration, and other factors have been pointed out repeatedly by the State Auditor, the Legislative Council, and the Legislative Budget Board.

Following the study as requested by the State Parks Board, the TRL made four basic recommendations:

(1) A set of basic criteria and minimum standards for Texas State Parks must be adopted and implemented. Future park sites which fail to meet these standards should not be accepted and parks now in the system which are below standard should be reclassified or disposed of.

In response to this proposal the State Parks Board has adopted a set of basic criteria and minimum standards which now await implementation.

(2) Park acquisition, development, interpretation and maintenance should be based on a carefully drawn, long-range plan.

Acting on this recommendation, the State Parks Board has contracted with the Texas Tech Horticulture and Park Management Department to provide such a plan. It will include a comprehensive, long-range plan for the system as a whole, and detailed plans of several individual parks.

When the Tech study is completed, the Parks Board will be in a position to furnish the Legislature with detailed, documented plans and estimates for bringing the State Parks System up to reasonable standards of adequacy.

(More)

(3) Personnel standards of the Parks Board staff should be raised, and qualified professional park rangers should be recruited to operate the system.

The report stated that efficient park management has become a profession. Graduates of Tech's Horticulture and Park Management Department have taken responsible positions with other states, large cities, and with the National Parks and Forests systems, but none has been attracted to the Texas system.

(4) Park management and concessions operation should be divided. Wherever possible, private concessions contracts for services compatible with the purposes of the parks should be made. Necessary services to the public should be continued by park personnel when contracts cannot be made. The State's public parks should be operated by public employees who have no financial interest in concessions sales.

The TRL stated that separation of park management from concession management and the employment of qualified park rangers is the single most important requirement to the development of a satisfactory State Parks System in Texas.

The report emphasized that much is to be done to provide a first class state parks system for Texas. It added, however, there is considerable evidence that Texans are prepared to support the necessary efforts once a sound, long-range development plan has been put together and an efficient management structure completed.

The Texas Research League is a privately supported, non-profit, non-political, educational corporation engaged in objective research into the operations, programs and problems of Texas government.

Dr. Ernst Giesecke, former academic vice-president at Texas Tech, will receive an honorary doctor of laws degree Thursday (June 7) at the University of Toledo.

The degree will be conferred during commencement at 7:30 p.m. in the Ohio university's field house.

Dr. Giesecke now is professor of higher education and associate dean of the Graduate School of Education at the University of Chicago.

As a consultant with the North Central Assn. of Colleges and Graduate Schools, Dr. Giesecke has worked for two years on academic matters with the faculty and administration at the University of Toledo.

He currently is a member of the State Advisory Committee for the Illinois Special Study Project for Gifted Children.

LUBBOCK --A Texas Tech graduate will be one of 40 persons touring Russia this summer as a Lisle Fellowship winner.

Frank White III, a Tech student from Clarendon, who was graduated with a masters degree in chemical engineering this spring, will leave the United States June 27 aboard the S.S. Aurelia.

The group will tour East Germany, Poland, Czechoslovakia, the Soviet Union and Central Asia before returning to the U.S. Sept. 10.

"This will be the trip of a lifetime. In addition to visiting with Russian people, it will give me a chance to brush up on my Russian and tell the people the good things about the United States," he said.

White took two courses in Russian while a student at Tech. The language background helped him to qualify for his fellowship.

The tour is being conducted under the Cultural Exchange Agreement between the United States and the Soviet Union.

6.4.62

LUBBOCK --This year's annual School Lunch Workshop at Texas Tech will feature ways to lower the cost of operating the hot lunch program in new schools. Also on the program will be a discussion of school lunch personnel and their eligibility to participate in the Teacher Retirement Program.

The short course will be taught at Tech June 11-15 and will feature a series of workshop sessions under the direction of Dr. Willa Vaughn Tinsley, dean of the School of Home Economics. Over 400 persons have pre-enrolled for the workshop to make it the largest ever held.

The session devoted to centralized food service will be conducted by Jeanette Hampton, School Food Service Director for the Paper Cup and Container Institute, New York. This program will officially get under way at 8:00 a.m. in the Tech student union ballroom, and will conclude when workshopers assemble for dinner on June 14. All at that time will witness a demonstration of three methods of serving transported meals.

Miss Hampton will direct the preparation of three different menus in a local school kitchen. The food will then be transported to the dinner meeting in insulated mobile serving carts, designed to keep hot foods hot and cold foods cold.

The first menu, which will be served to approximately one-third of the guests, will be transported in bulk and portioned into paper cups, containers and plates as it is served.

(More)

School Lunch Workshop -- add 1

Menu number two will be completely pre-portioned in the central kitchen, also using paper service. The third menu will combine these methods of serving; part of it will be pre-portioned and part of it will be transported in bulk.

Miss Hampton, who was graduated from Abilene Christian College with a degree in Home Economics and did post graduate work at the University of Texas, later worked for the United States Department of Agriculture in the early development of their school lunch program. Since then, her work with Paper Cup and Container Institute has taken her all over the country as a special consultant to school lunch program supervisors.

6.5.62

The familiar tales of Texas cowboys and oil kings that echo frequently in foreign countries helped form an early conception of the state by a young Swiss post-doctoral fellow and his wife at Texas Tech.

But then Andreas and Marianne Ludi cited another misconception-- this time one that Texans have for the Swiss.

"Most people believe we're only cheese and watch makers and they formulate other opinions from the popular American grade-school story of 'Heidi'," the Ludis said.

According to Marianne, the occupations of the Swiss are similar to those in other European countries. Some of the major job classifications include machinists, chemists, farmers (mainly in the mountain areas), and the makers of the famous Swiss chocolates.

Dr. Ludi, who received the Ph.D. in chemistry from the University of Berne on Feb. 22 of this year, now is working at Tech on a one-year research grant from the Welch Foundation of Houston.

Dr. Arthur Draper, Tech assistant professor of chemistry, was responsible for bringing Andreas and Marianne to America. Andreas will do research in solid-state chemistry, working with the structure and surface of some solid compounds.

A graduate of a teacher's college at Thun, Marianne taught elementary school for 4½ years at Berne while Andreas was in school. They were married in September 1961.

Marianne received four years of elementary schooling, five years in secondary and four years at a teachers' school.

(More)

Swiss couple -- add 1

Andreas received four years of elementary, two years of secondary and six and one-half of high school, where he earned the maturitat degree, similar to the bachelor of science degree.

He holds the licentiat, equivalent to the M.A., from the University of Berne, in addition to the Ph.D. which he completed in two and one-half years.

In citing things about Lubbock that have impressed him most, Andreas noted the flat plains of West Texas--so unlike the mountaineous areas in his country--the beautiful roads, the lovely homes and "lots of trees."

Since coming to Lubbock on May 11, the couple has bought their first car. "The car is still a luxury in Switzerland, whereas it is a necessity here," they said.

The popular mode of transportation for the Ludis back home was the bicycle, which they plan to ride here for recreation.

Andreas, the son of a Protestant minister in Berne, has a brother and three sisters back home. One of his sisters is a nurse in Nigeria and the other two are teachers.

His brother is a medical doctor, who also has studied in the U.S. A few years ago he practiced at a hospital in Bridgeport, Conn.

Marianne comes from a teaching family--two of her sisters have teaching certificates and the other sister is still in school.

"Our church system is not nearly so complicated as it is here," Andreas said. "We have two major churches--Protestant and Catholic."

Ironically, Andreas' parents live in a 12-room house built in the 13th century as a Catholic monastery. The house has thick two-foot interior walls and a high rock wall around the outside.

(More)

Swiss couple -- add 2

The Ludis, who come from a predominantly German-speaking country, also possess the knowledge of French, German and English.

Andreas, the more fluent English speaker, learned the language from reading scientific publications and doing research.

The advanced education setup in Switzerland varies from Southwestern colleges and universities. They have no dormitories, few social activities and no centralized campus.

"Most of the students live at home, only a short distance from school, while the various academic departments are located throughout the city," Andreas said.

"Social activities revolve around the person's major. At Berne we had a congregation of chemistry majors who heard visiting lecturers and toured various places," he pointed out.

After a year at Tech, Andreas plans to return to either the University of Berne or Frankfurt to continue research in physical chemistry.

LUBBOCK -- Dr. David M. Vigness, Texas Tech history department head, will spend the first summer term in Mexico City doing research on contemporary Mexico through a Tech organized research grant.

Dr. Vigness, who leaves Saturday (June 9), will visit the Mexican national library and archives, gathering information "on the drastic changes in Mexico since the revolution in 1910."

"I want to see to what extent the revolution 50 years ago has made on the accessibility of Mexico," Dr. Vigness said.

He plans to talk with government officials, politicians, economists and contemporary historians, such as Daniel Cassio Vellegas.

Mrs. Vigness will accompany him on the trip. He will return in time to teach during the second summer school term.

LUBBOCK --Eleven Texas Tech students are excavating in the later Pleistocene deposits of the Berclair Terrace near Beeville this summer in an archaeology field course offered by Tech.

The students, accompanied by Dr. David H. Kelley of Tech, are living and working on the Bar-J Ranch owned by Mrs. Clark Hardison.

Dr. Kelley is an associate professor of anthropology and director of the special Southwestern archaeology field course.

The course, emphasizing various archaeological techniques, is being offered for the first summer school term, which began June 1 and ends July 13.

"We hope to find the remains of several extinct animals which should have an important bearing on the problems of early man in North America," Dr. Kelley said.

Students enrolled in the Anthropology 433-434 course, which carries six credit hours, include: John Bayne, Big Spring; Don Knight, anthropology major from Sherman; Pem Rocap, social science major from Lubbock; Darryl Billings, history major from Lubbock; and Joe Stewart, anthropology major from San Antonio (486 E. Palfrey).

Others in the course are Lewis Davis, Brownfield; Larry Jones, government major from Midland (704 Cuthbert); Bob Sawyer and Sherry Perry, both history majors from Lubbock; Annette Sims, art major from Houston (9020 Wickford); and Charles Cummins, history major from Electra.

ATTN: Business or Book Editors

LUBBOCK --The day-by-day work of practitioners in tax matters has been described and analyzed by two Texas Tech accounting professors in their new book, "Federal Income Taxes: Research and Planning."

Released this month by Prentice-Hall, the book was written by Dr. Fred W. Norwood, professor, and Sam W. Chisholm, associate professor.

The book contains both narrative explanatory materials and case studies in tax research and tax planning. The narrative materials explore the use authorities and classifications attached to tax reference materials in three categories: statutory, administrative and judiciary.

Following the familiarization with these materials, methods of research are formulated and illustrated extensively through case studies. The narrative materials then explore the general principles of tax planning theory and practice, concluding with a case which illustrates the development of a tax plan.

The case studies, classified as tax-return and tax planning cases, are arranged in a graduated order from the less complex situations to those where no solutions have been found to date.

"The case studies have been gathered from the files of tax practitioners and are actual happenings or proposals of varied types," Dr. Norwood said.

(More)

Tax book -- Add #1

"This book is not only intended for students, but practitioners as well," Norwood said. "In fact, we expect the commercial sales to exceed those of college textbooks because of the book's value as a reference for accountants, CPA's, attorneys, treasurers and comptrollers."

Tech's accounting department has used the book for three semesters. So far the Universities of Chicago, Illinois, Texas, Arkansas and Texas A&I College have adopted the text for use this fall.

One of the objectives of the book is to provide "practice in drawing together the various sections of the Internal Revenue Code, or other law, and reasoning from the often broadly stated language to sound conclusions for the particular problem," Chisholm stated.

A native of Oxford, Miss., Dr. Norwood received both the B.B.A. and M.B.A. degrees from the University of Mississippi. He received his Ph.D. from the University of Texas.

Chisholm is a native of Brownfield and received the B.B.A. and M.B.A. degrees from Texas Tech. He is presently working on his doctorate at the University of Texas during the summer.

Both Norwood and Chisholm have their Certified Public Accountant certificates and have had experience in public accounting before they entered the teaching field.

The 320-page book, illustrated with charts and graphs, is on sale at the local college bookstores for \$6.95.

ATTN: AG EDS

LUBBOCK --The 11th annual Swine Conference will be held on the Texas Tech campus July 5-6. It will feature speakers from Oklahoma State University, Iowa State University and Texas A & M.

Prof. Stanley Anderson, associate professor of animal husbandry at Tech, said the conference will include reports on swine feeding tests run at Texas A & M, a report on research work conducted on atrophic rhinitis and virus pneumonia, and a session on different methods and equipment developed for swine management programs.

A carcass contest will be open to anyone wishing to bring a hog to the conference so it can be butchered and graded according to the percent lean cuts it will produce.

Anderson said swine breeders or raisers who wish to enter their animals in the contest should have them at the Tech animal husbandry department during the early morning of July 5 so the animals can be slaughtered and processed for the contest.

Speakers for the conference will be Dr. L.N. Hazel, Iowa State University; Dr. Jim Hillier, Oklahoma State University; Dr. Wayne Moore, Texas A & M; and T.D. Tanksley Jr., swine extension specialist at Texas A & M.

Many Texas Tech students are seeking part time work this summer, according to Mrs. Jean Jenkins, Tech Placement Bureau director.

Mrs. Jenkins said over 60 students had filed application for part time work since June 1.

A large number of these students have been all over Lubbock seeking work but have had to turn to our office when they failed to find jobs, she said.

"I have never seen such a shortage of part time work for students," Mrs. Jenkins added.

Miss Angela Malouf, assistant director, said a large number of students who have just finished high school and want to attend Tech have written to the placement bureau seeking leads and tips on employment in the Lubbock area.

We try to bring the students needing work and Lubbock employers together, but at the present time, we just don't have enough requests for student help to make a dent in the number of applications we have received, she said.

Employers needing summer employees or part time help are urged to contact the Placement Bureau at Tech. The office is open 8 a.m. till 5 p.m. Monday through Friday and till noon on Saturday. The phone is Ext. 232, off the Tech switchboard, PO 5-8541.

6.6.62

The drums will roll today (June 7) at Texas Tech as the only known percussion workshop in the Southwest begins five days of intensive training.

Junior high, senior high and college students from all over Texas will be enrolled in the classes to be taught by eight of America's percussion authorities.

Percussion instruction will be given in symphonic, military, concert and jazz band techniques.

Highlight of the workshop will be a concert at 8 p.m. Tuesday in the Music Building recital hall. It will be open to the public free of charge.

The artists and the students will demonstrate their percussion skills, with the spotlight on jazz.

Heading the list of staff members is Joe Morello, jazz drum artist with the famed Dave Brubeck Quartet. Others on the staff include Frank Arsenault, national rudimental drum champion; Haskell Harr, educational advisor from Chicago; and J. Durward Morsch, noted music educator and arranger.

Completing the list are Dick Schoxy, RCA Victor recording artist from Chicago; Jim Sewrey, percussion clinic editor for the School Musician Magazine; Bob Winslow, West Coast percussion authority; and Wally Barnett, mallet percussion authority from Decatur, Ill.

Dean Killion, director of bands at Tech, is director of the workshop.

###

6.7.62

LUBBOCK --A portion of Texas Tech's summer session is winging its way to South America for Spanish language study.

Twelve students in an eight-week institute enplaned at Miami Thursday (June 7) for Buenos Aires. Another 30 students and four staff members will take off from Miami Friday for the same destination.

The students--all high school teachers--will assemble Sunday in Buenos Aires and start by bus for Tucuman in northern Argentina, where they will practice their Spanish. They will arrive in Tucuman June 11 or 12.

Purpose of the institute is to give the teachers experience in speaking Spanish in a foreign land. Tech is conducting the study in cooperation with the U.S. Office of Education's Language Development Program. Financing is through the National Defense Education Act.

All the teachers have completed earlier summer language institutes in Spanish. This summer they will be picking up some of the finer points involved in speaking Spanish in a foreign culture.

Special language connotations and problems of communications will be brought out through living with Argentinians of the Tucuman area.

Institute sponsors expect the teachers to get a better understanding of how Spanish can be used in dealing with persons in foreign lands. This can be passed on to students and to fellow teachers.

Prof. A. B. Strehli of the Tech foreign language faculty is in charge of the institute. Other faculty members are Dr. and Mrs. Harley Oberhelman, Dr. Sam Schulman, and Mrs. Susan Ubal. Staff assistants are Misses Rosemary Patterson, Amarillo, and Olivia Alvarado, Midland.

Institute participants come from 21 states.

LUBBOCK --Two Texas Tech students have been announced as the outstanding senior and freshman in chemistry for the 1961-62 academic year.

They are Robert W. Bashe II, a senior chemistry and mathematics major from Oklahoma City, and William Rives Helms, freshman physics major from Lubbock.

Bashe, who will receive his B.S. degree this summer, is a member of Phi Kappa Phi, honorary scholastic society for upperclassmen; Phi Eta Sigma, freshman honor society; Kappa Mu Epsilon, mathematics honor society; Der Liederkrantz, German language club; and the American Chemical Society student affiliation.

He is the son of Mr. and Mrs. R. W. Bashe of 1406 Downing in Oklahoma City, Okla.

Helms, who is in the School of Arts and Sciences, is a member of Phi Eta Sigma, freshman honor society. He is the son of Mr. and Mrs. Jack Helms of Lubbock.

The award winners were selected by a chemistry faculty committee.

Safety Belt Campaign
Lubbock Jaycees
John Roppolo, Publicity Chairman
SW 9-3844

6-8-62

The Lubbock Jaycees will continue their month-long safety belt campaign Saturday and Sunday (June 9-10) at four locations.

The safety belt centers will be located in the shopping centers at Family Park, Monterey, Town and Country and the former Triple S Village.

Jaycees will man the booths from 1-6 p.m. Saturday and from 1-5 p.m. Sunday.

"Nearly 100 belts were sold during the first week of the campaign," Mack Osborne, co-chairman of the project, reported.

The belts will be sold at \$6.95 each and will be available in a choice of colors. Installment fee will be optional at \$1.50 per belt.

The Jaycees will continue the campaign on the weekends of June 16-17 and 23-24.

6.8.62

LUBBOCK --Five of the nation's top percussion authorities on the Texas Tech campus this week concurred that percussion instruments were surprisingly the most difficult to learn, but the easiest to fake.

"This difficulty many times stems from the quality of students being recruited into the percussion section," Frank Arsenault of the Ludwig Drum Co. said.

"Too many times the 'village idiot' is often cast into this section, because he supposedly lacks talent to play in the other sections."

He drew some laughs when he said, "If you don't believe this, just look at us!"

These remarks were made by Arsenault at the first afternoon session of Tech's percussion workshop--the only workshop of its kind in the Southwest this year.

More than 50 high school and college students, in addition to some area band directors, quizzed the famed percussionists whose names compose the "percussion honor roll."

Fascinating the 'future drum artists' was Joe Morello, jazz drummer with the famed Dave Brubeck Quartet. Morello flew in from a recording session in New York, just in time to appear on the afternoon panel.

The panel praised Morello for taking the time from his busy concert and recording schedule to assist in these workshops. He has been staffing workshops for the past five years.

(More)

percussionists -- add 1

"We all live in a basic rhythm and therefore directors rely so heavily on the percussion instruments to carry the band," Morello said in a mystic tone.

"Playing the drums not only requires the coordination of the hands and mind, but real physical dexterity," he pointed out.

Morello, called the "drummers' drummer," exhibited his amazing ability, along with his warmth and closeness to his audience. He demonstrated some rudimental techniques, which he calls necessary for any good drummer, then went into some jazz techniques.

"I want to be as musical as I can--play the best I can for the group I'm with--and be myself. If I can do that, then I'll be happy," Morello stated simply in his modest and easy going approach to life.

Dick Schory, Ludwig's educational director, emphasized the need for versatility among percussionists.

"They must be able to play the tympani, read both bass and treble clefs, know the different mallets and have coordination and flexibility," he said.

J. Durward Morsch, noted music educator and arranger, encouraged private drum study with competent teachers for those youngsters who have a special interest in percussion.

Remaining silent during the panel was Haskell Harr, educational advisor from Chicago, who is the "granddaddy of all living drummers."

"I'm just enjoying this," he said.

Highlight of the workshop will come at 8 p.m. Tuesday (June 12) when the staff members and participants present a concert in the Music Building recital hall. It will be open to the public free of charge.

6.8.62

LUBBOCK --Nineteen vocational agriculture instructors from various sections of Texas completed the two-day Grass Short Course offered by Texas Tech Thursday and Friday (June 7-8).

The course was designed to acquaint the teachers with the latest range management practices and as a refresher course in grass identification.

The course began Thursday with a field trip where range management practices were studied and grass samples gathered. Friday was spent in the class rooms mounting the grass and classifying them.

Instructing the course were Cecil Ayres, Chester Jaynes and John Hunter, all of the Tech agronomy department, and Herschel Bell, of the Soil Conservation Service.

The course was attended by J. W. Price Jr., Roanoke; Nolan O. Parker, Stanton; Donald E. Franke and J. B. Arrington Jr., both of Orange; W. C. Kountz, Garden City; Durwin Hill, Graham; Gail Harris, Lamesa; Harold Eades, Cresbyton; B. L. Peacock, Roaring Springs.

Clint House, Henrietta; Stanley Westbrook, Clarendon; D. B. Dean, Palestine; Wyatte Harman, Hereford; Terry Harmon, Tulia; Leonard Wilson, New Home; O. L. Christie, Idalou; Frank Kennedy, Quail; Truman Kidwell, Childress; and T. H. Seay, Estelline.

LUBBOCK --A Knox City youth will receive the 1962-63 Western Compress and Storage Scholarship at Texas Tech.

The \$750 scholarship will be awarded to Joe Tidwell, son of Mr. and Mrs. J. M. Tidwell. The grant is given to a student seeking training that will help him in service to the cotton industry.

Tidwell, who was valedictorian of his graduating class, plans to study agronomy at Tech.

While in high school, Tidwell served as secretary of the Future Farmers of America Chapter at Knox City and was awarded the Chapter Star Farmer Award. He received a Dekalb Award; served on the dairy, grass, and livestock judging teams; and was named Best All-Around Boy in 1962 at Knox City.

He was treasurer of the junior and senior classes, captain of the Knox City football team during his junior and senior years; and president of the Beta Club.

Dr. George O. Elle, assistant dean of the Agriculture School at Tech, said the Western Compress and Storage Scholarship was one of the most attractive available to freshman students at Tech.

The scholarship will be made available to Tidwell each succeeding year, provided he maintains a high scholarship record and good college citizenship.

LUBBOCK --Sixty-three high school science teachers from 10 states are attending the biology teachers' institute June 2-Aug. 3 at Texas Tech.

The institute is sponsored by a National Science Foundation grant to increase the effectiveness of the teaching of biology in high schools.

Dr. Earl D. Camp, biology department head, is director of the 9-week institute, which will include lectures, demonstrations and field trips, in addition to regular classes.

Teachers have come from Missouri, Washington, Ohio, Louisiana, Pennsylvania, Oklahoma, Kansas, Colorado, Illinois and all parts of Texas.

The participants include:

ANDREWS--Brodie Wayne Hutchinson and Billy Byron Rankin.

BEAUMONT--Thomas Ronald Jackson, 1885 Park.

BONHAM--Stanley Wilson, 513 E. 8th.

BORGER--Robert M. Edwards.

CANUTE, OKLA.--Gary Leon Laird.

CARBON--James Wilbourne Wood.

CORPUS CHRISTI--Don R. Sorensen, 4930 Kathy.

CUERO--Johnnie W. Baker.

DENVER CITY--Hugh Clarence Knox Jr..

DICKINSON--Francis Joseph Phillips.

EASTLAND--Carrol Royce Shelton.

EL CAMPO--Walter Robert Williams.

LUBBOCK --Two Texas Tech graduates and a senior student will share the \$250 Texas Concrete Masonry Assn. Award for agricultural engineering students.

The association sponsors the contest to promote the design of practical farm projects using concrete blocks as the primary building material.

This years' winners, H. Robert Hejl, Seymour; H. Eugene West, Muleshoe; and James B. Zetzsche Jr. , Bowie; submitted the best sets of plans for a machinery building to house the equipment needed to operate a 640 acre West Texas cotton and grain farm.

Hejl will receive first prize of \$125; West second prize, \$75; and Zetzsche, third prize of \$50. Hejl and Zetzsche were graduated from Tech in May and West will complete his studies in August.

Ira Williams, professor of agricultural engineering at Tech, said the senior students took part in the contest and were graded on the structural adequacy of the building, functional adequacy, quality of drawings, and the specifications which were drawn up to control workmanship and materials used in the building.

John Evans, 1952 graduate of Texas Tech, has been selected as a member of a special Robert Shaw choral group to tour Puerto Rico, beginning June 13.

Evans, now of Cleveland, Ohio, will sing at several performances, including a festival in San Juan. Upon returning to the United States, the group will present a concert June 24 in New York's Carnegie Hall.

He is presently methods technician with Remington Rand Univac in Cleveland and serves as song director in one of the Churches of Christ in that city.

While at Tech he was active in the music department and was a member of the Tech Choir. He is the son of Mr. and Mrs. Jess Evans of Shallowater.

###

6.11.62

LUBBOCK --Fifty-two school teachers are attending Texas Tech's elementary school science workshop, sponsored by the education department, June 4-15.

The workshop is being conducted by Milo Blecha, associate professor of elementary education at the University of Arizona.

Purpose of the special two-week classes is to develop more effective ways to teach science to elementary students.

The participants include:

ANDREWS--John R. Adams, Velma Horne Dixon, Maxine Hays, Mary Lorigan, Bertha L. O'Keefe and Carol Ann Weatherby.

BIG SPRING--Dolly K. Benson, 1745 Purdue; Elfa E. Cantrell, 1412 Sycamore; Patricia Godbey and Margie Beth Newbrough, 207 E. 8th St.

BROWNFIELD--Ruby Lee Arnold, Eunice Inez Black, Ona Faye Clelland, Lillie Zora Crump, Dorothy Jo Garrett, Robbie Jo Garrett, Beulah Arnold Herring, Ruby Rebekah Kempson, Creola Moore, Terry Lou Moorhead, Leola P. Petty.

GAIL--Dorothy Taylor Alderdice, Audrey P. Broadhead and Eunice Martin Yadon.

HOBBS N.M.--Virginia Dale Gafford.

6.11.62

LUBBOCK --Music fans of the Lubbock area will have a rare opportunity tonight (June 12) to hear six of the nation's top percussionists in a concert at the Texas Tech Union.

The concert, featuring all phases of percussion performance, will be at 8 p.m. in the upstairs ballroom of the air-conditioned Tech Union. The concert is open to the public free of charge.

Tonight's program will climax the five-day study held at Tech by the Percussion Workshop of America.

The faculty members to appear on the program include Frank Arsenault, national rudimental drum champion; Haskell Harr, educational advisor from Chicago; Dick Schory, RCA Victor recording artist from Chicago; Jim Sewrey, workshops founder from Denver, Colo.; Bob Winslow, percussion authority from Los Angeles; and Wally Barnett, mallet instructor from Decatur, Ill.

Many of the noted performers will direct numbers written by themselves.

Rudimental, symphonic and jazz numbers will be presented by both the faculty and students. A 15-piece ensemble, composed of woodwind and rhythm instruments, will augment the percussion instruments.

"If Lubbockites and Tech students are looking for an unusual musical treat that is visually stimulating and musically satisfying, this concert should solve the problem," Sewrey said.

(More)

concert -- add 1

Schory will direct two of his own numbers to open the concert. They include "Rocky Mountain Mambo" and "Bolero Diablo," to be presented by the concert ensemble.

Harr will direct an ensemble in three of his numbers--"Elmhurst Quintet," "Flying Sticks Trio" and "Valley Forge Quintet."

William Kraft's "Courante" will feature Winslow on the snare drums. Winslow will then direct a faculty ensemble in "Suite for Weather Kings."

"Drum Beat Jamboree" will feature Arsenault on the snare drums with direction by Schory. Sewrey will direct the last two numbers, to be presented by the symphonic ensemble.

The last numbers include "Easy to Love" and "Mambo No. 8," arranged by J.D. Morsch, noted music educator and arranger who has been a member of the workshop staff.

Workshop officials predict plenty of encores, especially numbers written by George Shearing, Duke Ellington and other known jazz artists.

Vaughn Janike, business manager for the Percussion Workshop of America, will narrate the program. Dean Killion, director of Tech bands, has been the host-director for the only known workshop of this type in the Southwest this year.

LUBBOCK --Thirty public school counselors from the Southwest will try to determine what keeps the able student from achieving his potential as they attend Texas Tech's institute in counseling and guidance training June 18- July 27.

The advanced institute is sponsored by Tech's departments of education and psychology in collaboration with the United States Department of Health, Education and Welfare under the 1958 National Defense Education Act.

The institute participants--15 men and 15 women--were selected from a field of 400 applicants from over the Southwest. Those chosen represent all parts of Texas and the states of Oklahoma, New Mexico, Illinois and Arkansas.

"With counseling experts staffing the institute, we will focus our attention on the greatest area of human waste--those students who are able to achieve, but are not developing their potential," Dr. Beatrix Cobb, institute director, said.

She cited cases from the Lubbock public schools where a student with an IQ of 130 had made 7 C's and 5 D's this past year and a girl with an IQ of 134 had made some F's and C's.

Thirty "able under-achievers" from Lubbock's junior and senior high schools will be given group and individual counseling by the participants, Dr. Cobb said.

(More)

counselors -- add 1

Visiting members of the staff include Dr. Fred Proff of the University of Illinois, who is director of the NDEA counseling and guidance institutes; Dr. John Shlien, director of the University of Chicago counseling center; and Dr. Alan Krasnoff, research director at the Veteran's Hospital, St. Louis, Mo.

Dr. Mary Bubliss, a Plainview child psychiatrist, will also be a visiting expert on the institute's staff.

Tech psychology members on the staff include Mrs. Betty Sturm, instructor; Dr. Murray Kownar, professor, and Dr. Cobb, acting psychology department head and director of Tech's Rehabilitation Counselor Training Program.

Tech has sponsored the NDEA counseling and guidance institute every year but one since the national act was passed in 1958, providing for the institutes.

###

6.12.62

The following counselors will participate in the 1962 Summer NDEA counseling and guidance training institute to be held at Texas Tech June 18-July 27:

The new cafeteria in Texas Tech's expanded Union building is now open, Nelson Longley, Union director, announced.

The cafeteria will serve lunch from 11:30 a.m. to 1:30 p.m. Monday through Friday during the summer session. Coffee will be served there 8 a.m. to 2:30 p.m. on those days.

The cafeteria will not be open on Saturdays or Sundays this summer, Longley emphasized.

The new facility, located in the recent addition to the Union Building, is air-conditioned and has a speaker system for music during dining.

The Union's snack bar will continue to operate from 7:30 a.m. until 10:30 p.m. Monday through Saturday during the summer session. The snack bar serves coffee, soft drinks and other short orders.

LUBBOCK --Texas Tech's annual Tax Institute will be held
Oct. 25-27.

Haskell G. Taylor of Tech's accounting department is
president of the 1962 institute.

Other officers include T.T. Vineyard, Amarillo CPA, and Ralph
W. McCleskey, Midland CPA, vice presidents; and Edward R. Smith,
Lubbock attorney and CPA, secretary-treasurer.

Program chairman for this fall's institute is Harold J.
Douglas, Lubbock CPA.

Douglas reports that papers on oil and gas, farming and
ranching, partnerships and other subjects on taxation are being
planned.

Tech's accounting department, headed by Dr. Reginald Rushing,
is sponsor of the institute, along with seven West Texas and
Panhandle accounting and law associations.

LUBBOCK --More efficient business operations for the public schools will be sought June 28-29 at Texas Tech.

The workshop is sponsored by Tech's education department in cooperation with the Texas Assn. of School Business Officials. Seven other educational organizations are assisting in the sponsorship.

Dr. Berlie Fallon of Tech, director of the West Texas School Study Council, predicts more than 60 officials will attend. "The School Business Manager Grows Professionally" is the theme of this year's workshop.

Dr. Sam Tidwell, nationally known authority in accounting, will address the workshop and head a panel on "School Accounting--Trends and Development."

The program will feature panels and discussions on centralized school lunchrooms, custodial training and techniques, tax-sheltered annuities, and budgeting and developments in certification for Texas business managers.

Speaker for the June 28 banquet will be Roy Bass, Lubbock attorney and humorist.

Participating on the program will be T.J. O'Connor, the Texas Education Agency business manager; Dr. Morris Wallace, Tech education department head; Dr. Fred Norwood, Tech accounting professor; Nat Williams, Lubbock Public Schools' superintendent; and T.A. Roach, Andrews Public Schools' superintendent.

ATTN: Fine Arts Editors

LUBBOCK --A Texas Tech senior has won first prize in the 1962 national Young Composers' Contest sponsored by the National Federation of Music Clubs.

He is David DeLane Smither of Lubbock, who won first place in the Texas contest earlier this spring.

Smither's winning composition is a song cycle, written in a contemporary idiom, to the text of three Carl Sandburg poems-- "Summer Stars," "On a Flimmering Floom You Shall Ride" and "Throw Roses."

The 22-year-old composer, who was chosen from contestants from over the United States, will receive a \$100 cash award.

His composition has been performed at the Texas and Georgia Federation of Music Clubs' state conventions. Smither presented the number at the Texas convention and Miss Evelyn McGarrity of the Tech music faculty performed it in Georgia.

Judges for the 20th annual contest were Dr. Peter Mennin of the Peabody Conservatory; Harold Boxer, Voice of America; and Dr. Glenn Finney, University of Michigan.

Smither has studied composition at Tech under Mary Jeanne van Appledorn, Ronald LoPresti and Mary Helen McCarty. He has studied piano under John Price and the late Myrtle Dunn Short.

6.13.62

LUBBOCK --Texas Tech's Summer Music Camp for high school students will climax Friday evening (June 15) with a concert by two bands, orchestra and choir.

Approximately 280 students from the West Texas and New Mexico area will be on the program scheduled at 6:30 p.m. in Tech's air-conditioned downstairs' Union Ballroom.

The concert is open to the public free of charge, Keith McCarty, director of Tech's music camps, said.

The two-week camp featured classes in marching, twirling, band, choir, orchestra, theory and instrument.

Walter Mantani, former conductor of the Midland-Odessa Symphony Orchestra, will be the guest conductor of the camp's orchestra.

Other conductors include W.O. Latson of Amarillo High School, concert band; J.R. McEntyre of Odessa's Permian High School, symphonic band; and Gene Kenney of the Tech music faculty, choir.

Latson will conduct the concert band in "Golden Eagle March," "Variations Overture," "Beguine for Flutes," "The Blue and the Gray" and "Liberty Bell."

Kenney's choir will sing "Sheep May Safely Graze," "I Beheld Her, Beautiful as a Dove," "Rise Up My Love, My Fair One," "Music, When Soft Voices Die," and "Beautiful Dreamer."

Completing the choral program will be "A Lullaby for Christmas," "In Silent Night," "Oh! Lemuel," and "Soon-Ah Will Be Done."

(More)

concert -- add 1

Mantani will conduct the orchestra in MacDermot's "String Jig" and Schubert's "Symphony No. 5."

The symphonic band, under McEntyre's direction, will play "Hands Across the Sea," "Jesu, Joy of Man's Desiring," "Mass from 'La Fiesta Mexicana'," "Greensleeves," "La Bamba de Vera Cruz," "Parade from 'Viva Mexico'," "Diamond Jim," "Percussion Espagnole," and "Block M March."

6.13.62

A paper submitted by a Texas Tech industrial engineering senior has been awarded first prize in the national American Institute of Industrial Engineers competition.

The paper, entitled "Machine Algorithm for Critical Path Scheduling," was submitted by Don Roper, 3205 39th St., Lubbock, and was picked as the top entry from among 30 papers submitted by students attending colleges across the nation.

Roper was awarded a \$100 cash award and an expense-paid trip to the national conference of the AIIE in Atlantic City, N.J.

The Tech AIIE student chapter has won second place nationally in the student chapter competition. Forty-seven student chapters throughout the nation competed for the honors.

Dr. Richard A. Dudek, professor and head of the industrial engineering department at Tech, was elected AIIE student chapter chairman on the staff of the AIIE Institute president. He is in charge of the complete student chapter program.

###

6.13.62

LUBBOCK --Texas Tech's recently expanded Data Processing Center is now available for use by faculty members and graduate students on a full-time schedule, according to Tech President, Dr. R. C. Goodwin.

"These facilities shall be used for educational and research purpose on a campus-wide basis," Dr. Goodwin said. "It is our purpose to provide educational opportunities in the area of computer and data processing systems and to contribute materially to our research efforts.

"While primarily a scientific system, the computer lends itself admirably to general purpose use," he said.

The center is located in the east end of the Architecture-Computer Building. The system includes an IBM 1620 Computer, coupled with a card input-output device. Supporting equipment consists of an IBM electronic accounting machine, an IBM card reproducer and an IBM card sorter.

Several card punch machines are distributed to various points on the campus for convenience of the faculty.

The 24-hour schedule for the center allows from 8 a.m. to 5 p.m. for processing submitted programs by the Data Processing Center staff only. From 5 p.m. until 8 a.m., time periods will be assigned to staff members and graduate students approved for console operation of the computer.

A one-semester-hour course in Fortran Programming is offered by the industrial engineering department each semester and during both summer terms. Fortran stands for FORMula TRANslator.

Special one week short courses in Fortran programming will be given for faculty members upon request.

Junior Chamber of Commerce
Miss Lubbock Pageant
John Roppolo, Publicity Chairman
SW 9-3844

6.14.62

A "barrel of prizes" awaits the winner of the Miss Lubbock Pageant, scheduled June 30 in the Lubbock Municipal Auditorium.

The top prizes are a full wardrobe, free modeling lessons and an expense-paid trip to the Miss Texas Pageant in Fort Worth.

Deadline for entering the pageant is today (June 15), Junior Chamber of Commerce officials report.

Interested girls can pick up applications at the Jaycee office at 1803 Broadway today and return them by Monday. Information on the contest is available by calling the Jaycee office, PO 5-6861.

Preliminaries will be held Friday, June 29, at a closed rehearsal, with the girls appearing in swim suits and performing their talent routines.

In the finals on Saturday night, the contestants will appear in evening gowns and swim suits and will display their talent. Judging will be based on talent, personality and appearance in evening gown and swim suit.

Miss Annette Cochran, 1961 Miss Lubbock and a finalist in the Miss Texas Pageant, will crown this year's winner.

Jaycee officials report a "bevy of beautiful girls" have entered the contest so far, but they are still searching for more to enter.

Judges for the contest will not be announced until the week of the contest. They will first meet the contestants at a party to be held Thursday night before the pageant.

Any Texas Tech coed, recent high school graduate or working girl is eligible to enter.

LUBBOCK --A West Texas School Study Council meeting at Texas Tech Thursday (June 14) adopted a long range program of workshops for the elementary school teacher.

The workshops will center around the basic elementary courses, such as reading, social studies and mathematics. Consultants will be brought to Lubbock to instruct the special courses.

The first of the two-day workshops will be held this fall with emphasis on mathematics.

Presiding over the executive committee meeting was Dr. Lee Vardy, superintendent of Slaton Public Schools and committee chairman. The Council has authorized the committee to plan the workshop programs.

In other business the group has scheduled a two-day workshop for elementary school principals in August and a meeting of all the council's school administrators this fall. The fall meeting will be held to decide on new projects for the coming school year.

The initial distribution of the Council's latest research project, "Graduation Requirements in Texas High Schools," was made at the meeting.

The research project contains results of a study on the directions which high schools are going with regard to organizational patterns, special service personnel employed and graduation requirements.

Attending the meeting were Dr. Berlie J. Fallon of Tech, the Council's executive director; Glenn Reeves, Littlefield Public School superintendent; Abe Holder, Lamesa superintendent; and Dr. Morris Wallace, Tech education department head.

LUBBOCK --Approximately 400 junior high and elementary school musicians will converge on the Texas Tech campus Monday (June 18) for the second Summer Music Camp sponsored by Tech's music department.

The first camp, held June 4-15, attracted 184 high school students from the West Texas and New Mexico areas.

Participants in the camp will attend classes in band, orchestra, choir and twirling. Classes are held six hours a day, with recreational activities planned for the remainder of the day.

"We are expecting an increase of about 200 students over last year," Keith McCarty, director of Tech's music camps, said. "The high school division enrollment jumped from 140 to 184 this year."

Students who have not pre-registered for the music workshop may register during the week. Tuition for the junior high division is \$20, while the elementary division is \$10.

During the camp, students will attend full rehearsals two hours a day and spend one hour each in instrumental instruction, theory class, section rehearsals, and ensembles or marching practice.

The three bands, two orchestras and choir will present a combined concert Friday, June 29, to climax the two weeks of intensive musical training.

Directors of the three camp bands include J. D. King, Hale Center band director; Tom Wright, Brownfield band director; and Orlon Butler, band director at Atkins Junior High School, Lubbock.

Cloyse Webb of the Perryton Public School System will direct the choral group. Teaching the twirling classes in both camps is Bill Woods, band director at Levelland High School.

(more)

music camps Add #1

McCarty expects several busloads of music students to commute each day from area towns, such as Abernathy, Hale Center, Levelland and Slaton. Other students will stay in Tech's residence halls.

The planned program of supervised recreation includes swimming, parties, bowling, miniature golf, concerts, movies, talent show, ice and roller skating, and visits to amusement parks. The students are provided transportation on Sundays to attend worship services.

LUBBOCK --Close to 400 school lunch personnel attending the annual School Lunch Workshop at Texas Tech this week were treated to a supper Thursday where they were introduced to the latest methods of food service.

The supper was provided to show the lunch room personnel how three different types of meals may be served to children with a minimum of effort and time expended.

Miss Jeanette Hampton, School Food Service Director for the Paper Cup and Container Institute, New York, said she did not believe the prepackaged meal would completely out date the present system of cafeterias but said its use would greatly expand as new schools are constructed in the larger towns and cities.

"Prepackaged food is the fastest and simplest to serve but it takes more equipment to fix. I don't believe it will completely replace the cafeteria in the school," she said.

Participants in the workshop had their choice of three menus at the supper. One menu was prepackaged, the second partly prepackaged, and the third was served from large pans as the persons walked down a regular cafeteria style counter.

It took approximately 15 minutes to serve the 400 persons attending the workshop.

Certificates showing the participants completed the training program were given out just before the workshop ended at noon Friday.

LUBBOCK --Texas Tech's regional rodeo champs will compete against the top college cowboys in the nation at the National Intercollegiate Rodeo next weekend (June 21-24) in Denver, Colo.

The Tech team gained the right to represent the Southwest region by winning college rodeos this spring at Abilene, Canyon, Las Cruces, N. M., Lubbock and Silver City, N. M.

Tech, champion of a five-state area, will face top teams representing the West Coast, Rocky Mountain, Southern and Northern regions in the national finals.

Among Tech's team members is Edd Workman, national all-around cowboy for the past two years. Workman, Lubbock junior, won all-around honors at five rodeos this spring.

Other team members chosen by the Tech Rodeo Assn. board of directors are Clyde Fort, Lovington, N. M., senior; H. C. Zachry, Henrietta senior; Benton Wardlow, Del Rio sophomore; Jerry Carson, Midland senior; and Jerry Harlan, Slaton junior.

Tech won this spring over long-time national champion Sul Ross College of Alpine. The first and only national championship for Tech's cowboys was in 1955.

###

6.15.62

LUBBOCK --Texas Tech's Southwest regional rodeo champs will compete against the top college cowboys in the nation at the National Intercollegiate Rodeo next weekend (June 21-24) in Denver, Colo.

The Tech team gained the right to represent this region by winning college rodeos this spring at Abilene, Las Cruces, N. M., Canyon, Silver City, N. M. and Lubbock.

Tech's cowboys won the rugged five-state area over teams from Texas, Oklahoma, New Mexico, Southern Colorado and Eastern Arizona. At the national finals they will compete with the champions of the Rocky Mountain, West Coast, Southern and Northern regions.

Competition in Denver will include the five top teams of six members each, in addition to the top three cowboys in each of the six standard events from each region.

The events include bareback bronc riding, saddle bronc riding, calf roping, steer wrestling, bull riding and barrel racing.

Among Tech's team members is Edd Workman, national all-around cowboy for the past two years. Workman, a junior industrial management major from Lubbock, has won all-around honors at five rodeos this spring.

The other team members selected by the Tech Rodeo Assn. board of directors are Clyde Fort, senior agronomy major from Lovington, N. M.; H. C. Zachry, senior art major from Henrietta; Benton Wardlow, sophomore business major from Del Rio; Jerry Carson, senior animal husbandry major from Midland; and Jerry Harlan, junior animal husbandry major from Slaton.

The members of the team were chosen on the basis of their individual ability and their current winning success, Zachry, the association's president, said.

(more)

rodeo team Add #1

Stock for the finals will be furnished by Summit Rodeo Co. of Sulphur, La. The stock is approved by the Rodeo Cowboy Assn. and is well known for its "top bucking" horses and bulls.

The Sunday afternoon (June 24) performance will be televised on "Wide World of Sports" over the ABC network. Bud Palmer, noted sportscaster, will serve as commentator.

Tech won out this spring over long-time national champion Sul Ross College of Alpine. The first and only national championship for Tech's cowboys was in 1955.

Participants in the national finals will compete for the usual prizes of saddles, boots, belt buckles, hats, and trophies, in addition to trips to the World's Fair in Seattle, Wash.

On hand to witness his prize-winning team will be Capt. Charles W. Brown of Tech's Army ROTC staff, who is sponsor of the Rodeo Assn.

The Tech rodeo team has added five championship trophies to its collection from rodeos won at New Mexico State University, West Texas State College, Hardin-Simmons University, New Mexico Western College and their own rodeo, which is the largest indoor college rodeo in the nation.

Safety Belt Campaign
Lubbock Jaycees
John Roppolo, Publicity Chairman
SW 9-3844

6.15.62

The Lubbock Jaycees will continue their safety belt campaign this weekend (June 16-17) to help reduce Lubbock's safety fatalities.

This will be the third weekend of the month-long campaign being conducted to educate Lubbock citizens on the need of the belts and to sell them at reduced rates.

The belts will be sold from 1-6 p.m. Saturday and 1-5 p.m. Sunday at the shopping centers in Monterey, Family Park, Town and Country and the former Triple S Village.

Just this week the National Safety Council reported that the use of seat belts tripled last year and as a result, 100 lives probably were saved.

"When a universal use of seat belts has been achieved, we believe over 5,000 lives will be saved annually," Council President Howard Pyle said.

The Jaycees are selling the belts at \$6.95 each, with installation optional at \$1.50 each.

The campaign will continue through the weekend of June 23-24.

Miss Marlee Kochis, spring graduate of Texas Tech, has received an assignment with the Agency for International Development, Department of State, in Washington, D. C.

She will be one of 10 from the United States attending a Foreign Language Institute while working in the Washington office. After a year there, she will begin overseas duty.

A French bi-lingual secretarial major at Tech, Miss Kochis also was invited to join the Peace Corps for a Nigerian project.

While at Tech she was a member of Delta Delta Delta social sorority and active in Le Cercle Francais, departmental organization for students of French.

She was a two-time Tech La Ventana beauty and a finalist in the 1960 Miss Lubbock pageant. She is the daughter of Mr. and Mrs. John Kochis of 4109 Curzon, Fort Worth.

LUBBOCK --A small gas-engine short course being held at Texas Tech this week (June 19-21) has drawn vocational agriculture instructors from Texas and New Mexico.

The course is being taught by R.C. McWilliams, Briggs and Stratton Corp., and Lewis Eggenberger, assistant professor of agriculture education, to 20 agricultural instructors.

The classroom instruction is devoted to repairing small gasoline engines such as the ones used on cattle sprayers, hay loaders and lawn mowers. The students are using engines supplied by the Briggs and Stratton Corp. to learn the basic repair procedures.

Instructors attending the course include James Carrol, Whiteface; J.E. Dozier, Anson; M.A. Barber, Ozona; Tom Heffernan, Nazareth; Henry Barber, Floydada; Andrew Essary, Lamesa; Harold Eades, Crosbyton; W.R. Womack, Rotan; Bobby Browning, Texline; and F.J. McCauley, Welch.

Clyde Barber, Gruver; Wyatte Harmon, Hereford; J.G. Watson, Panhandle; Ray Hensley, Maud; Don Bennett, Jacksboro; Frank Bartlett, Abernathy; Richard Earter, Anton; James Redd, O'Donnell; and Bill Bickel, Muleshoe.

Stanley D. Foreman, assistant professor of civil engineering at Texas Tech, is participating in the Summer Institute in Advanced Mechanics for College Teachers this summer at the University of Colorado.

The institute is supported by the National Science Foundation and directed by Prof. James Chinn of Colorado.

Thirty-six engineers are attending the institute, which is offering courses in advanced mechanics and applied mathematics. Ten seminars will be conducted by prominent engineering educators June 18-Aug. 24.

###

6.21.62

Three Lubbock businessmen have proven their decision-making ability by winning a theoretical business game, called "Mantrap," co-sponsored by Texas Tech and the University of Houston.

Winner of the game is the team of David Rodgers of Rodgers Litho Printers; Troy Myers, Lubbock First National Bank; and James Porter, West Texas Cotton Pool Sales.

The trio competed against three other teams of local businessmen during the three-night game. Participants were given case methods to test their decision-making--without risking real dollars in real business.

Purpose of the game is to help businessmen sharpen their talents by making decisions in imaginary competition involving thousands of dollars and numerous market factors.

Dr. Fred Norwood of Tech's accounting department and Burl Hubbard, management department, administered the game and rated the teams' decisions on a plus-and-minus point basis.

Several schools in the Southwest are playing the game, Norwood reported. The results and evaluations will be sent to the Center for Research in Business and Economics at the University of Houston.

The first games are being played as a test-run for the Small Business Administration, a Washington, D. C., agency.

The game was played without continuity, using random six-month periods of time from a small manufacturing company's operations. By avoiding continuity, the teams did not have to look for actual dollars-and-cents consequences of their decisions on the next company financial statement.

One team was composed of T. O. Wilkins and William C. Warren of Wilkins Furniture and Carpets; and George Berry of Tech's finance department.

(more)

business game Add #1

Four men from South Plains Associated Grocers comprised the second team. They are P. T. Glazner, Alfred Austin, Dan Boone and Bill Snell. Time Freight Inc. contributed Larry Anderson, Robert Gassger and Wayne York to another team.

Rodgers and Myers previously won another business game co-sponsored by the University of Texas and Tech.

6 22 62

The Lubbock Jaycees' seat belt campaign draws to a close this weekend after intensive sales for the past three weekends.

Seat belt centers will be set up Saturday and Sunday at the shopping centers in Monterey, Family Park, Town and Country, and the former Triple S Village.

The booths will be open from 1-6 p.m. Saturday and 1-5 p.m. Sunday.

Jaycee officials report approximately 200 belts have been sold during the past three weeks. The belts sell for \$6.95 each and installation is optional at \$1.50.

Any person interested in buying the belts after the campaign ends this weekend may come by the Jaycee office at 1803 Broadway or phone the office, PO 5-6861.

###

6.22.62

The under-achievement found among able students is regarded as a symptom and not as an end product, Dr. Fred Proff of the University of Illinois said Friday at Texas Tech.

Dr. Proff is a visiting consultant at Tech's institute in counseling and guidance training, being held June 18-July 27.

He is working with the 60 high school counselors to try to determine what keeps the able student from achieving his potential. In order to correct these symptoms and to keep them from reaching the "end stage," Dr. Proff emphasized the importance of the schools in meeting the unique needs of gifted children.

These symptoms are predominantly prevalent in males, rather than in females, he said. This is due to the female conforming to the educational culture easier than the male.

Of all boys in school, 50 per cent are gifted "under-achievers," while only about 25 per cent of the girls undergo this.

These "under-achievers" are generally hostile to their parents and to the education system in general, because they are bright enough to realize they are not reaching their potential in today's most important institution--education.

"If parents or teachers nag at this type of student, this makes him worse," Dr. Proff said. "The counselor must fulfill the role in motivating the student and the schools must provide outlets for him to expand and develop his creativity and talent."

Dr. Proff stressed the need for early identification of these able students since about 17 per cent of today's population are "able under-achievers."

(more)

education Add #1

At the University of Illinois, Dr. Proff is professor of education and is the national director of the institutes sponsored in collaboration with the U. S. Department of Health, Education and Welfare under the 1958 National Defense Education Act.

Since 1954 he has been doing research with the "gifted under-achievers." He is presently working with elementary and high school groups, following their academic improvement through school.

###

LUBBOCK --Junior high and elementary school students from West Texas and New Mexico are attending Texas Tech's annual Summer Music Camp June 18-29.

Participants attend classes six hours each day and will present a public concert on Friday, June 29, to climax the two-weeks of intensive music training.

Among the 350 band students enrolled in the music camp are:

Lubbock --Nineteen days of theater-going will comprise Texas Tech's sixth annual American Theater Tour to the Midwest, Canada, East Coast and South.

The 5,000-mile tour begins Aug. 4 and will end Aug. 23 when the group returns to Lubbock. Travel is by air-conditioned bus, with en-route discussions of current plays and new developments in the American theater planned.

Although the enrollment is limited to 25 students, the Speech 3311 course in American theater is still open to interested persons, Dr. P. Merville Larson, Tech speech department head, said.

Interested persons are encouraged to contact the Tech speech department since registration must be completed soon.

A fee of \$250 includes tuition, transportation, hotel rooms, and tickets to all scheduled performances.

The first stop on the itinerary is a visit to the Dallas Theater Center and attendance at a performance. The touring group will then visit the Fine Arts Center at the University of Arkansas and attend a musical in St. Louis' Forest Park amphitheater.

They will attend a performance at the nation's second largest legitimate theater in Chicago, Ill., and see a summer stock play at the Northland Playhouse in Detroit, Mich.

"Macbeth" will be featured at Canada's renowned Stratford Shakespearean Festival while the group is in Stratford, Ont. In upstate New York they will visit several stock companies.

(More)

Theater Tour -- Add 1

A tour of the American Shakespeare Festival and Academy will be on the Stratford, Conn., agenda, followed by a visit to New York City where they will see "Man for All the Seasons" and several other Broadway and off-Broadway productions.

In Williamsburg, Va., they will see Paul Green's symphonic drama, "The Common Glory," and visit the Barter Theater in Abingdon, Va.

The tour will continue through the South to Kentucky and Tennessee.

The last stop of the tour will be in Hot Springs, Ark. for an evening of relaxation and recapitulation of the entire tour.

Ronald Schulz, associate professor of speech and director of Tech's theater, will serve as instructor of the American theater course, which is offered for three academic hours of credit.

William Rives Helms, Texas Tech sophomore from Lubbock, will compete for the "outstanding chemistry student of this region."

Helms was selected by the chemistry faculty this spring and will receive a "Handbook of Chemistry and Physics" from the Chemical Rubber Co.

The second part of the competition was a two-hour written test which will be graded and entered with other freshmen exams in this region. The exam was prepared by the sponsoring company and will be graded by them.

Winners of the seven regional contests will receive \$100 of scientific books to be awarded to the college library of each recipient.

Helms is a physics major and was a member of Phi Eta Sigma, freshman honor society. He is the son of Mr. and Mrs. Jack Helms of Lubbock.

6.23.62

The 1962-63 Texas Tech speech scholarships, ranging in value from \$100-250, have been awarded to nine incoming freshmen and a Tech sophomore.

Dr. P. Merville Larson, speech department head, announced the recipients of the one-year scholarships.

Three Lubbock Monterey High School graduates are among the nine freshmen receiving the awards. They are Darline Hunter of 4626 30th St.; Keith Dudley Strain, 3216 42nd St.; and Anne Moore, 3425 53rd St.

Misses Hunter and Moore plan careers in speech education, while Strain is interested in a foreign service career. All were active in speech and other extra-curricular activities while in high school.

The lone upperclassman receiving a scholarship is Nell Anne Walter of Abilene, a speech therapy major.

Other freshmen recipients are Ollie Ann Brown of Whitney; George William Bailey, Port Arthur; Linda Leigh Sharp, Tulia; Judith Annyce Eaton, Sweetwater; Gerald R. Stockstill, Quanah; and Linda Lou Cargile, Mount Pleasant.

Funds for the scholarships came from money won by Tech debaters for the past two years on "Young America Speaks," the intercollegiate television debate show. Other funds were contributed by parents whose children receive training at Tech's Speech Clinic.

After spring grades have been received by the speech department, additional speech awards will be made to upperclassmen in the department, Dr. Larson said.

Dr. Willa Vaughn Tinsley, School of Home Economics dean at Texas Tech, and Miss Doris Nesbitt in home economics education will attend the annual meeting of the American Home Economics Assn. this week (June 25-29) in Miami Beach, Fla.

"Home Economics in a Changing World--Raising our Professional Sights" is the theme of this year's convention to be attended by some 5,000 home economists.

Dean Tinsley will report some of Tech's special techniques in home economics curriculum planning at the colleges and universities sectional meeting Thursday (June 28).

As chairman of the national nominating committee, she will announce to the assembly of delegates the new officers who were elected this spring by membership mail-ballot.

In addition to these duties, Dean Tinsley will serve as a voting member of the House of Delegates as president-elect of the Texas Home Economics Assn.

A Texas home economist is the president-elect of the 27,000-member association. She is Mrs. Florence Low, assistant director for home economics, Texas Agricultural Extension Service at College Station.

MAILING SCHEDULE FOR June 25-30, 1962

[illegible]

6-25-62

LUBBOCK --Vocational Agriculture instructors from 25 Texas and one New Mexico towns are on the Texas Tech campus this week attending the four-day Farm Mechanics Skills Short Course.

The course began Tuesday (June 26) and ends Friday (June 29). It is designed to acquaint agriculture teachers with the necessary skills to teach high school students the proper use of hand and power tools used on wood and metals.

The course is being taught by Bob Craig, farm mechanic specialist, Texas A&M College and Louis Eggenberger, assistant professor of agricultural education at Tech.

Attending the school are Leonard Wilson, New Home; Earl Medding, Cooper; W. C. Kountz, Garden City; Bob Williams, Vega; Franklin Brownfield, Blackwell; Gail Harris, Lamesa; Bobby Joe Browning, Texline; Billy Joe Hawkins, Hale Center; Jess Robinson, Hereford; James Reed, O'Donnell; Ike Trimble, Post; Jerry Stockton, Plains; Gene Barnett, Plainview; R. T. Laurie, Claude; and Wendell Dunlap, Goree.

Also attending are Tom Alvis, Munday; Jerry Adams, Abernathy; Bobby Lee, Wilson; Homer Jones, Wellman; Jim Thornton, Kerrville; Don Gilbert, Muleshoe; Stanley Westbrook, Clarendon; Doyle Messer, Hedley; Tom Duffey, Plainview; and Gene Sollock, Pasadena.

The only New Mexican attending the course is Fred Dirickson, Portales, N. M.

###

6.25.62

LUBBOCK--"The Future of Pork Production in the Southwest" will be the theme for the ninth annual Texas Tech Swine Conference to be held on the Tech campus Thursday and Friday, July 5-6.

The program, sponsored by the animal husbandry department of Texas Tech, Texas Swine Breeders Assn., Texas Chester White Swine Breeders Assn., Southwestern Hampshire Swine Breeders Assn., Texas Berkshire Swine Breeders Assn., West Texas Duroc Swine Breeders Assn., and the Panhandle Plains Poland China Breeders Assn., will get underway Thursday, July 5, at 8 a.m. with registration at the Tech Livestock Judging Pavillion.

Stanley Anderson, associate professor of animal husbandry at Tech, said the conference will include reports on keeping pork up-to-date, artificial insemination, the potential of specific pathogen free hogs, research conducted on Atrophic Rhinitis and Virus Pneumonia, and a panel discussion on practical swine management.

The panel will discuss and show slides on new uses of hog equipment. Panel members include Euel Liner, Lubbock; Larry Tackitt, Happy; Jack Barton, Littlefield; and Dr. J.C. Hillier, animal husbandry department, Oklahoma State University.

Speakers for the two-day program include Dr. L.N. Hazel, animal husbandry department, Iowa State University; Dr. Wayne Moore, Texas A&M; T.D. Tanksley Jr., swine extension specialist at Texas A&M; Dale Zinn, Tech animal husbandry department; and Anderson.

Anderson said a carcass contest will be held in conjunction with the swine conference.

"Anyone may enter barrows or gilts in this contest by bringing them to the pavillion by 8 a.m., July 5, where the hogs will be evaluated and later slaughtered in Tech's Meats Industry Building. The winner will be the carcass which has the highest percent lean cuts," he said.

6-25-62

LUBBOCK --Texas Tech's annual high school speech workshop will be limited to 25 students each in the dramatic and forensic divisions this summer.

The workshop will begin July 22 and will end Aug. 3. Dr. P. Merville Larson, Tech speech department head, is director.

"About 30 students have already pre-registered for the 50 places," Dr. Larson said. "This is the heaviest pre-registration we have experienced in the history of the workshops."

There are several openings in the dramatics division, but only a few remain in forensics.

Any interested high school sophomore or junior may enroll for the two-week program, which includes study and practice in voice, diction, personality development, role-playing, bodily action and development of good speech habits.

In dramatics the students will produce as many plays as can be cast from the group, in addition to receiving practice in make-up, lighting, costuming and stagecraft. Oral interpretation will also be included in this program.

This fall's high school debate topic, released by the Texas Interscholastic League, will be discussed and debated in the forensics division. The topic is: "Resolved that the United States should promote a common trade market for the Western Hemisphere."

The workshop will be climaxed by a public demonstration featuring all students in the summer speech program.

Students interested in enrolling should write Dr. Larson at the Texas Tech speech department, Lubbock. Scholarships covering the general registration fee will be awarded eligible students who have won first place in any regional or State Interscholastic League contest in 1961 or 1962.

"The School Business Manager Grows Professionally" will be the theme of the school business services two-day workshop beginning at Texas Tech Thursday (June 28).

The workshop is sponsored by Tech's education department in cooperation with the Texas Assn. of School Business Officials. Seven other educational organizations are assisting in the sponsorship.

Sixty public school officials are expected to attend the annual workshop featuring panels and discussions on centralized school lunchrooms, custodial training and techniques, tax-sheltered annuities and budgeting and developments in certification for Texas business managers.

Dr. Sam Tidwell, nationally known authority in accounting, will address the workshop and head a panel on "School Accounting--Trends and Development." He is also an author of widely used textbooks in school accounting.

Roy Bass, Lubbock attorney, will address the group at the banquet Thursday night.

Others participating on the program include T. J. O'Connor, the Texas Education Agency business manager; Dr. Morris Wallace, Tech education department head; Dr. Fred Norwood, Tech accounting professor; Nat Williams, Lubbock Public Schools' superintendent; and T. A. Roach, Andrew Public Schools' superintendent.

FERTILIZER SOURCES STUDIED BY COTTON TISSUE ANALYSES

Wesley W. Masters, grad. asst., Texas Tech; C.W. Wendt, asst. prof. agronomy, Texas Tech; Clark Harvey, agronomy prof., Texas Tech, and H.J. Walker, asst. agronomist, Texas agriculture exp. station.

The South Plains of Texas, which produces 1/7 of the United States' cotton and 40 percent of its grain sorghum, is an ever increasing consumer of commercial plant food. Due to the increasing use of nitrogen, phosphorus and potassium fertilizer on cotton there is a need for a better understanding of the proper balance of plant nutrients in the plant.

A cooperative research project sponsored jointly by Texas Technological College, the Texas Agricultural Experiment Station and the South Plains Soil Fertility Committee was conducted during the summer of 1961, to evaluate different fertilizers used on cotton.

The chief purpose of this project was to determine the nutritional status of cotton at various stages of growth by analyzing leaf petioles (stems) for nitrogen, phosphorus, and potassium. Twelve nitrogen and seven phosphorus sources were used. Nitrogen sources used included ammonium nitrate, ammonium sulfate, urea, liquid ammonium nitrate-urea, and anhydrous ammonia.

Phosphorus sources included 20 percent superphosphate, 46 percent treble superphosphate, and 52 percent phosphoric acid. Dual nutrient carriers included 16-20-0 ammonium phosphate, 16-20-0 ammoniated superphosphate, 21-53-0 di-ammonium phosphate, and 8-24-0 liquid ammonium phosphate. The only potassium source used was potassium chloride.

(More)

fertilizer sources -- add 1

The fertilizer was applied at the rate of 120 lbs. nitrogen, 80 lbs. P_2O_5 and 40 pounds potassium per acre. Tissue samples consisting of the uppermost mature leaf petioles were procured from the experimental plots on 15 different dates during the growing season of 1961. The yields of cotton and the petiole nutrient levels from the various fertilizer sources were compared.

The nitrate nitrogen levels in cotton petioles were found to be a sensitive index to the nitrogen status of the cotton plant. These preliminary investigations suggest that the petiole nitrate levels should be around 20,000 parts per million at the beginning of fruiting and then decrease to 3,000 parts per million by the end of the fruiting period for good yields of cotton on the South Plains of Texas.

The ammonium nitrate treatment produced 860 pounds lint per acre; which was a significant increase over the 710 pounds lint per acre produced by the complete check treatment. The nitrate contents of the petioles were maintained at a significantly higher level by ammonium nitrate than by the other nitrogen sources.

No significant differences in yields were found from nitrogen applied at one, two, or three applications. The ammonium nitrate and liquid ammonium nitrate urea applications during July and August were absorbed by the cotton plants 4 to 5 days before nitrogen from anhydrous ammonia applied at the same time.

(More)

fertilizer sources -- add 2

Phosphoric acid and di-ammonium phosphate treatments, which yielded 860 and 810 pounds lint per acre respectively, produced significantly higher yields than ammoniated super-phosphate, ammonium phosphate, liquid ammonium phosphate, 46 percent treble superphosphate, and 20 percent super phosphate. Phosphorus petiole levels reached a peak of 4,000 parts per million on July 4, and then decreased to around 1,000 parts per million by the end of the fruiting period on August 30.

High yields of cotton appear to be associated with high levels of nitrate in the petioles and low levels of phosphorus during the fruiting period. The ammonium nitrate-phosphoric acid combination produced the highest yield of cotton.

Additions of potassium fertilizer increased yields an average of 40 pounds lint per acre. Petiole levels reached a peak of 12-14 percent potassium early in the season and decreased to 3-4 percent by the end of the fruiting period.

The cotton was in severe moisture stress during the early bloom stage and this condition affected the readings of nitrate and phosphorus in the petioles and also adversely affected the yield of the cotton. The nitrate, phosphorus and potassium levels dropped during periods of moisture stress and rose following moisture applications. Nutrient levels in the petioles were influenced more by moisture conditions than by different fertilizer treatments.

These preliminary investigations indicate that cotton petiole analysis should serve as a guide for exposing plant deficiencies before they actually show up in the plant, and provide adequate information in time for corrective measures to be taken.

Also, the information suggests that the cotton petiole analysis may serve as an indicator of fertilizer response and give an indication of plant behavior under different treatments of fertilizer sources.

LUBBOCK --Texas Tech's elementary and junior high school summer music camp will end Friday (June 29) with a concert at 6 p.m. in the downstairs Union ballroom.

The concert will feature music by 351 students, who will compose an elementary orchestra, intermediate band, treble choir, mixed choir, concert band, junior high orchestra and symphonic band.

For the past two weeks the students from the West Texas and New Mexico area have attended classes in band, choir, orchestra, theory, instrument, marching and twirling. Keith McCarty of Tech's music department has been director of the high school and junior high workshops held during the month of June.

The concert is open to the public free of charge.

Mrs. Katherine Wells, string teacher from Lubbock, will direct the elementary orchestra in five numbers by Baicich. They are "Falling Leaves," "A Concert Piece," "In Old Ceylon," "Valsette," and "Dance Espagnole."

Mitchell Zablotny of Monterey High School will direct the orchestra in "Gavotte" by Boyce.

Tom Wright, band director at Brownfield Junior High School, will direct the intermediate band in Weber's "Rip Van Winkle," "Were You There" and Weber's "Indian Princess."

The treble choir, under Cloys Webb's direction, will sing "Vaughn Williams' "O Taste and See," Kodaly's "Ave Maria," "Four Slavic Christmas Carols" and "When Love Is Kind." Webb is choral director at Perryton High School.

(more)

concert Add #1

Webb will also direct the mixed choir in Willan's "I Will Lay Me Down in Peace," Gallus' "A Star Shall Rise," Kranz's "Kyrie Eleison," Shultz's "O All Ye Nations," Norlin's "Hymn of Freedom" and "Streets of Lorado. "

The concert band will present Olivadoti's "Yankee Clipper March," Strauss' "Emperor Waltz," Maxwell's "Proudly We Play," and Piato's "Country Squire." Orland Butler of Atkins Junior High School, Lubbock, will conduct.

The junior high orchestra, under the direction of three conductors, will present an aria from Mozart's "The Marriage of Figaro," Anderson's "Trumpeter's Lullaby," Strauss' "Pizzicato Polka," and Piccini's "Overture to Didon."

Conductors of the orchestra include Paul Ellsworth, director of Tech's Symphony Orchestra; Butler and Zablony.

The symphonic band will conclude the teen-age concert under the direction of J. W. King, band director at Hale Center. Their numbers include Maxwell's "Block Four March," Caneva's "Rio Blanco Overture," Morrissey's "Songs for Band," Osser's "Beguin Festival," Abbott's "Elmirea March" and highlights from "South Pacific" by Rodgers and Hammerstein.

Other members of the music faculty include Tom Adams, Bill Carmack and Mrs. Leland Croft, Odessa; Edwina Burkhalter, Lockney; Everett Maxwell, Abernathy; Bill Townsend, Slaton; Tom Wright, Brownfield; and Bill Woods, Levelland.

Completing the list of camp instructors are Morris Goolsby, Lutine Harris, N. A. Lee, Keith McCarty, Benjamin Smith, Fred Stockdale, Jim Swafford and Richard Tolley--all from Lubbock.

Four Texas Tech physical plant directors are participating in national meetings this summer and fall.

C. F. Libby, director of building operations, will deliver the keynote address to the Custodial Supervision Conference at the University of New Mexico July 26-27.

W. Mark Gosdin, director of grounds maintenance and associate professor of horticulture and park management, will participate in the American Institute of Park Executives Sept. 24-27 in Kansas City, Mo.

Frank Thomas, assistant to the building maintenance director, has returned from the National Safety Conference at the University of California.

Bill Daniels, chief of traffic-security, attended the National Assn. of College and University Traffic and Security Directors meeting last week at the University of Minnesota.

###

6.28.62

A leading educator and psychologist commended Texas Tech Thursday (June 28) for its contributions in four National Defense Education Act programs.

Dr. H. M. Kreitzer of Dallas, regional representative for the NDEA Higher Education Council, spent two days at Tech observing the NDEA-sponsored guidance and counseling institute conducted by the psychology and education departments.

He said that Tech was one of the few institutions in his 180-school region who has participated in all four programs. Included are the student loan fund, language institute, graduate fellowship program, and counseling and guidance institute.

Dr. Kreitzer has visited Tech three times in the past two years to discuss and help prepare proposals for the Tech NDEA programs. He serves as a liaison officer between the Southwestern schools and the Washington office.

His five-state region includes accredited colleges and universities in Texas, Oklahoma, Arkansas, Louisiana and New Mexico.

Dr. Kreitzer said schools who are not accredited may participate in the NDEA programs if three other schools will accept their credits.

Commenting on Tech's guidance and counseling institute, he emphasized the excellent planning and organization of the course under Dr. Beatrix Cobb's leadership. Dr. Cobb is director of Tech's Rehabilitation Counselor Training Program in the psychology department.

He also cited the good cross-section of the "able under-achieving" students selected for counseling. Tech's institute is being held June 18-July 27, with 30 public school counselors from the Southwest participating.

Dr. Kreitzer was formerly dean of Lebanon Valley College in Pennsylvania. He received the B.A. degree in psychology from Boonesville College, the M.A. from New York University and the Ph.D. from Temple University.

6-30-62

LUBBOCK --A special two week "Workshop in Child Development and Family Relations" will begin at Texas Tech Monday (July 2).

Dr. Bernice M. Moore, sociologist and social psychologist from the University of Texas will conduct the course which will be of special interest to counselors with the P.T.A., Scouts, church, Y.M.C.A. or family service organizations.

Registration for the course will be open at 8 a.m. Monday at the dean's office in the Home Economics Building. Persons interested in enrolling in the course may attend the whole course, discussions they are interested in, or either half of the two week study. Non-credit tuition will be \$10 per week or \$2 for visitors who want to set in on special discussions.

In setting up the course, it was recognized that many professional and lay leaders might not be able to attend a full schedule of workshop meetings, provisions are made for special visitors who may be able to come only one or two days, or part of the day. Those who come for an entire week or for both weeks may enroll for credit or non-credit.

The first week of the workshop, July 2-7, will be devoted to problems of children through the adolescent years. The second week, July 9-13, will deal with young adults through aging. The courses will run 9 a.m.-12 noon and 1:30 to 3:30 p.m. daily, Monday through Friday.

The following topics will be discussed at the workshop, July 2-7: Monday, Children and Adolescents in Today's World-Impact of Science, Technology, Social Conditions, and World Events. Tuesday, Children and Adolescents in Today's Family. Wednesday, Children and Adolescents, Their Values, Interests and Attitudes. Thursday, Children and Adolescents, What We Know About Them. Friday, Special Problems of Children and Adolescents.

The second week, July 9-13, will be devoted to adults of any age. The topics for the second week include: Monday, Young Adults in Today's World. Tuesday, The Middle Years. Wednesday, The Later Years. Thursday, Special Problems of Adults. Friday, Emotions in Every Day Living.

###

6.30.62

LUBBOCK --The big glass doors of Texas Tech's new \$2 million library building will open for the first time Monday (July 2).

At 8 a.m. students and faculty can begin using the card catalog and the portion of books and documents that have been moved to the new building.

For the past week, crews and trucks have been busy from 8 a.m. to 10 p.m. each day transferring volumes from the old library building, located on the west side of Memorial Circle, to the new five-story facility immediately west of the Union Building.

Librarian Ray C. Janeway estimated Saturday that a third of 517,000 books and documents now catalogued in the library had been moved to the new building.

He also estimated that the move to the new building will be completed around July 28. Until the transfer is finished, students and faculty will use the card catalog in the new building and will find out there just where the volumes they are seeking are located.

The new library building will be open from 8 a.m. to 5 p.m. on weekdays until further notice. The old library building will continue its regular summer hours of 7 a.m.-10 p.m. Monday-Thursday and 7 a.m.-5 p.m. Friday-Saturday. Both facilities will remain closed on Sundays.

Persons using the new library will have the advantage of open stacks, refrigerated air conditioning, plenty of space in which to study, excellent lighting and new facilities.

Formal dedication of the new library building will be held this fall, probably in October.
